The ARMY AND NAVY JOURNAL is to issue to-day and to the service, both regular and volunteer. It received in advance the approval of many of the most distinguished naval and military officers, who spoke from their knowledge of the want of such a publication. The JOURNAL is edited with ability, and contains a brilliant array of interesting intelligence and official information—its excellent scientific articles, and its literary merit, all combine to make it a paper of great value. We wish it success, both as a paper, and as a literary adjunct, and pray you continue to send me your publication."
From Major-General JOHN A. DIX, *Commanding Department of the East.*
"I am pleased with the ARMY AND NAVY JOURNAL, and wish it success."
From Major-General JOHN E. WOOLEY, *Second Division 16th Army Corps.*
"I am pleased with the ARMY AND NAVY JOURNAL, and wish it success."
From Brig.-Gen. ROBERT C. BUCHANAN, *Commanding Department of the Ohio.*
"I am pleased with the ARMY AND NAVY JOURNAL, and wish it success."
From Prof. H. COPPÉE, *University of Pennsylvania.*
"A paper of the character of the ARMY AND NAVY JOURNAL is formerly silent while my knowledge has been a failure; but now I am pleased to find it a brilliant success. It is full of interesting intelligence and official information—its excellent scientific articles, and its literary merit, all combine to make it a paper of great value. We wish it success, both as a paper, and as a literary adjunct, and pray you continue to send me your publication."
From WILLIAM H. RUSSELL, *Correspondent of the London Times.*
"Of the numerous notices of the newspaper press, we have room only for the following:
The ARMY AND NAVY JOURNAL is to issue to-day and to the service, both regular and volunteer. It received in advance the approval of many of the most distinguished naval and military officers, who spoke from their knowledge of the want of such a publication. The JOURNAL is edited with ability, and contains a brilliant array of interesting intelligence and official information—its excellent scientific articles, and its literary merit, all combine to make it a paper of great value. We wish it success, both as a paper, and as a literary adjunct, and pray you continue to send me your publication."
From the Correspondent of the Boston Post.
(NOW WRITING.
The ARMY AND NAVY JOURNAL has passed a success with the start. Handsomely printed, full of variety and interest, and ably conducted, it has already secured a position which many an older publication might envy. The JOURNAL has already assumed to be a very respectable number of subscribers, and is now in a position to offer a premium to parties of respectable equal to its great circulation. Among its contributors are some of the most able writers in the country, and the Army and Navy will find in the JOURNAL a welcome visitor, and a valuable addition to their libraries.
The terms of the paper are FIVE DOLLARS A YEAR, PAYABLE IN ADVANCE. Subscriptions may begin at any time—send quarter sheet of 16 pages, convenient for binding, and will be sent to subscribers on the week paper. This will furnish a yearly volume of over 800 pages, filled with interesting matter. Indispensable importance to every soldier or sailor anticipates of improvement in his profession, as well as to every man desirous of taking an intelligent view of the military and naval operations of the present gigantic struggle. Subscriptions and communications should be addressed to the publication office, ARMY AND NAVY JOURNAL, New York.

(Established 1778.)

IMPORTERS OF

BRANDIES, WINES, &C.,

375 BROADWAY,

New York.

Particular attention paid to putting up all kinds of Liquors for HOSPITALS, ARMY AND NAVY PURPOSES.

NATIONAL BATTLE PINS.

Soldiers of the Armies of the North!

I am the inventor and manufacturer of the above named pin, of four pattern, viz:

The NATIONAL BATTLE PIN, consisting of the Shields of the following Generals, who are the great leaders of the Army of the North: Grant, Meade, Rosecrans, Banks, Hooker, Sherman, Burnside.

Each General only records the battles fought when he was in command. A perfect photographic likeness of each General is given—of McClellan Pin, his photograph and battles; General Grant's photograph and battles; and so on through the named battles. The pins are gilted with fine gold, back and front.

The dies are struck in Engine charge for engraving. Any other photographs thus named will be on extra charge of fifty cents.

A full assortment on hand at the army.

By remitting one dollar, a sample will be sent by mail.

LOUIS PHILIP.

THE MILITARY SITUATION.

THE relative position of the opposing armies in Virginia is greatly changed since last week—General MEADE having resumed the offensive, and advanced towards the Rappahannock. There has been no important engagement since that of Wednesday, the 14th instant—mentioned in last week's *resumé*—between the 2d Army corps, under General WARREN, assisted by General GREGG's cavalry, and the rebels under A. P. HILL. Several cavalry skirmishes have occurred, of which the principal was about three miles beyond Manassas Junction, as our forces were advancing towards Warrenton, on Sunday, the 18th instant. Here the enemy's pickets were encountered, who retired, and drew our advance column into an ambuscade of artillery, where we had the worst of it, at first—the enemy being behind their guns in force. The next day, however, the rebels retreated, our forces pursuing. On Monday, the 19th instant, our reserve cavalry, under General MERRITT, reached Warrenton Junction, without coming up with the enemy; though they saw small squads in the country, that retreated before them. The battle of Wednesday, the 14th instant, probably entirely defeated and changed LEE's plans, and should be especially noticed as one of those decisive engagements, upon which, as upon a pivot, the fate of a campaign sometimes unexpectedly turns. It teaches, that every corps and every division should act as if certain that the fate of the war depended upon it alone.

Wednesday's battle was on this wise: The 2d army corps, under General WARREN, with a part of the 5th, and General GREGG's cavalry, being in advance, near Auburn, between Catlett's Station and Warrenton, were attacked suddenly and simultaneously, just at daybreak, by HILL's corps of rebels—the first intimation being a discharge of shot and shell. After momentary confusion, our men were in position, and repulsed the enemy handsomely, who only withdrew, however, to perfect his attack, which was renewed in the afternoon, by a nimble and furious flank movement upon the Pennsylvania Reserves. Being baffled in this attempt, however, he made a solid onslaught upon General WARREN's corps, with his whole force, in which he was signally repulsed, defeated, and driven from the field, leaving his dead and wounded in our hands, with some 700 or 800 prisoners, and a battery of seven guns, two of which, however, being worthless, we did not bring away. Our men availed themselves, during part of the engagement, of a railroad embankment, which afforded them the protection of a breast-work. When General WARREN saw that the enemy were driven from their guns, he detailed ten men from each regiment to go and bring in the pieces, that the honor might be fairly divided. This improvised corps sprang to their work with shouts of delight, although the woods behind the pieces were full of the enemy's men. The guns were shotted, and our men coming in on the run, turned them on their former owners, who took to their defence, in a charge of greatly superior numbers—our forces being unable to assist the little hand by giving a shot, as they were between our lines and the enemy. But before a charge could be made to help them, they had repulsed the enemy with the bayonet, and were back to our lines, dragging five of the guns with them—one large Whitworth, two fine Rodman's, and two brass field-pieces. This remarkable feat fitly closed the day—the engagement ending at dark, in the retreat of the enemy.

It should be added that General STKES, with the Sixth Army Corps, rendered valuable assistance in the latter part of the day. What shows the importance of this battle is the fact, that the rebel commander-in-chief evidently depended upon HILL to engage and defeat our advance (2d, 5th and 6th corps), while he should flank General MEADE at Chantilly, which he attempted at the very time (about 6 P. M.), when HILL made his last attack on our lines. This is LEE's old and often-repeated strategy; but General MEADE—never yet entrapped—defeated it by a masterly retrogression of his forces, at the same time that General WARREN repulsed HILL.

What LEE is doing at this moment, or where his principal force is massed, is not clear. On Wednesday, the 21st, the advance of our right column was at Warrenton (*not* Warrenton Junction), and our left at Greenwich; and though the enemy had been previously reported in force at Gainesville, and considerable bodies of his men had been driven by our cavalry to Buckland's Mills—some 3 or 4 miles further—his main body had not been overtaken. It is said by prisoners that a part, if not the main portion of LEE's army is on its way to the Southwest, destined either against Chattanooga or General BURNSIDE. It seems certain that the rebel General has retreated south of the Rappahannock, and it is absolutely certain that our Army is facing and following him, in the best of spirits, full of faith in its commander, and sanguine of victory.

It is asserted by *prisoners*—not the best of authority to be sure—that LEE's plan was, to drive General MEADE within the defences of Washington, and holding him there at bay, to turn back, and destroy the railroads, so that the way to Richmond might be obstructed for two or three weeks, while he hurried down the Virginia and East Tennessee railroad, to overpower General BURNSIDE, hoping to accomplish this and get back in time to confront General MEADE. This sounds improbable; but if true, LEE has evidently miscalculated the fine soldiership of General MEADE. The movements of the past fortnight in Virginia, are among the most startling and admirable that the war has hitherto called forth. And who does not hope, that the crowning hour for the Army of the Potomac—that heroic Army whom no misleading, slander, or misfortune has been able to discourage or demoralize—may be near at hand?

In the central field, a change has been made which has almost electrified the nation, though those who were informed on military matters knew that it was preparing. General GRANT has been placed in command of all the forces between the Alleghany mountains and the Mississippi river, and, it is said, with plenary powers. General ROSECRANS has been relieved, and directed to report at Cincinnati, General THOMAS taking his place. The best reasons, which will be known in due time, must exist for this change. No question is to be made of the motives of the Department, acquiescence and a hearty support of General GRANT being a duty, in which we, as a military people, will all agree. No living soldier in any part of the world has such a record as Major-General GRANT, who never lost a battle, and has taken more prisoners, arms and military property, and fought more battles, than any leader since the time of NAPOLEON.

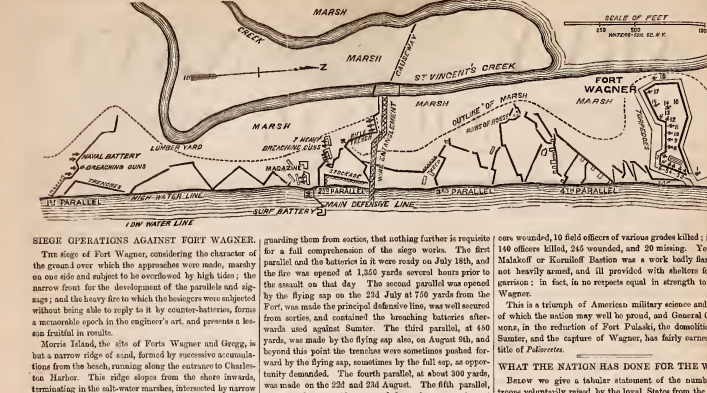
As to Chattanooga, it might be imprudent to state the condition of our force within the defences. But there is no harm in showing how the place appears from the outside, which we give in the words of a rebel newspaper correspondent:—"ROSECRANS has been "uniring in his labor. He has fortified Chattanooga "to perfection. There is hardly a rising ground any- "where but what is mounted by guns and breastworks. "His ports are already shell-proof. His rifle-pits extend round and around the town, in deep dykes from "Brabson Hill and the river to the tan-yard. They "are manned from night till morning, from morning "till night. The works on Smith Hill are very fine. "So are those facing toward Lookout. The view of "all these is clear and bright from the ridge. You "may take a glass any time and see the Yankee sen- "tries pacing along their parapets, Yankee officers "riding from post to post, and Yankee flags flying "from a hundred staffs." Unless BRAGG should make an attack, however, or attempt a flank movement, there is no prospect of an immediate resumption of hostilities. General HOOKER, one of the most enterprising of our officers, after taking his corps from Virginia to Bridgeport, Alabama, in the incredibly short time of five days, is now guarding the communications of General THOMAS, his headquarters being at Stevenson, Alabama. He arrived just in time to hasten the precipitate retreat of the rebel leader, WHEELER, who, with 5000 cavalry, had crossed the Tennessee river at Washington, 45 miles east of Chattanooga. He entered the Sequatchie valley, and destroying 400 supply wagons, moved upon McMinnville, taking that place with 500 prisoners. He then divided his band, one party going towards Murfreesboro. This might have been a serious business; but Brigadier-General CROOK was speedily after both parties, and has routed them in three battles, the hatchering at Farrington, Tenn., where he took four guns, 1000 stand of cavalry arms, and 250 prisoners, besides wounded. The band (General CROOK says in his official report with a loss of 2000 men) has *melted* back across the Tennessee river, entirely disorganized.

GENERAL BURNSIDE reports an engagement by a detachment of his force under General SHACKLEFORD, with the enemy at Blue Springs, about 70 miles northeast of Knoxville, in which the rebels were defeated with heavy loss, and driven from the State. Where they came from, or what their number was, or where they made their exit, is not stated. It was probably a considerable guerrilla force. Their final defeat seems to have been at Zollicoffer's Bridge, which Burnside destroyed.

THE rebel guerrilla chiefs, CHAMBERS and RICHARDSON, have been repeatedly defeated on the line of the Memphis and Charleston Railroad; the last fight of a series continuing through eight days having taken place at Ingrahamville, near Bayhales. This is somewhat important, as these robbers numbered about 8000, and have been, for a considerable time, the terror of Northern Mississippi. Our forces were about 2200, and were under the orders of General SHERMAN. A good many prisoners have been taken. A dispatch from General SCHOFIELD gives intelligence of similar successes against the guerrillas of Missouri, under SHELBY, who were signally routed by General BROWN on the 13th instant, with the loss of all their artillery, baggage, and numerous small arms and prisoners.

FROM Charleston there is nothing new whatever this week.

FORT WAGNER AND ITS APPROACHES.



SIEGE OPERATIONS AGAINST FORT WAGNER.

THE siege of Fort Wagner, considering the character of the ground over which the approaches were made, marshy on one side and subject to be overflowed by high tides; the narrow front for the development of the parallels and zigzags; and the heavy fire to which the besiegers were subjected without being able to reply to it by counter-batteries, forms a memorable epoch in the engineer's art, and presents a lesson fruitful in results.

Morris Island, the site of Forts Wagner and Gregg, is but a narrow ridge of sand, formed by successive accumulations from the beach, running along the entrance to Charleston Harbor. This ridge slopes from the shore inwards, terminating in the salt-water marshes, intersected by narrow creeks, which lie to the west of it. The width of the portion disposable for the trenches in no point exceeds 226 yards, whilst in others it narrows to 28 yards at high tide.

The plan of attack, it is now known, proposed by General GILLMORE, was: 1st. To effect a lodgement on the south side of Morris Island, which it was known that the enemy was then strongly fortifying. 2d. To besiege and reduce Fort Wagner, by which all the works on Cumming's Point would necessarily fall. 3d. From the positions thus gained, to reduce Fort Sumter. 4th. The vessels of war to remove the obstructions at the entrance of the harbor and reach the city by running by the works on Sullivan's Island.

The first point was effected by the diversion made on the Stono, which drew off half the enemy's forces from Morris Island, and rendered its capture by surprise comparatively bloodless. This was done July 10th.

It is known that two assaults on Fort Wagner were unsuccessful, though the troops making it were on the brink of effecting their object. These failures led to a modification of General GILLMORE'S plan, which was to effect the reduction or demolition of Fort Sumter, from which an annoying fire was kept up on his trenches over Fort Wagner, before advancing on the latter work, the fire of which he expected to keep down from destructive effects by his mortar batteries and the iron-clads of the Navy. How thoroughly this was done by the heavy guns of his batteries at distances of 3,330 and 4,240 yards is well known. In a letter to a friend, General GILLMORE, with characteristic candor and modesty, says:—"I take no special credit to myself for the "attainment of this result. It was simply the development "of the power of skilfully served artillery. PARROTT *is the* "*real hero.*"

Having effected this important object, the approaches and other works against Fort Wagner were more easily pushed forward. Armed with seventeen heavy guns, well flanked, with a wet ditch, a bomb-proof for its garrison that resisted the heaviest shells, approachable only in front over the narrow sand ridge which narrows down to 25 yards in width just in front of the work, guarded on the east by the sea and on the west by Vincent's Creek and the marsh from surprise, seen in reverse by Battery Gregg and thirty guns on Sullivan's Island, in flank by the batteries on James' Island; whilst all the ground in advance of it is swept at one point or another by all its guns, a more difficult problem has seldom, if ever, been presented for the solution of the engineer than its reduction; certainly none in modern times.

In spite of these obstacles; in spite of the shifting sand under him, over which the tide swept more than once during his advances; in spite of the scorn and relief of the garrison from Charleston, with which their communications were free, General GILLMORE addressed himself to his task with that preparedness for every eventuality and that tenacity which are characteristic traits of his character.

The sketch accompanying this succinct account, reduced carefully from an authentic copy, shows so well the skilful direction given to the approaches, and the means used for guarding them from sorties, that nothing further is requisite for a full comprehension of the siege works. The first parallel and the batteries in it were ready on July 18th, and the fire was opened at 1,350 yards several hours prior to the assault on that day. The second parallel was opened by the flying sap on the 23d July at 700 yards from the Fort, was made the principal defensive line, was well secured from sorties, and contained the breaching batteries afterwards used against Sumter. The third parallel, at 450 yards, was made by the flying sap also, on August 9th, and beyond this point the trenches were sometimes pushed forward by the flying sap, sometimes by the full sap, as opportunity demanded. The fourth parallel, at about 300 yards, was made on the 22d and 23d August. The fifth parallel, at 200 yards, on a ridge wrested from the enemy, August 26th. Beyond this point the approaches were simply zigzags, making very acute angles with each other, as there was not front enough for a parallel.

Here came that period which almost every well-contested defence has shown, where the besieger, being in fact the enveloped party, his artillery to a great extent unavailable, his daily losses heavy, discouragement arises upon the besieging force, and all but those who possess the bull-dog spirit are ready to give up. An officer present, writing to a friend, says:—"Matters seemed at a stand still, and a spirit "of dejection and discouragement began to pervade the "entire command. There seemed, indeed, to be no ad- "quate return for the daily loss of life which we suffered." Here we have repeated what occurred at Sebastopol. The same accounts sent home from men of all ranks. One gallant soul, however, was in this case, indomitable, Colonel, now Brigadier, ROSEARIE, of the Engineers, a man with many of GILLMORE'S traits. He wrote nothing but encouraging words. His song was "*nous arriverons*," we shall succeed. And succeed he did. His hopefulness was communicated to the ENEMIES, who could appreciate and has since well rewarded such tenacity. PEGRAM is a general, and on the high road to a marshal's baton.

In this emergency new means and redoubled efforts were called for, and General GILLMORE was equal to it. He moved to the front all his light mortars, enlarged the positions for his sharpshooters, obtained the cooperation of the *Ironsides* by day, used powerful calcium lights to blind the enemy by night, opened fire with as many heavy guns to his rear as he could without danger to hit men in the trenches, thus essaying to keep the garrison confined to their bomb-proof, and to breach through to breach in the work. These measures were inaugurated on the morning of September 6th, and for forty-two hours one who was present writes: "The spectacle was magnificently grand, even sub- "lime." The fort was silenced. The garrison were immured in their bomb-proof, and the work went on in safety except from the batteries on James' Island. The men moved about in the trenches, even sat on their parapets, and hunted torpedoes, at which they had become as skilful as rat-catchers in spotting and rabbiting. The counterscarp of the work was crowned on the night of September 6th, and some formidable obstructions in the ditch removed. All being now ready for an assault, the order for it was given; but seeing the hopelessness of their position, the enemy evacuated just in time to avoid the assault.

Such, in brief, is the record of this remarkable exhibition of "skill and industry," the true and always successful tools with which the engineer works. General GILLMORE'S losses, like those of the Allies at Sebastopol, were from two open assaults: an attempt never certain of success, but certain of great loss of life; contrary to the teachings of experience and to the precepts and practice of the great master of sieges, VAUBAN. At the siege of Sebastopol, the Allies lost at the final assault, September 8th, 10,564, all told, in killed, wounded and missing. The loss of the French was 7,567, of whom 5 general officers were killed, 4 general officers wounded, 10 field officers of various grades killed; in all 146 officers killed, 245 wounded, and 20 missing. Yet the Malakoff or Kornilloff Bastion was a work badly flanked, not heavily armed, and ill provided with shelters for its garrison; in fact, in no respects equal in strength to Fort Wagner.

This is a triumph of American military science and skill of which the nation may well be proud, and General GILLMORE, in the reduction of Fort Pulaski, the demolition of Sumter, and the capture of Wagner, has fairly earned the title of *Poliorcetes*.

WHAT THE NATION HAS DONE FOR THE WAR.

BELOW we give a tabular statement of the number of troops voluntarily raised by the loyal States from the commencement of the war to January 1st, 1863. The table is prepared from official reports, and is as complete as it is possible to make it. The information furnished by some of the reports is so obscure that it is very difficult to decide in which class of service the troops furnished belong, but it is believed the classification below is correct:—

	3 mos.	9 mos.	12 mos	2 yrs.	Not over 3 years.	3 years.	Total.
Maine	770	7,403		292	24,771	23,76	
New Hampshire	1,090	5,052			14,161	11,78	
Vermont	782	4,777			13,447	19,09	
Massachusetts	3,756	16,707			60,466	71,69	
Rhode Island	2,147	2,089			8,430	14,33	
Connecticut	2,340	8,667			20,482	26,18	
New York	16,822		39,131		178,183	223,83	
New Jersey	3,305	10,744		*	10,186	36,24	
Pennsylvania	29,316	15,500			164,257	230,20	
Ohio	30,930				345,228	370,15	
Indiana	4,686		2,687	3,101	93,840	104,31	
Illinois	4,961				130,339	135,30	
Michigan	796				84,996	85,79	
Wisconsin	1,401	431			23,541	46,04	
Minnesota	1,619	1,500			16,138	19,25	
Iowa	959				47,353	48,04	
Missouri				19,540	27,407	31,94	
Kentucky	878			1,940	41,362	42,66	
Delaware							
Maryland							
Virginia							
Tennessee							
California							
	59,561	67,338	2,687	39,131	15,863	1,065,120	1,278,70

LOSSES OF RESIDENTS' ARMY.—Complete official returns from the infantry engaged in the late battles in Northern Georgia have been received at the General Headquarters, and give the following statistics:—

THOMAS' CORPS—FOURTEENTH.	Killed.	Wounded.	Missing.
Officers	36	226	129
Men	636	3,297	2,137
Making a total of 6,301.			
M'COOK'S CORPS—TWENTIETH.			
Officers	40	169	79
Men	363	2,267	1,649
Making a total of 4,620.			
CRITTENDEN'S CORPS—TWENTY-FIRST.			
Officers	39	131	42
Men	296	2,167	653
Making a total of 3,300.			

Two brigades of GRANGER'S reserve corps, engaged early in the afternoon of the second day's fight, lost:

Officers	16	50	54
Men	163	877	327
Making a total of 1,732.			

Total loss of four corps, 965 officers and 14,891 men. The losses of the cavalry, not reported, will bring up the grand aggregate to just about 16,000. Of the 4,685 missing, about 2,500 were wounded. Thirty-six pieces of artillery were lost, and a few wagons.

COLONEL SERRELL, who superintended the construction of the work on which the "Swamp Angel" is mounted, says it required 7000 days' work and exposure to construct fire from numerous rebel batteries as soon as the work appeared above the grass. It stands on the very softest of mud, twenty-two feet deep, so soft that a man will sink into it out of sight if he attempts to walk on it. 10,000 bags of sand with and were carried over three miles, and 300 large logs and piece of timber more than ten miles to make the battery. Two miles and a half of bridges across the marsh had to be built to get to and from batteries.

CORRESPONDENCE.

A RESPONSE FROM MR. JULIUS W. ADAMS.

To the Editor of the Army and Navy Journal:

SIR:—May I ask a space in your JOURNAL for the insertion of the following remarks, elicited by an article in your issue of the 17th inst., headed "A Disappointed Applicant."

First, as to my efforts to "extend the circle of my sympathizers" by rushing into print, &c. My pamphlet letter to the Secretary of War was printed for private distribution solely, and with the exception of two copies sent to high officials in Washington, has not been offered for sale to personal friends, less than fifty in all, who were apprized of the fact that the document was not intended for *publication*. If some of our soiled linen needed washing, I am guiltless of calling in the public generally to witness the performance! Nor do I intend any such exposure, than to meet the silent points of the article, authorized, if not written, by General Casey himself; reserving myself for the pamphlet which I have in progress, whenever it should be needed. His hobby allusion to "those who live in glass houses" will then, I apprehend, receive a practical illustration, and the public will see whose windows are smashed!

It is a matter of surprise to "S." that "I should hold Gen. Casey solely responsible for the adverse opinion of the Board of Examiners in my case." General CASEY *is* known to be a brave and fearless soldier. Of the other members of the Board I know nothing whatever, save their names, although I made repeated efforts to learn something of them. No one who has had my experience in witnessing the Brevet Brigadiers' Board, U. S. A., and Major-Generals' U. S. Vols., at the head of the Board, could doubt for a moment who constituted the brain power of the row, as it would be inquisitive. Enough that, like SAM HOUSTON, I did not choose to fight "down hill."

The relevancy of the question of the battle of Fair Oaks is questioned by "S." The generalship exhibited by General CASEY at the battle of Fair Oaks has certainly been questioned. What the decision of the Board was, that he was judge of the qualifications requisite for a general officer? When I discredit the evidence of my own eyesight, and in lieu of it accept the parchmentary issues of the Office, I shall be prepared to admit his claims to generalship on that occasion, but not before.

The reference to my experience as an engineer is considered equally irrelevant by "S." If a successful wool merchant or grazier of Australia, for instance, should become disgusted, with no other known qualifications whatever, am I not at liberty to offset my ignorance in handling those useful artificial merchandizes, wool, and sheep, by showing an equally extended experience in handling *guns*?

We come now to the "pith of the matter," says "S." I failed to answer them, and wisely ignore it in my pamphlet." I considered that it mattered little what my answers were. The absurdity of the whole proceeding was apparent in the character of the questions. Of the 69 questions in the order in which they are printed, I failed to answer correctly as follows—8th, 9th, 31th, 36th, 37th, 38th, 40th, 44th, 46th, 64th, 65th, nine in all. The 7th and 8th I failed to answer according to CASEY'S TACTICS. I differed from him by a few inches in the 7th, whereas a difference of *feet* usually exists in practice amongst the best trained troops, and in the 8th I answered according to the instructions contained in my number of your JOURNAL by Major BOOMER, one of General GRAHAM'S staff, and of which I have myself seen the advantages. Question 40th I failed to be considered as matters of opinion among military men. Many experienced officers of the Regular Army agree with me as to the correctness of my answer. The 44th I failed to answer under decision by the statements of this and other countries, and until they settle it, common modesty should dictate to Gen. CASEY to suspend his decision as to the correctness of my answers. As to the answer to No. 16, General CASEY declares the new *set of rules* the rule of the color company; I say it is the right file of the first company. I asked General CASEY, very respectfully, as I thought, "if it had been so taught at West Point?" and he stated in reply that "they did not teach tactics right at West Point!" If such be the case, the country has been laboring under a sad mistake, and the discovery is ill paid for by two states. Surely the schoolmaster is abroad. As the President did not in all cases follow the instructions of the Secretary of War, so his enumeration of failures may differ somewhat from mine. For instance, the 48th question I answered as follows: "That depends on the nature of light, the corpuscular and the vibratory." The General said that the vibratory *alone* reconciled the various phenomena."

I replied that the "corpuscular of light were reconciled with either theory, and that some philosophers still adhered to the corpuscular theory, and that the whole subject was an enigma, and was so considered." Again, the 64th question I answered "That with a horizontal road-way, the segment of a circle of same integral area would be the strongest, but that under all circumstances, there was no one form of arch stronger than another." I have but little doubt he thought this answer incorrect. I do not judge that a number of the existing among smatterers that the parabola or catenary is the strongest form, which is true only under circumstances not obtaining in practice. Again, the 65th, I answered, "that an arch could be turned with any odd number of centers, but that the fact was of no practical value whatever." The character of the questions, and the manner of the judges, satisfied me that "he didn't see it," as I did. Again, the 29th I answered "Information was not considered a failure. My answer consisted in pointing out the illustrations, the campaign of MEADE against LEE, considered as terminating at the Rapidan—in other words, absence of communications.

Space forbids a more detailed analysis of the questions; but by no process other than some such one as I have indicated can the President of the Board pretend that the majority of my answers were not correct. However, I am for the present content to let the matter go before the public as "S." has put it, so long as I am not blundering of mine in the answers could detract from the brilliancy of the subtleties evinced by the questions themselves.

With due respect to the President, I note with astonishment my refusal to submit to the physical examination, and the alleged failure to answer the questions propounded, I was recommended by General CASEY for a majority, "*from the high character of my letters*." I had but one letter to Gen. CASEY, which was an introduction from Professor DAVIES, and one from HORACE GREELEY to the Secretary of War. May I ask, if two such letters qualifies one for a majority, how many cuttles one to the commission of Brigadier-General?

BROOKLYN. JULIUS W. ADAMS.

GOVERNMENT BARRACKS IN NEW YORK

To the Editor of the Army and Navy Journal:

SIR:—Quite a number have a subject of complaint among the tax-burdened citizens of New York, that no better use has been made of the valuable franchises held by the Corporation, which, under proper management, might be made to yield a sum sufficient to largely reduce the percentage of taxation. Its market sites, its water lots, and other real estate, have been thrown upon to the occupation of favored individuals at rates which gave better evidence of a spirit of generous liberality on the part of the "City Fathers," than of any special anxiety for the interests of the city. But the Common Council have at length discovered their error, and, awaking to the reality, have determined to inaugurate a new order of things. To make a beginning in a very small way indeed, they have of late attempted to charge the Government of the United States a rental for the parks and public grounds used by the troops sent here in July last, to maintain the peace of the city against the draft rioters—from which economical measure they have been dissuaded only by the interposition of the Mayor's veto.

It is a pity that the Government cannot place itself in a position to ask no favors of New York corporations, by building Government barracks in this city, where the entire business of the army might be transacted. Though the first cost of an eligible site would be heavy, the expense would in the end be more than saved from the rental of the numerous buildings now occupied by the Government in various parts of the island. The Quartermaster and Commissary Departments are now on the neighborhood of the Battery; the Provost-Marshal-General has his offices in White street, General DIX's Headquarters are just above them in Bleecker street, and the lower and the lower part of the city are scattered various Government offices, which might, it seems, be centered at one spot, without serious inconvenience to anybody, and with great advantage in many respects. If no other purpose were served, there would be some gain in having a rallying point for the officers who are continually passing through the city in such large numbers. A book for the registry of their names could be kept, and a reading room provided for their accommodation. These things seem trifling, but they all have their influence in increasing good fellowship, and cultivating that *esprit du corps* too much wanting in our army, as elsewhere organized. It would seem worth while also to have something in this great centre of commerce and influence which should symbolize the permanency of the Government, and bear constant testimony to the fact that we are no longer States simply, but a Nation, with national traditions and national institutions; not the least important of which is the Army, which utilizes the Nation's strength, and gives it power to guard the rights of all the people, and to check the demagogic dissension and foreign assault. We have our Custom House and Assay Office here, and why not our Government barracks? Whatever may be said to the contrary, I feel we are in future to have an army large enough to justify some permanent provision of this kind for our troops in a great centre like this. And whether we have or not, we are hardly likely to do end our present war this year or the next; and proper care and attention of all kinds would ensure a return of the investment, if the Government should have no further use for the property at the end of a few years.

I hope to see these or other suggestions from others interested in this subject, that it may be thoroughly discussed in the columns of the JOURNAL. MILES.

STATISTICS OF THE SIEGE OF VICKSBURG.—By the assistance of the Chief of Ordnance and Chief of Artillery, the following important and interesting information is procured, showing the number of guns, shot, shell, and the amount of ammunition expended during the siege of Vicksburg:

Amount of artillery and small arms ammunition issued by Lieutenant J. R. WALKER, Chief of Ordnance, to the Army of Tennessee in the siege of Vicksburg, up to the day of the surrender:

	No. of Rounds.
10-pounder Parrott guns	21,610
20-pounder Parrott guns	15,021
30-pounder Parrott guns	11,782
3-inch Rodman guns	14,013
6-pounder smooth-bore guns	20,388
James's 6-pounder rifle calibre 3 80-100 inch	14,013
James's 12-pounder rifle calibre	48
12-pounder howitzer calibre	21,736
12-pounder Napoleon calibre	4,556
12-pounder English	704
24-pounder howitzer	2,772
32-pounder siege guns	785
Total number of artillery ammunition	142,912 shot

fired into the city from various kinds of cannon.

The following is the amount of small-arms ammunition:

	No. of Rounds
Rifles, muskets, and muskets of various calibres	18,968,000
Mule's navy revolvers, calibre 44 to the lb.	813,000
Colt's army revolvers, calibre 38 to the lb.	603,400
Remington's army revolvers, calibre 44 to the lb.	800

Making a total of 20,385,200 rounds of small ammunition.

Making altogether 20,227,210 shots fired into the city during the siege and previous to its surrender.

The greatest average number of shots fired in any one day was, in the

Thirteenth army corps	15,769
Fifteenth army corps	4,147
Seventeenth army corps	9,414
Herron's division	3,287

Making the average number of shots fired daily, 32,617.

Which were fired from the following number of guns, viz:—

Thirteenth army corps	65
Fifteenth army corps	28
Seventeenth army corps	54
Herron's division	14

The greatest number of guns used in any one day against the city was one hundred and sixty-four.

THE "CUMBERLAND."

POORLY rode the "Cumberland" at anchor,
Into Hampton Roads where there the James
Proudly from the peak of the furled sparker,
Floating in the light, her ensign flames,
Not a sound, save rattling staff,—
At the lively gulf
Starry troubles of the sky it claims.

And her wooden sides were each as Nelson
Vanquished with at Nile and Trafalgar;
Strong her bulwarks, five-oak ribs and beckon,
Each iron-plated gun, each rope and spar;
Strong and beautiful
Her cathedral hull,
Clothed in thunder, terrible in war.

Seamen swore by her—herself a glory,
Their absolute glorified her more.
Like the great rue of Arabian story
Went, on crusades, her every voice to roar:
When the breeze was brave,
When the galley steer,
Lagged behind her, anchored at his oar.

Quiet on the shore andpteam: sedately
Watched the sentinel at Newport News
Forts and water-craft, the frigates stately,
Silent with their armaments and crews;
Sackle's Harbor mouth
Harr to the south;
Slumberous distances and shimmering views.

Wake, O, camps and ships! What shape encroaches
On you river-reach, a shadow black?
Grave the silence new disturbed. It approaches—
He [she comes! the mailed "Merrimac"!
Bold, with batteries manned,
Wafts the "Confederate"!
Speeds the Invulnerable to the attack!

Waits a gallant crew the word to fire,
In that feverish pause that seals shame.
Undegenerate—from a heredire
And the solut of chivalry his name—
Doth their prowess [ill incredible quail!
Still the Dragon's scale
Scare the good knight, consecrate to Fame!

Steadily came the foe; from forts and vessels
Spurt the red fire and the spouting smoke;
Steadily on—for in that storm of missiles
Hurtful only was the monster's breath—
Till, with solid shock,
Deep through sides of oak
Drave her iron beak, in the clench of Death!

As from ringing rods the hail-stones rounded,
As from ribicious scale the lightning flies,
So the "Cumberland's" broadsides rebounded
From the adamantine foe she fought;
Idly, on that roof,
As an aural proof,
Beat the harmless showers of the shot.

Was it idly? No! though, quickly sinking,
Beamed your last gun level with the tide:
No! though to the last with hearts unshrinking
Ye by hundreds perished in your pride;
With your flag uncowed,
Conquering while o'erpowered,
Not in vain ye fought, nor vainly died!

"Thou who passest, tell to Lacedæmon,
We obeyed her laws, and here are we!"
Yours as proud an epitaph, O, Sesmon,
As those ancient Greeks of Thermopylæ:
Written, all in light,
On that banner bright,
Which illumes your Alcæmah, the Sea!

And, O, grateful land! in measure ample
Thank the living, give the lost your tears;
Thus, invincible in their example—
Lengthig Death in the face with stormy cheers;
Dauntless in despair—
As those sainted Three hundred
Beneons Valor to victorious years!

W. C.

ENGLISH COLORED SOLDIERS.—*Le Moniteur de l'Armée* says:—"The Royal St. Helena Regiment, which has consisted for the last twenty-seven years of a black race, is to leave for Jamaica, and, it is rumored, is to be replaced by a regiment of negroes. It is also reported that the inhabitants have besought both the civil and military authorities to request the War Department at London *not* to send them a regiment of colored troops."

MAP OF THE MOUNTAIN REGION OF NORTH CAROLINA AND TENNESSEE.—We are indebted to the Coast-Survey Office for a copy of a new edition of this map, giving additional details of the Cumberland mountain region. This is by far the best in existence of the ground it covers, and although unavoidably deficient in some localities, owing to want of surveys, it has the merit of comprising all the information that has yet been collected, including that furnished by the military campaign maps. It was compiled expressly for the use of the Army, and is supplied freely to all general officers and persons connected with the Government; while to the public at large it is accessible through the publishers. We understand that the sale of this and other war maps issued by the Coast Survey is made to cover the expense of those supplied for the public service.

ON TRAINING-SHIPS.

NO. 1.

PREVIOUSLY to the present war the Navy subsisted in a great degree on its ancient reputation. It was not the popular arm of the service, however, and improvements, or, more properly speaking, changes, to be wrought at all, had to emanate from persons outside the Navy, the officers themselves having little if any influence in procuring the adoption of a measure however desirable.

But it seems that, from various causes, the Navy is now at least not unpopular, and as the general voice proclaims as a fact that it must henceforth be maintained on a more liberal scale than formerly, something like a reorganization of its permanent system is to be imperative, and we think this a fitting time to begin with an improved system.

A great deal has already been done for the officers in the way of promotion, perhaps too much, and the future is sure provided for by the Naval School. Let us now see how it is with the "hone and sinew"—the petty officers and seamen of the Navy.

And first, let us consider our seamen with regard to the principal and all-important part of their duty, as artillerists. For some years past the interest we have been led to take in the great-gun drill on board ship, has enabled us to find out, what indeed is well known to all our officers, that the seamen we get are for the most part utterly unacquainted with the gun exercise, and in order to make them efficient, they have to be very carefully and patiently instructed, not simply in the mere sponging and loading, the running in and out of a gun, though to do that rapidly and well is something; but in firing at a target in a seaway as well, with some little theoretical knowledge by which they come to take more interest in their exercises, and imbibe practical information more readily.

According to the ordinary routine of our ships of war, the time required to get a crew into a proper state of drill occupies a large proportion of the year, during which time their ships are in prime fighting order—but what becomes of them then? The ship gets home, the men are discharged, and all the time and practice spent in their training is thrown away.

The English Navy has experienced the same evil, as may be seen by the following allusion to it by one of their own writers:—

"The neglect of manning the Navy cannot be dismissed without calling forth a few theoretical considerations on the question of paying off a ships' company as soon as, by assiduous practice and strict discipline, they have been brought to a certain position of efficiency. A vessel is commissioned; by dint of great exertion and frequently with a mixture of bad and good men, she is somehow established. She sails, as the case may be, either for the Mediterranean, the Pacific, or the East India Station. After an absence of three years—during which that rough and tumble process of drill and discipline which is the life of a man-of-war's man, is never allowed to slacken and can be resumed at once—the ship's company are paid off; her now gallant crew are dispersed, never to meet again, and the vessel herself is sent home to be commissioned by a British man-of-war, and the labor of years is thus utterly thrown away. Let us now suppose that the ship is paid off on the channel and see how matters are managed there (France):"

This state of affairs is precisely the case with us—ships constantly going out with one crew and coming home with a well-disciplined men to be scattered to the four winds. Why not put a well-drilled crew on board of a ship at once when she first starts out?

So it appears that we not only want gunnery ships, on board which to drill our petty officers and leading seamen before going out on a cruise, but we want some system by which one can, with some degree of certainty be kept in the Navy—he made to belong to it—made to feel themselves a part of it—and to feel identified with it as much as officers do.

Let us take a "tar" in his incipiency and see how he is brought up, and how and by what tier he is attached to the service. If their career is commenced in the Navy, they are known as "ship's boys." These young lads are, in the majority of cases, allowed to serve out their time as decks in almost perfect idleness, doing very light duties, if any, and learning only a great deal of mischief. In scarcely any ship we have known of, has the slightest attention been paid to their education, either as artificers or seamen, and when at their meals being hustled fared better, save only as far as positive badness might militate against the discipline of the ship. A lad then having passed three years on board a man-of-war—having acquired the art, let us say, of burnishing pinnings, wires and swabbing a side-ladder, and having imbibed a taste for fancy flocks and tobacco; having acquired these, and nothing more, he conceives himself to be by his experience and accomplishments worthy of promotion, and consequently, if he again goes to sea, he "ships" (insists) as an "ordinary seaman," and a very valuable one he considers he be. Having nothing of heaving the lead, he has never stood his trick at the wheel, and aloft he is constantly getting in the way of better men, trying to hide his ignorance by making a great deal of noise and hard swearing. His quarters may be at a boarding-gun, where he learns, by dint of much drilling, to assist in running in and out a gun. Our specimen tar we will assume to be robust, not wanting in mental vigor, of good presence, not unpleasing countenance, and, through the friendly aid of a more experienced hand, able always to dress well. He is now a man-of-war's man, and if his own assurance does not gain him preferment, his ambition prompts him on his next cruise to strike for something higher; accordingly we find him, when again afloat, as coxswain and captain of a gun, for which he well cut frock and trousers amply fit him. No matter if he loses a boat in the end, or gets a hand, through his fault, drowned. No matter if he does not know one end of a gun from the other. Look at his physique! look at his clothes! at the tattooing on his arm! has he not the air of a sailor? has he not been 5, 6, 7, or 8 years in a man-of-war? Yes, and all this will be sufficient passport to give the elegant, assurant coxcomb the best pay and position in the ship. But it is a singular fact that however wrong and injudicious this election may seem, it is nevertheless the best; for among the older seamen, now qualified for the duties we speak of rational away be found, and it is easier to teach the young ignoramus than the old one. If our young friend is the happy proprietor of a flourishing beard then is no station he cannot fill—there is nothing too good for him, and if he is a fine looking fellow he becomes signal quartermaster, or captain of topmast, &c. Fifty officers, occupying the positions assigned them, are supposed, as a matter of course, to be perfectly familiar with all their duties. When they gradually betray their ignorance, they get severely rated—but who has ever given them the slightest instruction? Midshipmen are not to be found in such duties, and are tolerated, or if a change can be made for the better, they are broken and reduced to be seamen. This is no imaginary sketch, but is made up of several instances which have occurred within our own personal experience, and which we could multiply to any extent. But there are, we may cheerfully add, enough exceptions to this rule to prove conclusively how much—how very much could be done under a proper system of instruction, periodical examination and promotion.

PROMOTIONS IN THE REGULAR ARMY.

The following is a list of the promotions in the Regular Army, since the publication of General Orders No. 181, of October 1, 1862, and up to October 1, 1863. Those marked with a star are made by the President alone. The others are by and with the advice and consent of the Senate. We shall follow this next week with a similar list of appointments:

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, September 30, 1863.

General Orders No. 316.

Promotions and appointments in the Army of the United States, made by the President, by and with the advice and consent of the Senate, and by the President alone, during the month ending on the publishing of General Orders No. 181, of November 1, 1862, and from the 1st of July, 1863, to the 30th of September, 1863, are announced by a list.

* Captain Henry Prince, of the Fifth Artillery, to be Major, August 31, 1863, vice Filmore, dismissed (company K).

Captain Alexander Piper, of the Fifth Artillery, to be Major, December 31, 1862, vice Lieutenant-Colonel Ayres, dismissed, December 31, 1862 (company K).

* Brevet Second Lieutenant Robert James, of the Fourth Artillery, to be Second Lieutenant, April 27, 1863, vice Rollins, promoted (company K).

* Brevet Second Lieutenant Robert Floyd, of the Fourth Artillery, to be Second Lieutenant, April 27, 1863, vice Ransom, promoted (company K).

FOURTH REGIMENT OF ARTILLERY.

Second Lieutenant Edward Field, to be First Lieutenant, August 5, 1863, vice Lathrop, who vacates his regimental commission (company M).

Second Lieutenant Charles Mc. Lean, to be First Lieutenant, August 5, 1863, vice Field, promoted (company M).

Second Lieutenant Francis D. L. Russell, to be First Lieutenant, August 5, 1863, vice Mc. Lean, promoted (company M).

Second Lieutenant Bayard Wilkeson, to be First Lieutenant, August 16, 1863,

* We are aware that men enlisting at our rendezvous have to undergo an examination in reasonable; but when foreigners who cannot speak a word of English, simply from their extreme stupidity or idiocie, are shipped for the Navy, it will not appear strange how a landsman can get on in ship-board, while seaman is rejected for stereotyped questions and answers at the rendezvous examination—a derise, we are assured, which has actually been successfully resorted to.

the Beach, promoted (vacancy) 30; Interval of August 6, 1863, as announced by G. O. 76, A. G. O., dated August 6, 1863.

Second Lieutenant Charles Hazlett, 2d Artillery, December 27, 1861; the Rebel killed in battle (vacancy) 81; Interval of August 14, 1863, as announced by G. O. No. 101, of November 1, 1863.

Second Lieutenant Eugene A. Bencraft, to be First Lieutenant, December 13, 1861; the Lieutenant killed in battle (vacancy) 82.

Second Lieutenant Henry A. Bancroft, to be First Lieutenant, May 2, 1863; the Lieutenant killed in battle (vacancy) 83.

Second Lieutenant Frederick W. Kinzer, of the Second Artillery, to be Second Lieutenant, August 5, 1863, vice Cushing, promoted (vacancy) 84; Interval of 10 in the Second Artillery, as announced in "G. O. No. 101, of November 1, 1863."

Second Lieutenant Sylvanus T. Rugg, of the Second Artillery, to be Second Lieutenant, August 5, 1863, vice Hazlett, promoted (vacancy) 85.

Second Lieutenant John W. Roder, of the Second Artillery, to be Second Lieutenant, August 5, 1863, vice Bencraft, promoted (vacancy) 86.

Second Lieutenant Terrence Reilly, of the Second Artillery, to be Second Lieutenant, August 5, 1863, vice Bancroft, promoted (vacancy) 87.

FIFTH REGIMENT OF ARTILLERY.

A Major Level Tuttle, of the Fifth Artillery, to be Lieutenant-Colonel, June 1863, vice Sherman promoted to the Third Artillery.

Captain Alexander Piper, of the Fifth Artillery, October 6, 1863, vice Terrell killed in battle.

Second Lieutenant John R. Brinckle, to be First Lieutenant, September 18, 1863, vice Lieutenant Piper promoted; Interval of 1 in the Fifth Artillery.

Second Lieutenant Gollub V. Weir, to be First Lieutenant, October 9, 1863, vice Lieutenant Brinckle promoted (vacancy) 88.

Second Lieutenant Joseph Keefe, of the Fifth Artillery, to be Second Lieutenant, September 18, 1863, vice Lieutenant Piper promoted; Interval of 1 in the Fifth Artillery, as announced by the Lieutenant-Colonel Commanding the Ordnance Department, September 19.

Second Lieutenant Edward Terrell, of the Fifth Artillery, April 26, 1863, vice Keefe promoted (vacancy) 89.

Second Lieutenant Joseph Keefe, of the Second Artillery, to be Second Lieutenant, August 5, 1863, vice Terrell, promoted (vacancy) 90; Interval of 1 in the Second Artillery.

Second Lieutenant Andrew Daniels, of the Third Artillery, to be Second Lieutenant, October 25, 1861, vice Weir promoted (vacancy) 91.

ONE HUNDRED AND SEVENTY-SEVENTH REGIMENT.—1st Lieut. William M. Reilly to be Adjutant, (1st Lieutenant,) May 14, 1863, vice R. M. Strong, deceased.

SIXTY-FIRST REGIMENT, ARTILLERY.—William T. Noble to be Assistant-Surgeon, Sept. 16, 1863.

SIXTY-SECOND REGIMENT CAVALRY.—Serg. George C. Houston to be 2d Lieutenant, Aug. 18, 1863, vice C. McQuesten, discharged.

FORTIETH REGIMENT CAVALRY.—1st Lieut. Edward Hall Smith to be Captain, April 28, 1862, vice A. Von Buchholzen, discharged.

2d Lieut. Thomas Bennett to be Adjutant, (2d Lieutenant,) vice W. K. Parnell, promoted.

Orderly Serg. Zelotus S. Heusted to be 2d Lieutenant, March 22, 1863, vice J. P. Demelgo, promoted.

Orderly Serg. William H. Oliver to be 2d Lieutenant, Feb. 16, 1863, vice J. Lowry, promoted.

Orderly Serg. Thomas Scripps to be 2d Lieutenant, Feb. 16, 1863, vice C. Gilchrist, promoted.

FORTY-FIRST REGIMENT CAVALRY.—Rev. Edward F. Stimson to be Chaplain, Aug. 10, 1863. Original.

FIRST REGIMENT ARTILLERY.—1st Serg. Josiah F. Fuller to be 2d Lieutenant, March 18, 1863, vice J. Hall, promoted. Original.

Capt. Robert H. Pittaugh to be Major, Aug. 14, 1863, vice J. W. Hyde, resigned.

THIRD REGIMENT ARTILLERY.—1st Lieut. William E. Mercer to be Captain, Aug. 14, 1863, original.

Private James M. McVey (24th Ind. Bat.) to be 2d Lieutenant, Aug. 31, 1863.

Serg. James Van Vleck to be 2d Lieutenant, Aug. 31, 1863.

FOURTH REGIMENT OF ARTILLERY.—2d Lieut. Charles Jerdon, Jr., to be 1st Lieutenant, Aug. 17, 1863, vice T. A. Hoyle, resigned.

FIFTEENTH REGIMENT ARTILLERY.—1st Lieut. Edward Hall to be 1st Lieutenant, Aug. 27, 1863, (Co. B), original.

Sergt. Alexander Lieutenant to be 2d Lieutenant, Aug. 27, 1863, (Co. B), original.

Louis Kleche to be Captain, Co. C, August 27, 1863, original.

William Miller Milton to be 1st Lieutenant, Co. C, Aug. 27, 1863, original.

Julius Nieberguth to be 2d Lieutenant, Co. C, Aug. 27, 1863, original.

Frederick Stache to be Captain, Co. D, Aug. 27, 1863, original.

Franz Bernstein to be 1st Lieutenant, Co. D, Aug. 27, 1863, original.

1st Lieut. Otto Christel to be Captain, Co. E, August 27, 1863, original.

1st Lieut. Charles De Cyper to be 1st Lieutenant, June 2, 1863, vice G. Christe, promoted.

2d Lieut. Henry Yungk to be 1st Lieutenant, June 23, 1863, vice F. Mattenchrod, resigned.

2d Lieut. Henry Lautzman to be 1st Lieutenant, Aug. 17, 1863, vice F. Carisone, resigned.

2d Lieut. Joseph Mehrlo to be 1st Lieutenant, June 26, 1863, vice R. Sander, resigned.

2d Lieut. Max Von Beach to be 1st Lieutenant, June 26, 1863, vice J. Hartung, resigned.

Sergeant Joseph Brill to be 2d Lieutenant, June 26, 1863, vice F. Yungk, promoted.

Orderly Serg. Joseph Stiefield to be 2d Lieutenant, June 26, 1863, vice W. Kellerman, resigned.

Serg. Gottlieb Leger to be 2d Lieutenant, June 26, 1863, vice L. Mahlein, promoted.

Serg.-Major Alfred Newbatt to be 2d Lieutenant, Aug. 17, 1863, vice R. Lautzman, promoted.

Serg. Wm. Schmidt Miller to be 2d Lieutenant, Aug. 27, 1863, vice A. Briede, resigned.

Serg. Frederick Joachim to be 2d Lieutenant, June 26, 1863, vice M. Von Beach, promoted.

Orderly Serg. Theodore Sylvester to be 2d Lieutenant, June 26, 1863, vice J. Brede, resigned.

Capt. Leander Schaubacher to be Major, Sept. 1, 1863, original.

Julius Eggerss to be Captain, Co. F, Aug. 27, 1863, original.

Henry Wright to be Captain, Co. F, Aug. 27, 1863, original.

Charles Gilbert to be 1st Lieutenant, Co. F, Aug. 27, 1863, original.

William T. Everingham to be 2d Lieutenant, Co. F, Aug. 27, 1863, original.

Wm. Papemeyer to be Captain, Co. G, Aug. 27, 1863, original.

Wm. Schmidt Miller to be 1st Lieutenant, Co. G, Aug. 27, 1863, original.

Robert Pausch to be 2d Lieutenant, Co. G, Aug. 27, 1863, original.

George Emanuel to be Captain, Co. H, Aug. 27, 1863, original.

Oscar Mensecke to be 1st Lieutenant, Co. H, Aug. 27, 1863, original.

Ferdinand Fuerster to be 2d Lieutenant, Co. H, Aug. 27, 1863, original.

Franz Stortzer to be Captain, Co. I, Aug. 27, 1863, original.

Charles Ehrler to be 1st Lieutenant, Co. I, Aug. 27, 1863, original.

Theodore Rolstaster to be Captain, Co. K, Aug. 27, 1863, original.

Chas. Wenzel to be 1st Lieutenant, Co. K, Aug. 27, 1863, original.

Geo. Schinnel to be 2d Lieutenant, Co. K, Aug. 27, 1863, original.

Wm. Schmidt to be Captain, Co. L, Aug. 27, 1863, original.

Richard Schmidt to be 2d Lieutenant, Co. F, Aug. 27, 1863, original.

Henry E. Mausen to be 2d Lieutenant, Co. I, Aug. 27, 1863, original.

Wm. Eagles to be 1st Lieutenant, Co. G, Aug. 27, 1863, original.

Hugo Reilz to be 2d Lieutenant, Co. G, Aug. 27, 1863, original.

Reighmond Dannreuth to be 1st Lieutenant, Co. H., Aug. 27, 1863, original.

Chas. Klasay to be 2d Lieutenant, Co. H, Aug. 27, 1863, original.

Wm. W. Taylor to be 1st Lieutenant, Co. I, Aug. 27, 1863, original.

Augustus Wagenbach to be 2d Lieutenant, Co. I, Aug. 27, 1863, original.

TWENTIETH INDEPENDENT BATTERY ARTILLERY.—2d Lieut. B. Franklin Ryan to be 1st Lieutenant, Aug. 31, 1863, vice G. Everson, resigned.

1st Lieut. B. Franklin Ryan to be Captain, Aug. 31, 1863, vice G. S. Goddington, resigned.

Late Lieut. Mark Andrews (6th Art.,) to be 1st Lieutenant, September 16, 1863, vice E. B. Ryer, dismissed.

TWENTY-SIXTH INDEPENDENT BATTERY.—Serg. Chas. Bennett to be 2d Lieutenant, Aug. 25, 1863, vice J. Bennett, dismissed.

TWENTY-EIGHTH INDEPENDENT BATTERY.—Serg. Chas. Bennett to be 2d Lieutenant, Aug. 25, 1863, vice J. Bennett, dismissed.

FIFTEENTH VOLUNTEER ENGINEERS.—Chief Engr. Thos. Morr.—2d Lieut. Keefe S. O. Keefe to be 1st Lieutenant, Co. B, July 25, 1863, original.

2d Lieut. Richard G. S. Burke to be 1st Lieutenant, Co. B, July 25, 1863, original.

MASSACHUSETTS VOLUNTEERS.

The following Commissions were issued by the Governor of Massachusetts, during the week ending Oct. 17, 1863:

THIRTIETH REGIMENT.—Rev. S. Frick Whittemore, of Berlin, (Col. 59th Mass. Mil.,) to be Chaplain, Sept. 30, 1863, vice Rev. Cleveland, discharged.

THIRTY-FIRST REGIMENT.—Second Lieutenant Timothy Ingraham, of Ne Now Bedford, to be First Lieutenant, April 6, 1863, (No Record), promotion. The commission in the name of that lieutenant July 16, 1863.)

FIFTY-SIXTH REGIMENT.—Alfred G. Hitchcock, of Fitchburg, to be Second Lieutenant, October 15, 1863, under General Orders, No. 76, War Department, series of 1862.

SIXTY-FIRST REGIMENT.—Sergeant Major Edward Vose, to be Sergeant John H. Clifford, of Holyoke, to be Second Lieutenant, October 15, 1863, under General Orders, No. 76, War Department, series of 1862.

FIRST COMPANY OF SHARPSHOOTERS.—Sergeant Samuel G. Gilbreth, of Enfield, Me., to be First Lieutenant, September 26, 1863, vice Clements, cashiered.

A NAMELESS SPY.

We extract from the *Annals of the Army of the Cumberland* the following account of the most mysterious and useful spies ever in the service of a commander:

We have a difficult task to perform in this chapter,—to describe the operations of one of the most daring and valuable spies of the war, and yet to withhold from the reader the fact him as regards identity that he may not incur the risk of future punishment or assassination, contemplated by scores of rebels or their sympathizers in the South. We are about to speak of a spy who went into and came out from BRAGG'S army at Shelbyville, Tullahoma, Chattanooga, during the two battles at Stone River,—who even dined at the table of BRAGG and of his other generals,—who brought us correct information of the rebel movements before each battle was fought, and of the beasts of its head officers. This spy was the first to assure us positively that Bragg's force at Chattanooga was 70,000 strong, and that general's boast that "he would whip ROSECRANS back to Nashville if it cost ten thousand men." For the last service mentioned, and for others, this spy was paid five thousand dollars by order of our general, and the author saw the money passed to him.

In 1861 this spy was a Union man, and a Union man, with wife and children. He was a friend of the Union, and an anti-slavery man upon principle. After the rebellion broke out, he was driven from Southern Kentucky, and refused, this man, living in a strong pro-slavery region and surrounded by old acquaintances, to accept rebel commissions and those of his wife being also wealthy and bitter secessionists, very prudently held his peace, feeling his utter inability to resist the rebel flood which swept the country. This reticence, together with his known Southern birth and relations, enabled him to pass unsuspected, and almost unobserved, at the rebel headquarters at Bowling Green, Nashville, and Bragg, and other ardent politicians of Kentucky chose the rebellion as their portion and endeavored to carry the whole State with them in the hope of extending it. Without tacit admissions or any direct action on his part, the gentleman of whom we write was classed by the people of his section as a secessionist.

Circumstances occurred during that year by which this spy was enabled to render the Union cause most important in Kentucky, General NELSON. Their meeting and acquaintance was accidental. Mutual Union sentiments began personal sympathy, and NELSON, knowing the spy wished a certain service performed in the rebel territory, and he proposed to undertake it. Nelson's business to Major-General ROSECRANS, who had assumed command of the Federal army. The spy, at the same time, proceeded to Nashville. After accertaining the position of military affairs at Chattanooga, he came to Murfreesborough, where BRAGG'S army was then collecting. Staying here several days, he was urged by his Southern army friends to act as their spy in Kentucky. The better to conceal his own feelings and conduct, he consented to do so, and then returned to Bragg's head-quarters to go by way of Nashville, feigning important business, and from Nashville to go to Louisville, Kentucky, and rejoin Bragg's army as it ley stretched between Nashville and Louisville.

The nameless man now makes his way to the Federal head-quarters, seeks a private interview with General ROSECRANS, and states his case fully as we have just related. Here was something remarkable, surely,—a spy in the confidence of the commanders of two great opposing armies. Our general took much pains to satisfy himself of the honesty and soundness of the stranger. He was pleased with the man's candid manner, and his story bore an air of consistency and truth. Yet he was a Southerner, surrounded by rebellious influences, and enjoyed Bragg's entire confidence, and what guarantee could he give that he was a Union man at heart. None; and our general, in great perplexity, at last exclaimed, "Well, I will trust you, and you shall tell the latter to "dig up" the case to its very root. This was done, but in what manner we need not specially state. Suffice it to say that he did so trust him, and that he acted at least, he was now sent on his way to perform his mission for BRAGG. At all events, that scheming general so supposed from our spy's report, and he was soon after head-quarters a few days afterwards. His information was very acceptable to BRAGG, but we strongly suspect that he was not aware that he was the agent only what he was told by that old fox Colonel TRUESDAIL.

Doubtless the reader will inquire, how can we answer for the report thus made to BRAGG? it may have been mere true and valuable than we supposed. Well, there is force in the query. We are driven upon strong grounds of honesty, virtue, and patriotism are at heavy discount in rebeldom, and the Union man is a thing unknown and to be ridden, and the human mind is myth. However, we were then quite confident of the worthlessness of our spy to BRAGG, because he was not with the rebel army at the time, and our spy kept himself locked in a private room in the police building at Nashville. His meals were carried to him by a trusty servant, and he was not allowed to see personally to our best detectives, and so were his steps if he ventured upon the street for a few moments each day. He was also kept under a close guard, and he toasted himself before its comfortable fire, read books and papers, and confirmed officers of the Army of the Cumberland, who were occasionally strangers as they were to that region of country, a fund of valuable information respecting the rebels of Kentucky and Tennessee. Such was the life our nameless spy led while secret affairs. When our man concluded it was also time for his return to BRAGG'S army, he was politely escorted to the outer picket-line, and passed the rebel lines, and by a route where he would see nothing of our forces. The reader will see that he was a spy of rare confidence, no doubt one, in the worthlessness of at least one of General BRAGG'S spy reports.

In the first battle of Murfreesborough, again enters our lines, and is escorted by our pickets to the general commanding, to whom he reports in person concerning all that is transpired in the rebel army since his departure, and this he resumes his pleasant private quarters at the army police building. How little could the rebel general Bragg imagine how thoughtful was the mind, how wide-at dream, who building his elegant house in High Street, Nashville, in its gorgeous rooms feasted and entertained the very persons in a brief stay, another trip was made by our man to BRAGG'S head-quarters, using the same precautions as previously. He was not long absent, and his report demanded much attention at the hands of the Chief of Police. So he,—

"I am a stranger to you all. I can give you no guarantee whatever of my good faith. It is alike due to you and to myself that I be allowed no opportunities for deceiving you."

The report he carried to BRAGG on his second trip delighted that general. It was to the effect that the army of the Cumberland was demoralized, and in full retreat for the Ohio. After staying at Murfreesborough two or three days, and finding and walking all about in the most innocent and unconcerned manner, he returned to Nashville, and his delivered to the rebel lines and returned to the rebel lines. He gave the report to BRAGG, and, as it does not seem to have been thought to be of any value to the country was miserable. We had other and better evidence that the army of the Cumberland was not demoralized, and that it was in the best of spirits, and that the facilities possessed by the nameless one. Almost any anguish did he exclaim against himself in the rebel army, and the fact that he was present in which he was decried the rebel general, and involving the lives of his thousand of brave and true soldiers.

After the first great battle the work of such a spy is ended or, rather, it ceases when the shock of arms comes on. Henceforth the nameless one must serve the Federal, as circumstances may require. Our man, who during the ten days had been almost necessarily in the saddle, or with his men and very much exposed to the fire of the camps, left leave of our army upon the battle-field, and retired to Nashville.

One incident occurred during his last visit to BRAGG which is worthy of mention. That general took special pains to have the nameless one entertained around GENERAL JOHN H. MORGAN,—who was then absent with his cavalry in Kentucky to destroy ROSECRANS' railroad communications (in which MORGAN succeeded)—to return himself with his command by forced marches to Murfreesborough. Some night our man reported that the rebel cavalry had returned, and that MORGAN was in command, and what would take, &c. The information was telegraphed to General Rosecrans, and the rebel cavalry, which had been sent from each of these points to intercept the movement. They failed to apprehend him,—which, however, proves

no consequence, as the battles of Stone River were fought and BRAGG was on his retreat from Murfreesborough by the time MORGAN could have received the orders.

Our spy was a brave man: yet during the last three days of his service he was most sensible of its peril. To pass between hostile lines in the hours of the night—he he did not wait for daylight,—to be halted by guerrillas and scouts and pickets, with guns aimed at him, and, finally, to meet and satisfy the cautious, keen-eyed, hawk-nosed rebel officers as well as our own, was a mental as well as physical demand that could not long be sustained. While proceeding upon his last expedition, he had neither arms nor nameless one upon a hay-road. He halted our horses, drew near, and commanded me to surrender as private, while our attendants and companions moved on. The ruse succeeded. I was hoisted and soiled in appearance,—his clothing having been rained upon and splashed by much wet, was carefully hard riding, and which had dried upon him. He said he was about to try it once more, and, though he had been so often and so successfully, still he felt that there was not sure security, the hulket or the halter. He had been unable, amid the hurry and excitement, to make some final disposition of his affairs. He gave us a last message to send to his wife and children in case it became necessary; and he also desired a promise—nearly given—that we would attend and attend to the settlement of his account with our general for services re-nearly rendered. Thus concluding, he wrung our hand most earnestly, and putting spurs to his fresh and spirited animal, dashed off upon his mission. Twenty hours afterwards we were relieved of our anxious foreboding by his safe and successful return. We have heard of the price paid him for his labors: it was well earned, and to our cause was a most profitable investment.

ARMY AND NAVY PERSONAL.

GENERALS McCook and Crittenden have been ordered to Indianapolis with their aides-de-camp.

LIEUTENANT-Colonel J. M. Taylor, left Fortress Monroe on the 18th inst., with a report of affairs in that vicinity for duty.

ADMIRAL Wilkes is still stopping at the Brevoort House, in this city. It is uncertain how long he will remain.

CAPTAIN R. B. Brown, of the 30th Mass. Vols., has been promoted to Lieutenant-Colonel of a Louisiana regiment.

CAPT. C. W. Killborn, who for more than a year has been Provost-Marshal of New Orleans, has been appointed Colonel of the 1st Louisiana Cavalry, Native Guards.

Ma. Sidney S. Boyce, who was drafted in the Fourth District of this city, has been promoted to a captaincy, and ordered to report to Gen. Banks.

The office of Major-General Halleck has been removed to Seventeenth and F streets, Washington, where all the business will hereafter be transacted.

BRIGADIER-General Thomas H. George Cocke arrived at New Orleans on the 7th, and reported to Major-General Banks.

BRIGADIER-General Hugh T. Reid, lately stationed at Lake Providence, La., has taken the post of Cairo, by order of Major-General Grant.

COLONEL Dodge, of the 24th New York vels., has been appointed Assistant-Adjutant-General on Major-General Meade's staff, with the rank of Captain in the Regular Army.

CAPTAIN William H. Green, Jr., late a Captain in the 102d New York regiment, has been commissioned Lieutenant-Colonel in the 173d New York.

GENERAL Herron is now at his brother's residence in the vicinity of Fishkill, New York, where he has swamp fever and chronic diarrhœa, contracted in Louisiana.

COLONEL Horace Binney, Sergeant of the 1st Massachusetts Cavalry, has been detailed for service in the Department of the Gulf.

BRIGADIER-General J. St. C. Morton is announced by general order as Chief Engineer of the Army of the Cumberland.

CAPTAIN A. Mordecai, Ordnance Department U. S. Army, is announced as Chief of Ordnance of the Department of the South.

CAPTAIN W. L. M. Burger, Assistant-Adjutant-General, is assigned to duty as commissioner of Public Buildings Department at the Headquarters of the Department of the East.

GENERAL Peck has designated a lot near the Orphan Asylum, at Nyack, Rockland, Carolina, as a burial place of soldiers dying in that vicinity.

FIRST Lieutenant William Sinclair, 3d U. S. Artillery, has been appointed Assistant-Inspector-General to the 13th Army Corps, with the rank of Captain of Cavalry.

THE President has accepted the resignations of Captain Lorin Fairchild, 16th U. S. Infantry, and Captain William S. Tuttle, 8th U. S. Infantry.

BRIGADIER-General William Hays, U. S. Vols., has been detailed as member of general court-martial now in session at Washington.

A SPLENDID service of silver, costing about $2,000, has arrived at Washington, intended as a bridal offering from the medical officers of the Army of the Potomac to Dr. Letterman, Medical Director.

THE remains of Major H. Z. Curtis, who was killed at Baxter's Springs, Kansas, on the 6th inst., have arrived at Mount Oread for Kenlock, the home of his father, Major-General Curtis, for burial.

CAPTAIN G. D. Parker, Assistant-Adjutant-General to General Martindale, has been relieved from duty at the Old Capitol Prison, at his own request, and appointed Provost Judge at Fort Ethan Allen, in Georgetown.

LIEUTENANT Ahrm H. Klein, of Company K, 138th Pennsylvania volunteers, was arrested last week at White's Ford, near Edwards' Ferry, Va., while crossing the river with a view to desert. He was sent to the Old Capitol.

BY order of the War Department the following officers have been transferred to the Invalid Corps of the United States: Lieutenant Edward M. Leas, 17th Conn. Vols.; Lieutenant James Switzer, 66th N. Y. Vols.

CAPTAIN J. W. Howland, of the Fifth Army Corps, recently tried by court-martial on a charge of embezzlement, has been found guilty and sentenced to two years imprisonment in the Albany penitentiary. By the sentence of the court, it is made scandalous for an officer of the Army to associate with him.

A SPECIAL order from the War Department assigns Colonel Gelles, late of the 89th Penn. Vols., to the command of the troops of the Invalid Corps stationed at Philadelphia, under the direction of the Assistant-Provost-Marshal of Pennsylvania.

FIRST Lieutenant W. Neil Dennison, 2d U. S. Artillery, is, at his own request, relieved from duty as Inspector of Artillery at the Headquarters of the Army of the Cumberland, to enable him to take command of his battery, in the Army of the Potomac.

MAJOR-General Hunt was well enough to hold a review on the 7th. His wound is healing, but is still painful, and interferes with his pedestrian exercises, but admits of riding on horseback with comparative ease. He arrived at Cairo with his staff on the 16th.

FIRST Lieutenant Theodore Bertrand, Co. E., Independent Battalion, N. Y. Vols., has been sentenced by Court Martial convened at Folly Island, S. C., to be cashiered for drunkenness and neglect of duty, the sentence has been approved by Major-General Gillmore.

MAJOR-General Logan has relieved Gen. Leggett, in command of his old division, and also Brig.-Gen. John McArthur, in command of the post of Vicksburg. The other officers of the post are, District Provost-Marshal, Lieut.-Colonel James Wilcox; Post Provost-Marshal, Lieut.-Col. Waddell.

CORPORAL Eugene Swayne, late Provost-Marshal of the district of Memphis, Tenn., has been dismissed from duty, at his own request, and succeeded by Captain G. A. Williams, 1st United States Infantry, late mustering officer of the 16th army corps.

CAPTAIN Samuel Ford, of the 5th Maryland regiment, who was arrested by Major Wells, in the charge of having, whilst acting as Provost Marshal at Berlin, Md., robbed, connived at the robbing of Mrs. Padgett and Miss Adams by some of his officers, was yesterday honorably released and restored to his regiment.

ON Tuesday, last week, Major A. W. Fletcher, of Washington, was appointed and commissary for the Old Capitol prison, by order of the Secretary of War. Major Fletcher was a paymaster in the Army until recently, when he was dismissed the service for an alleged improper disposition of Government funds.

THE U. S. steam frigate *Lancaster*, hearing the flag of Admiral Charles H. Bell, Commander-in-Chief of the Naval forces on the Pacific station, arrived at San Francisco, September 16, having in 14 months sailed and steamed 17,500 miles, and visited most of the stations on the Pacific coast. All well.

LIEUTENANT Dissoway, the Provost-Marshal of Williamsburg, and who was tried by Court Martial for the First New York Mounted Rifles. A day or two before Private Blake stabbed Private Redson, both of the First New York Mounted Rifles. The latter was closely confined in Fort Magruder. Their victims died in a few minutes.

CAPTAIN S. A. Urquhart, Commissary of the Third Division, Sixth Army Corps, was recently captured by guerrillas between Centreville and Fairfax Station. Captain Whelan, Assistant-Quartermaster of the Brigade, First Division, Sixth Army Corps, and Lieutenant John Bradford, Commissary of the same brigade, were also captured by guerrillas in the same vicinity.

THE proceedings and sentence of a court-martial in the case of Lieutenant Joseph R. Clerk, 69th Indiana Volunteers, and which was tried at the same time and with the privates and non-commissioned officers of his company, has been approved by Major-General Hooker, Department of the Cumberland, and the culprit is accordingly dismissed the service of the United States.

A MILITARY Board has been ordered to convene at Newborn, N. C., to examine the "capacity qualifications, propriety of conduct, and efficiency of such commissioned officers as may be brought before it." The following officers compose the Board:—Brigadier-General I. N. Palmer, U. S. Vols.; Colonel T. I. C. Amory, 17th Mass. Vols.; Colonel S. S. Carroll, 7th Ohio Vols.; Major J. H. Jamison, 5th R. I. Artillery; 1st Lieutenant J. S. Tuller, 3d N. Y. Artillery.

A letter from Dr. Nesbell, surgeon on board the United States gunboat *Clifton*, contains particulars of his capture by the rebels at Sabine Pass, Sept 8. He was at Beaumont, Texas, when taken. He says the rebels only two hours after died since they were brought ashore. Those of the officers and men who were not wounded were sent to Houston. The doctor states that 32 of the party have been treated by the rebels with the utmost kindness and attention.

THE following named enlisted men of the 3d Rhode Island Heavy Artillery, serving on detached duty, recommendations have been transferred to the Signal Corps of the United States Army, and are required to report to the commanding officer of the Signal Detachment at Washington:—Corporal Albert Weaver, Co. I; Henry W. Mason, Co. K; Walter C. Wigfall, Co. H; Henry R. Congdon, Co. C; Alfred C. W. Hume, Co. M.

BRIG.-GEN. Rufus King is reappointed Minister Resident at Rome, and accepts the appointment, his acceptance to take effect immediately. Mr. Marsh's successor vacates by the return and resignation of the Hon. M. Bistchford, of New York, recent incumbent. Gen. King has turned the command of the Department of the Army of the Potomac over to Brig.-Gen. Cerouna. Capt. Robert Chandler, A. A. G. to Gen. King, accompanies the new Minister as Secretary of Legation.

CAPTAIN Hutton, of General Burnside's Staff, who sent a challenge to Captain Cutts, for alleged insulting language, was tried by a Court-Martial for guilty, and sentenced to be reprimanded by the President; but the Twenty-fifth Article of War, providing that officers in any command offer found guilty of sending a challenge shall be cashiered. The sentence of the Court was disapproved, and Captain Hutton was dismissed the service from Sept. 28, 1863. Major William Cutting, also of General Burnside's Staff, who was charged with carrying the challenge, from Captain Hutton to Captain Cutts, was acquitted, and ordered to be released from arrest.

CAPTAIN James Madison Cutts, late of General Burnside's Staff, Acting Judge-Advocate of the Department of the Ohio, found guilty of "conduct unbecoming an officer and a gentleman," and sentenced to be dismissed the service, but had his sentence remitted by the President, in consideration of his previous meritorious and gallant standing, and is ordered to join his regiment in the field, after receiving a reprimand from the President.

THE Washington correspondent has written a letter denying the truth of a statement made by the *Freeman's Journal*, in which his forces are charged with having robbed or violated Catholic churches. The Rev. Father Corby, Chaplain of the Irish Brigade, in his official report, however, in which he speaks in the highest terms of the conduct of the troops under his command, has not a word to say about the matter. He has nothing but praise for the manner in which the churches and convents were all respected, and now stand as lasting monuments of the falsehood of the *Freeman's Journal*.

MAJOR-General Curtis, who has issued a farewell order to his corps—the 21st—in which he says "he regrets the separation which has commenced—not the investigation of his conduct which has been ordered. Investigation—the closest scrutiny—however it may affect him, can only brighten your fame. Your deeds at Chickamauga, as at Stone River, will hand down to posterity your names honored in the brave honored men! The mighty band of the Twenty-first Army Corps will be known in the annals of our country as the heroes of the past. And the slanderer's tongue cannot reach the glory whose honors await you. May God's blessing attend you!"

CAPTAIN C. M. Levy, Assistant-Quartermaster in the Department of Washington, under Colonel Hoskins, tried on a charge of embezzlement, and on a specification of the charge was that he paid a clerk a salary of $50 per month and took $30 per month back, has been found guilty. By the sentence of the court he is to assist in the duties of the department, is dishonorably dismissed the service, and is to be held forever incapable of holding any office of trust or emolument under the United States Government. The court further directs that the sentence be published in three papers in the City of Washington, and once published in Albany, the usual place of Levy's residence, after which it shall be deemed scandalous for an officer of the United States Army to associate with him.

COLONEL W. S. Rowland, of New York, who is well known in connection with the organization of Rifle Regiments, has been appointed to Government service. 1,000 sharpshooters in ten different States under the new call for 300,000 men are now to be mustered in for three years, and subjected to four months' drill in the duties of the soldier, and all the details of rifle shooting, at the grounds of the Rifle Association, Creedmoor, Long Island, New York, where competent instructors from the celebrated English Rifle School at Hythe are engaged. The men to be thoroughly fitted to act as skirmishers, rifle-pickets, and to be detailed as such to different regiments, or to be attached as sharpshooters in squads of ten to regiments now in service.

A court composed of thirty-odd officers is about being formed in Washington, Colonel Warner, of the 10th Pennsylvania Reserves, has been appointed President. Another court-martial has been ordered to sit at the same place for the trial of military officers. The following is a list of the members who will compose the latter medical treatment in Washington, although able to perform light duty:—Major Hodgkin, 149th Penn. vols.; President; Lieut.-Col. H. C. Thompson, 8th Illinois cavalry; Major J. W. Bowe, 1st Iowa cavalry; Captain B. J. Buck, 6th Maine; Captain E. M. Paine, 16th New York; Captain J. H. Marshon, 6th Wisconsin; Captain C. H. Seymour, 5th N. Hampshire; Hospital; Lieutenant G. A. Whitmore, 12th Massachusetts; Lieutenant J. Andrews, 1st Rhode Island cavalry; Lieutenant Elisha Bean, 1st Maine; Lieutenant J. Lennon, 110th Ohio; Lieutenant W. F. Dutton, 105th New York; Lieutenant J. Hamilton, 2d Iowa, A. D. C. Judge Advocate.

MAJOR-General McCook, in his farewell order to the corps —the 20th—says:—" After being relieved from the command, I cannot in any greater favor of the War Department than a thorough investigation of my conduct from the two memorable days of Chickamauga, for I do not fear the issue. My great regret in parting with you is that the glorious associations formed after so long service in the Army of the Cumberland, and the bidding farewell to the gallant officers and soldiers of the 20th Army Corps, who have endured and maligned by news-scribblers, who, unfortunately, in our country, mould the public mind. Official reports will do justice before the world. I return my thanks to every officer and soldier of the corps for his gallantry in action and his bearing on the march, and devotion to duty. With this I leave you, and my earnest prayer ever shall be that God may prosper you as a corps and as individuals, and every one may win victory when struggling for your nation and glorious flag."

In order to encourage and reward the meritorious and faithful conduct of officers and men in the 11th Army Corps of the Tennessee, a "Medal of Honor," with appropriate device, has been prepared, and will be presented by a board of officers to the Major-General Commanding (McPherson) is the advisory member, to all those who, by their gallantry in action and other commendable qualities, have since distinguished themselves, or who may hereafter most distinguish themselves during the war. The following officers compose the Board:—Major-General John A. Logan, commanding Third division; Brigadier-General John McArthur, commanding First division; Brigadier-General John E. Smith, commanding Second division; Brigadier-General M. M. Crocker, commanding Fourth division; Brigadier-General T. E. G. Ransom, commanding Second brigade, First division; Brigadier-General M. F. Force, commanding Second brigade, Third division; Brigadier-General Giles A. Smith, commanding Third brigade, Fourth division; Brigadier-General Alexander Chambers, commanding Third brigade, First division; Colonel Gabriel Bouton, Thirteenth Wisconsin Infantry; Lieutenant-Colonel A. M. Powell, Chief of Artillery.

NOTICES TO CORRESPONDENTS.

The Editor of this paper will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest, of the movements of vessels; of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to tactical and other matters.

From gentlemen in the medical service we shall be glad to receive communications on military hygiene, practical surgery, and reports of notable operations and novel forms of treatment.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the Journal.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, OCTOBER 24, 1863.

CALL FOR 300,000 VOLUNTEERS.

BY THE PRESIDENT OF THE UNITED STATES.

A PROCLAMATION.

Whereas, the term of service of a part of the volunteer forces of the United States will expire during the months of July and August next, in addition to the men raised by the present draft, it is deemed expedient to call upon them three hundred thousand volunteers, to serve for three years or the war, not however exceeding three years.

Now, therefore, I, ABRAHAM LINCOLN, President of the United States, and Commander-in-Chief of the Army and Navy thereof, do hereby call for the several States named below, for the said term of service, the large city proclamation, calling upon the United States the different States to raise and furnish their respective quotas of men for the service, for the various companies and regiments in the field from their respective States, their quotas of the three hundred thousand men.

I do further proclaim that the quotas will be called and filled by draft.

I do further proclaim that the bounty, premium, and bounty, as heretofore, shall remain as heretofore specified, and may be WARRANTED before commissioned to the Provost-Marshal-General's office, by special letters.

Whether proclaim that all volunteers received under this call, as well as all drafted men, and substitutes under this call, shall be credited to and deducted from the quotas established for the draft.

I further proclaim that if any State shall not furnish under the quota assigned to it by the War Department under this call, then a draft for the deficiency in said quota shall be made on said State, and not for the districts of said State, for their due proportion of said quota; and the said draft shall commence on the first Monday of January, 1864.

And I further proclaim that nothing in this proclamation shall interfere with existing orders for the draft, which may be in force for the present draft in the States where it is now in progress, or where it has not yet commenced.

The quotas of the States and Districts will be assigned by the War Department, through the Provost-Marshal-General's office, to the regiments being had for the men heretofore furnished, whether by volunteering or drafting, and the recruiting will be conducted by the officers with such instructions as have been or may be issued by that Department.

In testing the proclamation, I address myself not only to the Governors of the United States, but also to the good and loyal people thereof, invoking them to lend their willing, cheerful, and effective aid to the measure now adopted, with a view to reinforce our victorious armies now in the field, and bring the existing rebellion to a speedy and successful end, thus closing forever the fountains of sedition and civil war.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington this seventeenth day of October, in the year of our Lord one thousand eight hundred and sixty-three, and of the Independence of the United States the eighty-eighth.

ABRAHAM LINCOLN.

By the President:
WILLIAM H. SEWARD, Secretary of State.

THE CHANGES IN COMMAND.

AT this moment, we have nothing to say about the action of the Government in removing Major-General ROSECRANS from the command of the Army of the Cumberland. We have heretofore had frequent occasion to eulogize that officer's military ability and manly worth; and our praise was based upon knowledge of the man and observation of the soldier, as well as upon the historical records of his past career. But we assume that the Government's action in his removal was not only dictated by the spirit of justice, but that it was demanded upon the highest military considerations. In regard to all his movements and each of his engagements since he assumed command, the Government necessarily has wider and more accurate information than can yet be possessed by any other parties; and in regard to the late action at Chickamauga, which doubtless was the immediate cause of his removal, it may be said that nothing is definitely known about his conduct on that occasion, except by the Government. We fling away as false and cruel the general charges made by the Daily Press against Gen. ROSECRANS, of unmilitary conduct and vicious personal habits. Some of the charges we know to be untrue, and all of them are in their nature so antagonistic to his established character—which is assiduous, dignified, calm, self-possessed, and, in a word *soldierly* to a rare degree—as to carry their refutation on their face to all who know Gen. ROSECRANS. But the whole matter, in all its bearings, will, we have reason to believe, speedily come up for investigation before the proper court; and until the charges then are made known, and the facts elicited brought to light, we advise his detractors, as well as a fluctuating public, to restrain themselves from indulging in random charges and harsh criticism against one who, during the last two years, has certainly done his country enough service to entitle him to honorable consideration, and to shield him from the poisoned shafts of unpatriotic malice.

General ROSECRANS' connection with the Army of the Cumberland, as its chief, lasted for one year, lacking three or four days. It is a twelvemonth ago today since he assumed the position then vacated by General BUELL. His great field engagements during that time have been but two—Murfreesboro and Chickamauga—the one fought two months after he took command of the army, and the other in the eleventh month of his commandership—the one being offensive and a victory, the other defensive and technically a defeat—his adversary in both cases being General BRAGG. But "pitched battles are the last resort of a good General;" and if ROSECRANS had few battles, he had many triumphs. In a recent issue of this journal, we dwelt upon the remarkable series of flanking operations by which he drove the rebels successively from Shelbyville, Tullahoma and Chattanooga, drove them across the Tennessee and out of the State, and so broke up and demoralized their army that they were only able to offer him battle in Georgia after receiving heavy reinforcements from the army of General LEE. And we may here say that General ROSECRANS now leaves his command after having firmly secured every position that his skill and valor had ever gained, and after having established a series of strongholds and bases in Middle and Southern Tennessee which if properly held and used, will permanently secure all soil of Tennessee to our flag.

The immediate successor of General ROSECRANS in the command of the Army of the Cumberland is Major-General GEORGE H. THOMAS—an officer who is not only regarded by the army as one of its most accomplished commanders, but who has earned his rank and his honors by great and successful services in the field—an officer of the finest intellectual and moral qualities of high military genius and profound scientific attainments, of great experience and long service, and who has only remained in a subordinate position because, when once before offered the command of the Army of the Cumberland, he declined on the regard for General BUELL, and indeed him to decline it. The first neat and decisive victory of our arms south of the Ohio river—that at Somerset, in January of last year—was achieved by him; and it is universally conceded that it was he who saved our army at Chickamauga last month. The selection of General THOMAS to retain General THOMAS at the head of that army, and if he definitely accept the position—we cannot say that a fickle and impatient public would be at once overwhelmingly gratified, but we can, with surety, say that we should have an officer who has few equals at the head of an army which has no superior.

Besides the changes above mentioned, it is announced that a new Military Department has been created (of "the Mississippi") and that Major-General ULYSSES S. GRANT, "with plenary powers," has been placed in command of all the troops between the Ohio, the Mississippi and the Upper Tennessee, including the Army of the Cumberland, the Army of the Tennessee and the Army of the Ohio, as well as the forces of General HOOKER. That distinguished General, although he has been disabled for two months, by injuries suffered in a fall from his horse, and although not yet entirely recovered, on receiving orders, promptly repaired to Nashville, where he is at once proceeded to Chattanooga, where he doubtless is by this time.

As to the precise nature of the position, or rather the duties, that General GRANT will assume, we are as yet uninformed; but as he grasps in his hand a series of commands which have heretofore been independent, and so a great extent, non-cooperative—we all his own troops on the Mississippi and in Western Tennessee, as well as General BURNSIDE's in East Tennessee, General THOMAS' and General HOOKER's and the various minor bodies that are scattered throughout that section of the country—are now under his control, we presume his first labor will be to give a practical unity to these armies and *ensemble* to their operations. The need of this has been and is very great; for in Tennessee alone, until this change, we had no less than four officers in independent command and without any unitary or cooperative plan of action against an enemy who had really but one fundamental position with a large army defending it. General GRANT will doubtless, to a large degree, combine these various forces at Chattanooga; and the upshot of the matter will probably be that he himself will assume chief command of the Army of the Cumberland—or rather the Army of the Mississippi. This, however, is merely conjecture.

To the supereminent fitness of General GRANT for the great position and great field to which he has been assigned by the President, his character and career bear testimony. Guaged by the test of success, he is without a peer among our Generals. His Mississippi campaign, beginning with Fort Donelson, or, if you please, with Belmont, nearly two years ago, and closing with the capture of Vicksburgh in July last, has commanded not only the applause of all military men in this country, but has extorted the admiration of the military authorities of Europe. In opening the Mississippi river, he achieved the impossible—or what all the world except the enthusiastic Americans, to whom there is no such word—had been declared such. And in entering upon a new field of action, he has the satisfaction of doing so after having entirely consummated his work in his own Department. It is a part of the gossip of the day that General GRANT lately remarked that he did not understand "how General HALLECK had turned out so great," and we will not attempt to unravel that which mystifies the veteran Lieutenant-General. Some people would explain it as the Maréchal DE CASTRIES explained to antiquizing mind the secret of his uniform success, that "he owed much to accident and nothing to skill not a little to blunders!" But, so far as we are concerned, this is precisely what we do *not* believe concerning General GRANT. Whatever may have been the case with the Maréchal, we believe that General GRANT owes his extraordinary success to the possession of the soul and qualifications of a great Captain.

CORPS D'ARMEE.

WHEN the disaster of the first Bull Run showed among other things the great necessity of army organization, General MCCLELLAN urged the formation of army corps, and the great practical utility of such bodies as fighting units has since been again and again demonstrated. In the French "*ordonnance sur service des armées en campagne*," the establishment of *corps d'armée* is required,—"ou plusieurs divisions réunies doivent pendant une campagne, au moins, agir séparément, bien que dans le cercle d'operations d'une armée." Thus provision is made for separate action of bodies, they are not to be broken up unless of great number; they subsidize the highest talent of gifted Generals, which would be in part wasted upon small divisions: they establish an *esprit de corps* in a larger body; which removes regimental or brigade bickerings. Whatever honor it may be to a soldier to belong to such and such a regiment, or such a brigade, or should they, from time to time, be modified, altered, consolidated, re-named? Should the tenure of command be like that of an army? These questions were proposed by JOMINI, and are worthy of present consideration. There are many reasons for preserving the denomination and identity of corps. They become compact and strong. The men know all the higher officers and follow them the more readily. The *esprit de corps* becomes a powerful agent for good. They assume badges of distinction—a trefoil, as in the 2d Corps,—a cross, as in the Sixth, and these are likewise pledges for the future. The officers begin to talk of new combats as interlopers. "Not of us, sir," said one,—"A good fighter, but we don't want him; he don't belong to us." The corps is a grand family, and all the members become proud of each other. Honorable emulation between different corps is thus excited, and for good. But, on the other hand, some corps become miserable and get a bad name; they distrust themselves, and their comrades of other corps distrust them. The enemy find out their character, learn where they are posted in battle, and always attack them, in preference. If the fault be with the chief officers, every day increases its evil influence; the *esprit de corps* becomes an evil, cowardly spirit, until the whole organization is pointed as one corrupt. What then? Our verdict is

to break them up at once; strike their very number out of the army enumeration; and so distribute or consolidate them as to avoid all the evils which have been demonstrated and developed.

Even the best corps should receive wholesome modification from time to time, so that each should be a large, strong, compact thunderbolt, which the commanding strategist may hurl against "a decisive point."

Good corps commanders are invaluable men, and as rare as they are invaluable. This war has developed some, both in our own and the rebel army. From among them we look for army commanders; and many whom the world thinks competent, as they look from their airy high station to the battle-ax and mere responsible one, shrink from the mighty and wearing task of supreme command. Among them the question of lineal rank can have no force; capability alone must decide the promotion, and they feel this. When General HOOKER was about to be relieved from the command of the army of the Potomac, the corps commanders themselves were united in suggesting MEADE as his successor. COUCH, SEDGWICK and REYNOLDS all ranked him. COUCH, before he left to take command of the department of the Susquehanna, asserted his conviction on this subject; SEDGWICK urged it, and REYNOLDS went to Washington to secure the appointment for MEADE.

These facts are stated merely in illustration of the good educational discipline of army corps, in forming Generals for high command, and as proof that they foster no unhealthy ambition for supremacy.

Besides the formation of corps, BURNSIDE tried the organization into *grand divisions*. Without extolling at the confusion of ideas presented by the word *division*, already possessed of a double meaning, which according to JOMINI was one of the minor causes of the French defeat at Waterloo, we disapprove of grand divisions, because while, in the ways specified, they accomplish no more than corps, they require still greater genius and talent in the Generals, difficult enough already to find, and they cause heart-burnings among corps-commanders and their staffs, which produce positive evil.

THE ARMY AND ITS REINFORCEMENT.

Two documents, pregnant with importance and interest, though brief in form, will be found in the current issue of the ARMY AND NAVY JOURNAL. One is the Proclamation of the PRESIDENT, dated the 17th instant, calling upon the country for a new contribution of three hundred thousand men to the army; and the other is a tabulated statement of the number of troops raised by the loyal States from the commencement of the war to January 1st, 1863.

The PRESIDENT assigns two reasons, one special and the other general, for the issuance of this call for *volunteers*—1st. That the term of service of part of our volunteer forces will expire during the coming year; 2d. The *expediency* of reinforcing our army by the number of men indicated. The other salient features of the Proclamation are—1. That it is through the Governors of the different States that these troops are to be raised and enlisted; 2. That the troops raised are not to be formed into new regiments, but are to be incorporated into the various companies and regiments already in the field; 3. That if any State fail to raise its quota by the 5th of January ensuing, a draft for the deficiency shall then be enforced.

We rejoice that this call has been made, and we are not sorry that the PRESIDENT should have given the States a choice as to the mode in which the troops shall be raised, whether by volunteering or conscription; though we confess it may well be feared that, in most of the States, the volunteering system will prove as inefficient at the close of this year as it proved at its beginning. We believe that the new levy could have been raised much more expeditiously and economically by a draft; and we believe that, now that the drafting system has been gotten in working order, and the people comprehend its operations and its essential justice, its enforcement would have been submitted to without a show of resistance. The issue of this Proclamation also indicates the adoption of a wiser policy by the Government in reference to the re-enforcement of our armies. Heretofore no call for troops has been made until we were in immediate and imperative need of their services—either to save the menaced capital, to repel invasion from the free States, or to fill the places of troops whose term of enlistment was on the eve of expiration. But this call was issued under no such sudden impulse. It looks to the future. It anticipates, it is true, the expiration of the term of service of a part of our forces; but that, as is indicated, occurs next year, and not in its earlier months either. This wise forethought, and provision against the contingencies of the future, we have been sadly deficient in during the whole course of the war, mainly for the reason that we were continually expecting its early termination.

Our tabular statement of the forces raised during the first two years of the war, is interesting in this connection, and shows some very remarkable facts. We estimated the other week that the number of troops raised in the North would not fall short of a round million; but the returns show that our figures were under estimate. Leaving out of the count altogether the three months' men, the nine months' men, the one year's men, the two years' men, and the troops raised for the special service of State defence, and beside all those we have up to the opening of this year, 1,068,769 men who volunteered "for three years or the war." The casualties of the field and the diseases of the camp have greatly reduced these numbers; they have also been vastly diminished by the discharge of men, in the early part of the war, who, after enlistment, were found physically disabled for a soldier's life; and desertion also have reduced the numbers by not a few. While deducting the above classes from the gross number given, we must, however, add to it the voluntary enlistments and the conscripts of the present year, which, we should judge, must amount to at least 200,000 men. This will give some idea of the magnitude of the Union army, even as it now stands; but the nature and extent of the field of operations, the size of the enemy's army, and the exigencies that follow victory and occupation, require that further reinforcements be furnished, to administer the last blows to the rebellion in the coming spring, and to restrain thereafter the smoldering fires of treason.

THERE is a great deal of foolish raillery indulged in from time to time against the Generals in command of our various armies, because of their supposed ignorance of the movements, positions, plans, and forces of the enemy. This is unreasonable from those who are as badly-informed of the nature of military operations as they are of military history. They assume that our side should know all about the *other* side, and that our side is horribly culpable if the other side succeeds in knowing anything about us. They assume that our Generals are in league with the enemy, and that the enemy's Generals know everything about our army. Of course all this shows that the rebel Generals are wonderful geniuses, and that the Union Generals are ignoramuses—or rather, we think, the expression of such opinions shows that the holders of them are ignoramuses.

The fact is, that war is a much more complicated and intricate game than these astute critics fancy. It is a "game which two play at." It would be as easy to foretell the game which a shrewd adversary would play in chess, or the successive movements of pieces he would make upon the board, as to forecast the plans of a skilful opponent in war, and the line of movements and dispositions he may make of his forces. Both in chess and in war, a sagacious player can make some excellent guesses as to his adversary's purpose, and can often promptly checkmate his moves. But the adversary, too, may have sagacity and resources—may be able to screen his designs and make effective disposition of forces; while, in fact, that indiscernible and unknown force, may often step in and decide the game without much reference to the inherent skill of the players. In every war, in all military history, and in the career of all Generals, these things appear.

The charge that, in the present war, the enemy knows more about our plans, movements, and forces, than we know about his, is, we believe, a total mistake. The same complaints, on this point, that we make from our side, are continually being made by the rebels, with reference to their side. And that too, not only by the Southern press and Southern critics, but their officers, high and low, in official reports, dilate upon their lack of information about us, and frequently confess to the promptness and accuracy of our knowledge about them. In the latest rebel military report—that of General LEE of his campaign in Maryland and Pennsylvania—we find repeated allusion to these points. He confesses that the march of two of his divisions from Fredericksburgh, although it was made in the rear of that place and in the direction of Culpepper Court House, was known to our commander almost as soon as it was commenced. In one place he confesses that "*it was impossible* to obtain accurate information" of the position of our Army after it had left Fredericksburgh; in another, that his "march toward Gettysburg was conducted more slowly than it would have been *had the movements of the General Army been known*;" in another, that "the attack was not pushed that afternoon, (the 1st of July) *the enemy's force being unknown*;" and in another place he says that "every effort was made to ascertain the numbers and position of the enemy, and find the most favorable point of attack," but he tacitly admits that all these efforts failed.

We recall these sentences for the purpose of shewing the injustice of the current criticism concerning this subject upon the commanders of our armies.

THE Army correspondents and the journals have been praising the conscripts (most of them substitutes of conscripts) for their excellent behavior and gallant bearing during the retrograde movement of General MEADE'S army from the Rapidan to the Potomac. These writers seem to have anticipated that the conscripts would fling away their muskets and fly, the moment they heard the echo or felt the crack of the enemy's guns. We anticipated nothing of the kind. There is not so much difference, after all, on the field of battle between volunteers, conscripts and substitutes. Confronted with the enemy, they will all fight, if they have been properly trained, and are well handled; under such circumstances all men will fight, excepting cowards, and these are extremely rare among trained soldiers. It is also a mistake to suppose that the word *conscript* is antagonistic, in a broad sense, to the word *volunteer*. If the one is always a *voluntary* soldier, the other is by no means always an *involuntary* one. The one has obeyed the *call* or invitation of his country in going to the field: the other has obeyed his country's *command*. The first act, or the act of enlistment being accomplished, both are alike subject to impressions of order; and the enthusiasm which fired the one to offer his services, will not then serve him in any better stead than the conscientiousness, or the necessity, which impelled the other to arms. As to the relative patriotism of the two classes of soldiers, it may be quite as great with the one as with the other.

We expect to see all the young soldiers who may be realized from the last conscription, or from future conscriptions, exhibit as creditable behavior in battle and on the march as was exhibited last week by the first batch of conscripts which we have yet had brought into action. Were it otherwise, it would be against human nature, against history, against the testimony of the ages, against what is opposed to what we have seen before our eyes in the case of an army of rebel conscripts.

THE Article on the "Siege Operations against Fort Wagner," which appears in another part of this paper, is completed by the selection of all who may be interested in an authentic description of General GILLMORE'S engineering operations before Charleston. The diagram accompanying the article—a beautiful copy of the authentic sketch, prepared expressly for this journal —will give a clearer idea of the operations it illustrates than pages of description. Whatever the final result of the present attempts to take Charleston, it cannot affect the reputation General GILLMORE has already secured as an engineering officer. His quickness of perception, his readiness of apprehension and promptness of resource, and his determined tenacity of purpose, have already secured results that in their full extent success, if the force at his disposal does not prove inadequate to the demands that must still be made upon it.

IN a note addressed, under date of October 21st, to Chief Engineer ALBERT C. STIMERS, the Secretary of the Navy says:—"You will be pleased to learn that "the Court of Inquiry, before which you recently appeared at this Department, have reported that in their "opinion there is no necessity or propriety of further "proceedings in the case." We congratulate Mr. STIMERS and his friends upon this very satisfactory decision of his case, which has occupied so much time and labor.

BY the last foreign steamer, we received the gratifying intelligence that the English Government has finally put the "head arrow" upon one or both of the rebel rams in LAIRD'S ship-yard, with a view to their detention and trial under the Foreign Enlistment Act. Meantime the Southern club are earnestly protesting against the action of the government, thus unwittingly bearing their testimony to the true character of these vessels.

FOREIGN NAVAL AND MILITARY MATTERS.

An English Ex-Captain of Engineers named FORBES, makes public announcement that he is prepared to construct breech-loading guns "nearly as perfect to armor plating at a distance of fifteen hundred yards."

THE Danish Government continues its preparations to resist any hostilities undertaken by the German Diet. The Minister of Marine on Sept. 29 applied to the Rigsrad at Copenhagen for a levy of 5,000 seamen, and for funds to build several iron-clad vessels.

EXPERIMENTS are soon to take place at Shoeburyness with the Armstrong 600-pounder gun, firing at a floating target representing a portion of the *Warrior's* side. The target upon Mr. Reed's plan, of very thick plate and slight backing, and a 2-inch skin, will also, ere long, be fired at.

It is stated that ten new iron-clad frigates have been ordered to be built by the present month, and fitting out, at Cherbourg. Their names are the *Flandre*, the *Gaulois*, the *Guyenne*, the *Magnanime*, the *Provence*, the *Savoie*, the *Semeuse*, the *Surveillante*, the *Valeureuse*, and the *Heroine*.

THE *Ceres*, a new twin screw steamer, and the sixth vessel of the same class built for the British navy by Messrs. Pembroke within a year, was launched on the 6th. She is an iron vessel of about 500 tons, 176 feet by 21 broad. She is propelled by two three-bladed screws of 7 diameter, driven at an estimated speed of 118 revolutions by separate and independent engines of 120 collective horse-power.

THE British Arctic iron-clad fleet will be strengthened before the end of the year by the *Achilles* and *Valiant*; the former will be floated out of the dock at Chatham some time during the month of November, and the latter which is to mount 34 guns was to be launched on the 15th instant by the Thames Ship-Building Company. She will also be followed by the *Black Monarch*, 28 guns, 6621 tons and 1350 horse-power, from Blackwall, about the end of December.

AN iron-clad frigate, built for the Italian Government, was successfully launched from the building slip at La Seyne, near Toulon. She is of 4,300 tons measurement, has engines of 700-horse power, and is to carry thirty-two guns. She takes the name of the *Varese*. The bow below the water line is formed so as to act as a steam ram. She is everywhere covered with chain cables, but these cannot be relied upon, it would be the most exposed to the force of any shock, are much heavier than the others.

THE Austrians have introduced into their service an entirely new description of mine. In the place of a stiff leather stock and upright collar, which is the admiration of the marines, they have adopted a soft necktie, which fastens in front with a narrow slit; it will not tip or get out of its place, and a collar which folds down flat upon the shoulder. The body of the tunic is exactly cut, but open and unbuttoned. The sleeves and a skirt sufficiently roomy to protect the legs of the soldier. This coat is not only smart on parade, but sufficiently easy to make a man's life bearable during a campaign.

THE Paris *Moniteur* publishes a letter from Jeddo, Japan, dated the 26th of July, which states that one of the chastisement inflicted by Admiral JAURES upon the Japanese bein bconging to the Prince of Nagato, which had fired upon European ships. The letter states that these reprisals produced a very salutary effect. A Japanese Admiral presented himself at Kanagawa and declared that he had come to Yokohama to be tackled of the flag borne be all the ships which belong directly to the TYCOON. The object of this step was to acknowledge, on the part of the Government of the TYCOON, the right of foreign war vessels to enter all ships which do not show this flag. The letter also contains some details of the manner in which the destructive effects of the bombardment. The losses of the Japanese appear to have been severe.

A COMMISSION to ascertain the merits of the French iron squadron sailed on the 27th of September from Cherbourg. Vice-Admiral Rigault de Genouilly is in command of this squadron, which consisted of the *Solférino*, *Magenta*, *Couronne*, *Normandie*, and *Invincible*, with the *Napoleon* and *Intrépide* in attendance. Arrived off Brest the squadron commenced its first series of experiments during very rough weather. The vessels were kept under steam by the *Normandie*. The water is a continuous sheet washed over her deck, and as no ports could be kept open, no artillery practice was possible. On the 29th the *Gloire* and the *Napoleon* had to enter Brest for repairs, and *La Couronne* had her boats and her *Portemanteaux* carried away by the heavy sea and rolling, and the *Normandie* had her jibboom broken and her foretopmast damaged. This is the true account of the *La Normandie*, whose speed during trials in the Channel is stated to have averaged from 13 to 14 knots so hour, and which was then considered faster than the *Gloire* and *Invincible*, but not as fast as the *Flandre*. She appears to have rolled more, to have suffered more damage, and to have steamed quicker than any vessel in the squadron.

THE mortality statistics of the British Army for 1861 are published. They show that the mortality for the year 1861 was a shade lower than for 1860, the loss being only 9.24 per thousand of the mean strength, against 9.95 in the previous year; but owing to the Army being considerably above its establishment in 1861, the facilities for invaliding were much greater, and therefore the Report considers it doubtful whether there really has been any material difference in the comparative loss for these two years. The losses of the black troops of the West Indies are upwards of 20 per thousand, or nearly treble the rates among the whites, and this through serving in a climate which is unhealthy—but garrisoned in good towns, and not unfavorable to the constitution of the negro. The returns from the West African Colonies, as given in this Report, afford little subject for remark beyond confirming the conclusion that, even upon their native coast, negroes are far from being a healthy race, and the diseases, of which they are the subjects, are often of a less aggravated, however, by hostilities in the field, where three fell by the hand of the enemy, leaving 45 deaths by disease out of a total of 48 deaths.

ADMIRAL DE PARIS, of the French navy, in a recent work on contemporary naval architecture, compares the English iron-clad *Warrior* with the French *Gloire*, very much to the disadvantage of the latter. He is of opinion that a duel between these floating iron batteries would speedily terminate in the former being riddled through and through, or sunk or taken. The grounds upon which he bases his opinion he states at length. To the first place, while the *Gloire* is completely covered with iron from stem to stern bull, the *Warrior* is plated on portions of her broadside merely. The rudder, the screw, the stern-post itself of the *Warrior* are all open and exposed to the impact of shot and shell. The only protection, therefore, it is contended, which a proportion of about one-half of the length of the ship can afford to a vessel would be the thin iron plating which forms her hull and the woodwork attached to it. This would offer no resistance whatever to shot and shell, while the *Gloire* armed as she is with powerful rifled cannon. In the second place, though the *Warrior* may have the advantage in speed, in point of fact, this prevents her turning and manœuvering so rapidly as the *Gloire*. The hull of the *Gloire* is built entirely of timber, not of iron, like that of her great rival; so that the frame and wooden walls of the vessel itself form the solid backing on which the armor is fixed. With regard to the relative merits of the timber and iron for building the ship's hull, this does not touch after the main question of invulnerability, which depends more upon the armor than upon anything else. The Admiral, finally comes to the conclusion that the *Gloire* is the most perfect vessel of war afloat.

REBEL VICTORIES AND FEDERAL SUCCESSES.

IN a leading article on the American Campaign the London *Army and Navy Gazette* says:

It is one of the characteristics of the war in America that the Confederates win nearly all the battles, and the Federals all the campaigns. Jackson, Lee, and Johnston, in the Southwest; SIDNEY JOHNSTON, and BEAUREGARD who half a battle at Shiloh, but the next day they were forced to relinquish the whole of the field; and, finally, afterwards BEAUREGARD had to evacuate Corinth. BRAGG, outmarching BUELL, penetrated into Kentucky, but being outmarched and baffled by the same BUELL, he claimed the victory, and what were the fruits? The evacuation of Kentucky by the Confederates. Bragg reappeared at Murfreesboro'. ROSECRANS assailed him there, and beat him by more obstinacy. The Confederates claimed a victory because they captured guns, but BRAGG, nevertheless, fell back behind the Duck river. ROSECRANS advanced this summer, and by adroit manœuvring turned first one flank and then the other of the Confederates, forcing them to give up and fortified for months Tullahoma and Chattanooga. When ROSECRANS was across the Tennessee, BRAGG, reinforced from the four winds—LONGSTREET from Virginia, Johnston and Polk, and even a rough-and-tumble fight in the Georgian Highlands—BRAGG, we say, reinforced from four points, gave battle his right hand to his left, and inflicts a deep wound upon this army, and hurls it back towards the Tennessee. Four days pass away, and Rosecrans, with the remains of his Chattanooga, the real bone of contention. BRAGG had made a supreme effort. The telegrams supplied to the Richmond papers furnish ample information of the battle, its issues and the best generals in LEE's army—even LONGSTREET, HOOD, HILL—were with him. He had won two combats, yet four days elapsed and he had done nothing. So far as appears he might have moved upon Bridgeport and compelled ROSECRANS to cross the river and Knoxville to place himself between BRAGG and Nashville. He might have so placed his army as to cut off BURNSIDE, or compel him to cross the Tennessee and leave Knoxville. But BRAGG he might have tried another battle. The stake was immense and would have justified risk, for if the Federals receive reinforcements they will hold Chattanooga, and if not, after the 20th of September BRAGG seems to have done nothing at all. What he has done is to have detached LONGSTREET to operate upon the projects submitted to him, or that he was waiting the effect of some cavalry demonstration in the rear of the Federal army? Whatever the motive, it is clear that there was inactivity in the Confederate camp, when success and the interests of the Confederacy required vigor.

FRENCH WAR CORRESPONDENCE.

A CORRESPONDENT of the *Moniteur de l'Armée* writes from the French army in Mexico, under date of June 20th, as follows:—

I dejected very concisely in my last letter the splendor of our triumphal entry into Mexico, and proposed to dilate in a future epistle upon the beauties of that capital, the gay flowers that decked its balconies, the piquant, pretty faces whose gracious smiles inspired the conquerors of Puebla with the determination to conquer Mexico. I dash at the much-vaunted eye of the Andalusian is comparable to the burning, flashing glance of the Mexican lady. I speak of the dark, soft eye, the long, black eyelashes, the arched eyebrows of the Mexican women, when, at the moment when I rejoiced in the idea of making a more profound study of this fact, at a ball given by the army to the ladies of Mexico, I was obliged, on the 10th ult., to resume my wandering life. I may add that I was entirely consoled for this, because the light column of which I formed a part, had an immediate prospect of encountering the enemy, and again making him dance to the music of cannon; but Puebla is far from being an enchanting residence, and the peaceful entrée we made did not even embellish with the promise of glory.

Here is an account of our little expedition:—

Our column, composed of 2,000 bayonets, 400 cavalry, and a section of mountain artillery, under command of Colonel Dupin, started on the 11th, and made for La Pasa, for Pachuca, and to the silver mines of Real del Monte—a very picturesque route, crossing for the first eight leagues upon a fine causeway, a series of beautiful plains, and then winding upon a magnificent, undulating country, wonderfully cultivated.

We knew when we started that the city, placed in a state of defence, was guarded by three or four thousand Mexicans of the regular troops, and that the commander-in-chief had just given a most flattering welcome to the fugitive ORTEGA, and shown itself very ill-disposed towards us. This intelligence, however, did not prevent us from our advanced, being repeated from mouth to mouth through the column, and maintaining an excellent morale among our soldiers, certain that we should be received as befitted a halting place, nothing appeared to modify the situation, and our commander-in-chief had taken the most judicious measures to us a brilliant success; confidence beamed from every countenance.

Already Pachuca appeared before us, its white houses distinctly seen climbing the sides of two twin hills. At a league's distance, at half-past nine in the morning, coffee was served to the troops, and we resumed our march in eleven o'clock, in column, by sections in open order, the cavalry of MARQUEZ reconnoitering upon our front and flanks. Nothing announced the presence of the army of the enemy, doubtless made him judge it prudent to precipitate the issue, for we found ourselves hurriedly packed up in baggage and decamped with his artillery and little army, so that as we approached the gates of the city, we were received by the authorities, who came out to meet us, with the most cordial offers of hospitality. What astonished face among us at this unforeseen welcome! Meanwhile the commander-in-chief entered the city by the principal streets, as was traversed them in going to mass ourselves in the great cathedral. At the end of the service, at which a society given up to disorder and evil passions, which will not be understood, the whole was calm and quiet in the streets. The Juarists have only left us 200,000 francs, which they did not have time to carry off; but it was essential to secure *leur aise* against the *large dependence* of which the city could draw important resources. I suppose we are to be left here to protect the mining, and they will dance without us in the city of Mexico!

THE LIFE OF AN ENGLISH CADET.

IT will be of interest to our young soldiers to know something of the daily duties at the Royal Military Academy at Woolwich, England, where the young Briton is taught the theory of the art of war.

In the British army rising is the rule with these young students of war. At six in summer, or an hour later in winter, a very wakeful cadet may hear the *reveille*. It is a bell, however, and not a stirring trumpet that sounds, but a bell. If he is in arrest, or has been the previous day, he "rises" at 6:30 A. M., and has to make for extra drill by the "quarter-past." This extra drill consists in being marched about with an old cutlass in one's hand, by one of the drill-sergeants, in a manner which is known by the terms the names. It is not much punishment in the summer, but in the winter the cold from the hilt of the sword strikes through to the gloves, and makes a whole morning miserable. The drill being over at the "quarter-to," a great amount of brushing goes on in the rooms, the "fall in" for the breakfast parade succeeding. At seven o'clock the hours seven in summer, eight in winter. And now comes the inspection, when the "dirty shirt," the "smokers," or bad-joined cadet, if a speck of dust is seen upon them by the corporal on duty who inspects them in the first instance, or by the officer who takes the inspection, is sent back to change into the inner court, in front of the hall that does the double duty of dining-hall and chapel, they are sure to be told to "run to quit to drill" or "come storming," or "to be in arrest for the day;" while, if they have already been in arrest, or other punishment for the same thing two or three times lately, they must learn the "goose step" in the "awkward squad" order, which generally means until they are brought before the Captain of the company to be told to "mend their ways" next. After breakfast, which is a substantial, though not very sumptuous, repast, and is concluded by prayers (the whole thing "inspection, breakfast, and prayers-only lasting about thirty-five minutes), they have half-an-hour to themselves, which is generally employed in having a morning pipe (smoking being permitted in certain rooms appointed), since the mutiny about two years ago. And now comes the routine. At 9 A. M., when smoking was one of the gravest offences, and generally brought the punishment of solitary confinement on the delinquent if discovered, rather more smoking went on, if anything, than at present.

At eight o'clock (or nine in winter) they have to parade for "Academy," and are marched into the various rooms they study in. The classes are separated into two divisions each, which study the same subjects, and are examined together at the end of the year, but are kept perfectly distinct throughout the year. Each division has a master, or professor, to study having been built in the Academy for the purpose. The professors are, however, professors attend, each taking charge of one-half of the

division. As some of the cadets are much further advanced in some studies than the others, it would be a disadvantage for them all to work together; so each does his work at his own desk independently of the others, going up to the instructor's table when he requires assistance, or to show what he has been doing.

In French, German, and Hindustani, however, each division is subdivided into four sections, each section going up to the professor's or instructor's table on behalf of the attendance. These languages are studied during the evening hours, as all the other subjects either require good daylight, or (like mathematics) are considered to be too exhaustive as to require the freshness and attention that is more likely to be paid to them in the morning than after the labors of the day. For "qualification" the cadets are only required to obtain a certain amount (one-half) of the marks in *one* medium language, but they are all instructed in it, having their choice of studying German or Hindustani. Every month reports of progress are sent in, and a report of "satisfactory," or "very satisfactory," entails a number of days' extra leave; each class-room there is a corporal on duty, who has to keep order, and report and punish misconduct; and twice a week greater offences are reported to the inspector of studies. The attendance lasts until eleven o'clock in summer, and half-past eleven in winter.

A quarter of an hour after morning Academy there is a parade for drill, when the cadets are again inspected by the officer on duty, the cadets, on joining, as at the theatre, the ordinary recruit drill, and after mastering the mysteries of "forming four," &c., and having been drilled as a company, they are dismissed as fit to join in the ordinary battalion drill. In their second term they are taught field-gun drill with the help of three-pounder guns, divided into a company, and generally also mortar drill. During the third term they learn the sword exercise, and, probably, if they are studying for the Engineers, the use of the rifle as taught in the Academy work. During the last two terms they are taught siding the garrison riding-school. The school, like our West Point Academy, must be a delightful one.

Every Wednesday the whole company is formed into a battalion, and performs battalion drill, the cavalry and artillery band generally attending to play while marching past, &c. In the summer, those who have gone through their mortar drill go down to the sea, where they are taught in practice at a flagstaff. As the shells have only a cartridge in them, the staff is not brought down more than once in a couple of minutes, as, either by the wind or bad shooting, the drill is over by a quarter before one, or sooner, to give time to wash and change before the 1 at one o'clock, and consists of alternate beef and mutton, with vegetables in season, and twice a week a pudding or pie—the Sunday dinner being the same as at least half of the week-days dinners. The two o'clock they go into Academy again for two hours, and at a quarter-past four parade for drill, except on Wednesdays and Saturdays, when they have the day to themselves. Those who have been dismissed drill for that term are allowed generally to leave the parade; the others go on till about half-past five in summer, and a quarter to six in winter. Academy begins again at six or five, according to the season, and lasts till half-past seven. A quarter of an hour after coming out they parade for prayers and tea, after which their time is their own till roll-call, which is at ten o'clock, or sooner, according to the time of the year, when the officer and corporals on duty have been round the rooms to see that every one is present, the doors of the houses are locked, and the lights put out, being afterwards allowed to make notes on the manufacture of all the various kinds of guns, shot, shell, &c.

On Saturday the cadets in the first class can get leave after four o'clock, by sending in an application for it, stating where they are going, until either Saturday or Sunday night. The other cadets have to apply to their captains for the place where they are going. Under-officers and corporals come back from leave at the appointed time, but have to be back by roll-call. There are two vacancies in the army at each rank, commencing about the middle of December and end of June, for the first six months.

We are requested to call the attention of the members of the New York volunteer regiments to the Bureau of Military Statistics, which has been established at Albany in accordance with the provisions of the Legislature of the State of New York, at its last session, for obtaining and preserving in permanent form, the history of New York troops in the present war. The plan contemplates the collection of documents and records pertaining to regiments and other commands, and, so far as possible, an authentic sketch of every person in the State who has volunteered into the service of the General Government since the 15th day of April, 1861. The records of the Bureau will consist of muster-rolls, and rolls giving an account of their organization, and subsequent history and operations, together with an account of the aid, in men and means, afforded by the several counties, cities and towns of the State towards the prosecution of the present war. It is intended also to form a collection of the flags of regiments, so they may from time to time be replaced by new ones, or the regiments are consolidated or mustered out, and to preserve such trophies and relics as may be procured in connection with the operations of the army. It is proposed as far as possible to make biographical notices, narratives, published documents and original manuscripts relating to carefully kept for future reference and use, under such regulations as may be necessary for their safety. Such photographic or other portraits of officers or privates, as may be contributed to the collection, will be indexed and bound, or otherwise preserved.

ITEMS AND INCIDENTS.

A petition, signed by the Governor of Massachusetts and many prominent citizens, urges upon Congress the passage of a law providing for a uniform ambulance and hospital system.

Doctor Kidd writes to the London *Medical Times and Gazette* that "thirty-six deaths from chloroform are noted this year, all due to the want of A B C knowledge of the subject."

Dubois the absence of Medical Director H. W. Hand, Surgeon R. B. Hagner, U. S. Vols., has been temporarily assigned to duty as Medical Director of the District of North Carolina.

The State of Massachusetts has contracted for seventy artillery carriages, consisting of the light 12-pounder or Napoleon gun, and the 10-pounder Parrotts, with all their implements, equipments and harness, ready for service.

Bishop-Major-General Polk has made a farewell address to his late military flock. He speaks of an unfortunate misunderstanding between himself and the General commanding the department, and claims that official investigations will clear his record.

Experiments have proved that compressed sugar bags hair does not possess the power of resisting, when calibred for it. A fifty-pound ball, propelled by three and a half pounds of powder, passed through the compressed sugar part of solid hair, and a backing of four feet of clay, and eighteen feet into an embankment in the rear.

Colonel W. Hoffman, Commissary-General of prisoners, has decided that *the allowance for the commutation of rations while a prisoner is entirely a personal one, and cannot be claimed by heirs or executors*. Hence, the pay of officers who have parents of many families of prisoners who may have died in Libby or other prisons of rebeldom.

California sends another regiment to the General Government for more troops, to protect that State against Indians, in the northwestern counties. Many settlements have been broken up, and many citizens murdered, the frontier the white men are on the defensive. Mail communication is interrupted, and transit through extensive tracts is extremely dangerous.

Brigadier-General J. A. Garfield, Chief-of Staff to General Rosecrans, telegraphs as follows from Chattanooga to Brigadier-General Boynton, Cincinnati: "Many of the officers who surrendered at McMinnville and have them tried for their surrender will be shot. Those who surrendered will be disgraced and punished. Publish this telegram in the newspaper. Notify the Bridge Guards that *no surrenders are allowed*."

A resolution has been adopted by the Vermont House of Representatives declaring that the exigencies of the times demand a thorough reorganization of the enrolled militia of the State into companies, and regiments, and brigades, with provision for arming the same; also for an efficient drill of each company and regiment, and providing for the annual encampments for the instruction of the entire militia by regiments and brigades.

A Paris letter says:—"The Russian government has adopted a new system with respect to the officers who desert to the insurgents. They declare them to be mad, and consider them in a lunatic asylum. A Polish paper just published at Kreif latyl announced that an ensign of the Kronstadt regiment, named Apollo Kurtschef, confined in the fortress of Schlusselburg, for having failed to his duty to his sovereign and violated his oath, had become insane, proclaiming himself King of Poland, under the title of Apollinaire I."

Brigadier-General B. F. Kelley, commanding the Department of Western Virginia, has forwarded to the War Department the reports of Colonel Moore, Milligan and Major E. W. Stephens concerning the disaster at Moorfield, Hardy county, on the 7th instant, in which occasion a body of five hundred rebel troops completely surprised a detachment under command of Major Stephens, consisting of Captain Lee's company of Pennsylvania Cavalry and six companies of the First Virginia Cavalry, of whom about one hundred and fifty were captured, including some fifty teamsters. The reports are forwarded to the Secretary to investigate the matter, which request is approved by Colonel Hayman, commanding the division to which the troops were attached.

The commissioners for the harbor and frontier defence of the State of New York have issued proposals for the construction of timber rafts or booms to protect the outer harbor at several of its most exposed points. This is the first practical movement that has been made since the panic, and for the execution of which the State purchased a large amount of lumber. It would appear from the proposition of the commissioners that the rafts have been sold again, for the contractor is expected to furnish all the materials. The plan has been carefully considered by some of the ablest engineers of the country, and the opinion of the best temporary system of protection that can be devised. After the rafts are completed they will be anchored near the places which they are intended to protect, and towed into position only when they are needed for service.

French Bibliography.—"You know," says a Paris correspondent of the London *Spectator*, " of course, that Col. Charras, an old friend of the Emperor, has published a remarkable book on the campaign of 1815 and the battle of Waterloo, in which he attacks the Napoleonic struggle analyzed and discussed from a soldier's point of view, and the result was that the gallant author, himself a military celebrity of great note, concluded against the fanciful story recorded in the 'Mémorial de St. Hélène,' laid all the blame on the first Napoleon, and gave the praise to Wellington. Although the book did not so much as mention Napoleon III, it had to be published in Brussels. The sixth edition is about to appear, and will contain, I believe, a special chapter of 100 pages, for the purpose of refuting the last volume of M. Thiers' history, he wanted to have his maps engraved in Paris, by a high firm, which does these things for the French War Office. The firm readily consented, when the Secretary of State suddenly informed them that their connection with his office would at once be discovered if they executed the order. Afterwards a Belgian engraver undertook the work, for which he desired to obtain a special kind of paper manufactured in France; the manufacturer was, however, forbidden to provide it."

Organization of the Invalid Corps.—Five regiments of the Invalid Corps have just been organized, viz: The 3d, 4th, 11th, 12th, and 13th. Each regiment is composed of six companies of the first battalion (men armed with muskets) and four companies of the second battalion (men detailed for duty in hospital and on other special duties). The new regiments will rendezvous at the following named places:—

3d Regiment, Col. F. D. Sewall, at New Haven, Conn.

4th Regiment, Colonel Ambrose Stephens, at Indianapolis, Indiana.

11th Regiment, Colonel P. S. Porter, at Elmira, New York.

12th Regiment, Colonel Amos Farnsworth, at Albany, New York.

13th Regiment, Colonel John Hedderson, at Wenham, Mass.

Other regiments of the corps are in process of organization. The troops of this corps are rapidly taking the places of hardy three years' men, who for some time past have been doing guard duty at their old posts, and who, of course, will be marched into the field as soon as relieved by the invalids.

Hints on Health in Armies, for the use of Volunteer Officers. By John Ordronaux, M.D., Professor of Medical Jurisprudence in Columbia College. Second edition, with additions. New York: D. Van Nostrand. This work is practical treatise on the subject of the prevention of sickness in both recruits and veterans, whether in barracks, in camp, on the march, or in any other military situation. It is not written by a professional author (a medical staff though every military surgeon may study it with profit), but by a practical surgeon man, intellectual language, and in a style of perspicuity which makes it easy reading for the unlearned. Though of a size convenient for the pocket, it touches fully on all the hygienic points needed by the soldier—as exercise, food, clothing, drill, camp and other duties, including a summary of the rules governing the examination of recruits for the service, by agreeable reading, independent of the instruction it contains, one ought to be a better and more disciplined man. We have no hesitation in saying that by it combination of this info without theory through the ranks the Government or the Sanitary Commission, it would display an act of wisdom, both in supplying something to read, and in teaching it, to the intelligent life-preserving thoughts. On only one point would we criticise and correct it, viz, on the allowance of tea said to be required in tents, barracks, &c. Its recommendation of *400 grains per day* is double, as far more than is often obtained, should have been *10 cubic feet* of space, as the minimum amount for perfectly healthy respiration. With this exception the book is worthy of all credit.

An Absurd Story.—The Paris correspondence of one of the British military journals contains the following absurd paragraph:—"Napoleon III. is to abandon Mexico to the United States. Before rebellion broke out, the Pacific States had the intention of forming a Republic, to favor the determination of the South, and Fremont said, when he left Europe, he would soon show himself in her wake." The Pacific States have not come out in favor of secession, but loyal, and became without a fleet no success would be of use. Jonathan's wisest would trample them into subjection very shortly. It is believed that Mr. Lincoln has aimed his naval battle to France, that he receive Jeaffe' ambassadors, and will not recognize the Confederacy as a Republic in Mexico, the South intend to take advantage of this attitude. They have no intention of forcing it on the French Government, and they now wish that Napoleon would withdraw his troops from up to the California gold fields. If Midas Napoleon would take a dip in the Yankee Pactolus all would turn to gold for the South. Let France keep her troops in Mexico, and go to the Pacific rather than Acapulco—to Guaymas—and then the Pacific States, no longer in dread of naval power, would declare their independence; France might then withdraw her troops to the Rio, and the Monroe doctrine would be checkmated, and no more anxiety be caused with regard to the ambition of Gallic-Mexican empire. Perhaps France is already taking some preliminary steps in the matter, for Mexico is ordering from Europe a fleet of iron-clad steamers, and about to create or create a naval school on the Isle of Carmen on its Pacific coast. Considering what France has been doing, the tone of the Washington cabinet has been most obliging and humble. It is not unlikely that Mr. Lincoln and his advisers see how much easier is Guyana, and think they have gone enough to occupy their hands with one secession at a time.

The *Spectator Militaire* for July contains a well written account of the siege operations in front of the city and production of Puebla by the French. The investiture of Puebla was commenced on the 19th of March, and it surrendered the 18th of May. The plan of the siege was, in the first place, to surround the city with posts or detached works sufficiently strong to prevent the escape of the Mexican General Comonfort, with his troops on the outside, from succoring General Ortega, who commanded the garrison; and in the next place to form a second front to penetrate into the heart of the city step by step, forcing his way through the enemy's positions and defences by sap, embrasures, and of course holding each successive point acquired until the conclusion.

A Military Board is ordered to convene in the Department of the South, for the purpose of examining commissioned officers of Volunteers who may be ordered before it. The following is the detail for the Board:—Brig.-Gen. Israel Vogdes, U. S. Volunteers; Col. Edwin Metcalf, 3d U. S. Artillery; Col. N. B. Buford, 1st U. S. Volunteers; Lieut.-Col. R. H. Jackson, Assistant-Inspector-General; Capt. Wm. S. Diller, 76th Penn. Volunteers.

ARMY GAZETTE.

BATTLE AT BLUE SPRINGS.

KNOXVILLE, TENN., October 17, 1863.

Major-General B. W. Halleck, General-in-Chief:

On the 5th instant the enemy held down as far as Blue Springs, and a cavalry brigade of ours held Bull's Gap, supported by a small body of infantry at Morristown. I accordingly dispatched a brigade of cavalry around to Rogersville to intercept the enemy's retreat, and with a considerable force of infantry and artillery moved to Bull's Gap. On Saturday, the 10th, advanced the cavalry brigade to Blue Springs, where they found the enemy strongly posted and utilizing a skeleton entrenchment. Skirmishing continued during the day, at intervals about 5 P. M., when I sent in a division of infantry, in charge of General Shackelford, to drive the enemy from the enemy in confusion till dark. During the night the enemy evacuated precipitately, leaving their dead on the field, and many of their wounded in our hands. We pursued in the morning with cavalry and infantry. The interrupting force met them at Rheatown, but owing to some misunderstanding with the infantry commander, was not with sufficient force to detain them. The pursuit was continued all evening, when I with five regiments of cavalry and artillery returned to camp.

General Shackelford, with his cavalry and a brigade of infantry, continued the pursuit, and overtook the enemy in a very strong defensive position; but he has driven them completely from the State, captured his fort at Zollicoffer, and burning the long railroad bridge at that place and five other bridges, and destroying three locomotives and about thirty-five cars.

His advance is now ten miles beyond Jetsell.

Our loss at Blue Springs and in the pursuit was about 200 killed and wounded; the enemy's considerably greater; about 100 prisoners were taken.

A. E. Burnside, Major-General.

CAVALRY ENGAGEMENT IN TENNESSEE.

CHATTANOOGA, Oct. 18, 1863.

Major-General H. W. Halleck, Washington:

The following dispatch has been received from Brigadier-General George Crook, commanding the Second Cavalry Division, Army of the Cumberland, dated Sept. 20th, 1863:—

Sept. 20.—I have the honor to inform you that I have had three fights with the enemy since I left the Sequatchie Valley, whipping him very badly each time. The last was on the 18th, at Alpine, Georgia, where I caught Wheeler's entire command with only two brigades. I cut the force in two, capturing the whole of the rear portion, four pieces of artillery, 1,000 stand of cavalry arms, and 250 prisoners, besides the wounded.

"As I pushed on after the enemy immediately, I have not been able to ascertain the number of their killed and wounded, but it was very heavy. They were scattered over a distance of fifteen miles from this, and strewn all over the road. I am now in pursuit of them and struggling over the country. I pursued them with great vigor, but their knowledge of the latter than mine. I am now in pursuit with a couple of regiments at finger crack, left to detain me. I made a charge on them, driving them off the road, and killing and taking a number in the woodlands. When within eight miles of the top I all struck the top, but when I reached it I found the enemy had all crossed as it fired some three miles above Sample Ferry, where they commenced to cross about daylight.

"I never saw troops more demoralized than they were. I have no idea that their loss in this pursuit was not less than 2,000. No fear need be entertained of their making another stand.

Signed, George Crook, Brig.-Gen. and Commanding.

W. S. Rosecrans, Major-General.

TWENTIETH AND TWENTY-FIRST ARMY CORPS.

HEADQUARTERS ARMY OF THE CUMBERLAND, CHATTANOOGA, Oct. 8, 1863.

General Order No. 223.—The President of the United States has directed that the 20th and 21st Army Corps be consolidated, and has assigned Major-General Gordon Granger to the command of the corps thus formed, which will be hereafter known as the 4th Army Corps. The commanders of the corps and of the several divisions commanding officers notified in obedience to orders from the Secretary of War. Major-Generals A. McD. McCook and T. L. Crittenden are relieved from duty in this department, and will obey the orders that have been issued from the War Office. They will be accompanied by their aides-de-camp. The remaining officers of their respective staffs will report at these headquarters for assignment.

By command of Major-General Rosecrans.

C. Goddard, A. A. G.

THE CAVALRY CORPS—ARMY OF THE POTOMAC.

HEADQUARTERS ARMY OF THE POTOMAC, October 16, 1863.

General Order No. 329.—The attention of the Major-General commanding having been called to the omission in General Orders No. 95, of the 16th inst., from these headquarters, to mention the services of the Cavalry Corps, detached part of the rear guard on the 14th instant, to take the enemy in flank as the rear brigade of the infantry passed the column, and the only of the Second division, but of the whole cavalry corps engaged in the affair, and which was conducted in all its subsequent operations from the Rapidan to this place.

By command of Major-General Meade.

S. Williams, A. A. G.

EXPEDITION AGAINST GUERRILLAS.

FORTRESS MONROE, October 2, 1863.

Major-General B. W. Halleck, General-in-Chief:

I have the honor to report that the expedition sent out on Sunday under General Wistar, to break up the guerrilla bands infesting the lower counties of this peninsula, especially in Matthews county, has returned, having destroyed the encampments and the stock of the guerrillas, consisting of one mare, and twenty-five head of cattle belonging to the confederates, and with them two muskets and some small arms. No lives were lost. A large number of rebel boats were destroyed. Our loss was one man killed and one wounded. The object of the expedition, the infantry (colored) making thirty miles in one day, with no straggler.

John A. Dix, Major-General Commanding.

SENTENCES OF COURTS-MARTIAL.

The following officers have been tried since August 1, 1863, by Court-Martial for various offenses, and sentenced to be dismissed the service of the United States:

Brigadier-General Joseph B. Carr, Second Corps; 1st Lieut. Colonel Edward Cross, 5th New York Volunteers; Major Joseph Snowden, 6th Iowa Cavalry; Second Lieutenant Philander D. Miller, Company A, 8th Ohio Volunteers.

Assistant-Surgeon William Robinson, 8th Kentucky Volunteers.

Captain George Bisman, 32 Missouri Volunteers.

Captain William A. Townsley, Company B, 8th Ohio Volunteers.

Second Lieutenant R. B. Van Horn, Company C, 124th New York Volunteers.

Second Lieutenant Joseph R. Clark, Company G, 6th Indiana Volunteers.

Second Lieutenant J. B. Bowley, 133d New York Volunteers.

Brigadier-General Joseph W. Revere, U. S. Volunteers.

Second Lieutenant Timothy Sculls, Company I, 44th Indiana Volunteers.

Second Lieutenant Philander D. Miller, Company A, 8th Ohio Volunteers.

Assistant-Surgeon William Robinson, 8th Kentucky Volunteers.

Captain George Bisman, 32 Missouri Volunteers.

Captain William A. Townsley, Company B, 8th Ohio Volunteers.

Second Lieutenant R. B. Van Horn, Company C, 124th New York Volunteers.

Second Lieutenant Joseph R. Clark, Company G, 6th Indiana Volunteers.

Second Lieutenant J. B. Bowley, 133d New York Volunteers.

Brigadier-General Joseph W. Revere, U. S. Volunteers.

Second Lieutenant Timothy Sculls, Company I, 44th Indiana Volunteers.

Second Lieutenant William H. Tanner, Company B, 66th New York Volunteers.

Lieutenant-Colonel Charles Ewing, Jr., Brigade, 3d Missouri Volunteers.

Captain Charles Bleiker, 1st Louisiana Cavalry.

Second Lieutenant Edward G. Pumpelly, 1st Minnesota Vols.

First Lieutenant Edward A. Calahan, Company C, 125 Indiana Volunteers.

First Lieutenant and Adjutant George W. Easley, 2d Missouri Volunteers.

Second Lieutenant William H. De Freest, Company F, First Cavalry, Iowa Volunteers.

Captain Oliver Culter, 5th New York Volunteer Artillery.

Captain D. B. Hall, 6th New York Volunteer Artillery.

Second Lieutenant William Robertson, Company F, 1st Michigan Engineers.

Second Lieutenant Charles C. Savage, 6th New York Volunteers.

PROMOTIONS.

During the week ending Saturday, October 17, 1863.

Second Lieutenant Thomas L. Donovan, Company F, 1st District of Columbia Cavalry, to date October 10, 1863, for absence without leave and breach of arrest.

First Lieutenant W. J. Keys, Company D, 26th New York Cavalry, to be Captain, to date July 22, 1863, vice Young, to be wounded, with a loss of 29 of his men killed, wounded and captured by the enemy.

Lieutenant-Colonel Edward H. Flood, 1st Pennsylvania Light Artillery, to be Colonel, to date Sept. 22, 1863, vice Kirkpatrick, whose name was published officially Sept. 25, 1863, and failed to make satisfactory excuse before the Commission.

Second Lieutenant James Lunn, 1st Delaware Volunteers, to date September 22, 1861, for conduct unbecoming an officer and a gentleman, and disobedience of orders, vice Hall, whose name was published officially September 22, 1863, and failed to appear before the Commission.

Colonel F. S. Rutherford, 67th Illinois, for absence without leave.

DISMISSALS.

The following officers, charged with offenses heretofore published, are reported by the Commission to have been duly tried, and found guilty, having made satisfactory defense in their cases:—

Lieutenant-Colonel F. E. Patterson, 1st General Peroves.

Captain F. W. Fox, Assistant-Adjutant-General of Volunteers.

First Lieutenant Charles A. Bell, 1st Pennsylvania Cavalry.

Captain C. W. Hillinsell, Assistant Quartermaster of Volunteers and Chief Quartermaster.

The following officer, heretofore dismissed, is restored, provided no vacancy has occurred in the Regiment since his dismissal:

Second Lieutenant Lemuel W. Jones, 8th Pennsylvania Cavalry.

RESIGNATIONS.

The following officers having been reported at the headquarters of the Army for non-performance of duty, are hereby notified that they will stand dismissed from the service of the United States unless within fifteen (15) days from October 19th they appear before the Military Commission, in session in Washington, of which Brigadier-General Joseph Holt, Judge-Advocate-General, is President, and make satisfactory defense to the charges against them:—

Improperly absenting themselves from their commands for the same, without proper authority, while a vacation.

Lieutenant-Colonel E. L. Patrick, 51st New York Volunteers.

Desertion.

Assistant-Surgeon Wallace D. Martin, 62d Pennsylvania Volunteers.

MEDICAL DEPARTMENT.

ORDERED.

Assistant-Surgeon C. R. Greenleaf, U. S. Army, has been relieved from duty in the Department of the South, and ordered to Fort Monroe, and ordered to report in person, without delay, to Surgeon J. Simpson, U. S. Army, Medical Director Department of Virginia and North Carolina, at Fort Monroe, Va.

Assistant-Surgeon T. C. Bedford, U. S. Army, has been relieved from duty in the Department of the South, and ordered to report for duty at the Chesapeake General Hospital.

Assistant-Surgeon-General B. C. Wood, U. S. Army, has been ordered to report to Surgeon J. K. Barnes, U. S. Army, at that place, instead of St. Louis, Mo.

Assistant-Surgeon C. D. Graw, U. S. Army, has been ordered to repair to Washington, D. C., to report in person to the Surgeon-General, U. S. Army, for assignment to duty.

Surgeon D. L. Magruw, U. S. Army, has been relieved from duty in the Department of the Cumberland, and ordered to report to Surgeon Foltz, to Louisville, Ky., and relieve Surgeon A. P. Meyler, U. S. Army, who will report in person to Surgeon Foltz, at that place.

Assistant-Surgeon H. L. Sheldon, U. S. Army, has been relieved from duty in the Department of the Cumberland, and ordered to report to Assistant-Surgeon-General R. C. Wood, U. S. Army, at Louisville, Ky., and relieve Surgeon A. P. Meyler, U. S. Army, commanding the Department of the Gulf.

Assistant-Surgeon C. H. Crane, U. S. Army, has been relieved from duty in the Department of the Gulf, and ordered to repair to Washington, D. C., and report to Assistant-Surgeon-General J. Woodward, U. S. Army, now on duty in the Surgeon-General's office.

Assistant-Surgeon J. Woodward, U. S. Army, now on duty in the Surgeon-General's office, on being relieved by Assistant-Surgeon W. Thomas, U. S. Army, will proceed to Fort Schuyler, and report to Fort Porter, N. Y., and relieve Assistant-Surgeon R. L. Sheldon, U. S. Army, now on duty at that post.

Assistant-Surgeon H. L. Sheldon, U. S. Army, has been relieved from duty in the Department of the Cumberland, and ordered to report to Surgeon John Campbell, U. S. Army, Philadelphia, Pa., Medical Director of the Department of the Susquehanna.

The Board instituted by Special Orders No. 434, September 18th, 1863, of the War Department, and of which Surgeon Foltz is President in the Department of Washington, D. C., has been ordered to examine the hospitals in the Department of the Ohio, and to make out and forward the names of all the occupants, whether patients or enlisted men, connected temporarily with the hospitals, or belonging to them, the names of all the regular soldiers, whether sick or not. The company and regiment of each soldier will be given. The Board will report to Surgeon in charge of the hospitals.

Surgeon R. H. Gilbert, U. S. Army, has been relieved from duty with the 20th Army Corps, and ordered to report in person

NAVY GAZETTE.

NAVAL DISPATCHES FROM JAPAN.

U. S. STEAM-SLOOP WYOMING, }
Yokohama, July 25, 1863.

SIR—On the evening of the 16th news was received, through a Japanese source, that an American steamer had been fired on by a junk and forts at Shimonoseki, in the Prince of Nagato, at the western outlet of the inland sea, and that she had disappeared and was supposed to be lost. On the following morning the same evening brought satisfactory information that the American steamer *Pembroke*, on her passage down the inland sea from Hiogo, had been fired on, had sunk her assailant by the guns of her own vessels, and had made her escape through the Bay of Simonoseki—information which was confirmed on the affair by the Captain of the *Pembroke*.

On the 17th we left this place for the scene of the outrage, and arrived off the town of Simonoseki on the morning of the 20th, and anchored off the batteries.

On the night of the 16th, we proceeded in the straits, and on entering the town of Simonoseki discovered a steamer, brig, and three-masted vessel at anchor. We stood for the steamer, and the flag of the Prince at the fore. We stood for the vessels, as an opportunity was given for the Prince to answer for the outrage in different positions, mounting from two to four guns each. Passing between the brig and three-masted vessel, and receiving no answer on the port, we reversed and returned their fire at point shot; rounding the brig for the steamer ran down on the port side, and fired a broadside for about one hour. During the affair the steamer got under way, but two well-directed shells exploded her boilers. The brig appeared to be settling by the stern, and no doubt sunk. The amount of damage done the brig could have been serious, as well as great direction on shore. The straits opposite the city are about three-fourths of a mile wide, and the vessels were anchored as near the shore as to manœuvre the ship properly. As I had no charts and my plans were suddenly changed, I was unable to anchor sufficiently near to shore (in fact did touch once), I was induced to withdraw out of action.

The engagement was a satisfactory one, and the vessels were silenced in so long as we were in range. We were baited down stream, with considerable damage to the vessels, but no loss of life. The punishment inflicted and in store for him will, I trust, teach him a lesson that will be of benefit to all foreigners.

On the 7th instant the French dispatch-steamer *Kien Chang*, passing through the Inland Sea, was fired on by the batteries, and considerably injured; and on the 10th H. B. M. ship *Sedaire* was also fired on, and sustained some damage near the same place, but not of a serious character.

As soon as the outrage on the French steamer was known here, the French Admiral proceeded to the Inland Sea, and off the mouth of Simonoseki, and no doubt will complete the punishment due for the wanton violation of the treaties.

The *Jeannieres* was at Woosung on the 16th, to sail immediately to this port via Nagasaki, and may arrive in a few days.

I enclose a preamble plan of the straits, the position of the vessels, and more intimate knowledge, all of which is respectfully submitted.

Your obedient servant,
D. MCDOUGAL, Commander.

Hon. GIDEON WELLES, Secretary of the Navy.

U. S. STEAM-SLOOP WYOMING,
Inland Sea of Japan, July 17, 1863.

SIR—In consequence of the outrage committed on the Japanese at Simonoseki, yesterday, I beg leave to report the following casualties:

Killed, Alexander Gibson, seaman, killed.
William Clark, seaman, killed.
George Watson, landsman, killed.
Michael Lynch, coal heaver, killed.
James Gordon, quartermaster, severely wounded; since died.
Andrew Wallace, captain of after guard, very severely wounded; since died.
William Thompson, seaman, very severely wounded; since died.
Thomas Stevens, seaman, severely wounded.
Michael Doyle, ordinary seaman, severely wounded.
William Fowler, seaman, slightly wounded.
Charles J. Murphy, seaman, slightly wounded.
Total killed, 4; wounded, 6.

I am, very respectfully, your obedient servant,
R. L. JAMES, Lieut. U. S. Navy.

Hon. GIDEON WELLES, Secretary of the Navy.

CASUALTIES OF THE UNITED STATES, }
Shanghai, July 3, 1863.

SIR—The George F. Seward, Consul-General United States for Shanghai, China, personally supported Captain Simon W. Cooper, Samuel H. Wells, Acting Master, and Thomas Pickering, Acting Ensign, and Wm. Jones, Second Officer, all of whom are attached to the American steamer *Forest City*, in the recent affair at Ningpo, who, being severe, all degree: On the 26th ultimo, while we were pursuing our way up the Yangtse-Kiang River, with the exception of the inland sea and Nagasaki, we then being near the western entrance of the inland sea, we were fired upon by the batteries of Simonoseki, under the following circumstances:

We had passed the batteries in the morning. We proceeded on our way to the voyage to Shanghai. On the 25th ultimo, at about two P. M., we passed the entrance to Simonoseki Harbor. The wind was dead and fair for us, with but no oreign act. At 4 we had anchored for the night, and were at the time about three miles from the Japanese flag fort. The wind was the same as those used on all Occidentals war vessels. It is a square sail, and is generally used on the sail by the masts. The batteries are on the north and south sides of the head of the entrance straits, a quarter of a mile away. As she approached us a gun from the South battery was fired, and at once all the signal was repeated all along the coast. During the morning she was worked somewhat favorable to the wind, and at noon was about 10 s. s. she commenced firing at us. We could discern the vessel plainly and could see the men working the guns. The fire was very dark.

After she had fired a dozen shots, one of which cut away our top mast rigging, and all passed close to us, a brig, which we recognized as a Japanese brig, and the Tycoon's steamer, which we knew from their shape. She passed about forty yards from us and dropped anchor, and discharged, but we had got up steam and ran out of the exception through the Bunga Channel, a narrow and dangerous road. We had to restrain the native pilot, who attempted to escape. During the whole time shells were in motion all around the ship, the noise of many boats distinctly heard by us. When the *Lorcast* passed as a terrific yell was raised from both vessels. The brig was then discharged at us, but the moment we should have been destroyed. Our guns were limited, and the shells fell short of the mark, and we were not injured.

The inland sea is frequented by foreign vessels; we had no notice that we should meet with any hostility that way.

Sworn and subscribed to before me the day of the year above mentioned.

GEORGE F. SEWARD, U. S. Consul.

SIMON W. COOPER,
J. W. LEAVITT,
J. L. TOLTON,
WILLIAM JONES.

U. S. STEAM-SLOOP WYOMING,
Yokohama, July 28, 1863.

SIR—Admiral Jarvis arrived at this place yesterday morning (28th), bearing with him the following report:

One of his ships, the *Tancred*, was fired on by the shore batteries. He landed a force and destroyed the batteries and spiked the guns. He has seven days' provisioning large quantities of ammunition.

They mention that they saw the topmast of a sunken ship. As they did not approach nearer than about two miles to where the vessel lay, the exact nature of the damage done to this ship.

The Admiral mentioned that, in passing through the straits, the steamer was on shore on one of the straits and badly injured, but not so satisfied but she never moved. Her name could not be learned.

Through the Japanese, reports were current and believed at the time that the boilers exploded forty lives were lost on board of the vessel.

I would mention that it was my intention to have returned with the Admiral had I met him on his passage down.

The Minister of the different treaty Powers are now in consultation as to what future steps are to be taken in regard to existing affairs.

I hope the course I have pursued, in vindicating the honor of my flag meet with your approval, sir.

I have the honor to be, very respectfully, your obedient servant,
JOHN C. KELLER, Commander.

Hon. GIDEON WELLES, Secretary of the Navy.

REGULAR NAVAL SERVICE.

PROMOTED.

Paymaster George Plunkett, to duty in the Bureau of Provisions and Clothing.

Second-Assistant-Engineer Peter A. Roach, to the *Britannia*.

Assistant-Paymaster Wm. H. Gilbert, to the *Sonoma*.

Assistant-Paymaster Wm. H. Ellis, to the Mississippi Squadron.

Ensign R. F. Bunting, to the Mississippi Squadron.

Ensign George M. Brown, to the West Gulf Squadron.

Acting-Master Thomas W. Hall, to the *Augusta*, to the *Metabesett*.

Second-Assistant-Engineer William S. Smith, to the *Powhatan*.

Third-Assistant-Engineer Thomas Hall, to the *Sassacus*.

Third-Assistant-Engineer Jesse Wilkin, to the *Monticut*, vice Third-Assistant-Engineer Hall, detached and ordered North the duty in the Bureau of Steam Engineering.

Third-Assistant-Engineer Wm. Thompson, to the *Metabesett*.

Third-Assistant-Engineers John T. Hankins, Josiah Paxson, and Joseph Hall, to the Mississippi Squadron.

DETACHED.

Assistant-Paymaster A. McKeever, from the Wyandot, and awaiting orders.

Lieutenant-Colonel Alfred G. Reed, detached from the West Gulf Blockading squadron, and ordered North.

PROMOTED.

Midshipman Robley D. Evans has been promoted to the grade of Ensign, dating, and ordered to the *Susquehanna*.

DEATHS.

Deaths in the Naval Service, reported during the week ending October 17, 1863:—

Thomas Hall, seaman, intermittent fever, September 23, United States steamer *Memphis*.

Thomas Hall, seaman, acute diarrhœa, September 22, United States steamer *Blackstone*.

Thomas Hall, seaman, remittent fever, yellow fever, September 22, United States steamer *Fernandina*.

Thomas Hall, seaman, remittent fever, yellow fever, September 24, United States steamer *Fernandina*.

Thomas Hall, seaman, remittent fever, yellow fever, September 26, United States steamer *Fernandina*.

Thomas Hall, seaman, remittent fever, September 20, United States steamer *Hollyhock*.

Thomas Hall, seaman, remittent fever, September 25, United States steamer *Hollyhock*.

Thomas Hall, seaman, remittent fever, September 30, Naval Hospital, Memphis.

Thomas Hall, first class boy, remittent fever, October 2, Naval Hospital, Memphis.

Thomas Hall, ordinary, first class boy, remittent fever, October 3, Naval Hospital, Memphis.

Thomas Hall, ordinary, first class fireman, chronic diarrhœa, October 4, Naval Hospital, Memphis.

Thomas Hall, ordinary, dysentery, diarrhœa, August 25, United States steamer *Blackhawk*.

Thomas Hall, ordinary, first class boy, diarrhœa, August 25, United States steamer *Blackhawk*.

John Hall, ordinary, seaman, remittent fever, August 27, United States steamer *Conestoga*.

John Hall, ordinary, coal heaver, typhoid fever, September 24, United States steamer *Sonoma*.

Patrick Kane, landsman, concussion of brain, September 3, United States steamer *Hartford*.

Sylvanus W. Cox, acting master, gun shot wound, August 6, United States steamer *Kanawha*.

Henry Curtis, seaman, consumption, Naval Hospital, New York.

Henry Hall, ordinary seaman, chronic diarrhœa, Naval Hospital, Memphis.

William Robinson, boatswain's mate, diarrhœa, Naval Hospital, New York.

Jeremiah Johnson, landsman, pneumonia, Naval Hospital, New York.

William P. Hemsworth, third assistant engineer, remittent fever, August 24, United States steamer *Kanawha*.

Allen P. Spear, lieutenant, yellow fever, September 18, *Nightingale*.

James McGinnis, ordinary seaman, drowned, September 19, *Sarah Bruen*.

Joseph Moss, acting ensign, yellow fever, *Sea Foam*.

John Lawrence, ordinary seaman, drowned, September, *Sea Foam*.

Charles Morris, acting master's mate, September 25, *Hollyhock*.

R. D. Green, acting ensign, yellow fever, September 25, *Hollyhock*.

Wilcox Jasper, landsman, pneumonia, September 2, Mississippi Squadron.

David Lott, fireman, drowned, September 14, Mississippi Squadron.

Thomas Hall, seaman, fever, March 25, Naval Hospital, July 25, Mississippi Squadron.

Thomas Hall, seaman, fever, March 25, Mississippi Squadron.

Jas. Driscoll, landsman, drowned, March 29, Mississippi Squadron.

Thomas Hall, ordinary seaman, fever, March 25, Mississippi Squadron.

Michael Nicholas, seaman, dysentery, January 7, Mississippi Squadron.

Daniel Young, seaman, dysentery, January 14, Mississippi Squadron.

Thomas Hackett coal heaver, dysentery, March 16, Mississippi Squadron.

Albert C. Smith, second assistant engineer, jaundice, September 1, *Augusta*.

James Higgins, second class fireman, pneumonia, October 12, Naval Hospital, Chelsea.

VARIOUS NAVAL MATTERS.

THREE Iron-clad vessels on the plan of Captain Ericsson, are in process of construction.

THE Russian war steamer *Oderain* arrived at San Francisco, from Japan, on the 15th inst.

THE schooner *Florrie*, captured by the supply steamer *Bermuda* in St. Mark's river, Florida, on the 10th instant, with a cargo of assorted cargo, had arrived at New Orleans.

THE steamer *Ella* and *Annie*, arrived from Halifax, N. S., during the night of the 20th. She had a valuable cargo of blankets, clothing, &c., destined for Richmond.

THE gunboat *Madgie* foundered at sea near Frying Pan Shoals, on Sunday, the 11th inst., in forty minutes post eight, P. M. The vessel is now on the bottom, in twenty-seven fathoms of water, the spar vision.

JUDGE SPRAGUE, of the United States District Court, at Boston, has passed a decree condemning the steamer *Cromwell* as a prize of war. She was captured by the steamer *Tioga*, one of which vessel will whose participate in the proceeds.

THE troops of the Army of the Potomac so far as the work to be done on the stocks is concerned. In a few days everything will be ready to float off the vessels, and the work will be left to the navy yard at the bit of November, she will be consigned to the belay element.

THE gunboat *Seneca*, which was recently purchased by the Gosher City, condemned, sold, taken to the British Provinces, and there to remain, she ran ashore on Cape Sable, and was got off with difficulty, while attempting to run the blockade at New Inlet, N. C. She had a cargo of 200 bales cotton, 270 boxes and 20 barrels tobacco, and a quantity of turpentine and rosin, all belonging to the rebel government.

JUDGE SPRAGUE, of Boston, has decided a point which is vastly interesting to the navy. Three vessels, the *Dominique de Cuba*, *Tiger* and *Gazonet*, assigned to the chase of the steamer *Victory*, which ran the blockade of Wilmington, N. C., on the 7th inst. They were all too fast enough to make the capture, and the others, finding they lacked the necessary speed, gave up the chase. The *Victory* succeeded in securing the cotton bales which the steamer had thrown overboard. When the *Dominique* finally overhauled the *Victory* her schooners were out of sight. Under these circumstances the *Dominique* de Cuba was decided to be the sole captor of the steamer, and the *Tiger* and *Gazonet* were allowed to share as sole captors of the property picked up. The gross proceeds of the prize were as follows:—Vessel, $65,000; cargo found on board, $241,427. 37; cotton taken by the *Gazonet*, $4,000 00; by the *Tiger*, $5,342 29. Total gross proceeds, $316,767 65.

THE following vessels have been added to the Navy within a few weeks: steam-tugs *Geranium*, *Narcissus*, *Sweet Brier* and *Camellia*. The names of the following vessels are to be changed as subjoined:—*Albert De Grasse*, to be *Seine-Drag*; *Willet J. Sea*, to be *Iris*; *Thayer* to be *Sea-Dog*. The vessels built and now in process of construction or purchased for the purpose of sea-to-boats in the South Atlantic fleet, to be used for picket duty, are having their names given to them in a few weeks.

A JAMAICA paper of the 1st says that the *Georgia*, in command of Semmes, passed that port on the previous day, and in the afternoon of an observer's glass. She was accompanied by a steamer, supposed to be from the distance at which the encounter took place—as seen by the Captain of the vessel which brought the news—that the other vessel remained the fire or not; at all events, this much is certain, that after the lapse of about an hour's cannonading one of the vessels was evidently leaving the other in tow, and both were soon after lost sight of.

THE first vessel launched from the Boston Navy Yard since national dock at the foot of Rutgers street, last Giver, on the 15th, in honor of the event. The vessel is a screw steamer of sixteen guns, and bears the witness the chief. The *Brooklyn*, during the attack on and capture of New Orleans, received from the rebel ram *Manassas* Capt. Mitchell, Mississippi, injuries of such a serious nature that she will have to undergo extensive repairs. She is now at the Navy Yard, New York, undergoing them.

THE Messrs. Secor & Co. have obtained from the Government the contract for building the new iron-clad *Mahongo*, at their foot-clad *Mahongo*, at their foot-clad *Mahongo*, at their foot

BRITISH ORDNANCE.—After having expended nearly fifteen millions of dollars in battling with Armstrong breech-loaders, the British War Department has now fallen back upon the old cast-iron weapon, and has issued tenders for the supply of more than a hundred cast-iron guns of various calibres. One of the military journals, writing on this subject, is at a loss to understand this back-slide, at a time when they have just found out that the 12-ton gun is essential smooth-bore-loader, of Elswick manufacture, has not sufficient power to breach armour-plate. "Of what use," it asks, "therefore, can lighter guns of cast-iron be? The Navy urgently requires powerful muzzle-loading ordnance that will send clear through armour, but by a strange perversity the War Department has weakened it rather than that which is already powerful. The smooth-bore 68-pounder, and quite obvious that its endurance now is found to be a considerable advance upon the 68-pounder, has now asked for a supply of these old weapons. In our Navy, we are, always to be armed with guns out of date? The best naval gunners—those who have most experience—declare the solid shot effectivelightly tell as that guns of at least 12 tons can be worked upon the broadside, and no less, in the case of the Federal ship *Ironsides*, guns of nearly 8 tons fired with such quickness as to subdue the fire of four Rebel batteries in the course of the *Wabash*. How is it, we ask, that no steps are taken towards supplying the guns' and more important still, towards making them? Guns we *must* have, and cast-iron pieces like the American ones can be made at once, under charcoal iron and after a long experience in manufacture. We can, however, make good built-gun rifles, and these, and these only, of these should be immediately put in hand, and Mr. Anderson, who is the practical member of the Ordnance Board, should be responsible for their being in every respect fit for the naval service. Mr. Anderson has been over the entire Navy, if he will only give naval men what they loudly call for—a gun which will enable them to go in close action with a reasonable fair sea-well armed as any opponents with whom the chances of war may bring them in contact. The Americans have a large squadron at New York, and their officers are not likely to throw their wrinkle away."

LIEUTENANT-COLONEL IRVINE, of the 10th New York Cavalry, who was captured last June, has been exchanged for Lieutenant-Colonel ALLSTON, of the Kentucky 4th Cavalry, and arrived in Washington on Monday. He has been ordered to make out a report to the Commissary-General, respecting the treatment of our prisoners in Richmond.

LIEUTENANT-COLONEL J. L. DONALDSON, Quartermaster of the Middle department, has been transferred from Baltimore to Nashville, to accept the position of Chief Quartermaster of the Army of the Cumberland.

THE attention of those desiring Corps Pins and similar articles of Jewelry is called to the advertisement of Mr. Lewis Philip, in another column.

JONES.—Suddenly, on Thursday, Oct. 15, ROBERT H. JONES, aged 57 years, 6 months and 15 days, late Captain of the 1st Regiment Maryland Cavalry, and Adjutant of the 2d Regiment, N. Y. Vols.

OBITUARY.

COL. WILLIAM O. JONES.

The report of the death of Colonel WM. O. JONES, killed in action in the recent fight at Chickamauga, is confirmed by intelligence from his numerous friends and regretted by a large circle.

The deceased was born in Wood County, Ohio, in 1824. At the outset of the Mexican war, he volunteered and was appointed Lieutenant of the Military Forces. On the close of peace, was ordered to join his company of the Eighth Infantry, then on the Rio Grande, and served in Second Lieutenant, then serving in Texas. He remained in that country till some time after the war broke out, and was engaged in several Indian skirmishes, and in the affair with the rebels at San Antonio, where he was taken prisoner. In all of these actions Capt. JONES was in front, and was frequently mentioned for their gallantry and good conduct.

In the Fall of 1861, Capt. JONES was appointed Major by which he became Second Lieutenant in the Tenth Infantry, and on the 14th of May, 1861, was promoted to First Lieutenant; but had not served with his own regiment, and while in Washington, in March, 1862, after being exchanged, he was selected as Provost-Marshal of the Army of the Potomac, which he filled with ability till about the time of the battle of Hanover Court House, in the Spring of 1862, when he was appointed Lieutenant-Colonel of the then newly-formed Pennsylvania Volunteer Infantry, called First California—Baker's regiment, and the Colonel being absent, he immediately fell to the command of the regiment.

During a regimental commander, Col. JONES evinced in the battles before Richmond," a rare capacity to command men, and by his cool and gallant bearing, courage, foresight and perseverance, still though fatigue, exposure and sickness, he kept the regiment in the front rank of the brigade, and when Colonel BAKER and some made his regiment all to be ready and under arms, and with the brigade in front of Pusch Gerhart, Gaines's Mills, and Malvern Hill, where Col. JONES was wounded. On these occasions that he was commended in general orders by Gen. PORTER, of the corps, and which should have been confirmed by promotion, but for the long delay in the Senate. Recommendations in August's favor by General SEDGWICK, Gen. PORTER, and General HOOKER, of Fredericksburg.

After the Seven Days' battles were over, and upon the reorganization of the Army of the Potomac, Colonel JONES went back to his former rank, but was soon promoted to Lieutenant-Colonel, A. A. G., and Captain, upon the staff of Major-General E. V. Sumner, and as such gallantly fought at Antietam, Fredericksburg and Chancellorsville. After the death of General SUMNER, Colonel JONES' services were not fully appreciated; but he was very soon appointed to the Colonelcy of the 142d Regiment, Ohio Infantry, a regiment, after only accomplishing this regiment, a regiment of which he was justly proud, and which he loved as his own. As a commander of this regiment, Colonel JONES was brave, skilful, agreeable, and with his friends, generous and kind. Under the discipline of one of the ablest and with his five years at the Academy," he was a thorough and accomplished officer. His conduct on the field of his term of service was so universally loved and appreciated.

NATIONAL BATTLE PINS.

Soldiers of the Armies of the North!

I am the inventor and manufacturer of the above named Pins, a record of patriot acts.

The NATIONAL BATTLE PINS record the Battles, Victories of the army of the Virginia Generals, who are the great Captains of the Union Army: McClellan, Hooker, Meade, Sumner, Banks, Rosecrans, Grant, Foster, and Burnside.

Each General represents the battles fought where he was in command. A perfect photographic likeness of each General given, and McClellan Pin has photograph and battles; Grant—his handsome profile and battles; and so on, with each General and battles named. The pins are pinned with fine gold, back and front.

The dates are struck in. Rare change for engraving. Any other General's pin can be had by the single change of fifty cents.

Agents wanted (in and out of the army).

Sample pin sent by mail, or example will be sent to call.

LOUIS FILLY,
609 Broadway, N. Y.

TREASURY DEPARTMENT, OF
WASHINGTON, August 13th, 1863.—Whereas, by authority vested in me by the 2d section of the act of Congress, entitled "An act to provide a national currency, secured by a pledge of United States stocks, and to provide for the circulation and redemption thereof," approved February 25th, 1863, I have complied with all the provisions of said act required to be complied with before commencing the business of Banking:

Now, therefore, I, Hugh McCulloch, Comptroller of the Currency, do hereby certify that the First National Bank of the city of New York, County of New York, in the State of New York, is authorized to commence the business of Banking under the said Act aforesaid.

In testimony thereof, witness my hand and seal of office, this thirteenth day of August, 1863.

(SEAL.) HUGH McCULLOCH,
Comptroller of the Currency.

U. S. FIVE-TWENTIES.

The undersigned, as General Subscription Agents, is authorized by the Secretary of the Treasury to receive the above loan, and to issue Certificates therefor. Mr. DAVIS' public notice will be given of discontinuance.

A short but favorable opportunity is offered while this amount is scarcely sufficient to furnish a basis for the circulation of the National Currency, the necessity now being formed in every part of the Country. But a short time can elapse before the whole will be taken, absorbed, the demand from Europe—Germany especially—being unlimited.

As it is well known that the Secretary of the Treasury has ample power in the emergency in the duties on imports, internal revenues, and in the issue of thirteenth legal tenders, to meet the interest, which is nearly certain that it will not be necessary for him, for long time to come, to make use of these powers, as such, the interest and principal of which are provided for.

These considerations must tend to the prompt conversion of "Five-Twenties" into Certificates, when these "Five-Twenties" will sell at a handsome premium, as has been the case with the "Seven-Thirties," which have risen and sold, and could no longer be subscribed for at par.

This is a

SIX PER CENT. LOAN.

the interest and principal being payable in coin, thus yielding about *Eight per cent.* interest, with a handsome premium on gold.

The bonds are "of twenty," from the fact that the principal sum may not for *twenty years*, yet the Government has the right to redeem at par, or pay off, at any time *after ten years*.

The interest is payable yearly, on the first days of November and May.

Subscribers can have Coupon Bonds, which are payable to bearer, in sums of $50, $100, $500, and $1,000, or Registered Bonds of similar denominations, and to exchange one for the other.

These "Five-Twenties" cannot be taxed by States, Cities, towns, or counties, but are exempt from taxation to only one and a half per cent. on their value.

Subscriptions will be received at par, in gold or paper money. Income from all other investments, stocks, mortgages, &c., is subject to taxation, but on these there is no per cent. tax on the income.

Banks and Bankers throughout the country are willing to dispose of the Bonds, and all orders for them or otherwise properly attended to.

The Treasury Department having perfected arrangements for the prompt delivery of Bonds, subscribers will not be subject to receive them at the time of subscribing, or within a few days thereafter, as is generally the case, but will be promptly supplied.

Parties wishing to portion who want the Bonds can forward at once the amount of their subscription.

JAY COOKE, Subscription Agent,
No. 114 South Third Street,
PHILADELPHIA.

D. VAN NOSTRAND
192 Broadway, New York.

HAS RECENTLY PUBLISHED THE FOLLOWING WORKS:

SAMUEL V. NILES,
Late Capt. U. S. Army (Land Office.)
MILITARY, NAVAL, AND
GENERAL AGENCY.
Established in 1851.
OFFICE AND RESIDENCE, 202 1st st. bet. 24th & 25th sts., WASHINGTON, D. C.

Having had the exclusive charge of the "*Revolutionary, and War of 1812, Bounty Land Bureau*," General Agency for many years, and being familiar with the business of the various branches of that Department, the Subscriber, of the "*Commissioner of Pensions*" offers his services to the public as an Attorney and Solicitor in the adjustment and collection of

DEMANDS AND CLAIMS AGAINST THE GOVERNMENT,

in all departments, especially claims growing out of the present war.

Particular attention given to Pensions due to Officers, Soldiers, Sailors, and Marines of the Army and Navy of the United States, and the widows, children, parents and heirs of those who have died in the service and from wounds and sickness contracted in the service.

Claims for indemnity for property destroyed, and claims of Citizens for Quartermaster's, and for Recruiting and subsistence, &c., and for horses destroyed in the service of the United States. Back Pensions of Pay, and Prize Money due Officers, Soldiers, Sailors and Marines of United States, will receive prompt attention.

Any business before the *General Land Office, Indian Office*, or other Departments, *Congress*, or the *Court of Claims*, entrusted to the care of an Attorney, will meet with prompt attention.

REFER TO
Hon. Thomas A. Hendricks, U. S. Senate, late Com. of Gen. Land Office, Ind. Hon. John Wilson, late Com. of Gen. Land Office, Ill. Hon. Joseph S. Wilson, late Com. of Gen. Land Office, D. C. Hon. Thomas J. Whitting, late Com., Pen., *Washington City*; Rigg & Co., *Bankers, Washington, D. C.* Ritchenbaue, Pam & Co., *Bankers, Washington, D. C.*

Correspondence solicited from Attorneys at Law, and responsible Agents that are desirous of the Country for the purpose of establishing branch agencies for prosecuting claims in their respective districts.

Detailed information will at all times be furnished correspondents in relation to claims, blanks, and the necessary forms, and such instructions as may be necessary to enable claimants to comply with the rules or the requirements of the Departments in relation to claims.

References required.

All letters, to secure prompt attention, should enclose postage stamps.

SAMUEL V. NILES, Attorney,
Washington City, D. C.

IMPORTANT!

Officers and soldiers should be sent by the HARPER EXPRESS, 71 Broadway, as they charge but half the price of others. Their messengers guarantee them to send to soldiers at Falmouth, Baltimore, Washington, Fortress Monroe, Alexandria, Va., stations, and all other places. Expresses sent daily at 12:30, 3:30, and 5:30 P.M.

PENNSYLVANIA MILITARY
ACADEMY, AT WEST CHESTER—OPENS SEPTEMBER 23RD.—The Academy is chartered by the State, and is under the direction of the following Board:

HON. JAMES POLLOCK, President; CAPT. WM. McMICHAEL, U. S. Navy; Hon. Geo. Sharswood, Supreme Judge; Hon. Thos. Cooper, Supreme Judge; Hon. Ellis Lewis, Supreme Judge; Hon. Wm. Darlington, Hon. Wm. Hamilton, James L. Claghorn, Gen. P. Sanford, Jos. R. Chandler, Wm. M. Meredith, Wm. B. Sprague, D. D., Dunlap, Wm. A. Sprague, Geo. L. Farrell, Theodore Hyatt, Esqs.

It provides Primary, Scientific, Collegiate and Military Departments of Study, all of which are now in operation, under thoroughly competent Professors. The accommodations for Cadets are of the most approved kind. Particular attention is given to the moral and religious instruction of the pupils. The Academy is furnished by the State with a Battery of Brass Guns for the Artillery Practice. For Catalogues apply to Lieut.-Col. JOHN W. ATT, President Pennsylvania Military Academy, West Chester, Pa.

UNITED STATES
ARMY AND NAVY JOURNAL,

A WEEKLY NEWSPAPER, DEVOTED TO THE INTERESTS OF THE ARMY AND NAVY, AND TO THE DISSEMINATION OF CORRECT MILITARY INFORMATION.

The ARMY AND NAVY JOURNAL is established in the interests of no party; it will be controlled by no clique. Its independence will be absolute. Avoiding all personal and political ends, its influence will be directed solely to the inculcation of sound military ideas, and to the reform of all public services in all its departments. Its pages will be devoted to the consideration of all military questions relative, to the dignified discussion of topics coming within the province of the soldier, and make a full and reliable record of all subjects of interest to those who are engaged in the military and naval service of the country during the war. The Department of Engineering, which took such a prominent place in the London *Times*, will receive adequate attention in this connection, and the progress of improvements in the science of war will receive appropriate place. Among other matters the columns of the JOURNAL will contain from week to week

A summary, in short, or whatever occurs in all parts of the world of value to our Army and Navy. No effort will be spared to make the JOURNAL complete in all its parts, and worthy of the support it expects within its province as at all times invited from those interested in the Army and Navy. It is the aim of the Proprietor to make it not only a complete Military and Naval gazette, but at the same time a high-toned, reliable, lively Journal, which will to read with interest by all who are in any way directly connected with the public service and by the great body of the reading public.

The importance which Military and Naval affairs assume during a time of a great National Emergency demands that they should have the press an adequate representative. The Military Establishment, by unavoidable circumstances, has become a necessity to the country, and for such official and departmental secrets as are of the highest interest to the people, and the exercise of changes, orders, &c.

Of the high literary attainments of approval the ARMY AND NAVY JOURNAL has awakened in the Army we select the following:

From Major-General George O. Meade,
HEADQUARTERS ARMY OF THE POTOMAC,
September 16th, 1863.

W. C. CHURCH, Esq.—DEAR SIR—I have received several numbers of the ARMY AND NAVY JOURNAL, and have read them with much interest. I think it will be a valuable publication, and wish you success. It affords me sincere pleasure to aid my contributions to the cause in which you are engaged, and I shall endeavor occasionally to enliven the accumulation of dullness which surrounds me.

Very respectfully, your obedient servant,
GEO. G. MEADE, Major-General Commanding.

From Maj.-Gen. Wm. F. Smith, commanding 6th Corps.

"I would state that the country requires such a paper! I have felt the want of it myself. I am glad to see that you have a military man at the head of it. I wish success to the kind—one that shall be a weapon—in time of peace, to prepare for war, and in time of war, to use it energetically."

From Major-General W. H. FRENCH, *Commanding 3d Army Corps.*

"To say that the ARMY AND NAVY JOURNAL is commencing a career with which should be a representative of our power-ful Military and Naval forces, is but to state a fact.

From Major-General O. H. TILLMAN, *Commanding 10th Army Corps.*

"I am pleased to learn that you have commenced the ARMY AND NAVY JOURNAL in the interests of the Army and Navy, and hope it may meet with success. I shall be glad to contribute to it in such items as may be of interest to it."

From Major-General H. W. SLOCUM, *Second Division 11th Army Corps.*

"You possess my personal and official interest in your enterprise. Whatever contributes to the efficiency or success of the Army, has my cordial support."

From Prof. H. COPPEE, *University of Pennsylvania.*

"I have read with much interest the first number. Every former critic within my knowledge has been a failure; indeed, I remember but one instance of success in this line of publication. Your paper is conducted with ability, and is, moreover, a beautiful, new, and perennial—in its issue and theme at least—addition to our periodical literature. I wish you every appropriate admirable; and your own military experience will enable you to meet the wants of the service and the views of our readers."

On the numerous notices of the newspaper press, we have room only for the following:

From the *Army and Navy Journal*, a paper is first and in its service, both regular and voluntary. It received its editorial management from Mr. W. C. Church, a gentleman of long experience in the service, and of high reputation for its character and standing of those who had the honour in the service, and of high reputation for its character and standing of those who had the honour in the service, and of high reputation for its character and standing of those who had the honour

THE MILITARY SITUATION.

ALTHOUGH a few menacing rumblings have been heard along the horizon, yet the two great warclouds that overhung Virginia, threatening momentarily to meet in the fierce embrace of battle, seem at last to have dissipated themselves, and gone to their own places. It is more than a week since the Army of the Potomac, after its fortnight's race up and down Virginia, settled down on its present line, with headquarters, as stated in the public prints, at Warrenton. Any attempt at the pursuit of the enemy beyond this point was vain, for LEE had full two days' start of MEADE, and had already withdrawn the main force of his infantry beyond the Rappahannock, when the latter, on Monday 26th, started from Bull Run and Centreville to follow him up.

We give on another page of this issue a full history of the late campaign, by our Special Correspondent with the Army of the Potomac, which obviates any extended survey here. The one practical result of what now seems little more than a great raid, is the destruction of the Orange and Alexandria railroad, which has been so effectually accomplished, from Bristoe Station to the Rapidan, that it is stated it will be at least a month before it can be put in running order. This will, of course, prevent General MEADE from resuming for that time his old front of operations on the Rapidan; as the supplying of the Army by wagons at any season, and especially with the roads and weather of on-coming winter, is a hopeless task. This result is not regretted by the officers of the Army of the Potomac, who are unanimously persuaded that the line of the Rapidan was a false position for the Army—the Northern side being perfectly exposed to rebel observation, while the Southern side is of a nature to mask any movement the rebels may make, and is besides extremely strongly fortified. Meantime, what will be done or what should be done with our Army in Virginia, is difficult to say; but there is little doubt that, with watchfulness on the part of the Commander, an opportunity will be found for it. The rebels must either retain sufficient force in Virginia to meet its constantly menacing front, in which case the problem of our grand Western Army will be the easier, or expose Richmond, in case of a material reduction of their force in Virginia, to the assaults of the Army which for thirty months has been eager for this prey.

The character of the enemy's operations since the retreat, has been such as to inspire the idea that the rebels are attempting to cover a movement of the kind last indicated. They have sent parties North of the Rappahannock, ostensibly on small scouting demonstrations—as, for instance, on BUFORD'S Cavalry Division, near Bealton Station, on Tuesday—seemingly threatening, all the time, a renewed attack in force, but just after the style which would be pursued if they were seeking to make a diversion in favor of more serious operations elsewhere.

The present line of communications of the Army of the Potomac with its base, is by the Orange and Alexandria and Manassas Gap railroad (diverging to the latter at the Junction) as far as Gainesville, and thence by the turnpike road to Warrenton—twelve miles.

THE situation in the central zone, where our military lines, forces, and aims have been unified by the appointment of General GRANT to the command of the Department, has not materially changed since last writing. The relations of the opposing forces are, however, such that we look rather to the enemy for the initiative. The rebel chiefs are so committed by every manner of solemn promise (which might not, to be sure, be much, if not backed up by vital interests) to attempt the dislodgment of our Army from Tennessee, as to make an attack at all times imminent. We have already fully given our views of the military situation in the West, and the strategical relations of the line we hold; the weak point, as every one who has studied the question sees, is our left flank, and the interstices between the Army of the Cumberland proper and Chattanooga and the force of BURNSIDE in East Tennessee. Indeed, our latest dispatch from Chattanooga, bearing date of Saturday, 24th inst. declares that the enemy's actions seem to indicate that BRAGG is moving in large force upon Cleveland, Tenn., with the evident purpose of breaking through our lines in that direction. It is also stated that, at Chattanooga it is believed this movement is cooperated in by a portion of LEE'S force from Virginia, moving down by way of Lynchburg and Bristol, Va., with the intention of driving BURNSIDE from East Tennessee, and turning the flank of the Army of the Cumberland, thus compelling its retirement from Chattanooga.

Aside from purely military relations, the greatest embarrassment under which our Army in Southern Tennessee has to suffer is the difficulty of supplies. The front of operations of this great army is removed from the base of supplies by a line of communications three hundred miles long, which has to be constantly kept up—a situation almost unparalleled in military annals. The late rains have made the roads so bad that the teams have to make a circuit of eighty miles, and even then cannot get through. "As yet," writes a trustworthy correspondent, "the troops do "not suffer, though they have been on half rations. "But the animals are greatly in want of forage, and "the common animals are dying by scores from hun"ger. Bodies of troops have in consequence been "scattered over large tracts of country to forage." There is one consideration in this matter, namely, that these very facts make action inevitable. It is a situation in which the Army cannot stay rusting in inaction, even if its commander were a man of the stamp to allow it to do so: so that both our necessities and those of the rebels guarantee speedy operations in this now main theatre of war.

Indeed the latest reports from Chattanooga indicate premonitory operations that may foreshadow a general engagement. A detachment under Colonel STANLEY of the 11th Ohio regiment, on the 20th inst., floated fifty pontoons down the river in face of the rebel sharpshooters, landed at Brown's ferry, and surprised and drove the rebels from a ridge on the south side, opening communication with Bridgeport. A second dispatch says that General HAZEN, with two thousand of Gen. PALMER'S division, attacked the enemy on Lookout Mountain and drove him from his position.

GENERAL BURNSIDE'S operations, if not on a very large scale, are still active. According to a dispatch from KNOXVILLE, General WOLFORD had an engagement with the rebels on the 25th and routed them, but while recapturing his wagon train, he lost his battery. The fight lasted four hours. The rebels numbered four thousand, and they lost in the action about three hundred, while our loss is stated at nearly the same. This affair at Philadelphia is blazoned by BRAGG in a bombastic bulletin, in which it is stated that "the "enemy is utterly routed, and we are in pursuit."

GENERAL MCPHERSON'S expedition has returned to Vicksburg, having accomplished its object—the dispersion of the rebel force on the Big Black. They met a large force of the enemy, but the latter retired without a general engagement.

ADVICES from Fort Scott to the 26th inst. say the rebels under COOPER have been reinforced from PRICE'S army, and threaten Forts Blunt and Smith. PRICE'S force is reported to be 9000 strong, with 18 pieces of artillery. QUANTRELL is with him. Gen. BLUNT has gone to Fort Smith, where he will hand the command of the Army of the Frontier over to General MCNEIL, and proceed to Leavenworth.

ON the 21st inst., the advance of the Union forces, moving eastward from Corinth, met with resistance near Cherokee Station, eighty-nine miles from Tuscumbia. General OSTERHAUS was in the advance, and had not moved far when he encountered two brigades of rebel cavalry under Generals LEE and FORREST, estimated at four to six thousand men. The fight lasted an hour, when the enemy was driven back with severe loss. The rebels are said to have strong fortifications on the west side of Tuscumbia, on the railroad, and prisoners report that it is meant to make a stout resistance there.

GENERAL SHERMAN'S advance also was attacked by FORREST'S cavalry at Barton Station, and the rebels were handsomely whipped.

OPERATIONS at Charleston seem, at last, to have been resumed. The Richmond *Enquirer* of the 27th says: "The enemy's batteries, Gregg and Wagner, opened "fire at eleven o'clock this morning (Monday, 26th) "with seven guns from the former and four guns from "the latter. The fire was principally directed against "Forts Sumter and Johnson. Two Monitors were "also engaged. The firing ceased at dusk. One hun"dred shots were thrown from Morris Island, and one "hundred and sixty from the Monitors. We find from "Fort Moultrie, no damage done as yet. Our bat"teries replied vigorously."

THE Texas expedition is advancing steadily. Gen. FRANKLIN has removed his headquarters to Lake Tasso, four miles above New Iberia. The advance, under General WEITZEL, is encamped three miles from Vermilionville. New Iberia will be the base of operations for General BANKS until some Texan seaport can be induced to subserve that purpose. It is fifty-two miles from Brashear City, in a direct line, and is the head of navigation for ordinary river steamers.

IN another part of the JOURNAL will be found a careful and corrected account of LEE'S late campaigns in Virginia, a military movement about which the public has been in much mystery. We have had to wait until this comparatively late day—even at the risk of being behind the hasty writers of the daily press—to secure a report which would be intelligible and satisfactory.

It is stated that to the late campaign in Virginia the loss of the Union cavalry, in killed, wounded, and broken-down horses, reached the enormous figure of *thirty-five* hundred! This will give the Cavalry Bureau, at Washington, all the work it can do to supply the deficiency.

From our Own Correspondent.

LEE'S CAMPAIGN.

ARMY OF THE POTOMAC,
WARRENTON, MONDAY, Oct. 26, 1863.

If there be any truth in the maxim of Marshal Saxe, that "the secret of success lies in the legs of the soldier," in our late campaign should be a great success indeed. It has seen short as much leg-work in the way of marching and counter-marching as could well be crowded into a fortnight. And if there is no more brilliant result to chronicle as the fruit of this campaign, it is at least no fault of this army, which would gladly have brought matters to the quickest issue, and no fault of the commander of this army, for he did his utmost to bring them to that issue. It seems, however, to have been no settled part of the plan of the rebel leader to risk a general engagement, unless extraordinary decd, the fortune of war should give some advantageous condition. And the rebel movement now reveals itself in the character simply of a great raid.

That this was actually the motive of Lee's advance, we have abundant evidence in the statement of the people of the country through which we have come in the wake of the rebel army. According to these persons, the unanimous statement of the Confederate officers on their return was to the effect that the purpose of the advance was, by a turning movement, to throw this army back towards Washington, thus giving the rebels an opportunity to so effectually destroy the Orange and Alexandria railroad, as would prevent Meade's Army from again, this fall, taking up a front of operations that would menace Richmond. Thus relieved, it is surmised the rebel chief will next proceed to make additional subtractions from the Army of Northern Virginia, for the purpose of reinforcing the army fronting Chattanooga.

It must be confessed that they have been successful in accomplishing their object, so far as the destruction of the railroad goes, for it will take several weeks to put it in repair; but it will be dangerous for them to try any experiments of the kind mentioned, on the theory that the damage to the railroad will consign this army to a role of inactivity. General Meade has a watchful eye on the great objective towards which the efforts of this army have so long been vainly directed; he has an army which was never in finer condition; and you may depend upon it he will let no opportunity slip of striking a blow Richmond-ward.

Our last campaign, though it has not been marked by any great or decisive action, and with the exception of various skirmishes, and the one considerable engagement of the 14th, at Bristoe, has been confined to that class of operations which pass by the name of strategy, and may be of use both for present service and for future reference.

The preparations for the rebel advance were made with great secrecy, and the night of the 8th, on the Southern bank of the Rapidan were well calculated to mask their movements. The advance began on Thursday the 8th inst., at which time the divisions of Anderson and Hitth, of the corps of A. P. Hill were moved up to and beyond Orange Court House; these were followed the next morning by the rest of Hill's column. Ewell's corps was in the advance of Hill's, and both now marched directly on Madison Court House. In spite of all the efforts of the enemy to mask his movements, the signal officers on Thoroughfare Mountain telegraphed on Friday that the columns were moving on the Orange and Gordonsville roads towards Madison Court House, threatening our right wing. Saturday was spent in reconnoissances to feel the enemy, and General Meade becoming convinced that Lee was actually executing a turning movement on his right flank, on Sunday morning withdrew his army from the Rapidan to the Rappahannock, which river our corps crossed on Sunday night, the falling back being covered by the cavalry.

General Meade, being still, however, somewhat doubtful as to the real proportions of the rebel movement, on Monday 12th, at eleven A. M., sent forward the Second, Third, and Sixth Corps across the Rappahannock as far as Brandy Station. Having become convinced of the genuineness of the rebel flank movement, these corps at midnight retraced their steps.

On Monday night the position of our army was as follows: the Third corps at Freeman's ford; the second, Fifth, and Sixth at Brandy Station; the First at Kelly's Ford; Buford's Cavalry at Brandy Station; Gregg at Fayetteville; Kilpatrick toward Hartwood.

In the meantime, the rebels were still pressing forward from Madison Court House in two columns—the one to the right by way of Culpepper Court House, the other to the left by Sperryville. Thence their movement was directed towards Warrenton, through which place Ewell's corps passed on Tuesday.

Their far the rebels had decidedly the advantage in the elements of time and space. They had gained a whole day on us, and were on the shorter line to Washington. The native reconnoissances and menacing movements in all directions of General Meade, however, admonished the rebel commander to be cautious in his action.

At Warrenton, General Lee, finding he had, by the skilful manœuvres of his adversary, been foiled in all his attempts to plant his army on our communications, formed the design of sending Hill's corps, moving lightly and without impediments, forward for the heights of Centreville, while Ewell's corps should harass our flank and rear. The double duty therefore devolved on General Meade of checking the latter and of attacking the former. This could only be done by rapid marching in our front, and great energy and prudence in our rear.

The movements of Tuesday (13th) and Wednesday (14th) may be regarded as a great foot-race between the two armies. On Wednesday morning our whole army passed Cedar Run at Auburn, the corps of General Warren (the Second), to whom was assigned the important task of covering our trains, passing in the rear. Hill, in the meanwhile, was pushing rapidly on by parallel roads a few miles west of us.

Already at Auburn, Ewell had begun to annoy our rear, and General Warren's command was engaged in skirmishing with the enemy from there up to Bristoe, at the same time exhausting all the resources of tactics for the purpose of keeping the rebels back.

About noon of Wednesday the rear of our column, which, as before mentioned, consisted of the Second corps, reached Catlett's Station. Thence on to Bristoe, which was made at 2.45 P. M. Here the two armies which for so many days had, unseen, been marching manœuvering to out-wit each other, for the first time seriously met.

The circumstances of the meeting were, however, of such a nature as already to decide that the Union strategy had gained the day. For the rebel General who thought to strike the head of our column *only struck its rear*. While Warren was at Bristoe, the advance corps of our army (the First—Newton's) had already reached Manassas, and the last one but Warren's (the Fifth—Sykes') passed beyond Bristoe simultaneously with Warren's coming up.

You are already in possession of the details of the gallant fight of the Second corps with the rebel corps of A. P. Hill at Bristoe, which makes the one really brilliant point on the fortnight's campaign. The rebel force had reached Bristoe just sufficiently in advance of the Second corps to allow of the formation of their line of battle, which was done perpendicularly to the railroad. The rebels, however, had neglected to take possession of the cut and embankment of the railroad, and Warren, instantly detecting the advantage their possession would give him, jumped his men across them and by a brief but desperate charge poured a murderous fire into the advancing and presently retreating rebels. The victory was complete, as a thousand rebels killed and wounded, five hundred prisoners, and the capture of five pieces of artillery well attest.

Gratifying as was the result of the afternoon's fight, however, the circumstances in which that gallant corps was placed were of a nature to make us "rejoice with trembling." Ewell's corps, it was known, was pressing close on our rear: what if it should come up and its strength be thrown out already over-matched force? It was an occasion on which Warren might well breathe forth the spirit of the passionate exclamation of Wellington at Waterloo, "Night or Blucher!" Friendly night came, however, closing on our triumph; and Ewell's corps, which arrived at sunset, had only time to form in line of battle, and not time enough to renew the assault on Warren's force, which, under cover of the darkness, withdrew and effected a junction with the main body of our army.

Let's plan, so far as concerned the planting of his army on our line of communications, was now completely disconcerted, and he never advanced his main force much beyond Bristoe.

On Thursday General Meade massed his army in the vicinity of what Hill could now also look for as the rebel flank. Our line of defence was taken up on the semi-circular heights east of the stream, Centreville forming the apex of the curve. The line extended from the vicinity of Chantilly on the right to Union Mills on the left, with advanced points covering the passes of Bull Run, Gainesville being beyond either flank, to provide against flank movements. Buford, with the first division of the Third corps, was placed in front of Fairfax Station, which was made the temporary depôt of supplies; and by the disposition of his troops and the cavalry of Pleasonton and Gregg, provided against any attempts of the enemy to gain our rear via the Occoquan, which they at one time threatened. The left of our line proper rested at Union Mills, and was formed by the two remaining divisions of the Third corps (Prince's), General Sedgwick, with the Sixth, was posted in the vicinity of Chantilly, forming the right of the line, with the cavalry division of Kilpatrick to protect his flank. The First corps occupied the immediate heights of Centreville. The Second and Fifth were held in readiness to be thrown wherever most needed.

On Friday and Saturday the rebels pushed forward reconnaissances about our position, and made vigorous demonstrations on our front and flanks. If Lee had seriously contemplated any idea of seeking battle with the Union Army in the position it had gained, the manner in which these attempts were met must have dissipated it. It is more probable, however, that they were simply meant to cover the work on which the main rebel force was, these two days, engaged—namely, the destruction of the railroad. Having accomplished this object with great completeness, the rebel force fell back from our front. At 2 o'clock on Sunday morning—I write these precise dates and lines of march, of course, from information subsequently received from the rebels and from citizens of the country through which they passed—Ewell's corps crossed the Rappahannock, taking the line of the railroad. Hill's corps moved back by way of Greenwich and Auburn—the two columns which had diverged at Bristoe, converging again at Bristoe. On Sunday night their advance reached the Rappahannock, after a fatiguing march, or rather race, of thirty miles that day. On Monday the rebels had crossed the Rapidan and reached the place whence they came.

The backward movement of the enemy had been admirably covered, and it was not till Monday morning that our army started in pursuit. Crossing full Run on pontoons, the Second corps took the road towards Auburn, the Sixth towards Warrenton, the Third towards Catlett's, the First and Fifth towards New Baltimore and Gainesville; and Tuesday, the 20th, found the army occupying the line first occupied—the line of Bristoe Station. Our advance had met nothing but bodies of the enemy's cavalry covering their rear. On Wednesday our own cavalry, returning from advanced reconnoissances, made known that the rebel army was already safely across the Rapidan. Such, in brief, are the circumstances, there was no further pursuit to be made.

FEELINGS OF OUR ARMY TOWARDS EUROPE AND TOWARDS ENGLAND IN PARTICULAR.

It is no vain nor unsupported boast, that no army that has ever been brought into the field, in any country, and at any period of the world's history, can show a higher average physical skill in every branch, so general an acquaintance with the frame work of its own and of foreign governments, and so great an amount of intellectual culture, as the Volunteer and Regular forces of which the Army of the United States is composed, including the present rebellion against the Constitution of the Nation.

Great spontaneous uprisings of peoples, for warlike purposes, are recorded in Ancient and Modern times; and immense masses of men have been driven to the field by the fierce breath of fanaticism, as in the case of the Eastern, or more recently, of the Western Empires of Europe; or by that more dreaded power, political proscription, as during the French Revolution. Yet, from the social and political systems under which these took place, the individuals composing them emerged, with few exceptions, sunk in the grossest ignorance, and conducted, more like beasts of barthen than creatures of intelligence, to the fields of contest; the sole reliance placed upon them being their brute force, and such discipline of a rude character as was drilled into them to convert them into a military machine. How different from this is the composition of this formidable force of our country, which has sprung up almost as magically as the fabled harvest of ready formed men from the seed of the Dragon's teeth; possessing every qualification that goes to constitute an army, and wanting only that unity of action which time alone can accomplish, but which, with such material, is speedily brought about.

Wherever our armies have appeared they striking testify to their composition has stood the severest test to the different requirements of its great efficiency, from the officers in command of them. General Grant, in his report—as striking for the modesty and self-abnegation of its tone, as were brilliant and important the grand series of military successes it chronicled—bears witness to this distinguishing feature of an American army, where he says, whatever he wanted men for any purpose for his operations—whether as mechanics, engineers on land or water, or other employments—he always found them at hand, to execute intelligently and faithfully. Nor is it to be wondered at, that we have executed that European military skill would never have dreamed of attempting; as, for example, the canal across Inland No. 10, on the Mississippi, and the railroad being built by General Hazen over Potomac creek. But not alone in such works has this been shown, but in others, sometimes of a ludicrous cast, as the impromptu establishment of printing offices, with their whole staff of editors, compositors, &c.

To such men may safely be left the destinies of the country and the e unity of its liberties. Neither baneful appeals of selfish demagogues, whether political or military, nor those which address themselves more directly to their passions, as connected with their patriotism, will prevail more than a moment over their reason, directed and guided by the sound moral and intellectual principles which the great majority of them have received. Surrounded as we have been with deadly foes in rebellion without, with not less dangerous miscreants secretly wound-

treason within; assailed on all sides by the abuse, falsehoods and sneers of most of the presses of Europe, and of the British possessions in America, it is the greatest of good fortune that we have an army of this character—one that can sift the wheat from the tares, and reserve its vengeance only for the real evil doers, and not those who, from social or political ties, are mixed up with them. This is peculiarly fortunate as respects that agglomeration of peoples, the English, Irish and Scotch, from whom we mainly derive as a people, whose manners, customs, traditions and laws, we hold to a great extent, and with whom we have so many social and commercial ties. Among them, as at home, there is a class, the oligarchy, and their flunkey tools, who live upon their passes and smiles—who bitterly hate our republican institutions, because they see in their success the future downfall of their class power.

But others, from their accumulated wealth, the privileges which, in barbarian ages, they usurped for their class, to the iniquitous wrong done to their fellow citizens, and to the rights of humanity—these men still hold and wield a power of the most formidable character, and sway, to a great extent, a subservient press, still, recent events have shown that that sturdy spirit of independence, which has been the Englishman's true boast, still lives and will not be quenched. It lives, among those who toil by the hand and the brain together, in most virility; who form the intelligent masses but are as much the slaves of several of the worst of the intelligent master to this usurping class. It is in consideration for them, in sympathy with them, that this great intelligent, armed force, which is now forming, from day to day, and whose spirit must permeate the whole society, will spare, in the hour of its triumph, the lives and property of those various components of the British empire, from that class who see their own welfare but in the social degradation of the rest; and when the day comes, that they may turn upon them and ask for a reckoning, they will draw the line strategically between the class of sovereign evil doers and those who are for them. A Lord Wharncliffe may encourage and preside over sympathizing societies for the aid and comfort of this rebellion against law and human rights; a Mr. Lindsay or a Lamb M.P., both in speeches on the floor of Parliament, and at public meetings, may, in the name of the colored race, respecting our country, whilst he fills his purse with the dishonest gains from the violated laws to which, as a law maker, he has given his sanction; a Lord Palmerston may indulge his senile wit and sophistry upon the affairs of this country as he has done in the case of the Rebel Rams, whilst making a conciliatory harangue to his friends in Scotland, may not have been able to resist that Englishman's mania to give some fling at America whether in or out of season, and be re-toasted, as he has done, in the following quotation from his speech, which was received by the people with what was denied in the most formal manner by Mr. Adams :—"But these questions lead, as you will see, to most difficult problems—as to whether, for instance, a thousand persons here may go out as laborers to the Federal States, and in the next place a thousand muskets pile the next in order "ship, and when they arrive in America, these thousand laborers having had an understanding before, may make a formal engagement, and be armed with these thousand muskets, and then they will have been done in the territory of the Queen, and on the soil of this country, and there will have been an offence." Yet for all these exhibitions of petty feeling from such ephemera, such mere as compose our armies will disregard their stings and remember that Great Britain contains a people who are not bowed the knee to this foul of our day; that a Cameron, a Fullarton, a Colquhoun and a Smith, have stept boldly forward to rebuke governmental and individual dishonesty of purpose and act; and that behind such men stand a mass in serried ranks, ready to do and to suffer, as they have bravely shown, for human rights. They will remember that these men are not of to-day only, but of all time; that to them alone are they to look for that aid, that shoulder to shoulder sympathy, whether put battle—the field and the gathering for which have been so long preparing—shall be fought between human rights and class privileges, whether those of despots or of oligarchs.

M.

A SERGEANT'S SECRET.

A PERSONAGE who shall here be nameless, but who described himself as "Late Sergeant in Her Britannic Majesty's 36th Regiment foot, and now Sergeant U. S. A.," has sent us a printed circular, which opens upon us abruptly with the query—

"Was ever such a fool as this!
What thought, by sticking Muttton Pat,
And pulling Cossack Wool to pieces,
To tell why Light should Spring from Grecian?"

We should be inclined at first blush to answer this greasy interrogatory in the negative, but the author himself answers his own question affirmatively—though he does not say, as we should be inclined to do, that the writer of such "mutton fat" poetry is a greater fool than the one of whom he sings. After his metrical generalizations, Her Britannic Majesty's late Sergeant, who, luckily for Her Majesty's service and unluckily for ours, is "now Sergeant U. S. A.," descends to prose and practicality. He possesses a secret which he wishes to open up to the world—for a consideration in hand, of course; and lest we should be accused of belittling a matter so stupendous, we give his own statement of the case, though we are sorry the exigencies of space forbid our displaying it in type so gigantic as the original circular:—

"Information! worth hundreds of regiments, and whole fleets of ships, to any great nation, is now offered for sale to the United States on the American Continent, &c.; England all over the globe, and with the Emperor and People of France, Europe and Asia; France, especially in Europe and Asia; by the undersigned, who can promise and perform what could never exist the United States in the present war more than half a million of men, and more than a thousand millions of dollars."

We should have been obliged to the Sergeant, past and present, had he given us some idea of his charge for information of such value. If a postage stamp of the smallest denomination would draw it from him, some fool might be induced to send it; but we, ourself, however, his feelings of humanity would lead him to communicate his information to the Government gratuitously; and he might, during his life time, rely on the gratitude of a Republic which is not always ungrateful, and after his death, the half million or million of men whose lives he had saved would certainly build him a monument, costing "more than a thousand millions of dollars." As he proposes to furnish his secret to "any great naval or military power, such as the United States, England, Russia, or France," (why not to the colonized Southern Confederacy?) "or any such immense(need of men-and-money-saving secrets?) and as he proposes to save all of them from the ordinary horrors and costs of war, we should not wonder if the little joker by which he proposes to work such wonders, bore in his hand a banner with some such strange device as "Don't fight."

CORRESPONDENCE.

PRACTICAL AND IMPRACTICABLE STRATEGY.

To the Editor of the Army and Navy Journal:

SIR: In the Army and Navy Journal, of October 17th, is an extract from Jomini's "Strategy," which, so far as we can gather from the context, is intended to prevent, by reading by the military laity of two little pamphlets, entitled respectively, "Practical Strategy illustrated by the Peninsula," and "Practical Strategy as illustrated by the achievements of Field-Marshal Travis," both by J. Watts de Peyster, a fact the critic does not appear to express the fear that these two little brochures may infect a wide sphere of intelligent persons not conversant with such subjects. Now we have read both these pamphlets, and are able to say we have read not only by laity, but by the clerical portion of our American patriots, believing that they can do no harm and may do much good.

There is no doubt that the touch of the artist is still wanting to the author of these pamphlets. He cannot seem to be saying something when really saying nothing; and worse, he often states things of importance without making the statement in such a way that the reader is not fatigued in his style, and with occasional really fine specimens of writing, he too often, in his desire to accomplish—more of expressing himself; he lengthens out his sentences with matter not directly bearing on their chief meaning, and there is often a want of connection in the whole subject. In a word, it is at times somewhat of a labor to read; but, on the other hand, there is always something to reward the labor; and great credit is due to the author of military history, and a very uncommon quickness in seizing the grand features of campaigns and battles manifest themselves continually.

The critic finds fault, very properly, with the American chicory-grower for calling his pamphlet a "new work" *Theoretical and Practical*, which, although they should mean something like the complements Science and Art, are too often used in a contrary sense and wrongly employed either to depreciate the matter who teaches, and raise the appreciation, who in some small way applies. Mr. de Peyster may take discriminations not generally noticed; but we believe he never sees either word as an ambiguous middle term existing between the two ends of the line of scrip. Nevertheless that he so does is a leading idea of the article before us.

He hinted that the author of "Winter Campaigns" and "Marshal Travis," is himself not practical, inasmuch as he was never in actual service; and if may be as well to mention that, although Mr. de Peyster has been a soldier by name, and although by reason of severe and chronic ill health he has been unable to go to the front, and therefore he has bullied from his body "*en repos*," he tells of General still we know that military subjects are no novelty to Mr. de Peyster, but have been the study of his engrossing study. During a considerable period spent in Europe, he devoted himself almost exclusively to the examination of the details of foreign armies, and this without any opportunities for seeing and for asking information. On his return he published a very minute account of the Swiss militia system, of the organization of the two departments, and of many noticeable things in foreign armies generally. This work, it is true, did not find much favor, but it was one of the rather heavy style and the circumstances under which it was published; but it is a mine of information, and we have good reason to believe that, in some other shape, it has been much worked by strangers. Mr. de Peyster was, after his return from Europe, made Adjutant-General of the State of New York; and had he remained in office, the State levies in 1861 would probably have been able to supply much better-instructed officers than they actually obtained.

The two pamphlets in question seem intended to show that the difficulties in winter transportation need not now hinder, as of old, the conduct of campaigns, whether the movements of armies to the happiest results; and to maintain that what their writer calls "Practical Strategy," is superior both to grand plans unsusceptible of execution and to simple blind fighting. It may require a little thought to make out what he intends by the term "practical strategy," but we believe that, in spite of the critic's assertion, his ideas and Decker's are entirely similar. General Lallemand calls the battles of Cocoa *batailles de choc*, those of Bernhard *batailles de poitrine*, those of Turenne and Frederic *batailles manœuvres*, and those of Napoleon, *batailles d'artillerie*. Some of Napoleon's earlier actions may belong in the same category with those of Gustavus Adolphus, Turenne and Frederic; but we think that the author of "Marshal Travis" wishes to divide the prevailing spirit of Napoleon's strategy from that of Frederic. Mr. de Peyster, then, he says, "in many respects is *more* General," and therefore a more practical model. It matters little whether we call the *weakness* of the man who, in order to avoid a battle, takes a circuitous way, "strategy," and keep "strategy" for those of one's great spiritual author, with unlimited resources, partly real, partly fictitious, partly his own, partly those of his enemies tremendous ventures, which none but himself can conduct or execute, or call the one *practical strategy* and another the other *impractical strategy for common people*; but if we look for our author's meaning, it seems to be this: Napoleon from most of his battles made one man in many and millions can "*assimilate with his natural food*." 2d. It is useful, to *sit serious* for a Napoleon. 3d. It is vain for one leading, and of respectable talents, to be "practical," to march pins over nogs of the United States, to hurl new levies against them, as if they were men, as many sit by or stones, and then to look for final success to the excellence of their grand plan. 4th. Its better than we form a thoroughly disciplined, thoroughly appointed army, moulded by that shrewd tact which Americas so largely affords, and in a *common sense way*: the best soldiers at the head of the troops in the field, the best commissaries and quartermasters and engineers, and the best politicians at home, keeping the people up to their duty and supporting the war. In particular it probably means that we should form bodies of *élite* troops constituting an army of the "Old Guard," as an unlimited reserve to crush the weak points of battle, and a strong army of every regiment should be left in the local district where it was raised, there continuing to keep its esprit de memory, and be day by day engaged in cold disciplining resulting in filling up its thinned ranks; that frequent *unexpected personal* visits of the general-in-chief to the armies and districts under administrative control, selecting for example some corps, and finding out what is at fault in its providing, ensuring the thread of life to the army, supporting the weak, and rewarding and unsparingly all who have been behind in duty, would have more effect than all the orders and protocols that can possibly be issued from the Government. And that the lines of transportation should be under an entirely distinct head than that of the immediate position, and a *train corps* formed, as seems to be done in the new organization of the forces as the best disciplined cavalry. In short, he would say, we have abundant material, and that a practical and intelligent population; we can form the finest fighting army in the world: let us form such; our Generals are capable of misfortune exercising their energies to crush all who dare to battle needless; let us not be too grand in our ideas, but condescend to what we can do in this way, and leave *tramontana* or excentric ideas to others.

To conclude, "M." should not so savagely attack Mr. de Peyster as he has done in his article. Although we have no "good" or bad "French dictionary" at hand, "military" or else, we believe that the author of Travis is plenty right in saying that the word "Art" is not used in the passage cited, is only another name for veterans. The great commander was looking back on his old soldiers, not on any new limb added to the army, although perhaps he felt a more exact expression for his meaning. In that "zealot" spoken of, there is nothing to deserve a *harsh word*, as the critic is right; it is the definition which any girl at a French school would give us. Its special military meaning, if we may guess from the text, is *the body of the army of a commander-in-chief of a regiment!!** And in this meaning it is not co-extensive with the English skeleton which, although it may be used for the whole army, generally means only what is left of a regiment which has seen some hard service; in fact its *veteran* remains.

Finally, we must say that Mr. de Peyster is not an writable for this exposition of his pamphlets. It is only our idea of their principal object; and should he think otherwise, he is very able to say so.

F. P.

AN AMERICAN—NOT AN ENGLISH INVENTION.

To the Editor of the Army and Navy Journal:

SIR:—In your Journal for October 10th, under the head of "Foreign Mechanical Inventions," we say Mallet's ram is termed a *new-fashioned* steering screw propeller, which has recently been tried on the *Clarence* gunboat under the direction of Rear Admiral Lushington, and the invention of which is credited to a Mr. Curtis, of London. In the interest of American inventive genius, I beg leave to inform you that if such a thing as the ram is tried, and is termed as an English invention, the claim is a false one, and reminds us that their wrongs has foundation in fact of the English courts having invented the "Monitor" principle of gunboats. On the 18th of April, 1854, Captain Jesse L. Tathcart, of Washington, D. C., received letters patent for the "Catheart Propeller Attachment," and in the same year, in connection with Messrs. Gardner and Hoxsie, of South Gardner, Mass., received other letters patent for the same invention there. Mr. Cathcart (who is now dead) was, at the time of the invention, and is to-day, presented on his return. *He, however, left the model in Boyland.* There have been boats running on our waters for six or seven years with that attachment to them, and they are all complete successes. The invention has been used principally on canals, and is the only one by which the "inland swell," so injurious to the sides of the canal, is avoided. There is one of the boats now running on the Chesapeake

* Les officers, sous officiers et caporaux constituent ce qui se appelle le cadre d'un régiment. Les officiers généraux, avec leurs états-majors, composes de soldats très-surveiz, marchés toujours bien en avant de leurs corps, sont chargés de voir et de connaître, de prévoir, pour ce qui concerne la Tactique par le Général.—G. H. Dufour.

and Ohio canal that has been there in constant use for six years past. On the Erie canal there are two that have been in use for five years. On the Dismal Swamp canal one in use for five years. On the Dismal Swamp canal one which has been running for four years. There is now in which has been running for four years. There is now in New York a boat, at Mr. UNDERHILL'S Dry Dock Iron Works, which has just been completed, and which is intended for a gunboat, to which this invention has been attached. It is claimed for this boat, that with this attachment it can turn with almost as great facility as the ferry boats of Meadicos, and that the speed is nearly two knots an hour greater than it would be with the old-fashioned propeller. The principle of Mr. MCCLINTOCK'S screw is precisely the same as the one you describe, but the application is very much better. Instead of allowing the wheel to be forced to rest on the shaft, he hangs his screw in a frame raider, which frame supports the whole weight of it; and between the inner side of this frame and the outside guard on one of the universal joints, thus relieving the shaft from all the strain and weight of the screw. Outside of the rudder frame is attached a common rudder, to be worked by the usual coupling the propeller attachment, which allows the screw to revolve in its frame by the motion of the steamer, which prevents the derange ment incident to the stationary screw. About a year ago, Mr. CHASE, Secretary of the Treasury, appointed a committee of officers and engineers Treasury, appointed a committee of officers and engineers from our Revenue Marine service to examine into the merits of this invention, with a view to placing it on one of the revenue cutters. Said Commission reported favorably, and the Secretary decided to have it attached to one of the new cutters about being constructed for the use of the Department. That is all we find the invention to be new, and the honor of it does not belong to an Englishman.

Very respectfully,

H. S.

IS IT JUST?

To the Editor of the Army and Navy Journal:

SIR.—An order from the War Department, Adjutant-General's Office, forbids the master of a Second Lieutenant if the regiment in which said Second Lieutenant is serving is commissioned by the Governor of his State *falls below a certain aggregate of strength.* Is this just? Is this for the interest of the service? I answer, No. If a regiment recruited and mustered, we will say, to an aggregate of 900 men enters the field. Its Colonel finds after a short campaign that he has only officers who have not shouldered the grade they hold, or failed to comprehend the duties of an officer altogether, and gradually the ranks of those who have been found wanting, by the order of the Governor of his State for commission, from the line to the field and from the ranks to the line in regular succession, gradually make room for those who will not weaken the aggregate, but it improves what is left. Then comes a special medical inspector who, after a casual examination, discovers, we will say, 50 men on account of various disabilities. Then say 50 are transferred to the Invalid Corps; after which, by orders of promotion, discharges of men not "dropped from the rolls for specific duties; besides this, there is a loss from promotions in other corps of say 25 men; by death and disability, 100 men; by desertions, which you will find will equal ten per cent., in the first year, say 90 men. Now, Mr. Editor, I will open a debit and credit or account with Government for illustration.

October, 1862.			
Colonel to Second Sis,	Dr.	Colonel So and So,	Cr.
To aggregate	900	By Invalid Corps, 50	
		" Special Inspector's orders	75
		" Transfer to Invalid Corps	50
		" Dropped from the rolls	25
		" Promotions in other corps	100
		" Death and discharge	100
		" Desertion	90
		" Balance	510
Total		900 Total	900

You have now 510 left, but these 510 are worth more to the service than the 900 were. And yet, sir, you cannot promote to, nor muster a second lieutenant, because your aggregate is *below* that fixed in General Order No. 182. You will perceive that the 50 transferred to the Invalid Corps, 25 dropped from rolls and 25 lost by promotions in other corps, make 100 men, *who are still in the service*, and receive, but you, who have furnished them, must suffer by having your second lieutenants refused muster. Is this just? Is this just? Does not the Government intend to fill up its ranks by draft? If so, is it not better to have these experienced and proficient officers to command drafted men when they arrive? It is different where a regiment becomes so reduced that it must be consolidated; and even this, except in cases of *disproportionate* loss, should be resisted so long as the Government intends to fill up by draft.

The 510 men, I would of his number, and I say *strike into that pride* and the regiment is safe.

A COLONEL IN THE U. S. SERVICE.

NORTH CAROLINA, October 19th, 1863.

IMPROVED ARMOR FOR VESSELS.

To the Editor of the Army and Navy Journal:

SIR.—As much interest is felt in devising some cheap and effectual means for constructing an impregnable, seagoing, iron-clad vessel of war, I have conceived the following plan, which it is hoped will be considered deserving that it will be found superior to any yet offered.

I use semicircular plates, commonly of wrought-iron—say six to ten inches in diameter, and about an inch in thickness. These plates are to be arranged in the following manner:—I first put solid plates of wrought-iron about three-fourths to one inch in thickness—over the whole frame of the vessel, thus giving a solid foundation for the heavy armor above. I then apply a layer of the semicircular plates, extending from one end of the vessel to the other, which are to be bolted to the solid frame of the vessel. Over these plates another layer of iron is placed, all being well bolted to the plates below. I again apply another layer of plates, but in another direction, extending from one corner to the opposite one, laying it at an acute angle to the first tier of semi-circular plates below; over these plates I lay two or more tiers, alternating with the semi-circular ones extending from side to side: and last of all I use a solid layer of wrought-iron—say two to three inches in thickness—bolted to the next lower tier.

I believe this arrangement equal to a similar amount of solid iron. To increase her speed as a ram (if intend to have her such), there is to be a large paddle-wheel in her stern, about the size of my cygnet, one on each side, the same being out of danger from shot or shell. The great advantages gained by using the semi-circular plates instead of solid iron, are as follows:

Suppose a shot or projectile should strike any portion of this armor, the tendency of it would be to penetrate the first and second plates; but upon striking the top of any one of the plates below it would bounce or glance off, between these plates it would lose so much force as would cause the shot to be much them down as it would to penetrate them. The whole amount of iron is in all only six to seven inches, but I believe it would be equal to that of the whole mass of iron represented by the thickness or depth of the plating from outside to the ship's hull were applied. As there have been built, supplied with air, they are, of course, rendered perfectly buoyant, which detracts measurably from the dead weight of armor, and if pierced by a shot or filled with water, the ship would still float. The manner in which I have arranged these plates renders them not only shotproof and water-tight, but also gives strength to the frame, heavy armament; and, it can be seen that the first layer extends the whole length of the vessel, while the second reaches from one corner to the opposite one, and the third from side to side; which is in effect the principle of tubular bridges.

CHARLES BARNETT.

New York, Oct. 21, 1863.

THE CHARACTER OF TEXAS.

As Texas is about to become the seat of war, it is proper that something in relation to it should be known at the North, where it seems to be an unknown country; its resources, its great rivers, its agricultural and mineral wealth, being left unworked, and, as yet, undeveloped. The increase of slavery has been fastened upon it, while the border troubles with the half-civilized and half-Mexicans, and the long existence of the warlike and savage Camanches, have given a taint of ferocity and savage daring to the Texan character which has frightened away the peaceful farmer of the North. This character exists, however, more in name than in reality; though in a portion of the Texan slave-holding region of Eastern Texas (the country lying north and east of the Trinity river) slavery has begotten an overbearing insolence, an insubordination to law, and a hatred to the Yankee North which has repelled immigration from that section.

Western Texas has been settled chiefly from slavery, and the character of the country differs greatly between Eastern and Western Texas, the one being wooded and agricultural; the other chiefly a grazing country, composed of stock farms. This is the rule, the exceptions are along all the river bottoms, where cotton has been cultivated to some extent, and cotton to a large extent.

The climate of the two sections differs much also, and the character of the population of Texas is formed by climate, for on the climate depends its agriculture, and on its agriculture the character of its population. A portion of the State is comparatively dry, and subject to great droughts, while another part is favored with seasonable and frequent rains. As a consequence we have kinds of vegetables and products in one part differing from those in the other. The difference in the climate makes a difference in the laboring population, and habits of the people. Commencing with the Sabine, we have a belt of country reaching down to Galveston, where in almost every year there are rains to a greater or less extent. Here the country is mostly prairie, and is admirably adapted to cotton, wheat, corn, barley, and other kindred crops. From Galveston, on the Trinity, which empties into Galveston Bay, to Matagorda, is a country of less yearly rain, even subject at times to drought. The character of the country changes too. The prairie disappears, and the wood is confined to the river bottoms; cotton, corn, and sugar are raised along the river, and are productive. In these two belts live the negro population, mostly in the first. From Matagorda Bay to the Rio Grande is one great prairie. It is a belt of land half wood, and toward the Rio Grande sandy and poor. This is the great grazing country of Texas; here are the large cattle, sheep, and horse ranches. Negroes are few, for there is no use for them; the sheep and cattle ranches require but few hands, but a large extent of country. Here, too, is the home of the Texan—carrying out the general rule, that where there are few or no slaves there is always a loyal people—while in Eastern Texas, and that portion of Western Texas along the rivers, where cotton and sugar are raised, and slave labor used, we have the bitterest enemies towards the North, and that hatred to our Government, which characterizes secession principles. Another State would long ago have been made out of Western Texas, had not Eastern Texas been afraid that it would be a free State. They would never trust them, and held them in awe.

The droughts in Texas seem to come in cycles of from ten to twelve years. This has been shown by tradition, observation, and by marking sections of hard-wooded trees, and observing the quantity of wood deposited one year with another. Somecircles of depositions were observed to be thicker than others, appearing to diminish and increase in thickness according to the cycle mentioned above. The winds of the Gulf are the great reservoirs of rain for Texas, and on these depends everything. The Mississippi river seems to be the point at which the greatest amount of rain falls, and Rotes Rouge the wettest on the river. From this the rains fall off to the westward. The prevailing wind on the Gulf is the southeast. During summer it may be called, more accurately, the southeast trade, coming north with the sun, and receding again in winter.

This southeast Trade Wind, coming across the West India Islands and the warm waters of the Gulf-stream, gathers a large amount of moisture, and deposits it in the shape of rain on the mountains above or at the Gulf. It is a most delicious wind, and makes for the eastern shore of Texas a most delightful climate in summer. But, strange to say, this wind, as we proceed down the Gulf shore in Texas, loses from the southeast to west, and finally, near the Rio Grande, becomes the west of south, and from over the land. Instead of a moist wind it becomes a dry one; and instead of making fine pasture and a productive country, it deprives Western Texas, in a measure, of both pastures and production. This rule is modified by the Guadalupe mountains in Western Texas, for, although the country is dry, yet the pastures are good towards the mountains, but poor towards the Gulf. The dryness of the climate of Western Texas is proverbial. It has long been the resort of consumptive invalids from the North, and has rarely have derived much benefit from it. Meat will not putrify in the air of Western Texas, but will dry up, and can be kept perfectly well without the use of salt. Jerked beef owes its celebrity and usefulness to this dry air; it is merely fresh beef cut into long strips and hung on lines or poles in the air to dry, which it will do in many a long time in that climate.

Thus we see the productions of a country and the character of its population, formed and depending on the winds that blow along its shores, making one portion wet and productive, and leaving another portion dry and unproductive, and a pastoral Trades, blowing over the Pampas and Llanos of South America, make its great rivers and give its fertility; while on the west of the Cordilleras in many places it has never been known to rain.

During the winter season the climate of Texas assumes another phase. The new wind comes in to modify and change the atmosphere. This is the "norther," the much-dreaded wind of the Gulf. This wind blows from the north to the northwest, and only comes during the winter months. It is a cold, dry wind, very much like the winds which sweep over the North-west during the winter months, and especially in March. It is not the extreme coldness of the winds that produces the suffering, for they are not what would be called a very cold wind at the North, but it is the change from a warm, moist wind to a dry northeast wind to cold, dry, piercing northwester. It affects both man and beast, and blows often with very great violence, lasting generally about three days, when it gradually dies out. For the upper part of the Gulf it blows off shore, owing to the curve of the coast, from Galveston bay; but as the coast below Matagorda Bay travels nearly north and south all the way down to Vera Cruz, it there blows parallel to the coast and raises a most violent and dangerous sea. It has the same peculiarity as the southeast wind, hauling somewhat to the east of north as the season advances, and allowing into the harbor of Vera Cruz somewhat, making it a very dangerous harbor during the winter. The sudden change in the feelings, both of man and beast, produced by this wind is very wonderful. It often kills a large number of cattle on the prairies, causing them and suffering them to be frequently necessary in the fall of the year to change from the coolest summer clothing into the warmest winter clothes—and that, within the space of an hour.

It is through such a climate that our armies will have to march to invade Texas. The Rio Grande, a body of men, and the horses attached to the army under such circumstances may well be imagined. Nowhere in the South does man want warm winter clothing more urgently than in Texas—more particularly if his blood has become thin, as his sensitiveness to cold will become—a result easy to be produced in the South it sure to produce.

If rain should come on, and the rivers rise, as they surely will in Eastern Texas, with the muddy roads and marches what will be the suffering of our men, and what will become of their artillery? We trust that Government will ponder these matters, and with a long line of coast, only fortified at points well known, and so easily approached, adopt some plan for invading Texas that will spare our army the risks, the dangers, and sufferings of a long march overland.

TEXAS.

GENERAL ORDER No. 100.—We have seen a letter by DR. HEFFTER, one of the Judges of the Supreme Court of Prussia and Professor of the Law of Nations in the University of Berlin, to a prominent gentleman in this city, which ends with these words:—"The precious (his word is *kostbar*) "Instruction for the Government of Armies in the Field," is fit to form a basis for a universal Code of the Law of War, so absolutely requisite in these days."

Judge HEFFTER is the author, among other distinguished law books, of The Modern European Law of Nations.

which has gone through many editions, each of which has been published in German and in French at the same time. It is, we believe, universally considered as the highest authority in this branch of Jurisprudence on the Continent of Europe, and so favorable an opinion on this American work, spontaneously expressed by so competent a judge, to a gentleman with whom he is not personally acquainted, must be flattering to every American.

VESSELS BUILDING AT PRIVATE YARDS.

The Department has contracted with Mr. J. S. UNDERHILL of New York, to build a light-draft iron-clad similar to the *Cohoes*, to be named the *Modoc*, and the vessel has been commenced at Greenpoint, and is progressing rapidly. Mr. UNDERHILL is the builder of the *Keokuk*. The keel of the *Modoc* was laid several weeks ago and her frame is now assuming shape. LARNED has been appointed as local inspector of the vessel, and attends every day at his post.

The *Dunderberg*, building at New York, by Mr. WINAN, cannot be completed in much under a year. Every appointment of the vessel is finished in the most perfect and laborious manner, and when completed she will be a worthy monument of American naval architecture. Preparations are making to launch the *Dictator*, which has been built at the Delamater Iron Works. Her vessel is 314 feet over all, including the overhang of 31 feet aft, and 13 feet forward. Her armor is composed of six inch plates, resting on armor stringers 4½ inches thick and 2 inches apart, filled in with wood. The backing is 37 inches thick, diminishing to 20 at the edge and to 14 at the deck. The beams are 15 inches oniod. The turret is so built that no bolt-heads can be driven through. An ordinary turret is first made, six inches thick. Outside this is a layer of 4½ inch horizontal bars, not fastened in any way to the turret, but which are kept in place by a second turret, composed of seven shots of 1 inch iron, each made separate and shrunk over the thick bars. There no bolt holes pass entirely through the turret, and 44 inches of iron intervene between the bolts exposed to shot and the interior, so that no accidents apparently could accidents occur such as have wrought such melancholy results in several instances. This turret is undoubtedly the best that has yet been devised; far superior to those constructed with rivets, and after a trial, without which no radical changes should be made, it is confidently hoped every Monitor in the service should be provided with such a turret. The *Dictator* has but one turret. The *Puritan*, her consort, will have two. The latter vessel is of similar shape, but larger; the same models are used in her construction as in the case of the *Dictator*, but with some added amidships. Captain PERKINS, of Williamsburgh, is constructing a light-draft armored vessel, to be called the *Naubuc*, which is, we believe, to be consort of the *Modoc*, building by Mr. UNDERHILL.

The great iron-clad ram now building by Mr. CRAMP, of Philadelphia, the builder of the *New Ironsides*, has been begun and her keel will be entirely laid in a few days. This vessel is to be one of the largest in the Navy, and will have breadside guns like the *New Ironsides*. The number and calibre of these guns is not yet decided on, but they will be the heaviest that she can possibly carry. Every effort will be made to finish the vessel as speedily as possible, and have her ready for service in twelve months.

The *Tuscarora*—the first Monitor constructed in Philadelphia —begins to assume an appearance of completeness. The work is so far advanced that it is expected she will be ready to launch in February. She is one of the double hull vessels.

Another vessel is building at Kensington, Philadelphia. She is a steamer, has been designed in search for privateers. Speed is a main point in her construction, and she is modeled after plans furnished by Government. Her name is to be the *Chattanooga*.

BENJAMIN MACKAY, the famous ship-builder of Boston, received a contract from the Navy Department to build an iron-clad vessel of war, and we understand he has commenced operations already. She is to be called the *Nauset*, to be 225 feet long, 40 feet wide, and 9 feet depth of hold. She is to be a two-gun turreted vessel. The hull will be double, with an opening of 3 feet between the hulls. She will have two propellers, worked by separate engines. It is to be hoped that the careful examination and study of foreign ship-building in which Mr. MACKAY spent nearly a year, may be productive of valuable results in the construction of this vessel.

THE IRON-CLAD "RESISTANCE."—The Irish papers have been loud in their praises of the ships composing the Channel squadron, but of none have they borne higher testimony than they have of the *Resistance*, an iron-cased screw steamship, which was built under the closest possible inspection of the British Admiralty. A Dublin paper thus describes the *Resistance* :—

As a specimen of iron-work manufacture she is perfect. She was designed and built with a view to being used as a ram, and her construction is in 1859 terms as follows:—Length from spar to deck, 381 feet; and tonnage, by builders' measurement, 3668. Like the *Warrior* and the *Black Prince*, she has no external keel, but an inner kind of girder, which acts as a lebson, and is formed of immense strength. The orlop deck is of wood, but the main and upper decks are of iron, and the decks are carried on wrought-iron beams of the most powerful description, to which both decks and ribs are riveted together. The armor-plates are about 16 feet long by 4 broad, and 4½ inches thick. On both sides the armor is continued to five feet below the water-line. The stem and stern, which are unprotected by armor, are grossed and recrossed in all directions with water-tight compartments. She has rather a clumsy and unwieldy appearance in the water, but this is accounted for by her shallow iron boat and her immense weight of iron-cased ships. The outline of her bows resembles the curved line formed by the wave in advancing.

Only 14 of the 32 deck guns which she carries are under cover, the armor only extending a length of 144 feet of her broadside. Throughout, the 14 guns are cone-plated pavilion runs through wrought-iron inlabbeds inside the armor at each side. They are turned wings, and serve as main passages of communication. The 14 guns are the only real coal bunkers, inside these again are the water tanks, and within all the magazines, shot rooms, &c. The place where the whole force of the blow must be received when the ship is used as a steam-ram, are strengthened inside with a perfect system of iron ribs and diagonal stays. The bow more than eight wrought-iron decks stretch back from this portion to the armor plates in addition to other supports, such as cross-bearings and diagonal stays, and there is the gigantic ar of 600 horse-power. On her principal deck she carries the 9-ton gun, the 12-ton gun, two 25-pounder Armstrongs, two 32-pounder smoothbores, 42 cwt., besides a 12-pounder Armstrong field-piece, and a smoothbore howitzer. On the upper deck she has four 8-inch and six 96 cwt. guns, which will throw 6866 solid shot and a 419-pounder Armstrong, all on sliding carriages with direeting bars.

The *Resistance*, in her equipment, carries two things seldom found on board a ship—the electric telegraph and gas. The former has been fitted by a man who has worked for many months on board the *Warspa*, running between Sidney and Melbourne. By its means the engineer communicates from the forward and after bridges, and by the officer of the watch as see moving a handle on a case hanging in front of the engineer as the wheel is to be put, and what wished to be given to "starboard," "port," or "steady," it required. The whole arrangement is simple, and cannot be misunderstood by the engineer, who has only to watch the man at the wheel. The gas is manufactured from oil on Mr. GURNEY'S plan. The gasometer is over the upper deck, between the boom and before the main mast. From it a small column of the oil from a reservoir enters a retort, and the gas generated by the combination is conducted through a pipe conducts the gas below the engine-room and screw alley, which when lighted by twelve burners has a most brilliant effect. The cost of the *Resistance* was £337,848.

CASUALTIES AMONG REGULARS.—The casualties of the brigade of regulars, 1st division, 14th army corps, in the battle of Chickamauga Creek, September 19th and 20th, were 3 officers killed, 16 wounded; 1 officer and 1 enlisted missing; in all 48 missing—in all 48 men. Of enlisted men, 80 killed, 334 wounded, 229 wounded and missing, 353 missing—in all 888 ; making the total loss of officers and men 936, out of a brigade numbering 1400. The names of the officers who were killed, wounded or missing, are :

15th U. S. Infantry—Captain D. M. Meredith and Second Lieutenant John Williams, wounded; First Lieutenants E. McElheny and W. H. Gardner, Jr., and Lieut. G. Gulwey, Roman H. Gray, and Second Lieutenants Theodore Kendall and T. P. Brown, missing.

16th U. S. Infantry—Major Sidney Coolidge; Captains Alexander Stanton, John Christopher, M. A. Cochran; First Lieutenants W. G. Worthington, J. Callahan, Thomas G. Dumin and Wm. H. Smith; Second Lieutenants M. Mahon and W. C——, wounded and missing; First Lieutenant Wm. Harris, A. A. Q. M., Captain Maitland, killed; wounded ; and Second Lieutenant J. T. Mackey, missing.

18th U. S. Infantry—Second Lieutenant John Isaac, killed; Lieut. Col. J. H. King, Lieutenants C. C. P. Truman and L. F. Brown, wounded and missing; First Lieutenants J. F. W. Neil, S. T. Brand, C. A. Adair, and N. W. Hutchinson; Second Lieutenant H. B. Freeman, and Second Lieutenants F. F. Bennett, R. C. Gaus, and H. C. Egbert, missing.

19th U. S. Infantry—First Lieutenant M. B. Fogarty, killed; Major S. Dawson, Battalion-Adjutant Robert Ayres, and Second Lieutenant Benjamin Maitland, author of "Vive l'America," wounded; Captain Thomas Cummings and Second Lieutenant C. F. Miller, wounded and missing; First Lieutenant V. D. Brown, A. A. Q. M., and First Lieutenants F. H. Y. Bickham, M. C. Caston, and Second Lieutenant H. Hegely, missing.

Battery H, 5th U. S. Artillery—First Lieutenant H. M. Burtham, killed; Second Lieutenant Israel Ludlow, wounded and missing; Second Lieutenant Swanson, missing.

By order of the President, the following officers are dismissed the service:—Lieutenant-Colonel Edward Bloodgood, Twenty-second Wisconsin Volunteers, for misbehavior before the enemy; Captain Augustus Cowles, Captain Joseph Bosler, Fifteenth Indiana Volunteers, for insubordination and neglect of duty. First Lieutenant H. M. Rosenow, Sixteenth Illinois Volunteers, for disobedience of orders.

BRIG.-GEN. H. H. LOCKWOOD, U. S. V., is assigned to the command of all that district of country consisting of the Counties of the Eastern Shore of Maryland, as far north as, and including, Kent County; the Counties of Northumpton and Accomac in Virginia; the County of Calvert in Maryland, and all the Western Shore of Maryland lying between the Potomac and Patuxent rivers, as far up as the Patuxent bridge on the Washington and Baltimore road, the County of St. Mary's. This Command will be known as the FIRST SEPARATE BRIGADE.

All the forces belonging to the Middle Department, stationed in Baltimore City or County, including all the works of defence thereto, except Fort McHenry, Fort Marshall, Fort Federal Hill and Fort Dix, and except the SECOND SEPARATE BRIGADE, will hereafter be known as the THIRD SEPARATE BRIGADE, and will be under the command of Brig.-Gen. E. B. TYLER, U. S. Volunteers.

CAPTAIN CYRUS H. JOHNSON, Ninth Wisconsin Battery, tried and convicted on the charge of embezzling ammunition and clothing, has been sentenced to refund to the United States the sum of $30.37, being the amount arising from sales of ordnance and clothing, to forfeit all pay now due or that may become due him by the Government, and to be dismissed the service.

BRIGADIER-General SPEAR, of the Department of the Cumberland, has been tried by Court Martial upon the following charges: Drunkenness, disgraceful and unmanly conduct of public property belonging to the Government, and for benefit; drunkenness on duty; conduct prejudicial to good order and military discipline. He was acquitted by the Court.

BRIGADIER-General HENRY B. CARRINGTON (Col. 18th U. S. Infantry), is ordered to report to Major-General D. C. Buell, for the command of Cavalry and seven of Infantry, three years troops, in Indiana, and prescribing the organization of the State Militia. In connection with the latter, is a military telegraph along the river, and the organization of nine 4-gun batteries in the river towns.

BRIGADIER-General Garfield and Major-General Negley of the Army of the Cumberland, arrived in Washington on the 28th.

MAJOR-General Rosecrans has been enthusiastically received in Indianapolis, where he has spoken urging the energetic prosecution of the war.

MR. D. VAN NOSTRAND has issued a new edition of General Order No. 100 ; "Instruction for the Government of Armies of the United States in the field."

MEDICAL DEPARTMENT.

ORDERED.

Assistant Surgeon Alfred Woodhull, U. S. A., to report in person without delay to Surgeon General Hammond, U. S. A., Medical Director of the Department of Virginia and North Carolina, at Fort Monroe.

Assistant Surgeon John T. Bailey, U. S. A., to duty on the Board of Examination now in session at Washington, D. C., in lieu of Wishing.

Thomas Antisell, U. S. A., to duty on the Army Medical Board, for the examination of Acting Assistant Surgeons of Volunteers, now in session in Washington, D. C.

Assistant Surgeon C. C. Lee, U. S. A., now on duty in the Douglas Hospital, to report in person without delay to the Surgeon General, U. S. A., for duty as Assistant Surgeon of Volunteers, U. S. A.

Assistant Surgeon Cyrus Bacon, U. S. A., to report in person without delay to Surgeon General Hammond, U. S. A., Medical Director, at Baltimore, Md.

Surgeon H. S. Hewitt, U. S. Vols., to proceed without delay to Nashville, Tenn., and report in person to the Medical Director, Department of the Cumberland, for duty.

RELIEVED.

Surgeon E. T. Bates, U. S. A., from duty as a member of the Army Medical Board, for the examination of Assistant Surgeons of Volunteers, now in session in Washington, D. C., and ordered to resume his duties at the Carver Hospital, near Washington, D. C.

Assistant Surgeon Alfred Woodhull, U. S. A., from duty as a member of the Board appointed to examine Hospitals in the Department of Washington, D. C.

DISMISSED.

Assistant-Surgeon G. McFarland, 7th Illinois Vols.

Chaplain Gilbert H. Powell, U. S. Army, late of Piatt's Regiment, Washington, D. C., by order of the President.

LEAVE OF ABSENCE.

Greated Hospital Steward Thomas, U. S. Army, for two weeks.

DISCHARGED.

Hospital Steward Wm. C. Tyler, U. S. Army, to enable him to accept a clerkship in the Treasury Department.

MISCELLANEOUS.

A Board of Officers, to consist of Surgeon Wm. J. Sloan, U. S. Army, Surgeon Wm. Thomas, U. S. Army, and Assistant Surgeon C. S. Winters; Assistant-Surgeon R. S. Gumby, U. S. Army, will assemble at Cairo, Ill., on the 1st day of November, 1863, or as soon thereafter as practicable, for the examination of applicants for admission to the McDougall Hospital, at Fort Schuyler, New York Harbor, and to recommend to the Medical Director of the Department for duty.

A Board of Officers, to consist of Lieut.-Col. Goodale, Medical Inspector U. S. Army, and Surgeon Cuyler Adams, U. S. Army, Carver, has been constituted, for the purpose of examining all convalescent soldiers reported now in the Carver Hospital Hospitals and Convalescent Camps, for the purpose of organizing the Invalid Corps, and for the purpose of discharging such as are unfit for duty, and to apply with their registers, or proper subjects for discharge, in accordance with General Order No. 105, of 1863, from the War Department. In the performance of this duty, the Board will visit such General Hospitals and Convalescent Camps as the Medical Director may designate from time to time direct, and will be governed by his orders and instructions.

The Acting-Surgeon-General has decided not to discontinue the Medical Examining Boards, but to increase the number of them.

In pursuance of Special Orders No. 360, from the Adjutant-General's Office, Surgeon Charles H. Crane, U. S. A., is announced as Medical Director of the Army of Arkansas.

GENERAL HOSPITALS IN WASHINGTON AND VICINITY.

Under Direction of Surgeon R. O. Stone, U. S. A., Medical Director of Washington.

SEAMEN AND TRAINING-SHIPS.

NO. II.

WE admit that we have many fine seamen and many men who are skilful at handling guns, but our general system is not such as to produce these, and we would say here that we do not wish to be understood as underrating our seamen—far from it; but it is our system of bringing them up which we wish to see changed; for of the great body of seamen now in the service, but a very small proportion were trained in the service.

Now let us take a glance at the French Navy, from which a great many good ideas may be economically picked up, and see what steps they lay upon instruction. In an article on that navy, speaking of the *matelots canonniers* (gunners on that navy, speaking of the *matelots canonniers* (gunners on board ship), the writer says:—"The special object in training these naval gunners is to qualify them afterwards to act as captains of guns on board ships, to superintend the service of the laboratory, and to form a body from which the non-commissioned artillery officers and the general crews will be recruited." "A of non-commissioned artillery officers and the general crews will be recruited." "A of non-of-war could in emergencies be recruited." "A similar provision had long existed in England, where a training-ship (the *Excellent* at Portsmouth) had been devoted to this object. Until the March, 1857, founded an establishment upon that model. The most efficient seamen were chosen out of the fleet, and they were specially exercised in gunnery for several years on board artillery training-ships, but the system labored under the disadvantage of too frequent changes, and it almost fruitless. Before the peace returned into private life, upon the expiration of their terms of service, the cost incurred in training them was thus lost to the State. It was thus glaring defect, no less than the extraordinary expense given to maritime affairs, which led to the prodigious augmentation of the navy, and to all the improvements determined upon by NAPOLEON III. It was then stipulated that every seaman must enter the service for a period of ten years; and that with the practical instruction he obtained on board the training ships, there should be combined a course of theoretical instruction on shore, *stimulated by periodical examinations* (and promotions), so that now the French seaman, gunner or marine artillery man is, theoretically grounded in all the principles of his duties. These schools already form out 600 gunnery yearly, besides being of use in the formation of efficient non-commissioned officers of all grades."

But, in copying from the English, the French improved upon them at the same time, since both practical and theoretical instruction are provided for their seamen, and both nations know that target practice is useless except on the open sea. It is true that France, by *immigration maritime* and the *Système de ligne*, the latter much improved at this moment, is able to do what would be a task impossibility with us; but it may be found within the limits of human ingenuity to accomplish the same ends in our own service by means conformable to our republican ideas. It had been found by demonstrate in the French navy that it was necessary to build large ships and crowd them with hands; it was essential that those hands should be expert both in seamanship and in gunnery, as well as trained to all the requirements and vicissitudes of a seafaring life.

It is observed by the Prince DE JOINVILLE, in his work on the French navy—" The question of fitting out a fleet is not a mere question of finance. Money can only be raised by the State, and money will produce any number of ships; but money will not make sailors; gold will not make a well-disciplined crew and an experienced staff of officers. And of what use are ships without the living soul to command and ready hands to obey? To collect, form, and train these, should be the first solicitude of a great maritime power, as it is the most important object in its task. Every other requirement will follow as a matter of course."

If such is the opinion of the Prince DE JOINVILLE, let us see what weight may be attached to it, for to the generality of our readers it is known only as a pretender to a published gentleman and the most popular member of the Bourbon family. In England he is known as the father of the modern French navy, and is that navy itself there is probably no man more highly esteemed. The following may convey a just conception of his European reputation and of his connection with the French navy in 1844—" In that "year a man was placed at the head of the French marine, "who devoted himself with singular patriotism and scien-"tific knowledge of no mean order to the discussion of "that of the navy, and to all the improvements determined "upon by NAPOLEON III. It was then stipulated that "every seaman must enter the service for a period of ten "years; and that with the practical instruction he obtained "on board the training ships, there should be combined a "course of theoretical instruction on shore, *stimulated by* "*periodical examinations* (and promotions), so that now the "French seaman, gunner or marine artillery man is, theo-"retically grounded in all the principles of his duties. These "schools already form out 600 gunnery yearly, besides being "of use in the formation of efficient non-commissioned offi-"cers of all grades."

But, in copying from the English, the French improved upon them at the same time, since both practical and theoretical instruction are provided for their seamen, and both nations know that target practice is useless except on the open sea. It is true that France, by *immigration maritime* and the *Système de ligne*, the latter much improved at this moment, is able to do what would be a task impossibility with us; but it may be found within the limits of human ingenuity to accomplish the same ends in our own service by means conformable to our republican ideas. It had been found to demonstrate in the French navy that it was necessary to build large ships and crowd them with hands; it was essential that those hands should be expert both in seamanship and in gunnery, as well as trained to all the requirements and vicissitudes of a seafaring life.

It is observed by the Prince DE JOINVILLE, in his work on the French navy—" The question of fitting out a fleet is "not a mere question of finance. Money can only be raised "by the State, and money will produce any number of "ships; but money will not make sailors; gold will not "make a well-disciplined crew and an experienced staff of "officers. And of what use are ships without the living "soul to command and ready hands to obey? To collect, "form, and train these, should be the first solicitude of a "great maritime power, as it is the most important object "in its task. Every other requirement will follow as a matter "

few days since successfully ended when I acted him what he thought of the ambulance system in the army of the Potomac. "The system," he replied, "is good and all right, as far as and as bad can be." At the battle of Gettysburg I had a chance to see the ambulance system in a somewhat more extended sphere. I could not get any of the ambulance department near me. I could obtain—Colonel—explain to a surgeon the use of it. The ambulance system, as it at present exists, is a mere sham." "Why so?" I asked. "Because," he replied, "it promises well, but has failed in performance, whenever I have wanted it. And well, too, has failed in performance. It would be none the at once, to state, in one of them, driven furiously, as they often are, by some driver who never cared a straw for the wounded, and who had no consciousness of such treatment." The gentleman has had in consequence of such treatment, a terrible time of it. In conclusion of this part of my subject let me state two facts. The first is positively true, the second probably so. Many men say they can say no more, but not members of my family. One of them is a splendid officer, and a gentleman of culture and refinement. He was for a long time unattended, and finally was carried off the field in a stable cart. The second is that a wounded officer in another case was driven to a hospital with immense suffering he could have been spared, by some of his own friends, who were anxious to get away from the field. The latter case I obtained from a surgeon of unquestionable veracity, whose name I cannot give without his consent. Both cases, however, were brought to my notice by the surgeon in charge of the hospitals, to which the wounded were taken. The gentleman and a brother officer had been wounded on the second day of the Gettysburg battle, and were lying side by side. Their wounds were of a painful character, and their sufferings terrible. It consisted of several tents and several rows, with a single entrance and exit common to all. Just in front of the entrance, from one to two thousand wounded men have been piled like cord wood, and there they have been lying for two days and nights without assistance, with both wounds and sufferings aggravated by the want of it. Some of them had been at night."

This was on the 6th of July, two days after the battle. Can an ambulance organization be complete which is unable to remove thousands of wounded men from the field after a battle, and leaves them to be ground without food, to be saved from actual death by exposure and hunger only through the tender ministrations of this great public charity?—*American Medical and Surgical Journal.*

ARMY AND NAVY PERSONALS.

MAJOR-GENERAL Heintzelman has so far recovered from his late indisposition as to be able to ride about in a carriage.

FIRST LIEUTENANT Benjamin Murphy, Co. K, 6th Veterans, has been dismissed for drunkenness on duty.

MAJOR GEORGE W. West, of the 17th Maine Volunteers, had been promoted to the rank of Colonel.

MAJ.-GEN. HOFFMAN arrived in St. Louis on Saturday last *en route* for New-Orleans, to rejoin his command.

CAPT. O. G. Dodds, of the 81st Ohio Infantry, has been promoted to Major of 1st Alabama cavalry—Col. Spencer commanding.

COLONEL H. W. Birge, of the 13th Connecticut Volunteers, of the Department of the Gulf, has been appointed Brigadier-General.

THE veteran Lieutenant-General Winfield Scott has returned to New York, and has taken apartments at Delmonico's, Fourteenth-street and Fifth-avenue.

GENERAL Thomas Francis Meagher will lecture in Boston on Monday, to a large audience, on the Army of the Potomac.

LIEUTENANT-COLONEL J. M. McChesney, of the 1st North Carolina Union Volunteers, has been promoted, for gallant conduct in the rank of Colonel.

COL. Joseph R. Hawley, of the 7th Connecticut Volunteers, has arrived in Washington, D. C., from Morris Island. Col. Hawley left Arkansas to command a brigade in place of General Stevens, who has been absent on furlough.

WILLIAM RAYMOND Lee, late Colonel of the 20th Massachusetts regiment, has been appointed Aide-de-Camp of the Brigade of Massachusetts upon the Governor's staff, with the rank of Brigadier-General.

SECOND LIEUTENANT Stephen Redshaw, Co. K, 77th New York Volunteers, has been sentenced to be dismissed the service for conduct unbecoming an officer and gentleman, and prejudicial to good order and military discipline.

IN the notice of the "Third Corps Union," the name of Brig.-Gen. Gilman Marston, formerly Colonel of the Second N. H. Volunteers, was left out in the list of promotions of field officers to brigadier-generals.

COLONEL Charles C. Dwight, of the 100th New York Volunteers, was relieved on the 13th instant from duty as Judge of the Court Martial (at New Orleans) of the Department of the Gulf, and ordered to rejoin his regiment. A. A. Marks, Adjutant, was appointed to fill the Judge's vacancy.

BRIGADIER-GENERAL Terry, who arrived in Washington a few days ago, brought with him certified copies of the official correspondence relative to Lieutenant-Colonel Gillmore's Dahlgren, relative to affairs at Charleston. The correspondence has been laid before the President.

THE 130th New York Infantry, which was recently mustered under the title of the 20th New York cavalry, has since been officially designated the 1st New York Dragoons. Letters for the officers and men will hereafter be addressed accordingly. Col. Alfred Gibbs is the commanding officer.

A CORPS of Inquiry, composed of Rear-Admiral L. M. Goldsborough, Commodore C. H. Davis, Commodore Joseph Lanman, and S. L. Phillips, Esq., is in session at the Washington Navy Yard, investigating the facts connected with the capture of the gunboats *Isabella* and *Zeilmer*, on the Rappahannock, on the 22d of August.

LIEUTENANT-COLONEL Charles R. Brayton, of the 14th Regiment, Rhode Island, R. A., (Colored), has been promoted to be Lieutenant-Colonel in the 3d R. I. H. A.; Captain Richard Shaw, of the 3d R. I. H. A, to be Lieutenant-Colonel in the 13th R. I. H. A. (Colored); Raymond H. Perry to be Captain in the 3d R. I. Cavalry.

LIEUTENANT Warner, executive officer of the United States receiving ship *Ohio*, at Boston Harbor, Mass., Silsbee commanding, has been ordered for duty to Washington.

Lieutenant Thomas Lay, also of the same vessel, is required to report to the officer commanding the revenue cutter *Jackson*, at the harbor of Bangor, for duty.

COL. Fairchild, of the Second Wisconsin Volunteers, has been promoted by the President to rank as a Brigadier-General, for the battles of Chickamauga and the battle of Gettysburg, where he lost an arm. He will, however, resign his commission, having accepted the nomination on the Union ticket for Secretary of State.

THE following promotions in the 64th N. Y. Volunteers are announced: First Lieutenant, Arnold H. Rose, to be Captain; First Lieutenant Charles H. Hadley, to be Captain; Second Lieutenant Orel H. Willard, to be First Lieutenant; Second Lieutenant Wm. H. Rose, to be First Lieutenant; Second Lieutenant W. W. Keller, to be First Lieutenant; Acting Sergeant Major Henry Thompson, to be Second Lieutenant; First Sergeant Albert C. Blackmore, to be Second Lieutenant.

THE prevalent notion touching the rank of Major-General is the Tennessee Army is erroneous. Major-General Grant is the senior officer in command, taking rank from the date of his appointment. Major-General Burnside is next in rank, his commission dating March 18th, 1862; Major-General Rosecrans is next, taking rank from commission dated March 21st, 1862; Major-General G. H. Thomas' commission is dated April 25th, 1862; Major-General Hooker's, May 5th, 1862; and Major-General Sherman's, we think, in November, 1862.

FIRST Lieutenant Wm. H. Smith, commanding Company G, 11th Infantry, was severely wounded through the temple on the first day of the battle of Chickamauga, is alive and unhurt. Two letters from him, dated Libby Prison, Richmond, Va., Oct. 19, 1863, have been received. Major Sidney Coolidge, commanding the regiment, was probably killed, as he has not been seen within the rebel lines nor reported by the rebels. Captain Peter H. Christopher, reported killed, is wounded and ill at Cincinnati.

THE following officers compose the General Court Martial now in session at the corner of Fourth and Pennsylvania avenue, Washington, D. C.: General William Hays, U. S. Vol., President; Col. Albert Tracy, additional A. D. C.; Maj. J. Lesley, U. S. Engr., Vol.; Maj. W. W. Grosvenor, 12th Ill. Cav.; Capt. John R. Howard, additional A. D. C.; Capt. John G. Hopper, additional A. D. C.; Capt. Joseph A. Shipper, Asst. Adj't. Gen. Vol.; Capt. H. F. Brownson, Asst. Adj't. Gen. Vol.; Maj. Theophilus Gaines, Judge Advocate.

CAPTAIN David W. Cohen, of the United States Marine Corps, recently tried before a Naval Court-martial for stealing Shakespeare, has been found guilty of the specification, but not of the charges, and sentenced to be reprimanded by the Secretary of the Navy. The bearer of the challenge, First Lieutenant Wm. McCoskry, of the Marine Corps, was also tried by the same Court, and sentenced to be admonished by the Secretary of the Navy. Secretary Welles disapproved the finding of the Court in both cases, saying that the Department cannot sanction a decision which seems to indicate a difference in the standard of duty, as well as in the reasoning power of those who pronounced it; the tendency of which would be to encourage a disregard of law.

ITEMS AND INCIDENTS.

A LETTER from the rebel headquarters to the Columbus, Georgia, *Inquirer*, puts the rebel losses at Chickamauga at 17,998. The Union loss is put by official statement at 15,851.

THOMAS J. Clay, the youngest son of Colonel Henry Clay, of Kentucky, has been drafted in the midst of Atlanta, Georgia, of congestive fever. He was inspector on General Buckner's staff.

THE Treasury Department has recently sent seven or eight millions of dollars to the West for the payment of troops. The Treasurer has received another package of notes from the Bureau of Engraving, Boston, (the last bearing additional proof that all the money (nearly three millions) was on board that steamer at the time of the fire.

THE contributions to the Sanitary Commission include a formidable water battery, extending from the saltpetre works to the old barracks, having a front of some ten or twelve hundred feet, with a formidable parapet, and a ditch and a glacis and mezat, or ditch surrounding the whole fort, in which there will be eight feet of water. The fort is to be flanked, and is designed for heavier fortifications, involving a complicated system of defences.

THE Commissary-General of Prisoners has requested the Acting Assistant Surgeons that have reports made on the fifteenth and last days of each month of deceased prisoners of war, giving rank, regiment, date of decease and place of interment, and other information as is necessary to trace their place of burial. An order has accordingly been issued by order of the Secretary of War, that rebel prisoners of war are held to furnish such reports as requested.

THE French Admiral gave a fine entertainment on Wednesday, on board the flag-ship *Guerriere*, now at Hampton Roads. Among the guests were Admiral Paulding, Captain Meade, United States Navy, and several other high officers of the United States Army; also Count de Gleirgy, Austrian Minister to the United States; Mr. H. Kohen, Austrian Vice Consul; Mr. Borg, Acting Swedish Consul; Mr. Hugo Hesse, Prussian Consul, B. Conard and family, and many other ladies and gentlemen of New York.

THE First Michigan, First Vermont, First Virginia, and Fifth New York cavalry regiments have received permission to return to their respective States, upon condition that they re-enlist for three years and recruit the regiments to their full strength. For this purpose thirty days' leave are granted. These commands were organized in 1861, and will go out of service during the coming year; but upon re-enlisting will receive the veteran bounty of four hundred dollars, and be able to muster a brigade equal in numbers to many of our divisions.

THE Provost-Marshal-General has issued a circular, stating that the one month's advanced pay allowed to volunteers, by resolution of Congress, approved July 21, 1862, will be paid to recruits for the old organizations, enlisted under special orders from the Provost-Marshal-General's office, immediately upon their arrival at the general rendezvous, by the Mustering and Disbursing officer there stationed, who will be subsequently reimbursed by the Pay Department.

IN one burial ground in Washington, near the old Soldier's Home, there have been over 2000 interments of soldiers, of which about five thousand bodies still remain—two thousand having been taken away by friends or friends. These interments are made in accordance with a regulation of the army, as laid out into divisions, with each avenue marked, and a record containing the names, date, regiment and regimental number, &c., so that, as a general thing, the visitor may always find the tomb of any of the departed in whom he may be interested.

A GENERAL Court-Martial, of which Brigadier-General J. Ammen was President, assembled at Lexington, Ky., on the 10th of October, and on the 16th of October, on army contractor, on charges of presenting claims against the United States Government, knowing such claims to be false and fraudulent; of fraud and of neglect of duty; in which he guilty of the two first offices, and sentenced him to pay a fine of ten thousand dollars to the Government of the United States, and to be imprisoned for two months. The sentence was approved, and Camp Chase, Ohio, was selected as the place of confinement.

THE facts in regard to changes at the West, as now officially ascertained, are as follows: 1. General Rosecrans is relieved. 2. Major-General Sherman succeeds to the Army of the Cumberland. 3. The Departments of the Ohio (Burnside), Cumberland (Thomas), Tennessee (Hurlbut), and Virginia (Schenck and Benson), are united into one grand "military division of the Mississippi," under the command of Major-General U. S. Grant, with Major-General Hooker, the latter now at Nashville, will command corps in the field. 5. Gen. Grant's headquarters will be in the field. 6. McPherson's Department will extend from the Department of the Gulf to Napoleon.

OUR LOSS AT CHICKAMAUGA.—The following is the official report of casualties at the battle of Chickamauga:

ARMY OF THE CUMBERLAND (GENERAL ROSECRANS).

Killed—36 commissioned officers; 635 enlisted men. Total, 671.

Wounded—266 commissioned officers; 3,297 enlisted men. Total, 3,563.

Missing—127 commissioned officers; 2,000 enlisted men. Total, 2,127.

20TH ARMY CORPS (GENERAL M'COOK).

Killed—49 commissioned officers; 363 enlisted men. Total, 403.

Wounded—168 commissioned officers; 2,367 enlisted men. Total, 2,535.

Missing—77 commissioned officers; 1,563 enlisted men. Total, 1,640.

14TH ARMY CORPS (GENERAL CRITTENDEN.)

Killed—33 commissioned officers; 296 enlisted men. Total, 335.

Wounded—131 commissioned officers; 2,157 enlisted men. Total, 2,288.

Missing—22 commissioned officers; 455 enlisted men. Total, 677.

RESERVED CORPS (GENERAL GRANGER.)

Killed—16 commissioned officers; 219 enlisted men. Total, 235.

Wounded—59 commissioned officers; 377 enlisted men. Total, 436.

Missing—54 commissioned officers; 507 enlisted men. Total, 561.

GRAND TOTAL

Killed—131 commissioned officers; 1,513 enlisted men.

Wounded—564 commissioned officers; 8,698 enlisted men. Total, 9,262.

Missing—280 commissioned officers; 4,055 enlisted men. Total, 4,945. Total loss—15,851.

GEN. GILLMORE AND ADMIRAL DAHLGREN.

The following letter from Rear-Admiral Dahlgren has been received by the Secretary of the Navy:

FLAG-SHIP PHILADELPHIA, } OFF Morris Island, }

HON. GIDEON WELLES, Secretary of the Navy:

SIR:—In the despatch of October 9th you are pleased to allude to the conduct of Lieutenant-Colonel Gillmore, Engineer and superior Officer, following note from General Gillmore will satisfy the Department as to this subject. I am, respectfully, your obedient servant,

HORACE BLAKE, (S. C.) Sept. 25.

SPECIAL.—I am much displeased at the report which you have made to me to assume you that I am entirely ignorant of the Ordnance duties of the Department, and that I have not been in the habit of reporting to you. I have not been in the habit of reporting to you. I have not been in the habit of reporting to you.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondents and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest, of the movements of vessels; of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in relation to military and other subjects.

From gentlemen in the medical service we shall be glad to receive communications on military hygiene, pharmacology, and reports of peculiar operations and recent forms of treatment.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Government's, Postmasters' or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers will fail to receive their paper promptly, will please give immediate notice of the fact.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

ANSWERS TO CORRESPONDENTS.

CORRESPONDENT.—If you will make your inquiry in person at our office, we shall be glad to give you what information we can, if we are satisfied as to your purpose in making the inquiry. We have very full information as to the location of the different regiments in the service; but it is not proper that we should make it public, through the columns of the JOURNAL.

NINTH NEW JERSEY.—A contract should present terms to any Surgeon who has the rank of Major.

SOLDIER.—The article on "Forming Fours," by Major-General CASEY, which appeared in the issue of this Journal for Sept. 12th, contains precisely the information you desire. In the second face to the right, No. 1 steps to the *left* of No. 2, to the third face to the right, No. 1 steps to the *right* of No. 2; in the fourth face to the right, No. 2 steps to the *left* of No. 1. In the first face to the left, No. 1 steps to the *left* of No. 2; in the second face to the left, No. 2 steps to the *right* of No. 1; in the third face to the left, No. 2 steps to the *left* of No. 1; and in the fourth to the left, No. 1 steps to the *right* of No. 2.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, OCTOBER 31, 1863.

THE ANACONDA POLICY.

IT will be for those of us who survive the war and are able to review the course of its military conduct in the light of completed events to learn to what precise extent the object for which the Nation took up arms has been delayed, frustrated and jeoparded by a single false theory. It would be difficult perhaps to mark the precise period when, or the exact circumstances under which the theory arose; but scarcely had the rebellion broken out when the minds of men became impressed with the notion that the proper method of "crushing" it, was to surround the rebellious territory with a grand *cordon militaire* which, drawn tighter and tighter, would squeeze the life out of the rebellion. It so happened, too, that this preposterous notion—so thoroughly characteristic of a people utterly inexperienced in war—at an early stage became fixed and formulated by a phrase, (the authorship of which tradition assigns to General SCOTT)—which seizing hold of the popular fancy, was forthwith looked upon as the certain and sovereign prescription for the cure of the rebellion. The reader already anticipates that we allude to the famous "Anaconda" policy. The Anaconda, immediately on its creation, achieved an immense success, and for months men's mouths and the public prints were full of the wild imagery drawn from this monster, whose "fiery folds were to twine round the," etc., etc.

Unhappily, this conceit was not allowed to remain an innocent fiction with which the popular fancy might play: it was adopted as a practical fact and rule of conduct in the governance of the war; and this brings us to the statement with which we set out, that time alone can reveal how much damage and disaster this false theory wrought us. The Anaconda policy planted our forces in an absurdly extended military cordon, along the whole vast circumference of the theatre of war. The Anaconda policy gave us ten, twelve, fifteen different and independent lines of operation, concentric towards the enemy. The Anaconda policy planted our armies on exterior and inclusive lines. The Anaconda policy, in a word, accumulated and resumed in itself every possibility of incorrect military action.

The rebels, not much wiser at the start than ourselves, undertook to meet the Anaconda by a corresponding device—opposing our force on each point of the front of operations by a counter force, meeting us on each of all the lines we selected, and covering each point we menaced. But they were not long in discovering the error and folly of this policy. They speedily found what could be accomplished by concentration, learned the advantage and uses of interior lines, and became willing to relinquish the temporary possession of territory that they might in the end take it and more back as the result of general combinations. To correct action based on these grand fundamental principles of war—which are also so obviously the dictate of what we call "common sense," that it is astounding men should ever act differently—the rebels are indebted for whatever success they have achieved. And it is no exaggeration to say that the rebellion is, to-day, in great part, by virtue of the Anaconda theory.

It is some satisfaction to know, however, that, if we were long in getting over this fatal fiction, disastrous experience has not been wholly lost upon us. We have learnt the impracticability of attempting to combine, mentally, or reducing the number of lines of operation and adopting such as promise decisive results, or ourselves seizing interior lines, of striking for the centre instead of dallying on the circumference. The latest action in this respect is most encouraging. At one blow, four independent armies, operating upon four lines, have been united into one colossal mass, planted on one grand decisive line, and assigned a task of superlative magnitude and moment.

This action reduces our forces in the field practically to two great armies, operating upon two lines and aiming at two great objective points—namely, the Army of the Potomac on the line of Richmond, Tennessee, now under General GRANT. It is true that we have other forces at other points, and working for other ends; but these are subordinate, and their work subordinate, not primary. Our coast operations will still go on, and should do so, for they are important in many ways, materially and morally. They are also expeditionary forces in the rear of the rebellion—west of the Mississippi river—whose work is worth doing; provided their presence there does not take from our needed strength at more important points. But the crowning task of crushing the main armed force of the rebellion is now committed to our two great armies in Tennessee and in Virginia.

So far, therefore, as concerns the general scope and scheme of military operations, the present position of our armies is in the highest degree satisfactory. It only remains that the operations of these two great armies *shall be so ordered that they shall mutually assist each and sustain each* throughout. If the main weight and interest of the war has been transferred from Virginia to Tennessee, the army in Virginia can yet aid the army in Tennessee immensely. The notion of "shelving" the Army of the Potomac, under the frivolous guise of "covering Washington," which we hear talked of, is ridiculous. It is far other work to do and it must do it. We should do what NAPOLEON did in all his wars against Austria, where he had two lines of operation—one in Italy and one in Germany. The main force, the main effort, the decisive operation, were always made in one zone, to which all that was done in the other zone was subordinate. We should have this zone in subordination and *coördination* between our two great armies. If the Potomac Army is unequal to its task of taking Richmond, it can at least so act as to make a great diversion in favor of the West. We have two armies. The rebels have in reality but one. They rely on the advantages of their interior position and our own oft-displayed want of combination, to make their force, by *massing*, formidable on the decisive theatre, east or west. Our forces have hitherto borne the character of the isolated fingers of a hand; they are now those fingers closed in a clenched fist, capable of dealing downright hard blows.

THE RANK OF GENERAL OFFICERS.

WE have in our service a want of grades among general officers, and we have never seen the man who could give a good reason why. The singular and anomalous rank of *lieutenant-general*,—anomalous when it stands alone, as a brevet, at least,—expired with WASHINGTON, and the National Legislature has guarded its slumbers in the tomb at Mount Vernon, as he dragons did the fruit in the garden of the Hesperides. So, when our noble old SCOTT had earned something more than thanks or a medal, and a few of the just, we will not say generous, thought to revive this rank for the veteran of three wars, there were not wanting bitter opponents; among whom, if we remember rightly, was JEFFERSON DAVIS.

But, entirely apart from rewards of merit, we need more grades and some system. Rising to some sense of this want in the Navy, *admirals* and *commanders* were appointed, although why they were *rear*-admirals, for the life of us we cannot tell. Why should they fly their pennons at the mizzen? Why not simply *admiral*? But the Navy has at least taken a step in the right direction. Now how is it in the Army? A *brigadier-general* means, of course, one commanding a brigade, but what does *major-general* mean? In truth, we have but one rank. The generals in every service of which we know anything have conformed in grade to the regimental organization. Thus, as we have *colonel, lieutenant-colonel* (*i. e.*, colonel-substitute), *major* (*i. e., greater* than a captain), and *captain*; so the design was to have *general, lieutenant-general, major-general*, and *brigadier-general*,—the brigade being the unit of a general's command.

The commander of a separate army is in very deed a *general*, without limitation of rank; his chief assistants or lieutenants, such as grand division, wing, or corps commanders, are rightly termed *lieutenant-generals*, while the division and brigade commanders, or respectively *major* and *brigadier* generals. To *major-general* we prefer the French and Spanish appellation *général de division*; but the European usage sanctions the other form.

We advocate, not a superfluity, but a sufficiency of grades, and should like now to see the grade of *field marshal* established for exalted merit and service. We are sure that the marshals of the Empire fought more devotedly than plain General MASSENA or JUNOT or DUROC would have done, and F. M. has added prestige to the fame of the Iron Duke, even after Waterloo.

There are two objections which may be urged against our propositions;—the one that the rebels have adopted the system of generals, and the other, that, hoping to come back to a small army and peaceful days, we should not encumber ourselves with a *grand cadre*, which would then be unnecessary and absurd; we have already answer for both. In their adoption of the European system the rebels have done well, and as wicked and ill-deserving as they are in other respects, in this at least they have given us an example we should follow.

In regard to the second objection, those who urge it are grossly mistaken. Until the rebellion is finally conquered, every one will concede that we must have a large army, and hundreds of generals; and if, as we believe and hope and maintain, we are to be entirely triumphant in this struggle, a large standing army in the future,—large, at least, in comparison with our former ideas,—is to be our fate and our fortune. The day of small things in military affairs, depend upon it, is over, and forever.

The creation of these new grades would avoid confusion, reward merit, render that symmetrical which is now one-sided and incomplete; it would produce no ill-results which we can conceive, and would cost the government not one single dollar. We only elevate the grades, but that does not imply increase of pay; but only a re-arrangement of the pay-table.

MILITARY INSPIRATIONS.

AFTER a commanding General has made all his plans, pre-arranged all his combinations, given to all his subordinates detailed instructions, and, with a force—almost superhuman, provided as nearly as he can for every possibility, it never fails to be the case that much depends upon what we venture to call "happy inspirations" of subordinate commanders in the moment of conflict. There is no war, there is scarcely a single great battle, which does not illustrate this. Such, for example, was the happy return of DESAIX from Novi to Marengo as soon as his practiced ear caught the vollies of the FIRST CONSUL'S battle. Before NAPOLEON could send, DESAIX following his instinct, was making a forced march; and he arrived just in time to save the day. "General," said the FIRST CONSUL, "that battle is lost." "I have had my own fears," said DESAIX, taking out his watch, "it is not four o'clock; "there is time to win another." And so the battle was won. The want of just such a spirit lost WATERLOO. JOMINI places among the three grand causes of defeat the non-arrival of GROUCHY, even though BLUCHER had escaped him.

It was the happy inspiration of RICHEPANSE at the battle of Hohenlinden, after his division was cut

in two by the Austrian left wing, that led him to fall with case-half on the rear of the grand column of the Austrians. MOREAU has had the glory in history, but NAPOLEON won the battle. MARMONT's testimony is valuable and decisive on this point. "Such good "fortune," he says, "was not due to the dispositions of "General MORLAND, General NAPOLEONE, a man of "talent and courage, finding his division surrounded by "Austrian troops, faced them in every direction, and "possessed himself of a hundred pieces of cannon, "which were marching in column over the causeway."

It was due to MCMAHON, the commander of the Second Corps of the Army of the Alps, that the French were successful at Magenta. He charged at no opportune moment without orders, and for his success he was made Marshal of France, and Duke of Magenta. We can hardly take up a battle in European annals which does not contain a striking example.

But to come down to our own times and people. Here we shall find our subject more frequently illustrated by the want of this inspiration than by exhibitions of it. Had General PATTERSON pushed for Manassas—or been able to do so—in a line parallel with JOHNSTON's retiring column, to the first battle of Bull Run, the day would not have been lost, and the rebel cry, at the moment of their despair, "KIRBY SMITH IS "coming with 30,000 men!" would have soon given way to dumb astonishment at finding that officer confronted by a new army on our own side.

It seems to be conceded that could General MCDOWELL have flown to the sound of MCCLELLAN's cannon on the first day or of Gaines' Mill on the second of the great week of battles, the issue might have been very different. "I venture to say," says Colonel ESTVAN, "of the Confederate Army" (and our readers may give what credence they will to his judgment), "that if MCCLELLAN had received the support "that was promised him, he might have driven us across "ing blow to the Confederacy." This support lay in MCDOWELL on the north, and BURNSIDE at Fort Monroe, or Newport News. There were a hundred times in that memorable week when succor from both would have carried Richmond, even after our retreat had begun. But it is the acknowledged stronghold of the rebels themselves. The directions for these so-called happy inspirations are often the most simple. Among them are:—If you have nothing of great importance to do, fly to the sound of cannon. NELSON's final order at Trafalgar to his Captains was—"Every "Captain will be doing his duty if he is hotly engaging "the enemy." The spirit and almost the letter is the same now, and for our army. Fight where there are orders; fight where there are no orders, and especially in an emergency where manifestly none could be given.

We do not by any means counsel an evasion or transgression of orders, or that mean spirit which would seek to avoid one's self responsibility in a battle, which is constantly reaching out for impunity of success; but we do counsel and hope to see more of the fire of genius in our subordinate commanders; men who take advantage of circumstances which the General-in-Chief could not foresee, to win a victory, or avoid a defeat. It is the hope on whose history delights to honor; such are the men who gain great battles, and save imperiled countries; bringing captive in their triumphant train, peace, prosperity and national glory.

THE London *Times* attempts to show that the fighting material of the North is exhausted. It is not necessary for us to argue this point, as the observation of every man in the North contradicts it. It further says that the fighting element of the South is not exhausted—and this statement, we rather think, will be contradicted by the observation of every man in that section. Its logic is marvelous ful. It assumes that the Confederate States have a population of six millions, and have sent to the field six hundred thousand soldiers, or one-tenth of their aggregate population; while the Northern States, with twenty million inhabitants, have sent to the field a million soldiers, or one-twentieth of their aggregate population. One would fancy that, in comparison with the Southern drain, this showed that the North had still a million of fighting men left, which we assure our astute critic it has, and another million to boot. The English organ, in further referring to the immense ratio of soldiers taken from the Southern population, says that "if we apply the estimate to our "own islands the levy will appear prodigious. Scot"land contains just about half as many inhabitants as "the Southern Confederacy, and they are among the "most martial races in the world; but what would be "felt in Scotland if the entire military establishment "of Great Britain were maintained by drafts from "that country alone? Our whole army, Indian and "Colonial garrisons included, is under 230,000 men of "all ranks and arms; whereas, if Scotland were to be "drained as the Southern States have been drained, she "would send 300,000 men to the field."

The fact is, that no comparison can be made between America, North or South, and any European country, in regard to the proportion of population for specific furnishing a great and effective army. The proportion of no European country, in mass, is one half so *military* as ours. The clumsy clodhoppers of their agricultural districts, the pale and puny operatives of their manufacturing districts, and the imbruted masses that form the under-stratum of their great cities, are the very antipodes of *soldiers*, as regards constitution, character, spirit and training. But our independent, free-holding American yeomanry, our intelligent mechanics of the great cities, our mercantile and commercial classes, are soldiers born, and, when men, are soldiers in thought, in habit, and, to a large degree, in training. Instead of being able to put into the field one-tenth of our gross population, we believe that, in case of emergency, the North could put one-seventh, or three millions of men under arms. And so flexible and apt is the national character, that in less than a year all of these recruits would have the character and capacity of veterans.

IT is understood that the Court of Inquiry in the case of General BUELL has acquitted that officer of all the charges brought against him. This result will be received with the utmost satisfaction by all who are cognizant of the merits of the case. Splendidly West of the Alleghanies, where the character and military career of General BUELL are more intimately known than in the East, his acquittal will be hailed with the liveliest satisfaction, as the vindication and justification—tardy though it be—of a much maligned soldier. The country has no misfortune to be one of the victims sacrificed to the Nation's own inexperience of war. It is the same old story that appears so often in the histories of all democracies suddenly plunged into war. Such men the Greeks exiled, and then raised monuments to their memory; such men Revolutionary France sent to the guillotine, and afterwards transferred their ashes to the Pantheon; such men American history will never be blotted with such acts. It is hard enough to submit, as General BUELL has had to do for more than a year, to public suspicion and malice, and the slings and arrows of outrageous fortune. The revenges of time come round, however; a court of his peers have given him every charge that ignorance or malice brought against him. We can sincerely trust that a field will be assigned to General BUELL where his great military talent will have full scope.

PROVOST-MARSHAL-GENERAL FRY has rendered a report to Secretary STANTON on the operations of the draft, in which, while stating that the machinery for executing the Enrollment Act is in complete working order, he yet acknowledges that the Conscription Law as it now stands, "cannot be made to develope the "entire military strength of the Nation, and that the "construction of it has been rendered exceedingly difficult by the efforts made in various ways to resist or "evade it, or to escape from its operation." Of those drawn in the present draft, including the fifty per cent. additional, eighty per cent. have reported, in accordance with the order of the board. Of all examined about thirty per cent. have been exempted on account of physical disability, about thirty per cent. have been exempted under the provisions of the second section of the Act, &c. About forty per cent. of the men examined (that is forty per cent. of eighty per cent.—thirty-two per cent.) have been held to service, and have either entered the army in person, furnished substitutes, or paid commutation. About one-half of those held to service have paid commutation, which reduces the thirty-two per cent. of men held to service to sixteen per cent. *Of these sixteen per cent., about one-third have gone in person, and two-thirds have furnished substitutes.* These men are now all in the field. The figures are not given, but from the data they must number about *forty thousand*, as the total practical result of the draft. The Provost Marshal, while re-opening the faulty provisions of a law whose practical fruits are so meagre, does not propose any remedy. Before the new draft, set down for the 1st of January, comes off, Congress should see that the needed improvements are made in the Act.

THE resumption of the bombardment on Morris' Island, which is reported to have been begun on Monday, opens the second act in the seige of Charleston. The first was the bombardment for the reduction of Sumter and Wagner. This having been successfully accomplished, General GILLMORE took Cumming's Point as his *point d'appui* for further operations. The interim, we make no doubt, has been well employed in erecting his batteries, and strengthening his works for the new assault, which has now begun. Our readers will bear us witness that we have always estimated the reduction of Charleston as a colossal task, and as yet we can scarcely see how, with the means at hand, it is to be accomplished. General GILLMORE can doubtless shell the rebels out of the works on Sullivan's island, just as he shelled them out of their works on Morris' island; but this is not the capture of Charleston. As for the attempt to effect its reduction by shelling from Cumming's Point (with or without Greek fire), that is a fiction which may serve the innocent purpose of tickling the popular fancies; but it will hardly be seriously considered by professional men. Until either the iron fleet can make its way up to the city, or we can plant a force on James Island large enough to march on it, we have little faith in the capture of Charleston.

GENERAL MEADE has within a day or two made some changes in the position of his army, looking to the better protection of those engaged in the reconstruction of the Orange and Alexandria railroad. While this change was going on, at about three o'clock Wednesday morning, the rebels made a demonstration against the Sixth corps, but nothing further was accomplished than the driving in of the pickets of that corps a short distance, when the rebels retired.

GENERAL ROSECRANS, in his Cincinnati speech, said it was his firm belief that if the forces now sent to Chattanooga had been ordered there before, the backbone of the rebellion ere this would have been broken.

THE figures of an official statement of the Union losses at Chickamauga Creek, published in the JOURNAL of last week, are slightly altered by a corrected report which we have received from Washington, and we therefore republish the statement with the corrections.

A WELL-INFORMED correspondent writes us as follows in regard to the organization of Army Corps:—

"As a matter of fact, permit a reader of the JOURNAL to say that the Army of the Potomac was not organized into Army Corps, until Mr. STANTON, the present Secretary of War, was inducted into office, and that it is believed this was done on his motion.

"It is also believed that with Mr. STANTON also originated the first official move to create a general Chief-of-Staff of the Army; a position similar to the one held in the French army, first by BERTHIER, and more recently by Marshal VAILLANT. Owing to the difficulties, likely to grow out of the somewhat ill-defined duties of such an office in a service like ours, it is presumed that it was thought best, when General MCCLELLAN was on the Peninsula, and unable to do the duties both of Commanding General-in-Chief and that of the Army of the Potomac, to appoint an officer to the former position, leaving to General MCCLELLAN the latter command."

THE question of supplies is really the pivot on which turns the problem of military operations at Chattanooga. The reports of correspondents reveal a lamentable deficiency in this respect at present. We have ever since General ROSECRANS took up upon the experiment of sustaining a front of operations at Chattanooga while drawing supplies from the Ohio river, as one of the most remarkable in logistics. The line of communications is over three hundred miles long, consisting of one single slender thread of railroad and requiring nearly a hundred miles of wagoning. This line has to be kept up in face of the flocks of light, enterprising cavalry which the rebels have in hand. We rather think that it will be found necessary for the Army of the Cumberland either to advance or to retreat, for the question of subsistence will hardly allow it to stand still.

FOREIGN MILITARY AND NAVAL MATTERS.

IT is not yet definitively settled, but it is not improbable, that the fine line-of-battle ship *Duncan*, of 81 guns, 3727 tons, and 800 horse-power, will be selected as the flag-ship of Sir JAMES HOPE, on his proceeding to relieve Sir ALEXANDER MILNE in command of the North American and East India Station.

ACCORDING to a circular lately issued by the British Government, officers of the army and navy on retired, settling and residing on any of the unoccupied and unsurveyed lands of British Columbia will be entitled without purchase money grants of such lands as they may take from 200 to 600 acres, according to their rank and length of service.

A SECOND trial of the iron-plated screw steamship *Prince Consort*, 35 guns, 3045 tons, has taken place at Plymouth. The mean speed attained in six runs was 13 1/32. The trial was at full boiler power. The engines and boilers worked remarkably well; and although in some of the runs the wind freshened from an average of 31 up to 5, it appeared to have very little effect on the speed of the vessel.

THE English journals regard the recent discovery of tempering blocks of steel to oil as likely to produce a vast change in ocean manufactures, inasmuch as it enables thick masses of steel to be enormously increased in tensile strength, at the same time that it removes the inveterate brittleness consequent upon the use of the hard surface required for firing rifle projectiles. Previous to the late successful application of this method of tempering blocks of steel, the only place in England the means of making powerful rifled guns, as the iron, whether wrought or cast, was liable to yield, and was certain to rapidly decompose under the heavy charges necessary to produce a high initial velocity.

GUNCOTTON is getting into note at Sheffield, in the Bessemer process (as a carburizer), and in the making of the charcoal cakes for cutting very well for this purpose, an account of the large proportion of manganese and carbon it contains. The British Government are now experimenting on this class of iron at Woolwich (with the intention, it is understood, of using it, like KRUPP of Essen, in the manufacture of steel guns). For obvious reasons, it is also likely to come much into use, being used in a process at present kept secret. There are various sorts of spiegel used, but the charcoal cakes are considered to be the best suited for the purpose named.

WHILE experiments are being made in the Adriatic, to ascertain the coupon above mentis of the iron-cased ships of war in the French navy, and while the experiments are about to be made at the island of AIX, off Rochefort, by which the EMPEROR expects to be informed what fortifications are the most likely capable of resisting the attack of a fleet of iron-sides. After the question has been decided, experiments are to be made with the object of deciding the best mode of attack on land, which have the advantage of remaining fixed, can be so constructed as to defeat any attack from a battery in motion, such as a ship of war. These experiments are to be commenced early in the month of October, under the personal inspection, it is said, of the EMPEROR, attended by some of the most distinguished military and naval engineers. The first experiment, to ascertain the capability of stone fortifications to resist modern ships of war, is to be made by an attack on Fort Lieder, in the island of AIX.

SIR WILLIAM SNOW HARRIS has published a pamphlet dissensing the naval architecture of England. He refers to the "ill-conditioned state of the administrative department of the Admiralty," and says, "the head of our naval government do not at all times seem to understand what they really want." He is of opinion that "in the present variable condition of nautical affairs, the construction of the British Navy ought not to rest with one or two individuals, however able in the hands of an executive council, consisting of theoretical and practical naval architects and engineers, experienced naval officers with the due admixture of naval tactics, gunnery, &c. In fact we require, for the solution of the problem of naval construction in the present day, a combination of the greatest skill of theoretical and practical knowledge and experience of different kinds." Owing to the future prospect of naval construction in the department of the Admiralty, as the case at present stands, it must be allowed, as just observed, to be sufficiently gloomy and critical."

IMPROVEMENTS in armor-plating have lately been patented in England by Mr. RICHARD BELL. They consist in securing to the iron frames or ribs double surface plates, that is, plates precisely similar in form to ordinary rails for railways, the web or bottom part of the surfaces being of a depth varying with the requirements of the ship; the outer surface of the plates is recessed so as to receive between every two the intermediate and smaller, but similarly-shaped, double-surfaced and web-bolted strengthening plates. Between every two plates where they are brought together by the web of all of them, and through this aperture, a bolt or bolts in a heated state is run vertically; a key is then passed through the bottom of the bolt, which on cooling tightens all the plates, and gives stability to the whole structure. The outer surface of the plates is bedded on tarred felt or other like suitable material. In some cases the vertical tie-bolt may be surrounded with a wooden washer or collar.

CAVALIER NOVI, formerly Lieut.-Colonel of the Ordnance, on the 5th of February last, read at the Royal Institution of Naples, a paper entitled "Substances for the Preservation of Iron, Cast Iron, and Steel." It was approved and inserted in the reports of the Academy. After having enumerated the various means for preserving iron adopted by the ancients, and still more recently down to modern times, he confines his attention to the following four compositions for coating iron works:—1. Varnish composed of resinous matter, such as essence of turpentine, gallipot, resin, colophony, &c. 2. Varnish of the composition of which is derived from naphtha and metallic essences, mixed with oxides and various coloring substances. He concludes by saying that the future preservation of iron depends on the scientific knowledge and its results. In the month of August the French Government directed that experiments should be made on these compositions.

LETTERS-patent have been recently granted to Mr. WILLIAM CLARK, engineer, London, for an invention which relates to what are technically known as "rifle shot," "shot and shell"—that is to say, shot and shell of a calibre less than that of the guns from which they are intended to be fired. It consists, first, in the combination of a body or elongated fuller of iron or steel, having a cutting face and a surrounding casing of wood or other light material; secondly, in a rear cap of metal, as applied to projectiles of the class of shot or shell and the wooden casing as to serve as a means of holding the wooden casing, as a means of attaching the packing device and of supporting, centering, and guiding the rear end of the projectile in the bore of the gun; thirdly, in a front cap of metal, so applied in combination with the rear cap and the wooden casing, as to serve the purposes of holding the forward end of the casing, of supporting and guiding its front end in the bore of the gun, and of breaking the explosion of the charge of the shell by resistance against the surface of the body penetrated by the shell itself.

A CORRESPONDENT of the London *Mechanics' Magazine*, writing of the defenses of English guns, says he is happy to state that England possesses a gun of precisely the same character as the Armstrong gun. The *Magazine* had called it a "*coup de main* for the best in the American navy." He refers to a gun invented by Mr. PASHLEY BRITTEN. "Like the Parrott, it is a breech-loader, is rifled with three grooves and lands, each about an inch wide; it also has a slow twist, and is bred with a charge of 1-10th the weight of the shot. The mode of stopping the escape of gas between the rear of the shot is in principle precisely similar—the only difference being that the soft metal cast into the breech-end is a line of lead instead of one of copper. This plan is known as the "expansion system," and is among the best; superior, I think to the Wahrendorff or compression principle, which is so highly spoken of now as Sir WILLIAM ARMSTRONG'S invention. Honor to whom honor is due," I present to your readers an abstract of the following letter received by Mr. BRITTEN having proposed his system to the War-office for heavy broadside guns, is still waiting, as he has been for months, while the Armstrong guns are manufactured. At a scientific meeting, Mr. BRITTEN, pluitively but naturally, said "he thought it only fair that he should be allowed to compete with Sir WILLIAM ARMSTRONG on equal terms."

ITALIAN ARTILLERY.—A writer, who was present at the Camp of Somma during the recent review of Italian troops, came away very much impressed with what he saw. The men particularly struck with the artillery. Three hundred and six cannon had just defiled before a considerable crowd, flocking in from the different provinces of Italy, and that under the eyes of the KING, surrounded by his children, his best generals, and most trusted ministers. The great military *fête* of Milan was not a mountebank display of inferior polities, but a *fête* got up quietly, and passing off quietly, to draw closer the ties of Italian brotherhood. The Italians are particularly struck with new arms after centuries of dissension, and Italy has now become a far different power to what she was when split into five principalities given up to the tender care of her own artillery brings to mind the days of which the "gunner" MACHIAVELLI wrote, when all the business of fighting was entrusted to a few soldiers of fortune called *condottieri*—a heavy armed cavalry who fought for the state that paid them best. The great object of the leaders of these troops was to keep them out of harm's way, for every man who fell was so much private capital lost. MACHIAVELLI relates how in two battles, the first of which lasted from sunrise to second half in the day, only one man was killed, who, tumbling from his horse, was suffocated in the mud. The case of the soldier, too, was so far consulted, that during a siege the artillery was directed to fire first at either side, so as not to sunrise. GUICCIARDINI gives an account of Italian artillery when the French, under CHARLES VIII., invaded that country at the close of the fifteenth century. "Of cannon they had very few, and those ful how guns such as those described by the Italian writer could have done much harm to the effects of artillery at all. It is not to be wondered at that the Italian soldiers of those days thought artillery might be altogether dispensed with in field engagements.—*London Army and Navy Gazette.*

THE CANADA BUGBEAR.

The English press continues to be disturbed by the alarming discovery that the United States is "casting longing eyes" on Canada and is greedy for annexation. The apathy of the province in responding to the fears of the public at home has occasioned great surprise and censure. A writer in the *Spectator* has undertaken to perceive that "the Canadas are rousing from a lethargy which seemed utterly "unaccountable" and are "girding on their defensive armor, and imitating the old country in making due preparations against invasion." An English correspondent says:

"Our annexation fear has had good effects: Canada is forming a Militia and Volunteer system much like our own, and, if she will only persevere, she will soon be able to defend herself against the attacks of any Yankee attempt to introduce republican despotism across the St. Lawrence and the chain of lakes. The Canadian militia will be thoroughly trained and steadily kept in a state of efficiency, eaught, with the aid of the Regular Army of England, to be well able to repel any invasion of the kind that the Yankees in Arms[illegible] We are well aware of the hatred which every Canadian bears to the United States, and that alone would prevent any conquest and annexation, if attempted by them. The North American Indians hardly hate more intensely the "Long knives" than the Canadians do. The Canadians, as we are generally known, but it is the truth, that ever since the dispute of the "Trent," we have been quietly increasing our force in Canada. During the whole year, and we have stored our arsenals at Quebec and Halifax with all the munitions of war, in which we were shamefully deficient when suddenly assailed. We shall be better prepared if ever again called on to give aid to Canada. Already in the country we have stores of arms, accoutrements, and ammunition to supply 100,000 men. We have between 18 and 45, and we could, in a few weeks, meet every demand for the defense of Canada, with a force of 50 to 60. As long as Canada retains her loyalty to England, and is true to herself, she can resist any inroad from the Northern States of America with even more success than the Southern Confederacy has done."

FROM JAPAN.

In a private correspondence from Yokohama, dated July 24, *Le Moniteur* finds some interesting details, of which the following is a translation:—

"A Yokohama merchant of which was unknown in Europe before the treaties recently concluded with the Japanese government, is a place of commercial importance. It is situated at about the 35th degree of latitude, on the gulf, on the bay of Kanagawa, and has a population of about 20,000. The wooden houses, built of well-dressed wood, are tasteful and surrounded by beautiful gardens. The inhabitants are industrious, active, and disposed to enter into relations with foreigners. When Admiral JOSIAH took possession of the city, he issued an address to the people, at the request of the Tycoon, assuring them that his only aim was to maintain friendly relations, and to protect them in their property, customs and religion. This produced an excellent impression. The Admiral took command of a small force of soldiers and sailors, and left a detachment under all his disposal. These troops asked for French instructors and from the 1st of August they will have them. They are proud of great spirit, and have acquired considerable military knowledge. They already understand the principal commands, and the Admiral has left with them Captain JAURES, to maintain harmonious relations with his subjects of the English marine, has shared the occupation of Yokohama with the troops of the Tycoon, and prevented conflicts. The struggle between the Tycoon and the Mikado, which for a time threatened to interpose great obstacles to the Japan, will probably assume the proportions of a civil war; but this combat will not menace the safety of foreigners, whose protection is perfectly assured."

SIBERIAN OF THE RUSSIAN ARMY.—A communication from St. Petersburgh says:—The *Bourse Gazette* of the 16th has lately published an article giving a favorable account of the strength of the Russian Army, extracted from the official returns for 1861 by Count MILUTINE. It is not omitted to say that this mass of troops is scattered over a surface equivalent to the seventh part of the globe, extending from the Pacific Ocean to the White Sea, and from the Baltic to the Black Sea. The article in question is as follows:—Adding together the numbers of regular and irregular troops, as stated in the report of the Minister of War in 1861, we have a grand total of 1,188,632 officers and men of the regulars consisting of 31,856 officers and 858,807 men and file, the irregulars of 4,818 officers and 302,951 men and file. These very respectable figures assume a still more formidable appearance when it is known that the Army is shortly to be reorganized. Our Army being backed by a powerful Reserve and a Depot of Recruits which can at

augmented if necessary, will be fully equal to the military requirements of the Empire without imposing any very great burden on the finances of Austria. The cathedar has omitted to say that these troops have to hold the Caucasus, to defend the Russian frontier in Asia from Kokand to Chinese, and along the Amoor to the Bay of Castrii, and to keep under an iron yoke Podolia, Volhynia, the Ukraine, Lithuania, and Poland?

APPOINTMENTS IN THE REGULAR ARMY.

The following is a list of the appointments in the Regular Army made by and with the advice and consent of the Senate, and by the President alone, since the publication of General Order No. 181, of November 1, 1862, up to July 1, 1863. Those made by the President alone are designated by a star.

ARMY GAZETTE.

MAJOR-GEN. GRANT ASSUMES HIS NEW COMMAND.

HEADQUARTERS MILITARY DIVISION OF THE MISSISSIPPI, LOUISVILLE, KY., Oct. 18, 1863.

GENERAL ORDERS, No. 1.

In compliance with General Orders No. 337, of date Washington, D. C., October 16, 1863, I hereby announce that I assume command of the Military Division of the Mississippi, embracing the Departments of the Ohio and the Cumberland, and the Troops in the Department of the Mississippi will be under the command of Major-General Thomas, to whom the Chiefs of all the Staff Departments will report to him for orders.

In taking leave of you, his brothers in arms, officers and soldiers, he congratulates you that your new commander comes to you not as a stranger. Some of you have been associated with him in battles and in the reorganization, and he has told you often in battles. To his renown, previously acquired, he can only add by complying with your wishes, and with confidence that, under God, he will lead you to victory. The General commanding desires to say to you that he has entire confidence and your country in the future as you have been in the past. Your courage, your noble devotion to your country, and the tenders his cordial thanks for their valuable aid and hearty co-operation, which will be duly appreciated.

To the officers of the Staff Departments and their subordinates, whom he leaves behind, he owes a debt of gratitude for their fidelity and untiring services.

Companions in arms, officers and soldiers, farewell, and may God bless you.

W. S. ROSECRANS, Major-General.

O. GODDARD, A. A. G.

MAJOR-GENERAL THOMAS ASSUMES COMMAND.

HEADQUARTERS, DEPARTMENT OF THE CUMBERLAND, CHATTANOOGA, TENN., Oct. 19, 1863.

GENERAL ORDERS, No. 245.

In obedience to the order of the President of the United States, the undersigned hereby assumes command of the Army of the Cumberland.

In assuming the control of this army, so long and ably commanded by Major-General Rosecrans, he does so confidently relying upon the hearty co-operation of every officer and soldier of the Army of the Cumberland to make it second to none in the noble duties devolved upon him.

The officers on duty at the various departments of the staff at these headquarters will continue in their respective places.

All orders heretofore published for the government of the army will remain in force until further orders.

GEORGE H. THOMAS,
Major-General United States Volunteers.

RECRUITS FOR THE REGULAR ARMY.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, Oct. 16, 1863.

General Orders No. 326.

The time for enlisting Recruits in the Regular Army under the provisions of General Orders No. 191, of August 22, 1863, is hereby extended to Dec. 1, 1863, during which the extra bounty of $100 will be paid. By order of the Secretary of War:

E. D. TOWNSEND, A. A. G.

EXCHANGE OF PRISONERS.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, Oct. 19, 1863.

General Orders, No. 330.—1. A declaration of exchanges having been communicated by Lt.-Gen. Grant, dated Army of the Rapidan, Va., dated September 12, 1863, it is hereby declared that all officers and men of the United States Army and Navy captured previous to the 1st September, 1863, are duly exchanged.

2. The officers and men thus declared exchanged will immediately be sent to join their respective regiments.

By order of the Secretary of War:

E. D. TOWNSEND,
Assistant-Adjutant-General.

SENTENCES OF COURTS-MARTIAL.

The following officers have been tried by Court-Martial since Sept. 1, 1863, and sentenced to be dismissed the service of the United States:—

First Lieut. Merrill Hicks, Co. F, 4th Kentucky Vols.

First Lieut. E. K. Purdy, 2d regiment infantry Corps d'Afrique.

Capt. Geo. Pyne, Co. B, 59th Wisconsin Vols.

Capt. John F. Gerrould, 11th Massachusetts Vols.

Capt. Wm. B. Cox, Co. K, 1st N. Y. Vet. Vol. Cav.

The following officers having appealed, are restored, provided the vacancies have not been filled by the Governors of their States:—

Captain Jesse A. Gove, 2d New Hampshire Volunteers.

Captain John N. Harrison, 2d Iowa Volunteers.

Lieutenant James L. Kelly, 56th Pennsylvania Cavalry.

NAVY YARDS.

BROOKLYN NAVY YARD.

Affairs at this Yard are as brisk as ever. The double-ender *Penobscot* was launched on the 24th inst. Her sister ves sels, *Tallahoma* and *Algonquin*, are far advanced. The first named will probably be the first launched. Orders were received from the Navy Department on Monday, directing Chief Engineer Isherwood to overhaul the United States school-ship *Savannah*, to investigate there the merits of a new gun-carriage which has just been presented for the approbation of the Board. The new gun-carriage company will board.—Lieutenant-Commander Upsur, Young and Lester. On arriving on board the *Savannah* the gun-carriage was exhibited to them the carriage, which was manately examined. The board then made a report, which was signed by all members, and transmitted it to the Navy Department, where it was referred to the Bureau of Ordnance. Orders have been received to dispatch a large force of men to recruit the Charleston fleet. A report has been widely circulated that a casualty of five men had occurred in the Yard. In justice to say, however, that the sick is still sufficient for all the drafts that must necessarily be made upon it. The vessels at the Yard are all rapidly progressing to a state of completion, and the work of the Navy Yard pumps.

The United States steamer *Union* will sail on the 11th of November for the South Atlantic blockading fleet, and will take a small Parties having friends on board of the ships of Admiral Dahlgren's squadron, are informed that letters, papers, and parcels, properly directed and left, free of postage, at the Brooklyn Navy Yard, will be cheerfully forwarded. The United States steamer *Nestora* will sail also in a few days for the North Atlantic blockading fleet, and will take letters and papers for the vessels of that squadron.

BOSTON NAVY YARD.

The *Tuscarora* entered the Dry Dock on Friday, but soon after removed to make way for the British steamer *Petrolea*, which was lately damaged by collision. The *Sabine* is out of commission, and workmen are engaged in making some alterations in her. The *Saratoga* sailed this week. The *Sacramento* and *Queen* are receiving some further repairs. The supply steamer *Circassia* sailed on Saturday for the West Gulf Squadron.

PHILADELPHIA NAVY YARD.

The new buildings which are being erected on the north side of the Yard, are in a fair way of being completed shortly. The men at work on the two-end *Tuscarawas* display great activity; the gunboat *Penobscot* will be ready for launching about the latter end of the month. The gunboat *Quaker City* is still on the dry-dock, undergoing repairs. The *Keystone State* sailed Tuesday, under sealed orders, for the blockading squadron off the mouth of the Rio Grande.

The *Wyandotte* lies at the Navy Yard wharf in the yard. The guns were taken from on board of the ship Tuesday afternoon. On Monday morning the United States steamer *Massachusetts*, Lieutenant-Commanding, reached the Navy Yard, and anchored in the stream. Acting-Master C. D. Dungan, purser of the steamer from Admiral Dahlgren's fleet, with invalids and other passengers, were on the *Massachusetts*. This vessel carries the mails and supplies to the Atlantic and Gulf Blockading Squadrons. She will leave the Navy Yard on her return trip to Port Royal, Florida, touching at all the intermediate stations, leaving supplies with all the vessels on blockading duty.

RECEIVING SHIP AT NEW YORK.

There have been no arrivals of any consequence during the week, with the exception of the gunboat *Tacony*, which, after a short stay, returned to her station on the Potomac. Regulus on the basin of steamer *Sabine* and sailor *Ellis* have been completed, and the vessels, on Monday last, rejoined the Potomac Flotilla.

The Court of Inquiry to investigate certain facts connected with the recent sale of scrap copper, has adjourned sine die. The proceedings have not yet been made public. Experiments in gunnery are being made almost every day; but the results are not made public.

NAVY GAZETTE.

DISMISSALS FOR NEGLECT OF DUTY.

NAVY DEPARTMENT,
OCTOBER 17, 1863.

GENERAL ORDERS, No. 211.

A survey having been held on the machinery and boilers of the U. S. steamer *Port Royal*, and the Board having reported the machinery of that vessel from New York to Fortress Monroe, one of her boilers was nearly destroyed, by burning, and the loss of her officers and crew placed in imminent jeopardy, in consequence of gross neglect of duty on the part of the Engineer in charge:

In conformity with the rule adopted by the Department, and with the sanction of the President, Acting Chief Engineer Joseph A. Wilson, the officer in fault on the occasion referred to, is dismissed from the service.

It is to be regretted that frequent examples of the nature appear to be necessary to impress officers with a sense of the importance of their responsibility, and of the determination of the Department that the public property shall be protected and watched with care by persons unworthy of its trust reposed in them.

GIDEON WELLES,
Secretary of the Navy.

REGULAR NAVAL SERVICE.

ORDERED.

Assistant Surgeon A. C. Bradford, to the Naval Hospital at New York.

Carlos G. K. Rockwell, to the West Gulf Blockading Squadron.

Richard Perkins, landsman, yellow fever, October 2, United States steamer *Alabama*.

Thomas Cooper, coal heaver, yellow fever, September 30

NAMES OF NAVAL VESSELS.—The New York *Journal of Commerce* has the following sensible remarks on the subject of names for the vessels of our Navy.—"Some of the Indian names selected by the christening baron of the Navy Department for the new vessels, are very harmonious and pretty; some are very rough and unpronounceable; all are unquestionably original, not to say aboriginal. No nation on earth has a larger and richer store of aboriginal names to draw upon in the naming of vessels. But there is too much of a good thing—a species of fetichism in the matter which has now reached such a number that all the better class of Indian names seem to have been called into use, and only ugly appellations are left. The Umpqua, Juniata, Sagunda, and Washanogus—species of fish, we believe, from the last two names—and Iroquois—are harsh to pronounce, and hard to remember. No human being, save the Indian, has the retentive knowledge of the dialects of all the extinct tribes, could recollect the names of the vessels already built with the last two years. We are glad to see, therefore, it only for the promotion of that variety which is the spice of life, that the Navy Department has introduced the plan of numbering vessels. Thirteen new iron-clads have been ordered, which will be numbered from 1 to 13. Simple and alliterative seems as the mode of distinguishing vessels; it has never, we believe, been used before. When the Navy Department and the public become accustomed to the system, it will be easy it is to remember, and record, and keep track of the numbers of vessels instead of their names, we predict that this plan will supercede all others."

HOSPITAL CARS.—The Worcester Railroad Company have fitted up two cars, to run on regular trains, daily, to and from Boston, to be for the transportation of sick and wounded soldiers. The arrangements for convenience and comfort are such as will that could be desired. The cots or berths are ruby stretchers, suspended on India-rubber loops, acting as springs, and can be taken down or put up. Sick patients can be removed from the hospitals or elsewhere in an unchanged horizontal position.

The attention of those desiring Corps Pins and similar articles of jewelry, called to the advertisement on Mr. Lewis's Philip, in another column.

MARRIED.

[ANNOUNCEMENTS of marriages and deaths should be paid for at the rate of 50c. each time.]

NATIONAL BATTLE PINS.

Soldiers of the Armies of the North!

I am the inventor and manufacturer of the shoulder-brace, a model of patient acts.

The National Battle Pins record the Battles, name of the same, of the following Generals, who have fought and bled for the Union: Army: McClellan, Grant, Meade, Rosecrans, Banks, Hooker, Gillmore, Burnside, and Sherman.

Each General only records the battles fought when he was in command. A perfect photographic likeness of each General is given—of McClellan Pin, his pipe, sword and belt; Grant, his cigar, horse and saddle; and so on through the pins of the Generals named. The pins are of fine gold, and will be sent by mail.

The duties are steady in. Extra charge for engraving. Any other photographic material will be attended to at the usual rates.

Agents wanted in all parts of the army.

Send by registering one dollar, a sample will be sent by mail.

LOUIS PFEILIN,
600 Broadway, N. Y.

VON HOFF & SPURR,
Proprietors.

Manufacturers of Brass, Silver and Gold Plated Goods. The largest and cheapest assortment of Army Goods in the United States. Price-Lists Free. Establishment. Also, Mexican, California and Victoria Spurs. Send for Price-List. Goods packed in Boxes and according to the requirements of the Act of Congress, subject to the inspection of the consignee, when ordered, secured by a pledge of United States stock, and to provide for the redemption of the notes when presented February 25, 1863, and has complied with the requirements of the Act of June 3, 1864, to secure a circulation to the amount of the capital stock.

Now, therefore, I, Hugh McCulloch, Comptroller of the Currency, do hereby certify that the "Merchants' National Bank of the city of New York, County of New York, and State of New York," is authorized to commence the business of Banking under the said Association.

In testimony thereof, witness my hand and seal of office, this fourteenth day of July, 1864.

HUGH McCULLOCH,
Comptroller of the Currency.

1454

U. S. FIVE-TWENTIES.

The undersigned, as General Subscription Agent, is authorized by the Secretary of the Treasury to announce the sale of this popular Loan, and Ten Dollar Bonds are now ready for delivery.

Only two hundred millions remain unsold, and subscriptions will be received at the Banking House of the Companies of the National Banking Associations now being formed, and at the Banks of the Country, for more than one month after this issue is wholly absorbed, the demand for which is unprecedented, greatly exceeding any former Loan.

As it is well known that the Secretary of the Treasury has ample and sufficient resources in the Annual Sales of imports, internal revenues, and in the increased Internal Taxation, to pay the interest on the Loan, it is simply certain that it will not be necessary for him, for a long time to come, to make further demands on Loans, the interest and principal of which are payable in Gold.

Since considerations must lead to the prompt conclusion that the Bonds of the Government of the "Five Twenties" will sell at a handsome premium, as soon as the Subscription Books are closed, the Bonds for these will sell, and could no longer be subscribed for.

This is a

SIX PER CENT. LOAN,

the interest and principal being payable in coin, thus yielding about Eight Per Cent. interest, with a liberal premium on gold.

It is called "Five-Twenty," from the fact that the Bonds may run for twenty years, yet the Government has the right to redeem them at par after five years, if they may after for years.

The Loan is issued, principally, on the first days of each month.

Subscribers will have Coupon Bonds, which are payable to bearer, and issued for $50, $100, $500, and $1,000, or Registered Bonds, with Certificates issued for $1,000, $5,000, and $10,000.

These "Five-Twenties" cannot be taxed by States, cities, towns, or counties, by the Government tax on Bonds is only one and a half per cent. per annum.

Subscriptions will be received at par, but accrued interest in Gold will be added to the amount of bonds.

The Treasury Department having perfected arrangements for the prompt delivery of Bonds, subscribers will be enabled to receive them at the time of subscribing, or to pay for them in Gold on delivery, according to notice to be given who want the Bonds on delivery of Certificates of Subscription, as they prefer.

JAY COOKE, Subscription Agent,
No. 114 South Third Street,
PHILADELPHIA.

D. VAN NOSTRAND,
192 Broadway, New York,
HAS RECENTLY PUBLISHED THE FOLLOWING WORKS:

The Academy is furnished by the State with a Battery of Brass Guns for the Artillery Drill. Apply to Capt. WM. APPLETON, U.S.A., Supt. PENNSYLVANIA MILITARY ACADEMY, Post Office, Pa.

UNITED STATES
ARMY AND NAVY JOURNAL;
A WEEKLY NEWSPAPER, DEVOTED TO THE INTERESTS OF THE ARMY AND NAVY, AND TO THE DISSEMINATION OF CORRECT MILITARY INFORMATION.

The ARMY AND NAVY JOURNAL is established in the interests of no party; it will be conducted by no clique, but by gentlemen well versed in the subjects appertaining to personnel and political lore. Its influence will be directed always to the maintenance of military laws, and to the elevation of the public service to the highest military efficiency. It will be devoted to inspiring military criticism by competent authority—to the encouragement of military science, and to the diffusion of correct information, and to a full and reliable record of all subjects of interest to the army in any way connected with the military profession, or interested in the art of war. The legislation of Congress, which will in any way affect the organization with warlike operations, will receive unbiased consideration. The Reports of the Heads of our Commercial Marine will also have an appropriate space, and every effort will be made to render the JOURNAL will contain from week to week:

A summary in detail of whatever occurs in all parts of the world of value to our Army and Navy Not content with an epitome of the news, we shall explore in all its parts, and communications on any subject within the province of the JOURNAL are solicited from those interested in the Art of War. It shall be the aim of the JOURNAL to report at least all the complete Military and Naval guests, but at the same time a full record, which has been long desired, which will be read with interest by the families and friends of those engaged in the public service, and by the large body of the intelligent public.

The connection which Military and Naval affairs have sustained in the United States imperatively demands a journal devoted to them, and the want has been repeatedly voiced by the public. Its unquestionable usefulness in the dissemination of military information, by the publication of official documents, and by access to the National Union, shall commend itself to the favor of the Army and Navy, and to the support necessary in every land, furnish, benefits and awards. The Army and Navy JOURNAL will be conducted on such a demand, and it shall be the purpose of the proprietors to make it a journal of which every soldier will be proud to reference as their organ, and which shall be worthy of the consideration and support of any of its class in the world. Arrangements for official full reports of the proceedings of the most important writers on Military and Naval affairs in the country, and for such a full digest of foreign information as will secure to the JOURNAL early and ample information of all matters.

From the numerous expressions of approval the Army and Navy JOURNAL anticipates that the Army will select the following:

TERMS OF SUBSCRIPTION.

DEADED ADVANCE (POSTAGE PAID).

One Copy, one year,	$5 00
Five Copies, one year,	20 00
Ten Copies, one year,	40 00

W. C. CHURCH, Esq., and
PETER M. THOMPSON, Esq.,
Have been appointed special agents for the ARMY AND NAVY JOURNAL, and are authorized to receive subscriptions and advertisements, and to receipt for the same.

Major-General GEORGE G. MEADE,
Commanding Army of the Potomac,
Camp in the Field.

W. C. CHURCH, Esq., and
PETER M. THOMPSON, Esq.,
DEAR SIR—I have received several numbers of the ARMY AND NAVY JOURNAL, and have much pleasure in saying to soldiers they bear of the promise of usefulness of the journal. It will be a welcome visitor to the camp, and a valuable auxiliary to the officer.

Very respectfully, your obedient servant,
GEO. G. MEADE, Major General Commanding.

From Maj.-Gen. Geo. G. Meade, Commanding Army of the Potomac.

"It would seem that the country requires much proper to be done in the way of providing a work which shall be very best interest, military and naval, in the Republic. A work of this character, if well done, will be welcomed by the profession, by the best writers are will all connected with the service."

From Major-General W. H. French, Commanding 3d Army Corps.

"To say that the ARMY AND NAVY JOURNAL is commenced with will which should be a representative of our profession is unnecessary, as the name is a guarantee. I, therefore, take this opportunity to express my gratification that such a publication is issued."

From Major-General JAMES S. WADSWORTH, Second Division 1st Army Corps.

"I have received several numbers of the ARMY AND NAVY JOURNAL, and have much pleasure in commending the enterprise. Whatever contributes to the efficiency of science in the Army has my hearty sympathy and support."

A NEW DISCOVERY IN
MEDICINE.
THE PERUVIAN SYRUP.
THE PERUVIAN SYRUP.
THE PERUVIAN SYRUP.
THE PERUVIAN SYRUP.

is a protected solution of the Protoxide of Iron.

A new discovery in Medicine, that strikes at the root of Disease by supplying the blood with its vital principle of life elements, Iron.

This is the secret of the wonderful success of this remedy in curing Dyspepsia, Liver complaint, Dropsy, Chronic Diarrhœa, Boils, Nervous Affections, Chills and Fevers, Humors, Loss of constitutional Vigor, Diseases of the kidneys and bladder, Female Complaints, and all diseases originating in a bad state of the blood or accompanied by debility or a low state of the system.

The following is from well-known citizens of New York:

"The experience which we have had of the PERUVIAN SYRUP, and the evidence which has been exhibited to us, leave no room in the cure of many diseases, satisfies us that it is a medicinal agent of remarkable power, and deserving the attention of invalids.

Pistols, Swords, Rifles and ammunition, at wholesale.
E. KITTREDGE & CO.,
Cincinnati, Ohio.

ARTIFICIAL LEGS AND HANDS.
SELPO'S PATENT LEG AND ARM.
Patented 1858-7. Established 24 years.
The most perfect, durable and reliable substitutes for lost limbs the world of science has ever invented. In use by an army of
WM. SELPO, PATENTEE AND INVENTOR,
510 Broadway, opposite the St. Nicholas Hotel, New York.
N. B.—A Silver Medal just awarded at the late Fairs of the American Institute, New Haven County Fairs, for the best Artificial Limbs.

J. M. MIGEOD,
(Established 1835.)
No. 37 South Eighth Street,
Entrance on Jayne St., formerly Lodge Alley,
PHILADELPHIA.
Manufacturer of every description of Military Equipments, Saddlery, Harness, Valises, Portmanteaus, Boxes, Bridles, Saddle-Cloths, &c. Medical Saddlery, Harness, Invalid Chairs constantly on hand and to great variety. Goods made to order.
☞ All orders promptly attended to.

SWORDS, BELTS, SASHES, &c.
C. ROBY & COMPANY,
Manufacturers of
Line, Non-Commissioned, Field, Navy, Medical, Paymasters', Chaplains', and General Officers' United States Regulation Swords, Belts, and Sashes.
Also, for Ornamental Sword Cutlery and Military Goods, &c.,
BLODGET, BROWN & CO.,
Agents, 54 Beekman street, New York.
All the above arms are made from Patterns in the United States Ordnance Department, and guaranteed to stand United States Government Proof.

BALL, BLACK & COMPANY,
565 and 567 Broadway, New York,
Manufacturers and Importers of
MILITARY GOODS,
FINE PRESENTATION SWORDS constantly on hand, and made to order, which, in style of finish and elegance of workmanship, defy competition.
A full assortment of SWORDS for Army and Navy. EPAULETTES, SASHES, BELTS, EMBROIDERY, &c.
OFFICIAL REGIMENTAL STANDARDS. NATIONAL ENSIGNS, GUIDONS and FLAGS, Of every style. Designs furnished, and Orders promptly executed.

HORSTMANN BROTHERS & CO.,
Fifth and Cherry sts.,
PHILADELPHIA.
Manufacturers and Importers of all kinds of
MILITARY GOODS,
Staff, Field, and Line Officers' Equipments, on hand, & made to order in an elegant style.
Sashes, Belts, Cords, Swords, Spurs, Buttons, Sword Knots, Epaulettes, Shoulder-straps, Chevrons, Lace Cloths, Embroideries, Presentation Swords, &c.
Only Establishment in the United States where Navy and Marine Officers supplied with everything for their Regulation Outfits, Swords, Belts, Cords, Pantaloons, Epaulettes, Sword Knots, Caps, Hats and Clothing Flannels, Shoulderknots, etc., etc.

PRESENTATION SWORDS,
REGIMENTAL COLORS, Etc.
HORSTMANN & CO.,
550 & 552 Broadway, New York.
DEPOT OF GENERAL QUARTERMASTER,
Competing everything pertaining to the PRESENTATION OF CAPE DESIGNS or the MILITARY OUTFIT, including the necessities of active service, or the protection of uniform and material, will be well to examine the large collection of Fancy and Domestic Arms, Uniforms and Military Fancy Dry Goods.

EVANS & HASSALL,
MILITARY FURNISHERS,
412 Arch street,
PHILADELPHIA.
Swords, Sashes, Belts, Pantaste, and everything necessary for the complete outfit of Army and Navy Officers; Regimental Books and Company Flags. A liberal discount to the trade.

SMITH & SPALDING,
(Late James Smith,)
Nos. 15 Division st., and 251 Broadway,
BEAUFORT, S. C., and VICKSBURG, Miss.
Importers and dealers in
MILITARY GOODS,
Swords, Belts, Sashes, Shoulder-straps, Spurs, Sporting Caps, Hats, and in fact, everything required by the Officers of the Army and Navy.
Medals, Checks, Stamping and Press Work, done at short notice.
Sole manufacturers of James S. Smith's Patent Metallic Shoulder Scale, in imitation of embroidery.
☞ Trade Supplied. ☜

MILITARY DEPOT,
STADERMAN & SEAPTER
292 BROADWAY, corner READE STREET, N. Y.,
Manufacturers and Importers of every description of
MILITARY AND NAVAL GOODS,
Swords, Belts and Sashes in great variety. Gold and Silver Lace, Epaulettes, Shoulder-straps, &c.
Military Trimmings of the finest manufacture and importation. Full Dress Swords of original design made to order at the shortest notice. TRADE SUPPLIED.

SEEBASS BROTHERS,
324 Broadway, next to Reade St.,
NEW YORK.
Manufacturers and Importers of
MILITARY AND NAVAL GOODS.
The cheapest place for
SWORDS, BELTS, SASHES AND EMBROIDERY.
Metal Goods of every description.
We manufacture our own goods and fill orders promptly.

M. W. GALT & BROTHER,
Pennsylvania Avenue,
Between 3d and 4½ sts.,
WASHINGTON, D. C.
RICH MILITARY GOODS, PRESENTATION SWORDS, FINE EMBROIDERIES,
and Army and Navy Officers' requisites of every description.
☞ Testimonials, in Gold and Silver, executed from original designs, in the highest style of the art.

MILITARY DEPOT.
DENT & BESH,
cor. Chestnut and Washington streets,
Keep constantly on hand a large assortment of very superior glasses, introduced by them, and adopted as standard instruments in the Signal Service, Army of the Potomac.
They likewise manufacture optical and mathematical instruments of every description.
DENT & BESH, Opticians,
1021 Broadway.

MILITARY GOODS.
W. J. SYMS & BROTHERS,
300 Broadway, New York,
Importers and Manufacturers of
PRESENTATION SWORDS, SASHES,
BELTS, EPAULETTES, BUTTONS, AND
REVOLVERS.
Every article in the military line, wholesale and retail.

SOMES, BROWN & CO.,
Sellers of Clothes and Estate and Attorneys at Law, Offices—476 Seventh Street, Washington, D. C., and 1 Park Place, New York City.
WE REFER BY PERMISSION TO
Hon. Hannibal Hamlin, Washington; Hon. Mess. Rudolphus, Mayor, Brooklyn; Hon. Abbott Mann, M. C., Boston; Hon. Wm. Kellogg, M. C., Ill.; Hon. Thomas M. Edwards, M. C., N. H.; Hon. Simon S. Bellon, M. C., N. H.; Hon. John F. Potter, M. C., Wisconsin; Hon. S. Chandler, M. C., Michigan; Hon. Geo. H. Pendleton, M. C., Ohio; Hon. Wm. Allen, M. C., Minnesota; Hon. Francis W. Kellogg, M. C., Michigan.

UNITED STATES 5-20 BONDS,
United States 7-30 Treasury Notes,
United States Compound Interest Notes,
United States Certificates of Indebtedness,
Gold, Silver, Interest Money Drafts on all parts of Europe and Northern China,
BOUGHT AND SOLD.
We are authorized to furnish 5-20 bonds at par. Orders for Stocks and Gold executed in New York exclusively on commission.
RITTENHOUSE, BACKUS & CO., Bankers,
352 Pennsylvania Avenue, Washington.

MILITARY AND NAVAL CLAIM AGENCY.
J. LOWENTHAL & CO.,
(Late LOWENTHAL & WASSER),
307 Pennsylvania Avenue,
WASHINGTON, D. C.
Authorized Agents for procuring Bounty Money, Back Pay, Pension, and collecting all kinds of Claim against the Government.

MACALLISTER & BROTHER,
Nos. 728 Chestnut street,
Largely supplied with Mathematical Instruments, Manufactures, Importers and Dealers in every description of
MATHEMATICAL AND OPTICAL INSTRUMENTS. EVERY KIND OF CHART AND MARINE GLASSES, for the Army and Navy, Spy Glasses, Telescopes, Microscopes, Drawing Instruments, &c., always on hand.
Their new and illustrated catalogue furnished gratis on application, and sent by mail free of charge.

FRICK'S UNITED STATES
MILITARY AND NAVAL AGENCY.
Commissioner for all the States.
Established In 1846.
Bounty, Pay, Pension and Prize Money Office.
H. FRICK & SON,
Office, No. 233 Dock St., op. Exchange,
PHILADELPHIA.
Pension, Bounty, Pay, Prize Money, Claims.
For Soldiers, Seamen, Marines, Heirs, Orphans Sisters, Widows, and others, promptly collected.
☞ Private Soldiers Rights.

STANDARD AMERICAN
BILLIARD TABLES.
Approved and adopted by the Billiard Congress of 1862. Every variety of the best Billiard Tables manufactured, Balls, Cues, and every article relating to Billiards for sale by
PHELAN & COLLENDER,
Cor. Crosby and Spring streets,
NEW YORK.

1,000 AGENTS WANTED. For a profitable and respectable business. *Something needed by every body.* AGENTS ARE MAKING $500 PER MONTH. Send for circular and sample. Address, enclosing stamp for reply, ARRANDALE & CO., 251 Broadway, N. Y.

UNITED STATES
Army and Navy Journal;
A WEEKLY NEWSPAPER,
DEVOTED TO THE INTERESTS OF THE
ARMY AND NAVY,
and to the
DISSEMINATION OF CORRECT MILITARY INFORMATION.
TERMS—$5 per annum, in advance; $2 for six months in advance. Advertisements of a character suited to the columns of the JOURNAL will be inserted, to a limited extent, at twenty cents a line each insertion. Additions are requested to make their favors as short as possible.
All letters should be addressed to THE UNITED STATES ARMY AND NAVY JOURNAL, New York. Remittances may be made in United States funds or Postmasters' Drafts, or other drafts, which should be made payable to the order of the proprietor.
The Editor of the JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany all communications, not for publication, but as a guarantee of good faith.

THE MILITARY SITUATION.

A WEEK which has throughout been one of expectancy closes without any military operations of magnitude, whether on our part or that of the enemy. The eyes of those who take the trouble to follow the *preparations* for great operations have been directed not without some anxiety to East Tennessee, where many indications concur in the supposition that the rebels are about to make a movement against General BURNSIDE's exposed column. Intimately associated with this, the Army of the Potomac has been eagerly watched for the first motions of a new advance. Nothing, however, comes from either quarter beyond notes of preparation, giving evidence that warm work may soon be looked for. Only from where that wondrous siege of the city by the sea goes on, do we catch the sounds of actual war.

We were able barely to announce last week the happy change of the situation at Chattanooga, by which the blockade of supplies which was coming to press painfully on the Army of the Cumberland had been lifted, and those great highways of communication, the river and railroad, gained. We have new full details of an operation, which though of minor importance in a military point of view, is yet of the highest importance in regard to the vital question of the subsistence of the Army at Chattanooga—a question which very lately bid fair to drive that Army out of all it had gained in Tennessee. On the 27th a portion of the force of General HOOKER, who is holding the right wing of the Army near Bridgeport, crossed the Tennessee at that point, and advanced on south, back toward Chattanooga. Penetrating into Lookout Valley, eight miles from Chattanooga, they met but two brigades of the enemy and one battery, which force retired before them up the valley. At the same time that General HOOKER's force crossed at Bridgeport, a force under General HAZEN passed the river at Brown's ferry, below the city, and began ascending the Lookout Mountain, which was soon taken, the enemy giving way with very slight opposition. When General HAZEN crossed the river and marched up the point of Lookout Mountain, the retreat of the enemy's forces in that direction was cut off, and they could only retire *up* the valley towards Trenton, Ga., some twenty miles, thus making a long detour before they could join the main rebel army. This force consisted of two brigades of infantry and one battery. The rebels had retired before the advance of General HOOKER into Lookout Valley, on the 27th; but at 2 A. M. of the 28th, they made quite a spirited night attack on his lines, and a brisk engagement ensued of several hours, in which we suffered in the severe repulse of the enemy at every point with slight loss to us.

Quartermaster General MEIGS, in a dispatch from Chattanooga referring to this affair, pays the 11th Corps the following handsome compliment:—

"Only after walking over the ground to-day do I fully appreciate the exploit. When those hills were taken they marched to the assistance of General GRANT, who had held his position, and LONGSTREET was driven back with slaughter. As prisoners from two divisions attest that his (LONGSTREET's) whole disposable force was engaged, the whole affair is most creditable to those corps from the Army of the Potomac."

This movement for the possession of the southern bank of the Tennessee was planned by General THOMAS, and has resulted in giving him both the river and railway for communication with Bridgeport, distant twenty-eight miles from Chattanooga, and the point at which the Nashville and Chattanooga Railroad crosses the Tennessee. In the course of a week the railroad will be in full operation—that time being necessary for the completion of two important bridges, one over the Tennessee, at Bridgeport, and the other over Running Water. In the interim the river affords ample means of transportation. A steamer, lately built at Bridgeport, has been running between that port and Chattanooga; and there are two other steamers at the latter place, the *Dunbar* and *Paint Rock*, which will now be used for the same purpose. The reason why the steamer had to be built at Bridgeport will suggest itself to all acquainted with the peculiarities of the Tennessee River. The Upper Tennessee, navigable for light-draught steamers, is cut off from the lower river by what is called the "Muscle Shoals," a few miles above Florence, so that the upper navigation, in high water, extends from Decatur to Knoxville, and the lower from Florence to the port of embarkation of the Tennessee into the Ohio. The boats used on the upper river must consequently be built there. Two small rebel steamers were captured at Chattanooga, and General ROSECRANS immediately on seeing that port, foreseeing the great importance of having the river highway of supplies, ordered a powerful light-draught steamer to be built at Chattanooga. This was in a few weeks done (her engines and boiler being brought from Louisville by railroad), and the *Cuttage*, thanks to General ROSECRANS' foresight, is now furnishing his late army with abundant supplies.

THE Army of the Potomac is on all hands looked to as the only force that can save our East Tennessee columns. If LEE ventures on the step of further depleting his army for these Western operations, General MEADE should find the means to make him pay dearly for it. There are indications that the work so imperatively imposed on the army in Virginia, by every consideration of military prudence, will speedily be entered on. It is publicly announced that all able-bodied troops in garrison at Washington, under command of General MARTINDALE, are being relieved from duty and sent to the field. Their place will be filled by the Invalid Corps. Further advices from the Army of the Potomac show that the rebels intend to resist our occupying the Rappahannock, to rebuild the railroad across it, and a collision seems to be imminent. They have been recently engaged in fortifying the approaches to the river on the North side. It is reported that considerable information has recently been gleaned of the enemy's strength, position, etc., "which, if true, will enable General MEADE to take active measures."

THE latest advices from Charleston reach us through Richmond papers. The bombardment of Fort Sumter goes vigorously on, and from the *few d'esprit* which has been poured upon it, the old revamped ruin must be a complete chaos. A Charleston telegram, under date of October 31, states that at four o'clock of the morning of that day, after an incessant fire of twenty-four hours, a portion of the wall fell in, burying beneath the ruins some men believed to be of the Twelfth Georgia and Twenth-fifth South Carolina Regiments. Thirteen are reported missing. A second despatch has it that they were buried by the falling of the barracks on the sea face of the fort, where the troops had been placed in position for mounting the parapet in case of an assault. On Sunday, November 1, the bombardment of Sumter was continued fiercely—the firing being from two Monitors, two heavy and two light-rifled guns at Fort Gregg, four 10-inch mortars at the middle battery and four rifled guns at Wagner. In the bombardment of Saturday, over *twelve hundred* shots were fired in twenty-four hours.

This energetic work seems to indicate a renewed and vigorous effort on the part of General GILLMORE and Admiral DAHLGREN to achieve the reduction of Charleston. The reason of the concentration of so much effort on the reduction of Fort Sumter, is the commanding importance of the island on which it is built as a place of refuge for the iron-clads, should any of them be disabled after entering the harbor. Its possession is therefore a necessary preliminary to further operations. Private fleets in our possession of a nature unsuitable for publication, inspire the best hopes of the success of the grand combined land and naval attack. The nature of the obstructions to the harbor, which have always been the bugbear to the fleet, is now thoroughly understood.

THE rebels have been attempting in heavy force to prevent the Eastward movement of General SHERMAN's troops, for the purpose of forming a junction with the main body of General GRANT's army. A dispatch from Cincinnati, under date of the 6th inst., announces that he has probably had a heavy fight in the vicinity of Tuscumbia. General SHERMAN is now in possession of that point. We last week chronicled a previous fight of his column on the 21st ult., at Cherokee Station, eight miles west of Tuscumbia. We have now the particulars of this affair. The enemy was discovered at 11 o'clock drawn up in line of battle, with skirmishers advanced. A heavy fog rendered it difficult to find out much about his position, and the fight opened somewhat to our disadvantage. Presently, however, our line was advanced, and the enemy vigorously attacked; and General OSTERHAUS, having succeeded in getting up his 20-pounder Parrotts, the rebels under their fire, broke in great confusion. The fight, which was very spirited throughout its entire duration, did not last over *sixty* minutes from the firing of the first gun, until the enemy was in full retreat. Prisoners announce the rebel force to have been 5,000 strong, under General LORING and S. D. LEE. The Union force actually engaged was not exceeding 2,500. Our loss was one hundred. Theirs three times that number. The strength of the rebel force opposed to General SHERMAN, is put at ten thousand men, under command of General JOE JOHNSTON.

FROM the Trans-Mississippi region we have no reports of operations of importance.

WE have reprinted Number One of the JOURNAL, and it is now ready for delivery. Number Two is also being reprinted, and we shall soon be prepared to supply the orders we are constantly receiving for both these numbers. The other numbers of the JOURNAL have been and will be stereotyped, and full sets may at all times be obtained.

THE limitation in paragraph 5, of General Orders No. 173, under which no officer of the Corps can receive a commission higher than the grade of Major, is removed. The grades of Colonel and Lieutenant Colonel are authorized from September 5, 1863.

ENGINEERING OPERATIONS OF THE ARMY OF THE POTOMAC.*

THIS report of the Engineer and Artillery operations of the Army of the Potomac may be regarded as an installment of the report of General McLellan, and if the public is debarred from the hope at present of seeing that *magnum opus* complete in all its members, the publication of the accessory and subordinate reports, such as the present one, will serve to throw much light on the military history of our Army in Virginia. General Barnard begins by saying that he make this report "in compliance with the request of Major-General McClellan;" and the appearance it wears extend from the time of the organization of the Army of the Potomac to the date at which it was withdrawn from the James river. Perhaps the best service we can render our military readers, the majority of whom will doubtless not see the report, is to give a running *resume* of the more salient points of its contents.

On the night of the 23-24th of May, 1861, a portion of our newly-raised Volunteer force crossed the Potomac, and seized the city of Alexandria, the heights of Arlington and intermediate points. An *étete-de-pont* to the Long Bridge and Aqueduct, Forts Runyon and Corcoran were commenced at daylight of the 24th. On the same day Fort Ellsworth, designed to secure our possession of Alexandria, was commenced. A couple of weeks later, General Barnard laid out Fort Albany, intended to command the Columbia and the Aqueduct and Alexandria roads, and to give greater security to our *debouché* by the Long Bridge. These works, forming the initiation of the system of "defences of Washington," were all of considerable magnitude, Fort Runyon having a perimeter of 1500 yards. They were not quite complete, though very nearly defensible, at the date of the advance of the Army under General McDowell (July 16).

On the return of the Army from Bull Run, the policy of surrounding Washington by a complete system of defensive works was no longer doubtful; and General McClellan, as General Barnard testifies, "on the assumption of the command of the Army of the Potomac, was prompt to recognize the necessity of further defences, and with a rapid succession as possible, and in the order of the most urgent "importance, new works were commenced."

The theory of these defences is that upon which the works of Torres Vetres were based. It is to occupy the commanding heights within range of each other by field forts, the fire of which shall sweep all the approaches. These forts furnish the secure emplacements of artillery. They also afford cover to bodies of infantry. The works may be connected by lines of light parapets. This has never been completely done; and it is to be noted, as mention that during the "seige" attending Lee's late movement, the work of throwing up rifle pits connecting the fortifications was energetically pushed on.

"With such a system established," adds General Barnard, "the defence against a powerful enemy would rest on the forts shall be garrisoned; that a certain amount of infantry, cavalry, and mounted artillery be distributed along "the lines, sufficient to hold them until reserves can be brought "to support; and that, finally, it require a moveable force held as a reserve, which may be either kept ready to pass it "meet the enemy's effort wherever it may be made, and "where, aided by the works, they can repel superior numbers. . . . No less an authority than Napoleon says that, "aided by fortifications, *forty thousand men can defend a position "artillerymen can defend a capital against 300,000 men.*" We cannot refrain from asking why, if this be true, it has been constantly necessary to keep the Army of the Potomac trampling up and down Virginia, and harried hook, at every menace of its flank, to "cover Washington?"

General Barnard gives a detailed view (with accompanying drawings) of the rebel fortifications of Yorktown and their armament, from which it appears that even at the time of landing on the Peninsula our approaches to Yorktown were swept by the fire of at least seventy-nine guns, nearly all of which were heavy, and many of them the most formidable guns known. The line of works, with their intermediate rifle-pits, trenches, &c., was certainly one of the most extensive known to modern times, and the skill of the construction the country offered, such as abattis, marsh, inundation, &c., was skilfully used. The country on both sides of the Warwick, from near Yorktown, is a dense forest with few clearings—extremely swampy, and the roads impassable (even in midsummer) during the heavy rains which fell at the time of the arrival of our Army on the Peninsula.

"If," declares General Barnard, "we could have broken "the enemy's line across the isthmus, we could have invested Yorktown, and it would, with its garrison, have soon "fallen into our hands." "*It was not deemed practicable, consideringthe strength of that line and the difficulty of handling "the troops, to do so.* If we could take Yorktown, or drive "the enemy out of Yorktown, the enemy's lines were no "longer tenable. Two ways could be by siege operations "and the result was in my mind a *certainty. It was deemed "too hazardous to attempt the reduction of the place by assault.*"

The siege was accordingly forthwith begun. The operations of the siege required extensive preparations; and the landing and bringing up of the heavy artillery by roads which had to be corduroyed throughout their whole extent were themselves heavy operations. Nearly 5000 yards of road, mostly side cuttings, with numerous cut-work bridges over inter-vening streams, were made passable. This preliminary work was so far completed on the 17th of April, that it was deemed practicable to commence the construction of batteries. By the 3d of May, fourteen batteries, with redoubts, etc., had been raised and armed, and parallels, under the increased fire of the enemy, approached to 600 yards. Considering the location and strength of these works, and the number of our mortars and guns, the enemy's position had become untenable. He appreciated this, and evacuated Yorktown. "He could not," affirms General Barnard, "have endured our fire much longer."

The engineer operations subsequent to the evacuation, including the bridge-building, road-making, construction of defences, *têtes-de-pont*, etc., are detailed by the Chief Engineer with great minuteness, though we regret our inability to find room for them in the present issue. With reference to the important question of pontoons and other bridges we make the following extract, which contains General Barnard's mature conclusions on the subject:

The pontoon equipage which accompanied the Army was got up as already mentioned by Lieut.-Col. Alexander, assisted by Captain Duane, U. S. Engineers, and was constructed on the plan suggested as the best *ière* of the Mantz-Lesage Light-bateau; possessed great practical superiority over the old pontoon, and was the best yet results arrived at in other services in this branch of military art.

Captain Duane had previously acquired by much study practical and experimental knowledge of military bridges than any other man in this country.

They gave, after full consideration of the subject, their preference to the Lesage bateau. The Army of the Potomac had been fitted, however, *because* it was French, they would not have been without solid resources, for the Engineer Department had a full equipage of the best system known to the world. Whatever may be said about the difficulties in the transportation of pontoons, it is the last thing to be overlooked in Europe (now that our armies have assumed European magnitude) in the selection of bridges.

The Engineer officers had also, before the battles for the crossing of Rappahannock, had their attention directed to the construction of a corrugated iron boat, which, from the peculiar shape of its ends, would ride over the waves, and the former experimented upon.

Many propositions were made to the Army of the Rhine system of sectional pontoons, and "Birago" the oddest) trestles.

The experience of the Peninsula campaign has adopted no system in question. Not to advance, by any means, that nothing better can be devised than the system of pontoons which some of the gallant improvements well understood by the officers named, but that, at the time, they were not available, and that the experience was that the French pontoon was found to be most excellent, useful, and reliable for all ordinary purposes. The Chief Quarter-Quartermaster's Department in discharging transports, were precisely what was needed for the crossing of streams, and the Chief Engineer's Department constructed a portion of the numerous bridges built over Warwick creek during the siege of Yorktown. Where it was found necessary to use the Chickahominy, while over the lower Chickahominy, some 10,000 men, and nearly all the artillery and wagon trains, the larger trains of the army, passed over a bridge of the extraordinary length of 1,200 feet, which was constructed by the Engineer Department.

The Birago system, or variety of, had formed so high an opinion, proved itself dangerous in the extreme, and was found to be unsuitable for the purposes of military bridges. Of the American pontoon-bridges, that of Colonel Ellet, over the Chickahominy, was the best. Captain Duane's, of which I

was a blunder which ought not to have happened—fought or it was without reconnoitring the position, without concert of action among the different corps and division commanders, and almost without orders. A dog's delay would have rendered the battle unnecessary. On leaving Williamsburg, General BARNARD thinks we should have crossed the Chickahominy and connected with the Navy in the James. We should," he argues, have had a united Army, and the co-operation of the Navy," and probably would have been in Richmond in two weeks. The fact that the bridges, "the character of the Chickahominy, as an obstacle (as it lay across our direct road to Richmond), that our transports were on the York river, and that the railroad furnished a good means of supply to the army, that we wished to concentrate with McDOWELL coming from Fredericksburg, etc., determined the route.

6. General BARNARD thinks the repulse of the rebels at Fair Oaks should have been taken advantage of. It was," says he, "one of those occasions which if not seized, do not repeat themselves." We now *know* the state of disorganization and dismay in which the rebel army retreated. We *now know* that it could have been followed into Richmond," etc. "Although we did not then know all that we now do, it was obvious enough at that time, that when the rebels struck a blow at our left wing they struck with their *whole* force; and yet we repulsed them in disorder, with three-fifths of ours. We could have followed them up at the same time that we brought over the other two-fifths."

7. General BARNARD fully justifies the withdrawal from the Peninsula, in view of the depletion and "demoralization" of our Army and the increased strength of the rebel force. "From such considerations," he adds, "as well as those flowing from the results of past operations, I concluded that a change of base was necessary, and in accordance with the forces covering Washington." What was the true course to be pursued when the Army of the Potomac got to Harrison's Landing, will of course remain a subject of dispute. We believe, however, that the great majority of our officers at the time believed in staying on the James, securing transports and attempting the advance again under better auspices and with the results of our experience to guide. The last message of General MCCLELLAN, previously to withdrawing, was a power to be allowed to stay. There are few of the Army of the Potomac who do not agree that had that prayer been listened to, there is a very strong probability indeed that ten days would have seen the Army in Richmond.

CORRESPONDENCE.

TURRETED AND BROADSIDE IRON-CLADS.

To the Editor of the Army and Navy Journal:

SIR—In your number for October 3d you give your readers the benefit of the ideas of Captain COLES, R. N., on the subject of turreted vessels and low freeboard ships. A good cousins across the water must come to their own conclusions as to the necessity of attending to the "Monitor" councils of their countrymen; but I do not feel the truth of what he asserts, and rest content in our feeling of security, it is to be feared that we may run into the opposite extreme, by entrenching ourselves, in one way, final conservatism.

At present we are devoting ourselves exclusively to building iron-clad vessels of the turreted pattern, commonly called "Monitors." It is an undeniable fact that *the Monitor* saved the Northern squadron at Hampton Roads, and the country is and should be grateful to Mr. ERICSSON for this vessel, so happily conceived, so opportunely ready. It is natural, too, that more of them should be built, that the original plan should be modified and improved, and, feeling that we have a good foundation laid, that we can take advantage of more and more experience, and go on building them until we achieve what may be considered a faultless Monitor; all this, I say, is natural and should be done; but more should be done.

What is the use that a Monitor is designed for, if evidently to contend with iron-clads of the same kind as the original *Monitor* was built to meet the *Merrimac*. Its construction shows clearly that this is the only use for which it can be considered perfectly fitted. So long as rebel iron-clads with wooden vessels, for against them it would only have to run them down, and the Monitor has proved herself that fleets the ocean would soon sink the bottom.

The *turret*, the centre and life of the vessel, is of limited dimensions, and of accommodation for but few guns, which to be effective against iron-clads, must be of the largest calibre, and containing metal enough to insure against the utmost chance of bursting. Experience proves that a gun of heavy calibre in a Monitor has been exemplified in the case of the *Weehawken* and *Atlanta*, and Captain COLES is very right in the use she has to make of this example. If a Monitor expecting to engage an iron-clad should neglect to coat herself with a foot of heavy plating, and should adopt the design on which she was constructed, and would rob herself of that crowning means of offence to enable her to carry which has been the pride of heavy ordnance, Captain COLES is right in bidding the *Weehawken* beware of a Monitor's 15-inch gun, for however "slow and far between" might be the discharge, it would most surely effect its work of destruction, while the 110-pounder rifle of Sir WILLIAM ARMSTRONG, *with the accompanying uncertainty of a breech-loading apparatus*, might be hammering the while at the turret without producing any more injury than could be remarked on the inside by the concussion shaking the plates.

But there is another important duty on which iron-clads must be engaged, and which, at the present time, exhibits the Monitors in a light not so favorable as when viewed in the service sketched above. In the approach to cities, forts have to be met, long lines of earthwork to be passed, and obstructions to be encountered, forcing delay in the entrance to a harbor until these can be silenced. How fares the Monitor in this case? Her heaviness, a stationary object for the artillerists of the enemy, the fire of all batteries is concentrated on her, and hard indeed is it if they do not, with their searching fire, find a weak point in her armor which will admit the ball. In reply what can she give? Only her slow fire of powder metal, which the enemy avoid on seeing the turret revolve, and which in no way tends to cause them to slacken their fire upon her. In encounters such as these the Monitor is powerless to protect.

In engaging forts or earthworks, the enemy can only be driven from their guns by the quick, successive fire from a broadside; the 11-inch gun is admirably suited for such a purpose than the 15-inch, from the simple fact that it can be fired at least three times in the time that it takes to fire the 15-inch gun, and yet the Monitors now before Charleston may expect, before the termination of that struggle, to be engaged in such operations. Perhaps, they would be more effective against the batteries on Sullivan's Island if their armament were changed to 11-inch guns. This, however, is the fault of the original design of the Monitor, which is built expressly for contending with iron-clads. A readier means is at hand for profiting by the experience of Charleston, which is to turn all those at once to the building of more vessels of the pattern of the *New Ironsides*, which, anchored in Charleston harbor, or Sullivan's Island, is worth all the Monitors now assembled at that place. The *New Ironsides*, or "*Old Ironsides*," as she is affectionately called, is the pride of the whole fleet blockading, and is acknowledged by all reports to be the terror of Charleston. She is most ably commanded, and the drill of her crew is quick, precise and perfect—in short, unequalled. No engagement of the iron-clads is considered as being dignified in a fight without the *Ironside* has a position in the line, and then, when after slowly choosing her position, and swinging majestically to her anchor, she opens fire from her battery of 5 inch guns, and from her 11-inch guns, the enemy's fire is soon silenced, and the Monitors are left to the undisputed possession of the field.

The enemy, brave as they are, cannot endure it; they struggle, they contend for mastery, but in their open works the *Ironsides* holds them at her mercy. Her shower-like bursting shells shut them; their fire flags, it droops, it ceases for the time, and with joy they see her move off again to her anchorage out of range.

Let us not stop building our Monitors for contending with iron-clads, but let us build more and more of the class of the *Ironsides*, from which a rapid fire of sufficiently heavy guns can be poured on an enemy when firing from open works or bastette batteries. MONITOR.

ATTENTION TO DETAILS.

To the Editor of the Army and Navy Journal:

SIR—Two publications of the regular troops have suggested themselves to my mind, and I would like to see them agitated in your valuable paper, viz: First, that a *neat* rigid discipline on the part of officers be enforced regarding *little* details, especially in regulating the observance of a respectful deference towards them by the men under their command. Have it set down as a law regarding the duties of officers, "officer so" "form," "fuck," or "Bill" etc. And, secondly, that greater attention be paid to regarding the men to keep themselves clean, and their uniforms in good condition. The uniforms are all alike when issued, but a practice is perverted in this respect, which in no way resolves his clothing of attempting to alter its appearance.

On page 114 of "BUFFINGTON'S Camp and Outpost Duty for Infantry," in the paragraph "Duties which every officer should know," and one paragraph struck my attention "Every officer, who is not a drunkard, and who is attentive to his duty negligently, he has morally obtained money (viz. "his pay for that day) under false pretences. The old adage "don't overdo it" is applicable to this paragraph, probably to an officer's duty; and one who looks after little things is apt generally to prove a good officer. F.

CORRUGATED PLATES FOR SHIPS OF WAR.

THE following is the substance of the paper on "Corrugated Plates for Ships of War," read by Mr. GEORGE RENNIE in the section of Mechanical Science, at the meeting of the British Association:

"The principle of protecting ships by thick plates of iron against projectiles of steel, or homogeneous iron hardened and tempered, would appear to have come from the Gallerie Couverte, viz., that two plates must always be softer than the projectile, while the latter has an almost unlimited advantage in the weight of its mass. This led to the manufacturing guns so as to bear very large charges, and thus gain increase of velocity with increased weight of shot. Still more to this end, the Whitworth steel, which was hardened and tempered as the Whitworth shell and shot are, are to be provided against, as we doubt not they will be, the bursting of guns made from them, the two principles of strength—cohesive strength and mechanical strength. The plates being made of steel hardened and tempered as nearly as possible up to the cohesive strength of the Whitworth shot and shell, are of two kinds—one thick and corrugated, the other thin and smooth. The thick corrugated plates which are from inches thick, are placed upon the thinner plates of one inch, also tempered, and bolted through the ribs of the ship to the beams and the outer timbers in a manner to secure. If iron plates of the corrugated form were backed with an inch plate of steel, hardened and tempered, they would, I think, prove impenetrable, and even smooth iron plates of 4 inches thus laid upon steel, would be more effective than iron plates, even of 7 inches thick, backed by timber.

In explaining the mode in which I conceive this kind of compound armor-plating to act, it is necessary to consider to what kind of projectiles it is more especially to be done. It will be admitted that this is not to be attributed to the velocity of the shot, but to the force of impact, a great velocity with an incase spherical and conical projectiles sent with higher velocity do not pierce iron plates. The rationale of the penetrating action may not yet be quite clearly understood, but this much seems to be established, that a flat-headed shot pierces because its whole force is applied equally in one direction, and free from the lateral resistance which the conical and round shot meets with. I venture also to state that the suddenness of the impact of such a body has much to do with the effect; it would seem that time is an important element in the consideration, and therefore if this perfect impact can be delayed, and still more, if it can be prevented altogether, the piercing of the plates will not be effected.

As an illustration of the influence which time forces applied with time and force without it may be pointed out the simple experiment of striking one of the blades of a pair of shears, and placing the same force in weight gradually over the same. In the first case the force is not conducted away into the mass of the shears as it is upon the latter, but instantly and possibly in breaking is into fragments. This is also exemplified in the sounding of round shot against an iron target of proper thickness. The shot will be found projected beyond upon the anvil, no effect is produced upon either the shot or the target. Another familiar illustration of the like effect of soft materials, such as gun wads or tallow candle, being sent at high velocity through wooden planks, and, as frequently occurs, passing through two planks by their velocity, then, may be described as force with the least possible element of time; the best example, perhaps, of which is electric force in the form of lightning. The destructive effect of this force is seen in the flash of flame which occurs when a steel plate is struck by a leaden plate. Now, if the hard surface of the steel plates being hardened and tempered, is to delay the shot by its cohesive strength, and to prevent, by the corrugated resistance, the shot from getting to the soft projectile bearing upon the plate at the same moment of impact. The shot is delayed partly by this means, and partly by meeting with a metal to which it is not adapted, and which is not allowed for the conduction of the force away into the surrounding mass of the plate, and the shot is broken and forced upon which I consider most important being, first to prevent penetration of the outer plate, and to oppose a shot which will pierce the first plate, to be regarded to the receiving the skin of a ship with a thin steel plate, in preference to increasing the thickness of the outer plating. The mechanical strength of the corrugated plate—viz., that of the double arch form combined with a certain amount of 'play' and elasticity, obtained by fixing the corrugated plate upon a flat one. In the action of the projectile is also prevented by, as it were, converting it into a round head, or a hollow head, when it comes in contact with the plate. Now, as I said the space between the corrugations being about four and a half inches, a flat-head shot of five inches diameter would begin to bear upon the corrugated plate and plant it on the arch across a furrow, while if it struck upon a corrugation the surface passed upon even with a seven-inch shot would be even upon inches instead of five, thus increasing the area of impact of a shot of this diameter upon a flat surface. In a large proportion of shot this result would have to go through in an oblique direction about six inches of metal before reaching the plain plate.

The advantages of the plan proposed are, besides the protection of the ships, the reduction of the weight of armor much below that contemplated for the new ships of war, and below that of the *Warrior*, *Black Prince*, and the *Defence*. The saving of at least one inch in thickness of plates would give a saving upon the whole of the ship of 1,000 tons first class. The extra cost would be to a great extent met by the saving in the thickness of plates and the timber backing. I refer to the diminution of the weight of the ship, and the conversion of iron into that for stronger metal, for the acquisition of a lighter and more impregnable armor-plate. The manner in which can now be obtained by merely increasing the thickness of iron to any extent a ship could carry and be fit only for a target. As to the manufacture of such plates as I have described, I have the authority of the most eminent makers of steel, such as Messrs. T. Forth & Sons, and Messrs. Cammell & Co., that they could be easily be manufactured at about one-third more than the cost of the best iron armor-plates.

DEFECT OF RIFLED GUNS.—A correspondent of the London *Mechanics' Magazine* says:

The inherent defect of rifled guns of every service, in this or foreign countries, is the *forcing* principle, by which rotary motion is imparted to the projectile. The compression or expansion of the metal of the gun or the groove which are in the gun, the friction of the iron surface of the shot in grinding its way through the bore or the groove, whether on the hexagonal oval, or ribbed plan, are all more or less forcing systems. The proof that they are so, is the numerous loss of propelling force sustained by them, and the impossibility of fabrication to protect the gun from bursting by excessive tension. This point is set at rest by comparing the velocities of shot fired from smooth bore and rifle guns, as in the 68-pounder round shot, with a windage area of 5 per cent, has a velocity of 1,700 feet per second, a second, elongated, Whitworth, and other English rifled guns give little more than 1,200 feet, and the American heavy ordnance probably not more than 1,000 feet per second.

The gun wanted for the navy, and for coast or siege batteries, is one which shall be rifled on a plan which is not a forcing one, which shall impart rotary motion to the shot with no more strain on the gun than that resulting from the weight of the projectile. This may be produced by abandoning the vicious principle of obtaining rotation by forcing the shot to unwind itself into or to avoid its way through the rifling. The *Merjer* at Woolwich of suicidal rifled guns furnishes ample evidence of the cause of self-destruction. They invariably burst at the part of the chase where the shot, suddenly put in motion by the explosion, has to force its entrance into the grooves or ribs which compose the rifling.

The following is from the same writer:—

The only method by which this contrary result can be

and ARMSTRONG's differ materially in the qualities essential to a good field-gun. I will not stop now to go into that vexed question, which the Special Competitive Committee seem by some occult influences to be deterred from entering upon. It may, however, be interesting to your readers to be reminded, by the following abstract of the report of the Ordnance Select Committee, of the results obtained in a competitive trial, to "ascertain range and deflection in comparison of WHITWORTH's B L. 12-pounder with ARMSTRONG's B L. 12-pounder gun.'

ARMSTRONG'S GUN.				
Charge.	Elevation.		Range.	Deflection.
lbs.	deg.	min.	yds.	yds.
1.00	2		1,120	7
1.75	4		2,068	3
2.50	5		2,818	11
3.00	7		3,417	7
3.50	10		3,968	17
4.00	11		4,464	11
WHITWORTH'S GUN.				
1.00	1		1,128	15
1.75	2		1,880	13
2.50	3		2,737	7
3.25	4		3,421	18
3.50	5		4,122	7
4.00	6		4,800	68

The victory remained to the Whitworth, and yet, although more than two years have elapsed since those experiments took place, the Armstrongs have been and are the preferred service guns of the British artillery. So much for the judicial and scientific Department, which of two systems of fieldguns selects the least effective for the public service. It is very desirable that the real character of the American field-pieces similar to those in the above reports should be published in your pages. We could then judge if the "tremendous execution and long range" of those guns could not be equalled by field-pieces manufactured in this country.

MILITARY PROPRIETIES.

REVERENCE for those set in authority over us is certainly not one of the distinguishing traits of the American character; though respect for law, and obedience to its mandates, is in no part of the civilized world so prominent a feature as in the United States. To ourselves, this is no subject for surprise, growing, as it does, out of the most cherished of our privileges and citizens—the right to vote, and the power to our opinions of public men, who owe their position to our votes, and of the public measures initiated by them, by which our private interests may be vitally affected. The exercise of this privilege, although too frequently abused (sovereign slander being often substituted for sound argument and truth by heated partizans on all sides), is still fraught with too much that is salutary to admit of its being abridged by law or police regulations. The maxim, borrowed by JEFFERSON from HERMAN, "that error is no harm, if reason is free," when truth is left free to combat it," lies at the foundation of all political safety; but, unfortunately, we shall decide what is error and what is truth, or what are the legitimate weapons with which the one may fight the other?

With this unquestionable right, derived from his political condition, it would be wonderful should the American citizen, stepping from civil into military life, suddenly lay aside a habit that had become a second nature, to adopt one contrary to all his pre-conceived opinions of the inalienable rights of a freeman. Yet the wonder is one of every day occurrence. In fact, it has been so universal as to be no wonder at all, and the citizen of yesterday, with all the pride of individual opinion, and ready to maintain it in any way, exits to-day into the position of an obedient, docile soldier, forgetful that he has any rights, and ready to die for them, however contrary even to his own views of what is right, of those under whose command he is placed. Such, at least, is the general testimony of officers who have had the most experience in organizing of large bodies of men. Even the native fighting material, so one with a soldier's eye who has witnessed the passage of our volunteers to the seat of war, could for a moment doubt. That these men from their first appearance in the military garb, and from their past habits and condition of life, were likely to become good and reliable soldiers, men not only to brave the perils of the battle-field, but to show that endurance and fortitude called for daily, where there was no such excitement as this to urge them onward, and which is the true test of the real soldier, might provoke a doubt among men accustomed to armies where discipline was never for a moment relaxed. Yet that these admirable and essential qualities of the soldier have shone forth prominently among the rank and file of both branches of the service, the utterances of every general officer of note. There have been no mutinies, no seditious conduct, or words, among any bodies of the large armies called into the field, except in a few cases of regiments composed of the worst materials, and those were provoked by the ignorance or folly of the officers set over them.

Whilst this praise for observing the essential military proprieties of their station can be awarded to the rank and file, for which observance, to a certain extent, they are indebted to their officers, it is a subject of regret, that, upon several points, the examples of but too many officers have been injurious to the service. That men coming from the walks of civil life, many of them fresh from the heated arena of partizan politics, should fail when suddenly clothed with high military trust in the proprieties of military life, is but a matter of course. Accustomed to harangue civil constituencies, and arraign before them the conduct of others holding public office, it is not surprising that they should look upon a body of troops under their command but as a constituency in the soldier's garb, and should hold towards them the same line of conduct as they had been accustomed to employ in another sphere. But no such excuse can be pleaded for officers regularly trained in the ethics of their profession; with them no departure from the strict rules of military propriety can be excused on the plea of ignorance.

The noticeable failures in this respect are seen in proclamations, addresses of thanks to bodies of troops for having done their duty, and the harangue to the line; through which the political views, private prejudices and other traits peculiar to the writer are often prominently set forth, and always to the detriment of the service. Instances of this will too readily occur to the mind of every one who has followed the military events of the last two years, to make it necessary to restate them here.

It is presumed that all will agree that no one but the head of the Government, or him to whom his authority is either directly delegated or must be exercised from the necessities of his position, has the right to make known the policy of the Government through a proclamation. As to the right to award praise or censure for military conduct, the highest authority in all military matters, NAPOLEON I., may be quoted. After the memorable battle of Wagram, Napoleon announced to the army's artillery, through the following order of the day to the Saxons in his corps, in terms as stilted as some like orders of a recent date among us, that might be pointed out:

"*Soldiers!* On July 5th, seven or eight thousands among "you pierced the enemy's centre, and advanced to Deutsch-"Wagram, in spite of the efforts of forty thousand of the "enemy, supported by fifty pieces. You fought until mid-"night, and slept in the midst of the Austrians. On the 6th, "at daybreak, you renewed the combat with the same deter-"mination, and before 9 o'clock the enemy's artillery and "your living columns remained as immovable as a wall of "iron. The great NAPOLEON witnessed your devotion, he "reckons you among his braves."

"*Saxons!* The destiny of the soldier is to fulfill his duties; "you have worthily performed yours.

"Signed: J. BERNADOTTE."

Unfortunately for the truth of history, the facts were the reverse of what the order states. This, however, is the most common and the least of the evils of such addresses. NAPOLEON I. pointed out the true line of conduct of his disciple Bernadotte, and to make it a warning to other corps commanders. He therefore issued an order of the day in which, stating the facts which contradicted what was put forth in the one of BERNADOTTE, he says:

"His Majesty has written to the Marshal, Prince DE PONTE CORVO, his disapprobation of the order of the day "dated Leopoldau, July 7, and which was published at the "same time in nearly all the public journals."

"Independently of the fact that his Majesty commands in "person, and that to him alone belongs the right to "distribute the meed of glory which is due to each." * * *

"His Majesty hopes that this expression of his dissatisfac-"tion will serve as a warning to prevent any Marshal from "attributing to himself the glory which belongs to others."

"His Majesty knows that the first principle in the mutual relationship to the army and navy under our Constitution, as NAPOLEON I. did to his army and navy. To him alone, or to generals commanding separate armies, acting under his delegated authority, belongs the right to praise or censure in public orders.

There is another form of expressing direct approval and sometimes indirect censure, which is no less to be condemned than the one just pointed out; and that is the presentation of swords by companies, regiments, &c., to their superior officers. Such testimonials of liking or approbation of conduct, however unobjectionable in civil life, though even here it is often exercised to a ludicrous extent, cannot be indulged in by troops, without a demoralizing effect upon discipline. It was the practice for many years in the army to prohibit the acceptance of presents, &c., to their superior officers. Such testimonials of liking or approbation of conduct, however unobjectionable in civil life, though even here it is often exercised to a ludicrous extent, cannot be indulged in by troops, without a demoralizing effect upon discipline. It was the practice for many years in the army to prohibit the acceptance of presents, &c., to their superior officers. Such testimonials and the like; through which the political views, private prejudices and other traits peculiar to the writer are often prominently set forth, and always to the detriment of the service. Instances of this will too readily occur to the mind of every one who has followed the military events of the last two years, to make it necessary to restate them here.

It is presumed that all will agree that no one but the head of the Government, or him to whom his authority is either directly delegated or must be exercised from the necessities of his position, has the right to make known the policy of the Government through a proclamation. As to the right to award praise or censure for military conduct, the highest authority in all military matters, NAPOLEON I., may be quoted. There is another form of expressing direct approval and sometimes indirect censure, which is no less to be condemned than the one just pointed out; and that is the presentation of swords by companies, regiments

among the Welsh. The highest proportion of recruits was among the manufacturing artisans, and the lowest among the shopmen and clerks. Small or malformed chest gave rise to a much larger number of rejections than any other cause. Upwards of two-fifths of the rejections were for causes indicative of ill-health or feeble constitution, and one-fifth for defects which would have affected the marching power of the men. The returns show, as in the previous year, a considerable excess in the amount of disease of the chest and eyesight in Ireland. Of every 1000 recruits examined 584 were laborers, handloomers, and servants; 131 were manufacturing artisans; 73 were shopmen and clerks; 72 were engaged in various physical development; 96 were shopmen and clerks; 6 were professional persons or students; 26 boys. Of the enlistments in 1861, England and Wales furnished 231 in the 1000, Scotland 156, Ireland 307, the colonies and foreign countries 6—this is an increase in the proportion for Scotland. Of every 1000 recruits examined in that year, 271 in the English districts were unable either to read or write, 168 in the Scotch districts, and 323 in the Irish.

THE WEAKNESS OF THE BRITISH NAVY.

The following are extracts from an important speech lately made by Mr. JOHN LAIRD, M. P., at Birkenhead, England:

And I am bound to say, having sat on that committee (the Parliamentary committee to inquire into the merits of the Armstrong gun), during the session of 1860, that Sir WILLIAM was satisfied that practically 2,500,000 had been spent on that gun, and that we had not the value for our money. But I think we can save money on that gun. I think we can give you that of his grace the Duke of Somerset, who was himself examined upon this committee, as to the efficiency of the Armstrong gun, and he was of opinion that practically it had been incurred. The Duke of Somerset, in reply to question 5,022, and: "We had a report that the Armstrong gun had the greatest range and the greatest power of penetration of any gun tried; when we came to try it ourselves that was not our experience. We found that projectiles fired at a great distance may have had greater power of penetration, but for naval purposes, at two hundred yards, it certainly had not the greatest power." And he was asked was a more powerful gun than the 100-pounder Armstrong gun." This was evidence given after they had been at work for five years, and up to such a bold thing as to say, "Why, then," again, the noble duke goes on to say that a 68-pounder gun of the old style struck a harder blow at short range than the 100-pounder Armstrong gun.

How do we stand with regard to iron-plated ships? If we were to go to-day with America, or with any other power, one-inch target ships perfectly fitted in every respect for coast defence, whilst we have no ships at all that are suited for the purpose. It will not do to say that we have made the Russian war, that we can build 150 or 200 gunboats, by means of private yards, in twelve months. Armor-plated ships require a long time in building, and although we may say most emphatically, that it would be the best policy for this country if the legislature would put an embargo for a time upon the building of merchant ships—that is a question I believe, although the fleet that we saw in the Mersey the other day was composed of magnificent ships—most of them driven by steam twenty-five, thirty, and thirty-five water, I need scarcely tell you, who know anything of the port of Liverpool, that they are perfectly unfit for war on the coasts of the west of England. They are fine, noble ships that I can find on looking over the navy lists, that could possibly be considered suitable for coast defence, and those are two vessels constructed on the Clyde. Now, they are not brought forward I cannot pretend to say; but I do believe that—but the master shipwright who would administration of this country is something fearful. We have spent from thirty to thirty-three millions sterling in the last three years, and yet a large number of the vessels we have of which you saw in the river the other day, and others are building but not ready, and none of which will be of any use to us to carry on a war in the channel, or on the coast, but shall most probably be placed. I state these facts distinctly. The two ships on Captain Coles' plan drew so much water that they are not suitable for the purpose, and are not intended for, namely, the defence of our coasts and harbors; and moreover that they are neither masted nor rigged, nor can they fit to be sent across the Atlantic. It is in vain that Captain Coles has protested to our government against this class of things. He has urged them to make those ships serviceable, not only for the defence of our own coast, but for foreign service.

I will take two ships built in this neighborhood—the *Atalanta* and the *Florida*. I am not at all ashamed, ladies and gentlemen, to own that my sons designed and built the *Florida*. Now, I am sorry to say that the *Florida* ashamed to say that he designed and built that ship; but the testimony known as the *Florida* is not the testimony of Mr. Laird, or of Liverpool, or indeed of this country; but the testimony comes from America. They are two vessels that have been sailing in close connection with the Clyde, and they have defied the power of 400 ships. They have never been caught. They were designed and built by private individuals; but in this country it is the misfortune of the managers of our marine to imagine that one man, and one man only, is to carry in his head the largest and the designing talent of the country for building ships. If they had got a little life in the Admiralty then they might have borrowed on the *Atalanta* and the *Florida* for designs on other ships. We have been accustomed to hear of the Americans boasting about their ship-building, and that they build ships to run us down. I am sorry to say that the *Atalanta* and the *Alabama* goes thirteen, but the Americans have never been able to touch her.

THE TERM "ADMIRAL."—It has frequently been a matter of dispute as to when the term "Admiral" was first used. According to one author it was first employed in the reign of Edward the first; the first Admiral of England being the first Earl of Arundel, who received the appointment in 1386. The late Sir Francis Palgrave, however, assigns a more feasible than any other writer for arriving at the truth on a question of this kind, considered that "the word was first introduced into England by Richard the first on his return from the Crusades; a name that was probably derived from 'ameer,' a chief, or leader. The commander of every expedition, whether fitted out by the Government or by private individuals, was styled admiral or general." Sir William Monson says, "there have been often disputes whether the title of admiral or general was more proper for a sea commander; and though I dare not to presume on either, yet I think it is as improper to call an admiral, general by sea, as to call a general, admiral by land." The two titles were, however, sometimes applied the same person, for in 1665 one was termed "Admiral, General, and Commander-in-Chief of Sea and Land Forces;" and Lord Howard of Effingham is so appointed by Royal Patent. The sole and supreme command both of the fleet and the army, with the high and either extraordinary title of Lord Lieutenant-General of all England.

A NEW ROAD TO RICHMOND.—The Richmond *Examiner* of October 30th, has the following;—It is reasonable to believe that the war in Northern Virginia is over. The country between the Rappahannock and the Potomac is, by repeated experiments have proven, if anything can be proven, that a march from Washington to Richmond in that direction is impracticable. It is proved, moreover, by the test of experience, that an advance by the Peninsula of the James and York, or of the Potomac from Acquia Creek or Fredericksburgh, is impossible and absurd. But one road to Richmond has been untried by the enemy. It is that of Corbin's and Bowling Green, on the line of the James. Some insignificant experiments and explorations have been made in the counties which intervene between the cities of Petersburg and Richmond, but no movement in force. That nothing can be done on the lines of SCOTT, MCDOWELL, MCCLELLAN, BURNSIDE or POPE-LEE, seems now to have been established to universal truth in the North-west mind, and it has begun to consider whether Suffolk and the Blackwater offer better opportunities. Such considerations are the germs of LONGSTREET's failure and discomfiture, and so far furnish encouraging reminiscences to the enemy. Other routes are known to him only as names. The others are filled with predestined defeats; this one has, at least, no MANASSAS or Fredericksburgh on the way. If another effort be pressed it will be to Richmond, although it may, with reason, be supposed that it will be made on the south side of the James. But that is the least difficult movement in there, is more than problematical. The United States have met with a sufficient number of disappointments as to Richmond to discourage the most sanguine of seekers. It is more probable that they will abandon the vain endeavor to capture this capital, and concentrate their forces on the routes to the South.

CAPTAIN DAVID M. COHEN and First Lieutenant WILLIAM B. KEAN, of the Marine Corps, tried at a General Court-Martial convened Aug. 20, 1863, at the Navy Yard, Mare Island, California, on charges preferred, relating to the destruction of good morals, in this, that the former sent and the latter carried a challenge to E. A. Selfridge, the clerk of the Commandant of the Navy Yard, requiring the said clerk to be reprimanded, and the other to be admonished by the Secretary of the Navy. Upon revision of the record in these cases, it appears that the Court in each case, finds the accused "Guilty" of the specification, but "Not Guilty" of the charge, and declares the accused "Guilty" of conduct to the discredit of the service, and sentences each of the prisoners to be confined within that provision of the "act for the better government of the Navy" which makes it a punishable offence to "utter any challenge," and the opinion of the Court, violation or evasion of a law intended for the suppression of a moral offence is not "scandalous conduct, tending to the destruction of good morals." The Department cannot sanction a decision which would seem to indicate a deficiency in the moral sentiments of the Court, disapproves of the sentence, but does not disapprove of the findings of the Court, which would be to encourage a disregard of law." The sentences are therefore confirmed, and the proceedings of the Court are disapproved.

THE ARMY CORPS.—The several army corps with their commanders, now stand as follows:

1st Army Corps		Maj.-Gen. John Newton.
1st	"	Brig.-Gen. Thomas H. Neill.
2d	"	Maj.-Gen. Daniel E. Sickles.
3d	"	Maj.-Gen. David B. Birney.
3d	"	Maj.-Gen. George Sykes.
4th	"	Maj.-Gen. Oliver O. Howard.
5th	"	Consolidated with others.
6th	"	Maj.-Gen. John Sedgwick.
6th	"	Maj.-Gen. John G. Parke.
7th	"	Maj.-Gen. E. A. Ord.
11th	"	Maj.-Gen. O. O. Howard.
12th	"	Maj.-Gen. H. W. Slocum.
12th	"	Maj.-Gen. E. G. Gr. Gri.
13th	"	Maj.-Gen. John M. Palmer.
14th	"	Maj.-Gen. W. T. Sherman.
15th	"	Maj.-Gen. F. P. Blair.
17th	"	Maj.-Gen. J. B. McPherson.
18th	"	Maj.-Gen. C. C. Washburn.
19th	"	Maj.-Gen. N. P. Banks.
Cavalry Corps		Consolidated with others.
1st	"	Maj.-Gen. S. P. Heintzelman.
2d	"	Maj.-Gen. D. N. Couch.
Cavalry Corps		Maj.-Gen. George Stoneman.

COAST SURVEY MOVEMENTS.—Assistant W. S. EDWARDS, with the schooner *Bentley*, has reported to Admiral DAHLGREN, in Charleston Harbor, for the purpose of inspecting and sounding the channels of the squadron. Sub-Assistant CLEVELAND ROCKWELL has joined Major-General FOSTER, as the Department's topographical aide, in addition to Sub-Assistant G. J. OLTMANNS, now attached to General FRANKLIN's corps.

THE following general order, dated Oct. 22, 1863, and issued by Major-General THOMAS, is interesting: On the 16th inst., First Lieutenant Peter McLane, 84th Regiment Illinois Volunteers, in charge of a working party, was repulsed from the front of Fort Negley. He did all he could upon the ground and read a newspaper while his command were idling and neglecting to perform the duty assigned them." This officer, which is admitted by Lieutenant McLane, merits a severe reprimand. For this offence Lieutenant McLane is spared solely on account of his distinguished gallantry in the battle of Stone River near Chickamauga; in the former as a private soldier, in the latter as commissioned officer. The General commanding takes this occasion to announce to the army that the case of Lieutenant McLane must not be taken as a precedent. It is as much the duty of an officer to exhibit energy and industry in building fortifications, as it is to lead his men in battle. The duties of officers are various. None can now plead ignorance. Lieutenant McLane will, in any department, will meet with summary punishment.

MAJOR-GENERAL BUTLER has raised question with the War Department respecting the right of General SCHOFIELD to retain his present command over himself and other major-generals in the Department of the Ohio, among them Generals BURNSIDE and PRENTISS. General BUTLER claims that General SCHOFIELD is not a major-general within the purview of the act of July 4, 1864, by which the President of the United States is assigning a command as between officers of the same grade, without regard to seniority of rank. The opinion of Judge-Advocate SCHOFIELD could not legally be made a major-general during the recess of the Senate, that body having adjourned without confirming his nomination. Judge-Advocate HOFF has given an opinion sustaining the claim of General BUTLER, on the ground: First, That even if General SCHOFIELD had received the nomination of major-general from the President, he could not be considered an officer of the same grade with General BUTLER, whose nomination had been confirmed by the Senate, so was the case with BUTLER, STEELE and PRENTISS, all now under the command of General SCHOFIELD. Second, That the recess of the Senate of the Legislature show that no major-general's commission has been issued to General SCHOFIELD since the adjournment of Congress; that only paper he has received being a letter informing him that he had been promoted.

THE War Department has received from Richmond a list of the names of all the National officers held as prisoners in Richmond. The list contains the names of 2,000 and odd officers, viz.:—One Brigadier, Neal Dow; 14 Colonels, 25 Lieutenant-Colonels, 27 Surgeons, 53 Assistant-Surgeons, 60 Majors, 200 Captains, 564 First Lieutenants, and 297 Second Lieutenants.

A sort of panic reigns in the Italian Army. Forty officers have been put under arrest, because they intended having married, contrary to the regulation of May 25, 1863. But it seems there are about 1,200 officers in the army married under the same circumstances, and therefore menaced with the same punishment.

Two new regiments for the Invalid Corps have just been organized. The regiment now commanded by Colonel GEORGE N. MORGAN, and Fourteenth, under command of Colonel FRANK P. MCGUIRE, encamped on the Second at Detroit, and of the Fourteenth at Pottsville, Penn.

BALL, Black & Co., of this city, are now engaged in the preparation of medals of honor for General Gillmore's command.

MASSACHUSETTS VOLUNTEERS.

The following Commissions have been issued by the Governor of Massachusetts, Commander-in-Chief:

Thomas Dudley, of Roxbury, to be Assistant Surgeon, with the rank of Major, dated Oct. 29, 1863, vice Hastings, promoted.

Thomas Sumner Hastings, of Roxbury, to be Surgeon, with the rank of Lieutenant-Colonel, dated Oct. 29, 1863, vice Hastings, promoted.

Edward Lincoln Hunt, of Boston, to be First Lieutenant, August 22, 1863, vice Hunt, promoted, discharged.

Frank Lincoln Hunt, of Boston, to be Second Lieutenant, September 23, 1863, vice Hooper, promoted Major.

Edward Lincoln Hunt, of Boston, to be First Lieutenant, May 7, 1863, vice Hurd, promoted Captain and Assistant-Adjutant-General.

Second Lieutenant John Hincks, to be First Lieutenant, September 23, 1863, vice Hooper, promoted.

Second Lieutenant George M. Hudson, of Dingham, to be First Lieutenant, May 7, 1863, vice Hunt, promoted.

Second Lieutenant George W. Bibby, of Hingham, to be First Lieutenant, May 7, 1863, vice Hudson, promoted.

Sergeant Gustavus E. Bird, of Taunton, to be Second Lieutenant, January 4, 1863, vice Lombard, discharged.

Sergeant Edward F. Phinney, of Gloucester, to be Second Lieutenant, July 4, 1863, vice Bennett, killed in action.

Thomas Jefferson Bennett, of Gloucester, to be Second Lieutenant, May 7, 1863, vice Hurd, promoted Captain and Assistant-Adjutant-General.

First Lieutenant T. Edward Ames, of Charlestown, to be Captain, August 22, 1863, vice Hunt, promoted Major.

First Lieutenant Edwin A. Morse, of Worcester, to be Captain, September 23, 1863, vice Hooper, promoted.

Second Lieutenant Henry W. Daniels, of Worcester, to be First Lieutenant, May 7, 1863, vice Bibby, promoted.

Second Lieutenant Frederick H. Sibley, of Fitchburg, to be First Lieutenant, September 23, 1863, vice Morse, promoted.

Second Lieutenant Wm. H. Hodgkins, of Charlestown, to be First Lieutenant, July 4, 1863, vice Bennett, killed in action and Commissary of Subsistence, U. S. A.

The commissions of Captain Ames, dated to Lieutenants Morse and Daniels, under date of July 24, 1863.

Second Lieutenant Ezekiel Fowler, of Boston, to be First Lieutenant, September 23, 1863, vice Sibley, promoted.

Sergeant Robert Hooper, (THIRD REGIMENT VETERANS.—Captain Hamilton Rowe, Jr., of Fairhaven, (2d Regt. M. V. M.) to be Major, September 23, 1863.

SEVENTH BATTERY OF LIGHT ARTILLERY.—Second Lieutenant Wm. Gaston Bates, of Lowell, to be Second Lieutenant, Oct. 29, 1863, vice McCurdy, who declines promotion.

Second Lieutenant Charles H. Williams of Lowell, to be First Lieutenant, October 6, 1863, vice Hartwell, discharged.

Second Lieutenant Wm. Gaston Bates, of Lowell, to be Second Lieutenant, October 8, 1863, vice Storer, promoted.

SECOND REGIMENT OF HEAVY ARTILLERY.—First Lieutenant John B. Parker, Jr., of Boston, to be Captain, October 21, 1863, vice Ellis, discharged.

Captain Arthur A. Fiedler, of Danvers, late Captain 14th Regiment, (now Heavy Artillery,) to be First Lieutenant, October 29, 1863, vice Parker, promoted.

Sergeant Charles A. Anthony, (Acting Quartermaster-Sergeant,) to be Second Lieutenant, October 29, 1863, vice Barnes, promoted Quartermaster 4th Regiment.

FIFTH REGIMENT CAVALRY, (NEW BATTALION).—Sergeant Joseph C. Murphy, of Boston, (First Regiment Cavalry,) to be Paymaster, October 27, 1863.

ENGLISH ADMIRALS.

IN an article on "Our Active Admirals," the *United Service Magazine* says:

It becomes a question whether, in the event of our being at war with any of the other great maritime powers capable of sending to sea fleets ready to cope with our own, we active Admirals will have had sufficient, or even any, experience in the all-important and difficult duty of properly managing and skilfully manœuvring fleets composed of several squadrons; in other words whether, if war were declared with France to-morrow, there are many among the Flag officers on the active list of the Royal Navy," who have practiced at sea the plans which they would put into execution on meeting a powerful force bearing the enemy's flag. The substitution of steam for sailing ships has no doubt changed the tactics which should be adopted in a naval engagement, and the rules which we have on the one hand, ROBERT, HOWE, JERVIS, or NELSON, would not apply now; the art of separating and weakening an enemy's force, without disorganizing our own, cannot be learnt entirely from a study of the naval history of the last century, and the days of imitation have been succeeded by those of invention and improvement. In order to maintain the superiority at sea which England has so long possessed, our Commanders-in-Chief would have to inaugurate and carry out some new system, but as ROBERT had to do eighty years ago; and to enable them to be prepared to do this, they must have ample opportunities afforded them of fighting squadrons with several ships in company; just as the general officers in the Army have of handling large bodies of troops under arms and on field days. The establishment of camps at Aldershott and the Curragh for the instruction of the Army, may be taken as a good practical example for the Navy to advantageously followed by the Navy; instead of keeping the largest squadrons employed on detached duties, we would have them assembled occasionally for the purpose of carrying out evolutions which would be likely to be useful in time of war. The Channel Squadron under the Prince Consort mean fleet would form a respectable specimen of what we could send to sea to face an enemy in case of war, and the ships would be sufficiently numerous and of a suitable kind in command to try any experiments which he may wish.

In order, however, to have our fleets well handled, it is necessary that the officers who are appointed to them should be active in mind and body, and able to cope with any difficulties which may arise, however great they may be. This has been said in a line of keeping on the active Admiral's List such only as have not reached a certain age, and compelling the others to retire on half-pay; but this system in theory and on paper this may appear to be very excellent and desirable, but when we come to the practical application of it this is found that many officers who have reached sixty years of age or more are much more competent to occupy important posts, and to discharge efficiently the important duties, than several of their younger brethren who are considerably their juniors in years. Take the present list of Flag officers and Commodores, and we find that not less than eight out of the fourteen employed are above the age we have mentioned, and will any one possessing a knowledge of naval matters say that these eight officers are score years veritas to allow that they are not equal to their work, or ready to meet any demands that can be thrown on their energies and abilities? The fact is that in the case of a true non either in the Naval, Military, or Civil department of the State, and there is no reason why it should be discriminately must be aware that in so doing they would deprive the country of some of its brightest ornaments.

A glance at the Naval history of the last century proves the most devoted advocates of the compulsory age retirement scheme of the founders of these opinions. Those of us that know NELSON will remember the bitter opposition he met at the Dutch Fleet under VAN TROMP in the Downs, that Admiralty would not grant their request to allow him to serve in Sole bay, that the Earl of OXFORD was 49 when he fought the battle of La Hogue, that ROBERT had only just reached the fifty years when he took possession of Quebec, and that HOWARD was only 48 at the time he defeated the French Fleets in the Mediterranean; but on the other hand ROBERT had attained the age of 64 when he fell in action with the Count DE GRASSE in the West Indies, and when Lord HOWE gained the victory of the 1st of June he was in his 69th year. Again, HOOD took possession of Toulon when he had passed 60 years of age, Sir JOHN JERVIS was 63 at the time he gained the naval victory which made him Earl of VINCENT, DUNCAN reached the battle of Camperdown when he was 66, and died in the arms of victory at Trafalgar at the age of 47, and COLLINGWOOD bombarded Cadiz in the year before he reached his 60th birthday. The great battle (Sir EDWARD PELLEW) fought with the French Admiral LINOIS was gained by Admirals who had passed the age at which it has been proposed that officers of the present day should be put on the list. The instances we have repeated are not rare; and were any scheme of this description to be adopted, the country would be deprived of the service of some of the very best men that we could look in the case of emergency.

Nevertheless, it cannot be denied but that there are many officers on the so-called Active List who are considerably in advance of the age we have been considering. Putting on one side those vessels employed in the Arctic seas, whose united ages amount to more than two hundred and fifty years, we find that the Admirals are (with one exception) above three score years and ten, and that the four eighty-seven, another eighty-two, two seventy-nine, one seventy-seven, two seventy-six, one seventy-five, the same under seventy-four, seven from seventy to seventy-three, and one sixty-eight. A veteran of seventy-seven leaves the list of Vice-Admirals, and is followed by one of seventy-six, six from sixty-five to sixty-nine years, nine above sixty and under sixty-five, two of fifty-nine, one of fifty-eight, and the remainder of fifty-seven years of age; the oldest Rear-Admiral is seventy-two, there are two others over seventy, seven are from sixty-five to sixty-nine, the same number range from sixty and under sixty-four; between fifty-five and sixty there are eight, nineteen are above fifty and less than fifty-five, and the remaining two are under fifty. Many of the oldest of the full Admirals have done good service to their country, and their advice is sometimes eagerly sought and advantageously followed; but they are only nominally Active Admirals, and we doubt whether there are half a dozen of that rank who would care to have under their orders twenty or thirty sail of the line and iron frigates. At present, but one of these has his flag flying, and when his term of service expires this autumn, he will most probably be succeeded by a Vice-Admiral. Of this last named rank there are but two officers employed, both of them holding shore appointments at the ports; and of the eleven Rear-Admirals on the Active List, three are serving with the temporary rank of Vice-Admiral.

GEN. FORTH'S FAREWELL TO THE MEXICANS.

MEXICANS: I have terminated the great mission which the French Emperor, NAPOLEON III., has sent me about to leave for France. I can assure you that no alteration has been made in the policy of the French Emperor with regard to departing from you, I leave you with a general in whom you may have full confidence.

To form a new constitution, that all might be happy under it, was the object of the mission; but the Emperor's intentions were not fully realized, because they are not sufficiently known.

In leaving Mexico, I hope my departure will be the means of opening the eyes of the blind (or restless) among you, and that the blessings arrived in your midst will be discovered in the calm they seek for their country. Then the true Mexican will find out that there are false friends, and that there are not many who treat with contempt or disregard the existing government. Then the true Mexican will be reminded of the little number of meek patriots, and their proximity to the mire in which they are rapidly falling.

Be assured that God, whose Providence protects the French cause, will not abandon you to the gulf of the gulfs.

Adieu, Mexicans! I leave with full confidence in the welfare of your country, for I have seen with my own eyes and thank Providence that your happiness has been consigned to the French Emperor. In leaving, I can say you will not forget [illegible] and the Mexican people.

FORTH.

MEXICO, Sept. 30, 1863.

THE NAVAL ACADEMY—this institution, which so much money is lavishly expended, and which promises such beneficial results in furnishing competent officers to our rapidly increasing Navy, having sadly been banished from their impending every loyal State and Territory in our national domain, cannot but be an object of interest and solicitude to every friend of the Navy. Appointments to those having sons in the institution and those designing to apply for appointment, feel interested in the daily routine of duties in the establishment.

For the purpose of gratifying such, we will select one day out of 365, from hundred devoted to study, which will answer for the whole, and give them the daily routine of midshipman life on ship-board, as observed on the *Constitution* and *Sorry*. The hours are given in the old style.

We will suppose it to be six o'clock A. M., and the young gentlemen snugly stowed in their hammocks, when the morning gun is fired, and the cry of "Reveille, reveille," at which every midshipman is required to turn out, stow his hammock in the nettings and get ready for morning call and inspection, which is at 7:30. Then follows breakfast, which occupies at 7, sick call at 7:40. Then follow the exercises of studies at 8:30, recitations at 9, dismissed to quarters at 1:57, and retreat from studies at 3:07. Call to exercise at 3:07, either at the guns or drill on shore; evening roll-call at 4:45, 4:50 P. M. Dismissed from quarters at 5:30, and call to evening studies at 7:30; call to evening hammocks at 9:30; tattoo and evening gun at 9:50; taps 9:55; 4 bells 10 P. M., when the lights are ordered to be extinguished for the balance of the night.

On Saturday's written permits are given, to such as from misconduct have not denied the privilege, to visit the town, which occurs in the afternoon. No midshipman who is known to use intoxicating liquors as a beverage shall ever give assurance to discontinue its use, which he must do in writing in the following terms:

I hereby give my solemn word that I will discontinue the use of tobacco until I am detached from the Naval Academy by the Secretary of the Navy," &c.

They are then allowed to enter any grocery store while absent from the ship, on any place where liquor is sold.

The following is a list of the Naval Academy:

Students desirous of going to church in town, will give their names to the officer of the day not later than 12 o'clock, who will make out a list of those churches, and assign them to the commanding officer, who will cause them to be read at dinner formation, specifying the leaders of the different parties, who will be responsible for the conduct of their parties. They will march to and from church in two ranks and in military order, entering the church immediately on reaching it, and on the close of the services quickly forming outside the door and marching directly to the chart."—*Providence Press.*

EMBARKATION OF HORSES IN TRANSPORTS.—The horses of the cavalry require peculiar attention at the time of embarkation, and should be put on board in the best manner that the cavalry is expected to feel that he has a most important duty to perform on these occasions, on which depend, in fact, the success of the carefully employed in the field when he reaches his destination.

The following regulations are required to be strictly observed:

The horses must not be heated at the time of embarkation. At this time every horse should be led quietly on the way of embarkation. In cases where this cannot be attained, at least two hours should intervene between the arrival of the horses at the place of embarkation and their being put on board. If they cannot be placed in stables, they should be disposed as to be thoroughly dressed and cleaned. The first night on board they should have a mash with some nitre, and during the passage lean should make a large part of their daily ration. Care must be taken that they are not heated by being over-fed.

The drugs on board wash the fetlocks and heads at each table long, and the horses should be well dried on the legs and nostrils with a sponge. If the horse appears heated and refuses his food, an early bleeding (?) will in general restore him. The object of all others requiring the greatest attention is that the hold be well ventilated, well whitewashed, shifting the ends to different parts of the hold.

In cases where the hold has been kept more than usually close, great advantage will be found in washing the manger with vinegar and water, and occasionally the nostrils of the horses with the same.

One stall on each side of transports must remain vacant, and some spare sheep should be provided, in case of illness or accident.

After disembarkation, a cooling regimen, with gentle exercise, are the best means to restore the horses to their wonted vigor and fitness for service.—*Delafield's Art of War in Europe.*

THE BROAD ARROW.—We have heard lately that the relics of name in Lairds' ship-yard have been marked with the broad arrow. The broad arrow, which is supposed to understood to be that they are declared to be the Government's property, is a mark which is not in competent count that they are not built in contravention of law. But the origin of the "broad arrow" and where it was first adopted as a mark for British Government property—we things such be familiar. The "broad arrow" was privately used, as for instance in the areas of the Sydney family, before it was introduced into the public service, and, for such, it would seem that legal documents were verified with the same symbol. The first official recognition of the "broad arrow" as a mark for Government stores, so far as known, was in 1661. A warrant issued in 1699, "by the principal officers and commissioners of the Navy," to the Navy Board, for certain regulations, one in the year 1661, and the other in 1662, directing that "all sorts of stores of their Majesties should be distinguished by some particular mark," namely, "those cables of white thread spun the contrary way, canvass with a blue stroke in the middle, and all other stores with the "broad arrow." The "broad arrow" was not used in the Navy, but that the bow was in early times the national weapon of defence, and was generally painted on both sides? At least, flags of the smaller size can be made of this material.

It may be formed out of any ordinary thin sheet-iron or tin, and a few such flags would be carried in every ship, and next the staff may be turned down about the width of one of the stripes. This will make it double on the edges when on one side, and the other side will be the same. An open band rings put through the double end, the rings to be put around the staff, and sewed together, making them secure in any manner preferred. It can be hoisted with aloft and kept there day and night in all weathers, and will rarely require repairing occasionally to make it last for years.

It may be made of several sizes, and, if desired, may be cut and hint on the fly, so as to show the wind, and will be a waving form, which will make it still stronger. Of course, if whatever form it is made it will retain it, and so as with which will be a great saving of bunting. The staff will not all stays show the stars and stripes; and, as it will be made of the same material as the flag, it will not chafe the staff as much as an ordinary flag when the wind is heavy.

These shot-iron flags may not only be used on stationary staffs, and also on ships, but they can be used on the battle-field, if not made too large, where, by holding them in position, they will be seen by the troops in the rear, and so to cover the head and the vital parts of the body, many a brave officer may save his life, by being more in more danger than any other part of the body. The flag is inexpensive, nearly a retreat, and even rent, which would otherwise be avoided.

ENGLAND NOT READY.—The London *Navel and Military Gazette* does not cease complaining of the apathy of the British Admiralty in preparing the Royal Navy to meet the exigencies of the time. It says:

"But our means of information as to works intended to carry out the superiority in guns and vessels abroad, especially in the dockyard ports, are very scanty. Throughout the whole country—the visits of Russian vessels of war, and their peculiar reception in America—all tend to the home question of "What is to be done?" "What are we doing?" "What are our ports?" We have just lost one of our trusty monitors in Lord CLARENCE'S room—caused by distraction in 1854–6 by cries of 'the French are coming.' Such cries, 1863, when we doubt in sober truth the honesty of another neighbor, and when we have the finest armaments ever seen afloat at New York, we earnestly ask, if to-morrow war ensues, how are we prepared? Will the British deal as the Americans do with their trusty Generals? Will the indignation of this country adequately reach those by whose omissions we are placed, as it were, and unprepared? Or will we trust to the aid of the Almighty, a feeling we feel but just been pronounced 'even inferior to any of our ironclads?'

"Those are not idle remarks. From several reliable sources we have reason to know that those who are ready to make war on us in the spring have contracts for a navy which, in its *unwieldy powers*, will be much more than a match for our hastily-founded frigates; and more, notdividing, as our Admiralty does, that important element of speed, each of the hostile navies now hatching will beat any vessel we have afloat. In words known, from elaborate tables lately published, the exact measure of the relative ship & note in the British navy; and our friends will take care that the comparison is made on unfavorable terms. This is especially worthy of imitation. Can we meet it? There's the rub."

ARMY AND NAVY PERSONAL.

CAPTAIN George B. Halsey has received the appointment of Assistant-Adjutant-General to Brigadier-General Andrews, commanding the Corps D'Afrique, at Port Hudson, La.

SURGEON J. Ruderstein has been detached from the Naval Rendezvous at Boston, and Surgeon J. Winthrop Taylor is at the Rendezvous.

FIRST Lieutenant George C. Charles, Adjutant Second South Carolina Volunteers, has been sentenced by court-martial to be cashiered.

BRIGADIER-GENERAL Wild, of the colored brigade, has been relieved from duty in the Department of the South and ordered to proceed to North Carolina.

DR. Lucius Abbott, recently a Surgeon in the Regular Army, dropped dead in the streets of Hartford, on the 29th of October.

CHARLES R. Ellet, commanding the Mississippi Marine brigade, died suddenly on the 29th October at Bunker Hill, Illinois.

CAPTAIN H. E. Lord, C. S., has been assigned to duty at the office of the chief Commissary of the Department of the South, on Folly Island.

MAJOR-GENERAL John M. Palmer has been assigned to the command of the Fourteenth Army Corps, in General Grant's Department.

MAJOR-GENERAL Sickles was serenaded at the Brevoort House, New York, on Saturday evening last, and made an address to the large throng that surrounded the house.

MAJOR-GENERAL Ord has returned to New Orleans and General Washburne is in command of the Thirteenth Army Corps.

THE Richmond *Examiner* of October 26 says of Roseerans' removal:—"Meantime, Lincoln is helping us. He has removed from command the most dangerous man in the army, and put two fools in his place."

BATTERY G, Fifth U. S. Artillery, has been assigned to the First Brigade, Army of Virginia, and to the Second Division, Corps D'Afrique, Department of the Gulf.

JOHN H. O'Neill, United States Military Telegraph Operator, of Pittsburgh, Penn., a gentleman, deservedly esteemed, died Oct. 28, at Alexandria, Va., of typhoid fever, aged 24 years.

ASSISTANT-SURGEON T. M. Lancy, Ninety-fifth Pennsylvania Volunteers, has been placed under arrest by the Surgeon in charge of Seminary Hospital, for absenting himself without leave.

THE arrival at Hilton Head, S. C., of Mr. Parrott, the inventor of the gun of that name, with several of his workmen, on the steel heavy ordnance on Morris Island, is announced.

COLONEL R. Butler Price, of the Second Pennsylvania Cavalry, has ordered to Philadelphia, to relieve Colonel Hatch, who is ordered to the Cavalry Department of St. Louis.

BRIGADIER-General Stevenson; Colonel Barton, of the Forty-eighth New York; Colonel Redman, of the Seventh Connecticut; Major Brooks, of General Gillmore's staff, arrived at Hilton Head, S. C., on the 29th ult.

CAPTAIN Daniel Ammen, Chief-of-Staff to Rear-Admiral Dahlgren, arrived in New York on the 30th from off Charleston, in the Ironclad Weehawken. Captain Ammen is the bearer of dispatches having reference to important prospective operations against Charleston.

LIEUTENANT-COLONEL Irving, A. A. G., of the New York Cavalry, formerly member of Congress from the Steuben district, has been appointed Assistant Commissioner to effect an exchange of prisoners, and will report to General Meredith.

LIEUTENANT Solomon, of the One Hundred and Seventyeighth New York regiment, who has been on duty for some months at the Central Guardhouse, Washington, has been relieved and ordered to his regiment, which goes into the field.

COUNT Ferdinand Von Zeplin, an officer of the Staff of the King of Wurtemburg, traveling in this country, is at present the guest of Major-General Sickles. The Count has had nine years experience in the artillery and cavalry service abroad.

COLONEL Litchfield, who has had temporary command of the Fifty-fourth Massachusetts regiment (colored), stationed in the Department of the South, has gone to Pocotaligo to look after the welfare of his own regiment. Colonel Hallowell remains command of the Fifty-fourth.

THE New Orleans *Times* of the 21st Oct. announces the arrival at Galveston of Commodore Renshaw, U. S. N., on the hospital steamer *Ohio*. *McDougall*, Captain Grupevine. The hospital of the *McDougall* is in charge of Major A. H. Hoff, with a complement of nurses.

MAJOR-General Butler has been assigned to the command of the North Carolina and Virginia Department, now commanded by Major-General Foster. Major-General Foster ordered to report to the Adjutant-General, and quarters have been prepared for him and his staff in Washington.

BRIGADIER-General Alexander Hays, who has been relieved from court-martial duty at Washington and ordered to New York, where he will perform the duties of Assistant Provost-Marshal-General, Department of Virginia, Recruiting Service, and Chief Mustering and Disbursing Officer for the first ten districts of New York, including New York city.

FIRST Lieutenant Thomas E. Chamberlain, Thirty-first Ohio Volunteers, Army of the Cumberland, was sentenced by court-martial to be cashiered for drunkenness while on duty. The President, in consequence of the previous good character of the accused, has commuted his sentence to a forfeiture of six months pay.

CAPTAIN P. W. Black, of the Ninth Massachusetts Regiment, dismissed from the service July 28, has been restored. Judge-Advocate Holt, upon a revision of the evidence in his case, having decided that it was not sufficient to sustain the charge against him. The vacancy caused by his dismissal having been filled, he is to be assigned to another command.

THE death of Colonel Torrence, of the Thirtieth Iowa, in the battle near Tuscumbia, was a serious disaster. He was killed while in advance of his men in the midst of the fight. Mistaking a party of rebels dressed in Federal uniform for our troops, he rode forward to ascertain who they were, and at half-range distance was shot down. Colonel T. lived at Keokuk, and served with distinction through the Mexican war.

BRIGADIER-General Butler recently published it appears that Major-General Butler was empowered by the Government to have the rebel General Jeff. Thompson released from the Fort Delaware prison, on Pearson's Island, near Sandusky, Ohio, on parole. This favor was granted Mr. Thompson, and readily complied with by General Butler, in recompense for the acts of humanity performed by the rebel General in releasing a Federal officer while operating in Louisiana against General Butler. George D. Prentice, of the Louisville *Journal*, said, "Jeff. Thompson is a fine fellow, and desired to send him 'some good liquor,' but was not allowed to. Thompson was released, as he desired.

ITEMS AND INCIDENTS.

WE have now in the United States at least two hundred and thirty-five general hospitals for the use of the soldiers, containing about 80,000 patients.

SR. Petersburgh accounts say it is the general belief that there will be a diplomatic rupture between Russia and the Western Powers before Christmas.

AN able-bodied man, under the command of General Martindale, Military Governor, are to be relieved from duty at Washington and sent to the field. Their place will be supplied by the Invalid Corps.

GENERAL Pemberton's report says that Vicksburg was not surrendered for the want of provisions or ammunition, but because the men were worn out completely, were physically exhausted and could not be made to perform duty accepting by any longer.

THE entire armament of the State of Vermont consists of 5 brass and 4 iron 6-pounders, 97 Springfield rifles, 513 smooth-bore muskets, 36 flintlocks, and 60 Windsor rifles. And what is more, there is not a regular militia to fire over these few, if occasion should demand it.

ON the recommendation of the Medical Director, a Convalescent Camp has been established at Convent of St. Augustine, Florida, where, hereafter, all sick and convalescent officers and soldiers, requiring a change of climate "to save life or prevent disability," will be sent by steamer.

THE London *Morning Herald* says that the capture of the steamer *Sir Robert Peel*, by the Federals off the Rio Grande, is exciting considerable attention, and that strong pressure will be brought upon the British Government on the subject, it being alleged that there was not the slightest ground for seizure.

THE Abingdon *Virginian* says General Wm. E. Jones, by recommendation of General Lee, has been assigned to the command of the counties in the Southwest Virginia Valley and East Tennessee. In a subsequent paragraph, the *Virginian* says the command of General Jones' department have been divided between Generals Williams and Jones.

THE Board for the examination of officers for colored regiments have since they commenced their labors examined 99 officers, of whom 12 were rejected for position, 30 were appointed, and one declined. Of the recommendations for appointment 16 were for captains, 10 for first-lieutenants, 24 for second lieutenants.

THE following is a list of vessels boarded by the U. S. Revenue Cutter *Putnam*, off Gloucester, N. J., during the month of October, 1863: Steamers, 6; ships, 2; barques, 10; brigs, 17; schooners, 39; sloops, 1. Total, 104. The officers of the *Putnam* are, Captain, Thomas Sands; Lieutenants, Henry A. Porter and Horace J. Gambrill; Pilot, Alex. Hay.

THE Orange and Alexandria Railroad is in running order to Warrenton Junction. During last week eleven miles of the road were completed. This embraces, among other, finest feet of bridges, from 20 to 65 feet in height, have been built, and 27,700 cross-ties made and laid. So thoroughly has the work been done that it is believed that not half a dozen cross-ties were found that could be used.

AN English paper, speaking of the reported disagreement between Generals Grant and Banks, says Roseerans' (which report has since been authoritatively denied) says that readers of English history can recollect the similar case of Admiral Byng, who was shot for his inaction at Carthagena, and how an expedition relatively as formidable as the Federal one against Charleston, came to nothing through the dilatory movements of Banks.

THE President has concurred in the opinion of the military commission of which Major-General Hunter was president, appointed to inquire into and report upon matters connected with the destruction of the steamer *Keth*, with Government property, on the Mississippi. It appears from that report that a government officer, agent of the funds, has been to blame for misconduct or neglect of duty in the premises.

THE Secretary of War directs that for each battle in which every officer, non-commissioned officer, and private of the Invalid Corps may have been engaged and borne an honorable part, a scarlet chevron, one inch in width, be worn on the right arm, with a space of one-sixth of an inch between each braid. This will become an honorable badge, and one that every soldier has been eager to have formed, and will be as highly prized by the brave wearers as the ribbons and crosses so proudly worn by the veterans of European armies.

SOME alterations in the French marine which have been under discussion are likely to be carried into effect shortly. The seamen inscribed on the register, instead of being subjected to three distinct levies, are to serve six consecutive years. M. Cuvier, the Director of Marine and Colonies, is reported to suppose that the large number of persons who have recently entered on the cultivation of oyster beds would be available in time of emergency. He also points out that the number of recruits available for maritime service might be largely increased if the extensive tracts of land bordering on the sea, which are now salt marshes, were given by the Communals to be converted into reservoirs for the cultivation of fish; and at the same time the alimentary resources of the country would be immensely increased. One of the difficulties to which those who depend on this fish culture would be subject, would be that of being drawn for service in the navy.

THE Rebel General Ewell.—A newspaper correspondent says of General Ewell:—"The birthplace of this general is a huge, wicky frame-house in the village of Centreville, Fairfax county, Va., of about ten years his father had to sell out the Centreville property, and retire to Haymarket, Prince William county, Va., where he resided at present. Young Ewell was educated at West Point, and was a classmate in the regular service, and on the breaking out of the war was appointed to a colonelcy in the rebel service. He rose rapidly to a brigadiership. Early in 1862 he was appointed major-general, and on the death of Jackson he took the command of his late corps. In appearance he is a dark-complexioned man, with a rich profusion of a black beard, which he always wears. He is about forty-seven years old, five feet nine inches in height, and has rather a stern military appearance.

ARMSTRONG Guns Ridiculed.—The London *Examiner*, writing of the Armstrong guns, says:—

"It is a perfect anomaly to send your arrow-clad fleet to sail round our islands and visit our ports without an effective gun on board any one of them which could make a hole in the side of the heaviest ship. We are informed that the brave knights of old who were so encased in steel as to be safe in a fray without hurting anybody, unless some of them fell down, and were not able to get up again on their legs, were smothered in their armor."

And one of the correspondents growls that "for years have given the Americans forty or more 200-pounders, which have beaten down a strong fortress at a distance of 1,000 yards, while the Armstrong 100-pounder at that distance could hardly knock an old duck off its nest; and the gun that was ever cast or forged, with a charge of twelve pounds of powder, could do that which Parrott's guns have done."

The London *Telegraph* indulges in the following bitter sarcasm:—

"Instead of calling all scientific England to put their heads together and watch events with the Ordnance Office, the Whitworth committee was shown the door before anybody's own committee approved his own guns; his own rifle-pattern at Enwick turned them out, on his own evidence, without sufficient proof of their merits; and 'the Armstrong' of the 110-pounders were served out before the experiments upon them had been concluded. In a country full of foundries and workmen, Armstrong alone drew £1,000 between 1859 and 1863, and Woolwich, under the orders of the 'retired partner,' spent another £1,471,763.

THE Strength of the Rebel Rams.—The Richmond *Examiner* of October 26, says:—"The strength we shall be able to put forth in the Confederate Navy will be chiefly determined in the present speech of Lord Russell, and the movements of the next few months. It will be a bitter disappointment to the high hopes that had been raised by the Bright visit, and the fierce spirit of war by the sanguine minds of our people, yet it admits of grave doubt whether their importance to our cause was not much overrated. Bright visions of a powerful navy up of the blockade broken and the enemy's cities bombarded. We should, however, reflect that the construction of a vessel adapted to the purpose of the Atlantic Ocean takes years, and to cross the ocean from Europe to America, necessitates a build very different from that required for iron than those intended solely for coast or harbor defence.

The Monitors already possessed by the Yankees, and the still more formidable ones now rapidly advancing to completion, would be superior to any we would be likely to receive from Europe, and consequently no such great results could be anticipated from them as were generally expected of both Confederate and Yankee, have depicted. *Le Glaire*, the boast of the French Navy, stated to Admiral Farragut, would be found to be superior to the British ship *Warrior*, has a plating of twelve centimetres; less than five inches. The Confederate rams have a maximum of eight inches. Not having to consult buoyancy and safety to the same extent, they can be made more formidable for the purpose of fighting in harbor or in smooth water.

THE Monitor already possessed by the Yankees, and the still more formidable ones now rapidly advancing to completion, would be superior to any we would be likely to receive from Europe, and consequently no such great results could be anticipated from them as were generally expected of both Confederate and Yankee, have depicted. *Le Glaire*, the boast of the French Navy, stated to Admiral Farragut, would be found to be superior to the British ship *Warrior*, has a plating of twelve centimetres; less than five inches. The Confederate rams have a maximum of eight inches. Not having to consult buoyancy and safety to the same extent, they can be made more formidable for the purpose of fighting in harbor or in smooth water.

THE Manufacture of Gunpowder in Wagner.—On Sunday last, says a correspondent of the *Tribune*, while Captain Exton, of the Volunteer Engineers, was examining the earth-works on the left of Fort Wagner, preparatory to designing some alterations, he discovered a magazine, which until then had escaped the notice of any of our men. The magazine was found to be in the left flank of Section of the fort, in the form of a pit, and is reached by means of a stationary ladder. When found, its roof was covered with eight feet of sand, upon which had been heaped up by shells thrown from our batteries. It contained an immense amount of ammunition, including cannon, projectiles, and small charges for rifled muskets. These were also stored away a vast quantity of a peculiar kind of incendiary shell, the composition of which was found to consist of a powder resembling fine sand, and which was readily ignited and burned with an unquenchable flame. To what use the powder was intended, or by whom it was put up, is unknown, unless it was to fire the wooden vessels of the fleet. A portion of one side of the magazine was covered with a substance resembling tin. Original sandbags, made from white and very strong material. Perhaps one and the chief cause of the rebels precipitately evacuating the fort was the fact of the sap building by the engineers heading directly for this magazine, which it would have penetrated if the workmen had been allowed to continue their labor one night more. A careful search was made for a fuse connecting the magazine with the outside world, but none was found. It is probable that the rebels could, one instance, at any rate, where the enemy abandoned his diabolical plan of murdering his adversary, who in legitimate warfare proved too much for him.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels; of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to books and other matters.

From gentlemen in the medical service we shall be glad to receive communications on military hygiene, practical surgery, and reports of notable epidemics and noted forms of treatment.

The subscription price of the ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Postmaster's, Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The position on the JOURNAL is strictly cash in advance, at the above rates.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, NOVEMBER 7, 1863.

THE COMING CAMPAIGN OF GEN. GRANT.

THE concentration of all the Western forces under Lieutenant General Grant has given to the campaign in the central zone proportions which can only be fitly designated by the word *colossal*. Whether we contemplate it in respect of the force massed under his command—reaching up to close on two hundred thousand men—the vastness of the theatre of operations, or the superlative issues at stake, the war in the West has not assumed less than magnitude. It dwarfs all our own previous military combinations and finds its parallel only in the grand campaigns of the Napoleonic era, when war, o'erleaping the old bounds of routine and method, strode forth a heaven-daring Titan. The whole course of events has from the beginning tended to give the war grander and grander proportions. Those who had fancied that, leaving the field of great operations, it was destined to degenerate into mere guerrilla practice, must find their expectations rudely disturbed by the present military *status*. Just the reverse has been the actual fact. Concentration rather than diffusion of forces has been the progressive policy of both belligerents, till to-day the issue of the great argument finds its arbiters in the two "mighty opposites" which flee each other in Virginia and Tennessee. There is, properly speaking, but one army in the field (including, of course, the forces of both belligerents), and that is in Tennessee; for the operations in Virginia, after having for two years been primary, are now in reality but secondary, and subordinated to the more decisive operations in the central zone. There is something fairly awful in the intensity of interest centering in these two mighty forces, which collision with other with the stripped and clean-cut isolation of two Roman gladiators. With these rests the issue of the struggle, and the war will be ended, not in the petty operations of guerrilla warfare, but with all our powers at the climax, in a duel that must shake the Continent to its foundations.

How soon this contest will come, depends, of course, on contingencies that are wholly beyond our ken. If it rested exclusively with General GRANT, we doubt if he would do anything of great aim this season; but, waiting for the fine roads and weather of spring, proceed then with an army unified, mobilized, and disciplined, to enter on a grand final campaign. But it does not rest exclusively with him. The very presence of our army on the line it now holds in Tennessee, is an arrow rankling in the giant sides of the rebellion, which those who sit in power at Richmond are committed to pluck out, even if the attempt should cost the very life of their cause. If the possession of this central citadel of the South is of the grandest moment in a purely military point of view, it is of even more and vital importance in the point of view of the productive forces of this region. To this respect its possession is with the Confederacy literally a question of life and death. Hear the frank confession of a late number of the leading journal published at the rebel capital on this head:

"Not until that country fell into the possession of the enemy was its inexhaustible value realized. Except what was furtively obtained from Kentucky, *the whole enormous supply of pork came from East Tennessee, and the contiguous counties of adjacent States.* The product of corn in that region was very heavy, and no portion of the Confederacy, equal in extent, afforded as large a supply of forage and winter pasturage. *The salines and lead mines of Virginia, which produce all the salt and lead used in the Confederacy, and the saltpetre caves from which limestone supplies of saltpetre were obtained for the Ordnance Department, were protected so long as East Tennessee was safe.*"

The rebels, therefore, may make an attempt to recover this lost region by a vigorous blow at the left wing of the Union line under General BURNSIDE. Indeed, there is every indication that such a *coup* is in preparation, if not now in actual execution. A movement of this kind on the part of the rebels would, of necessity, involve the other forces of General GRANT, and this way accelerate military operations, as well as materially alter their character. In the meantime, a survey of the situation in Tennessee will put us in a position to appreciate both present and prospective movements.

The late operations of the right wing of General GRANT'S army, resulting in giving us possession of the railroad and river from Bridgeport to Chattanooga, have made a most important change of the situation in our favor. It has, in fact, decided at a stroke our ability to hold our own at Chattanooga. The question of our ability to remain there has, as we have repeatedly shown, turned from the beginning exclusively on the problem of supplies. There is no doubt, we think, that without the lines of communication opened up to General GRANT, by the possession of the south side of the river, it would have been impossible for our force to have remained at Chattanooga. For a month previously our garrison at that point had been practically in a state of siege. On the withdrawal of General ROSECRANS to Chattanooga the rebels seized possession of Lookout Mountain, and thus reached the banks of the Tennessee river ten miles below Chattanooga, effectually stopping the running of steamers and the railroad between Bridgeport and Chattanooga. Thus blockaded and shut off from the two great highways over which the vast supplies needed for the subsistence of the army ought to have passed, the only avenue of communication with the terminus of the railroad at Bridgeport was by making a great detour of eighty miles on the North side of the river. Over this route, difficult at best in respect to topography, while in the bad season, all the supplies for man and beast had to be wagoned. From a week to ten days was required by a single wagon to make the distance. Even this route, however, soon became almost useless to us, in consequence of the annoyance received from the rebel guerrillas who infested it. Under these circumstances, the feeding of the army was mathematically an impossible task. Its condition soon became deplorable—the men being put on one-half and then on one-third rations, and the animals, for days and days without forage, were dying by hundreds. If this blockade could be kept up, the rebels might fairly hope to starve out the Union force, and compel a retreat which, under the circumstances, could hardly fail to be disastrous. The late victory—inconsiderable in a purely military point of view, but in a *vital* point of view of the very first importance—has changed all this. The Army at Chattanooga has now communication with Bridgeport both by river and railroad (distance twenty-eight miles), and abundant supplies are easily obtained.

This black cloud being now happily lifted from our army in Tennessee, we are free to consider the campaign as it stands. That army has the Tennessee river and the mountains behind it as a splendid line, whether for defence or for offence. Let us consider it briefly in both aspects.

The defences of Chattanooga against direct attack are now so formidable that any attempt of this kind by the rebels may be considered out of the question. An offensive movement would, therefore, be by one or the other flank.

A movement on the right flank, extending from Chattanooga to Bridgeport would be naturally dictated by the fact that the line of communications of the army at Chattanooga, instead of being directly in the rear of the army, and therefore covered by it, is really on the right flank, and is open to the enemy's cavalry miles west-by-south before running north. There are, however, geographical conditions that favor the safety of this line. Thus it is along this whole exposed portion covered by the Tennessee river, whose general course it follows, and which cannot be crossed (except by bridges) at any point between Chattanooga and the Muscle Shoals. This entire distance of one hundred and fifty miles is vigilantly guarded by a corps of observation. Besides, a movement by this route would take the enemy hundreds of miles away from railway communications—a task which he will hardly be tempted to try. If, therefore, we may regard the centre as absolutely, we may safely count the right flank comparatively secure.

The left flank loose remains, and, it must be confessed, this is more vulnerable. Twenty-five miles above Chattanooga, the Tenoessee river up to Knoxville (General BURNSIDE'S headquarters) is frequently fordable. The possession of the Western and Atlantic railroad would enable the rebels to mass at Cleveland, which almost touches the river: thence the country is a broad, open valley, through which runs the Virginia and East Tennessee railroad, all the way up to Knoxville.

As we have before intimated, we regard a rebel move in this direction as extremely probable: indeed so much so that we momentarily expect to hear that it has actually taken place. Against a vigorous demonstration of this kind it must be acknowledged the situation of General BURNSIDE'S column is somewhat critical—isolated, as it is, by a hundred and fifty miles from all succor. The rebels, however, could only hope to execute a move of this kind by secretly withdrawing a corps from BRAGG'S force and sending it from LEE'S, and even then remainder to hold our two opposing armies in check, and, by uniting these detachments, make a rapid assault on General BURNSIDE'S force. With vigilance on the part of Generals GRANT and MEADE, this should be made a hazardous step. The Army of the Potomac, especially, should be swift to seize any such opportunity afforded it to make an open base for offensive operations. The campaign on which General GRANT, when once ready, must enter, is preeminently one of *action*. In the possession of the mountain system of Tennessee, we have achieved all that mere manœuvring could win. The glittering prize for which strategy played its arduous and perilous game is ours. The fortresses is now downright hard pounding. We hold in this region the coveted "interior position" thence our army should spread out, fan-like, in all directions where a rebel force is found. Of distinct *territorial* objectives, Atlanta and Montgomery present themselves as desirable points—being both positions of importance, key-line of railroad communication between the East and West, and also great centres of Southern manufactures and depôts of supplies. Once at these points, our force would touch the great navigable rivers which flow into the Atlantic and the Gulf, affording new bases and lines.

General GRANT has still much to do in the way of getting his army in hand, in consolidating, disciplining and vitalizing it. He should be left to choose his own time and way of work. We trust he will not be hastened beyond the dictates of military prudence. For, as the coming campaign should be the final one, nothing should be spared to make it absolutely decisive.

JOINT CAPTURE AND SIGNAL DISTANCE.

JUDGE BETTS in the United States District Court has made a decision in a case of joint capture of prize, which, as the first decision on a question involving a great number of cases, will be of interest to all our naval officers.

The decision is in the case of the prize steamers *Anglia* and *Scotia*—two vessels which were captured in Bull's Bay by the U. S. vessels *Ethan* and *Flag*, belonging to the blockading squadron off Charleston. Of course, their claim to interest in the prize is unquestioned. But the *Housatonic* and the *Flambeau*, two other vessels of the blockading squadron off Charleston, which, at the time of the capture of the *Scotia* and *Anglia*, were doing duty in Moffit's channel, interposed claims before the Prize Commissioners, insisting that they are entitled to share in the distribution of the prizes—on the plea, in the case of the *Housatonic*, that she was in sight of the prize when captured, and in the case of the *Flambeau* that she was in signal distance of both captors at the same time. The Commissioners requested advice to the claims of the *Flambeau* and *Housatonic*; and Judge BETTS, before whom this case was brought in appeal,

affirms the decision of the Commissioners, disallowing the claims of the *Flambeau* and *Hunsatonic*.

The act of Congress of July 17th, 1862, directs that "when one or more vessels of the navy shall be within signal distance of another making a prize, all shall "share in the prize." At the time of the capture by the *Restless* and *Flag* in Bull's Bay, the *Flambeau* and *Housatonic* were stationed at a distance of sixteen miles. No signals were seen by them from the capturing vessels at the time of capture. Several witnesses, however, expressed their opinion that the *Flambeau was within signal distance*, while several other witnesses, equally well situated to judge, expressed the opinion that "neither the *Housatonic* nor "the *Flambeau* were [was] in sight or signal distance "of the prizes or capturing vessels, at the time of the "capture." The chief points in Judge BETTS' argument are as follows:

The mere physical ability to discern the prize, or even seeing her from the masthead, not imparting the ability to contribute assistance in making the capture, does not seem to have been recognized in any authoritative case, as rendering a vessel so present and in sight as to afford evidence of *constructive* assistance to another ship in effecting a capture. (Upton on Maritime Warfare and Prize, 204–220, second edition.)

The latest provision in the act of Congress (12 Stat. at Large, 605 sub. div. 4, § 3: "Where one or more vessels of the navy shall be within signal distance of another making a prize, all shall share in the prize,' &c.,) affords no indication that the established rules in regard to joint captures in prize cases were intended to be changed; or that a squadron of enemy ports by fleets or squadrons, or united navy forces, seem to be therefore entitled to more extravagant rules, subject to regulations applicable to naval service of that denomination.

It will not be applied *constructively* that assistance has been rendered by a ship, and palpably contributing to the capture of another, unless she shall be within signal distance of the one making the prize—that is, under circumstances which may justify the capturing ship to demand and expect her assistance.

These facts must be affirmatively proved by the vessel claiming to share in the proceeds of the prize property given.

He, therefore, disallows the claim.

The appointment of Brigadier-General GARFIELD, late Chief of Staff to the Army of the Cumberland, to a Major-Generalship, will be hailed with peculiar satisfaction by his brother officers of the West, and by all who have learnt the high qualities of this distinguished soldier. The mode in which General GARFIELD obtained his double star is peculiarly honorable to him. Having been elected a member of the coming Congress from Ohio, he went to Washington, after the removal of General ROSECRANS, for the purpose of awaiting the opening of the session. It having become a question, however, whether he should assume his seat or return to the field, General GARFIELD sent word to the PRESIDENT that he was quite willing to serve his country in either field of duty. The PRESIDENT's reply came in the form of a commission as Major-General—a rather witty mode, and quite characteristic of Mr. LINCOLN's way, of telling him to return to the field. We are glad of the decision. For much as we think Congress would gain by having more men of General GARFIELD's patriotism, intellectual ability and army experience, yet the country needs him still more as a soldier than as a legislator. General GARFIELD had already performed distinguished services in the field under General BUELL, when on the death of the lamented Colonel GARESCHE, at the battle of Stone River, he was appointed by General ROSECRANS to the position of Chief of Staff. To the arduous duties of this difficult and delicate post he brought qualities of a peculiarly high order—an immense facility for business, a clear and comprehensive judgment, and untiring industry. In his official report of operations in Middle Tennessee, published in this journal a few weeks ago, General ROSECRANS pays him the following high but deserved tribute. "All my staff merited my warm approbation "for ability, zeal and devotion to duty; but I am sure "they will not consider it invidious if I especially men"tion Brigadier-General GARFIELD; ever active, pru"dent, and sagacious. I feel myself indebted to him "for both counsel and assistance in the administration "of this army. He possesses the energy and instincts "of a great commander."

We trust it will not be considered going out of our way if we say that General GARFIELD's career affords a fine illustration of the opportunities which our free institutions afford even the humblest to rise to eminent station. By the death of his parents while yet very young, he was cast wholly upon his own resources for a livelihood. At the age of sixteen he drove horses on the Ohio and Pennsylvania Canal, and rose through the like narrow fortunes until he was able to enter Williams College, Mass., at which he was graduated in 1856. After graduating he returned to the West, and during a period of three years was at the head of a collegiate seminary at Hiram, Ohio, and it was from among his pupils and friends that he formed the regiment (42d Ohio) with which, at the outbreak of the war, he took the field. The poor canal boy, the struggling teacher, is to-day, at the age of thirty-two, a Major-General.

ONE of our daily contemporaries sums up its military creed in the following pithy formula: "we hope "changes will go on *wherever a general cannot win* "*victories*." This certainly reduces the somewhat vexed question of the removal of generals to an extreme simplicity. If it would only work! But as it never has, so we imagine it never will. We have a faint notion of some very great commanders, who have not always "won victories," and whose military career was begun by winning very decided defeats. Is not NAPOLEON the Corsican's career—one of the most instructive works that an American officer can read—that illustrious commander tells how, at the close of his first campaign, in which he had committed many blunders, he sat down to think over and profit by his own mistakes and failures. The Archduke CHARLES, the first teaching of a soldier: NAPOLEON in fact (who himself did not always "win victories," calls him "the greatest and worthiest of his enemies"—and yet he was far from always being successful. In his "Principles of Strategy," which may be considered the transcendental calculus of the science of war, he does not hesitate openly to confess that in his own campaign of 1806, he almost always acted in a manner directly the opposite of the manner in which he ought to have acted. The distinguished warrior who fought so valiantly at Essling, who planned with such skill the movement against JOURDAN and MOREAU in 1796, and who manœuvred so brilliantly at Stockach, does not regard it as any derogation to his glory to seek even to his own failures for lessons as noble as avowal, the proofs of established principles. We hardly think that we are likely to get better commanders than these. And until our contemporary can discover a method of reading a general's construction in his face, and assure us ready-made commanders, warranted to "win victories," we imagine it will be better to let a general have the benefit of his own mistakes, and even of his own failures. If he has in him the stuff for a commander, he will be able to extract from his own errors of action the best possible lessons. Of course, we do not mean that a general should be retained merely *because* he makes failures. But there is a just mean between this and the wild notion that a general should be dismissed whenever he makes a failure.

QUARTERMASTER-General MEIGS pays a very handsome compliment to the Eleventh Army Corps, on account of its late brilliant feat in driving the rebels from Lookout Mountain, and thus reopening the communications of the blockaded army at Chattanooga. We are sincerely glad that this corps, which was likely to pass into an unenviable immortality on account of its ill luck at Chancellorsville, has a chance to retrieve itself and has done it so brilliantly. The Eleventh Corps has suffered much unjust aspersion on account of an affair which was its misfortune quite as much as its fault. The blame was with the commanding general for placing this corps in a false military position, (being, technically speaking, *en l'air*) quite as much as with the men who were the victims of that false position. It is a very gratifying piece of poetical justice that this corps has been able to rout and chase before it in Tennessee, the same troops by which it was discomfited in Virginia.

The imminence of an attack on General BURNSIDE's column at Knoxville, a hundred and fifty miles from all succor, appears still more threatening from the tone of the late Richmond papers, which confidently announce the speedy recovery to the rebel side of the whole East Tennessee region. The *Enquirer* of the 29th October says:—"The Federals at Knoxville have "but the most contracted idea BURNSIDE contemplates "a movement on that place." The *Examiner* of the 31st says:—"We believe that in a few weeks more "the enemy will have been driven out of East Tennes"see. Indeed it is highly probable that the work "would have been accomplished by the present time "if the movements of our armies had not been re"tarded by the want of shoes; *but we have reason to* "*believe that East Tennessee will soon be recovered.*" These statements would hardly be permitted in the Richmond journals were not the plan already in execution. Indeed our latest advices from Chattanooga show that this movement is actually going on. The force is reported upon good authority to be commanded by LONGSTREET, and to be now concentrating in the vicinity of Cleveland, Tenn.—the point of junction of the East Tennessee and Virginia with the Western and Atlantic Railroad. It is also believed that General BURNSIDE will very shortly find himself menaced by a strong force from LEE's army by way of Lynchburg and Bristol, Va.

THE British Government has recently sent communications to all its colonies, stating distinctly that the Home Government will no longer defray the military charges for the internal good order of the several communities, nor for their military defence in the event of war, unless in time of peace the colonists consent to liquidate the expenses of keeping up a regular force sent from that country. It is also said that the Home Government is pledged to the reduction of all the establishments in the colonies to the lowest state consistent with safety, and that the military staff, especially, will come under the pruning-knife. This will be sad news for the loyal citizens of the British North American provinces, whose souls are disturbed with forebodings of a Yankee invasion. It is not impossible that they may come to a different view of the blessings of British rule, when they find it taxing them with the burdens of a sovereign state, while hampering them with the restrictions of colonial dependence.

EXTRACTS which we publish this week from English scientific journals, and from an important speech of Mr. JOHN LAIRD, Member of Parliament and shipbuilder for the rebels, show in what an unfit state the British Navy is for war. The pet Armstrong gun, on which so much has been spent, is a failure. The Channel fleet, which has been sailing from port to port, to be received everywhere with the greatest expressions of delight and confidence in its prowess, draws from twenty-five to twenty-eight feet of water, and is entirely disqualified for operations on our coast, even if it were able to cross the ocean. Mr. LAIRD can find but two vessels suitable for harbor defence in the whole Navy list, and they are those built on Mr. REED's plan. Captain COLES' turreted ironclads draw too much water to be of much use for coast defence, and they are totally unfit for crossing the Atlantic. And yet England has spent not less than thirty millions of pounds in the last three years on her Navy.

MAJOR-GENERAL THOMAS officially communicates to Major-General HALLECK, under date of Chattanooga, 4th instant, that PFEIFFNER, of the 13th Michigan Infantry, overtook the combined guerrilla forces of COOPER, KIRK, WILLIAMS, and SCOTT, numbering 400, on the morning of the 3d instant, at Lawrenceburg, 35 miles south of Columbia, and after a severe hand to hand fight defeated them, with the loss on his side of three men wounded, and eight horses killed. The rebel loss was eight killed and seven wounded, and twenty-four prisoners; among the latter one captain and two lieutenants. General BRAGG's forage train, sent up the Lookout Valley, in front of his position, was captured. The train was sent to camp. The train guard were also captured.

FROM the *resumé* of the labors of the Board for the examination of officers for colored regiments—which appears in another place in this paper—it will be seen that there has been no lack of applicants for positions in this division of the Army. Nearly seven hundred persons have appeared for examination, about one-half of whom failed to satisfy the demands of the Board, and were rejected. The applications still continue undiminished, and there is every prospect of an indefinite prolongation of the labors in which the Board is engaged ever since the organization of its president. Major-General CASEY, who is a firm believer in the efficiency and military capacity of our negro troops.

FOREIGN MILITARY AND NAVAL MATTERS.

A large body of Danish troops have been ordered to be massed on the Schleswig Southern frontier.

The Canadians having got the militia through, are all shooting rifles. Every target is supposed to represent an invading Yankee.

Two divisions of Russian infantry are ordered to Poland, and several batteries, as reinforcements, to the Russian troops already there. The Black Sea flotilla is being fully equipped.

The Danish Admiralty had decided to construct a new squadron of iron gunboats, armor-plated, double screw propellers, to be armed with two heavy Armstrong guns.

No less than seven lieutenant-of the British navy have been placed at the bottom of the list of that class of officers, in consequence of the many extra-nautial that have taken place—a fact unprecedented in the naval records of that country.

Prior to the nomination of Vice-Admiral Sir James T. Hope to the command of the West India squadron, in succession to Sir Alexander Milne, the wishes of Rear-Admiral Erskine were consulted on the subject, but that officer declined the offer of active employment.

The British Board of Admiralty have for some time past had under consideration the necessity of providing a number of efficient gun-vessels to replace the condemned gunboats at Hankar and other yards, and a design has been agreed upon. The new vessels are to be built of iron and iron-plated, and they will be propelled upon the twin screw principle.

The latest New Zealand advices estimate that about 7,500 soldiers were in arms in the Waikato. Should General Cameron's troops had been successful in one or two small engagements; but it was believed that further reinforcements would be required before the war could be terminated.

It is stated that the muzzle-loading shunt gun, designed by Sir William Armstrong for the British navy, has become in an unfit state for further practice, after firing less than 300 rounds. This failure is owing to faulty construction, in having a movable breech plug, and a sort of vent behind to admit of the escape of the gas in the rear of the gun.

Admiral Rufer's fleet had at last accounts arrived at Kagosima, Japan. The necessary salute to obtain the satisfaction demanded, Kuper besieged the city and levelled it to the ground. He then set on fire the Prince Satsuma's three steamers moored off Yokohama. Kagosema is one mass of ruins. The palace, the factories and the arsenals are all destroyed.

A new machine for cleaning by means of steam machines the submerged parts of iron ships is now undergoing trial at Portsmouth. The *Recruit*, whose bottom is covered with grass two or three feet long, is the vessel to be operated on, and while in dock and when the scouring has been effected, in order to ascertain the result of the experiment.

Rear-Admiral Sir James Hope, K.C.B., transacted business recently at the Admiralty. The future Commander-in-Chief of the West India station will, as a matter of course, have temporary rank as Vice-Admiral on arriving within the limits of his command. The *Duncan*, Sir James Hope's flag-ship, will scarcely be ready for the pendant before the middle of December.

Capt. Coles has introduced in the *Royal Sovereign* improvements of the most important character. He can weigh his anchor, or anchor, without using a single man on deck. Under his cupolas he has placed his magazine, and between the bottom of the cupola and the top of the magazine there is small space, which may be filled with sand-bags or wet sails, so as to render the magazines absolutely secure.

Algeria is still making experiments with gun-cotton, and successful operations have been carried out upon by a select committee. Gun-cotton was tried in Paris, but found that now made by Baron von Lenk is said to be of a far superior kind. Great care and precautions are at present used which were then unknown. The winds the Baron employs to dissolve the cotton in are of the very best description, and the immersion is repeated twice.

The Liverpool papers contradict the report that a guard of soldiers had been put on board one of the rams in the Mersey, to prevent her sailing. At present, the work on one of the rams, *El Tousson*, is being rushed forward rapidly. An attempt is made to conceal the warlike character of the vessel. The *Leeuat Herald*, of Constantinople, confirms the report that the Turkish Government has offered to buy the rams.

The *Indépendance Belge* has published a report to the effect that the Poles have applied for assistance to the Ottoman Porte; that they have already concluded an offensive and defensive alliance with Turkey, and to its encouraging all the provinces which have been wrested from the Sultan by Russia; that the Turkish Government is not disinclined to listen favorably to the offer; and that the Russian Cabinet apprehends a conjoint attack from Sweden, Turkey, and France.

By the death of the late Admiral Sir Henry Hope, K. C. B., the number of English naval officers decorated with the Guelphic order of knighthood, and commanded ships in general ranks or captains of the vessels of equal force are reduced to four; namely, Admiral Sir George F. W. Anson, G. C. B., for Battle of St. Domingo; Admiral Sir James Alexander Gordon, G.C.B., Governor of Greenwich Hospital; Sir Philipp Hornby, G.C.B., for action of Lissa; and Vice-Admiral Sir Henry Keppel, G.C.B., K.H., for Bombardment of Bushire.

Monsieur Xavier Raymond states positively, in his recently published work entitled *Les Marines de la France et de l'Angleterre*, that the French possess a 30-pounder French firing elongated projectile of 45 kilogrammes (99 lbs.), and of a charge of 12 kilogrammes (26.47 lbs.), with which they have penetrated 1000 mètres (1083 yards) iron plates as strong as those pierced by Mr. Whitworth's shell at a shorter range.

A review of the French Imperial Guard took place on the race-course of the Bois de Boulogne, on the 31st of October. The Emperor commanded in person, the Prince Imperial, came on the ground in a carriage and four. Having mounted, the royal party rode along the line, followed by a brilliant staff and several foreign officers. The troops, amounting to about 20,000 men, were under the command of Marshal Regnaud de St. Jean d'Angely. The men merely marched past, and then retorted to their quarters.

At the annual meeting of the Western Cambridgeshire Agricultural Association, the Earl of Hardwicke responded to the toast of "The Army, Navy, and Volunteers," and said he trusted that, in his opinion, the artillery which was to be used at sea in future must be much the same as of old, and he limited to that which was perfectly manageable under various circumstances of position and weather in which ships were placed. Model guns of from twelve to twenty tons were useless unless they could be worked upon moveable platforms. He believed that the breech-loaders would prove valueless, and that they should again have to use muzzle-loaders.

In the whole history of war, there is scarcely a regiment of infantry which has not been engaged in actual warfare either in the Crimea, in Italy, China, or British India, so as to have earned for itself a soldier that has not a medal, and very shortly there will be added to these a medal for service in Mexico, the decision for which is already known. It will be of silver, and on one side will bear the effigy of Napoleon III, and on the other Expedition du Mexique. 1862-1863; exergue, Prise de Puebla. Below will be Puebla, Mexico. We believe it is intended that the Mexicans who shared in the campaign shall have this medal as well as the French soldiers.

Major Von Thielau, a certain German officer, has lately published a volume of "Reminiscences," the chief object of which is to defend the memory of the General Staff against the attacks made by Generals Bertzke, Bernhardi, Haussen, and other writers who have assailed it. The book closes with a review of the Austrian campaign of the autumn of 1859 and 1814. Much of it is merely a restatement of that which is already known, or a quotation from documents published by Prussian officers of rank; but there is, however, written by the Prussian Minister for Schwarzenberg to leave much value to the author's testimony in matters where his hero's reputation is impugned.

It appears that the rolling of the iron-plated French frigates was heavier than at first stated, and that the *Normandie* was quite seriously damaged. The vessel was docked once again for further trials. Admiral Penaud has hoisted his flag on board the iron-plated frigate *Invincible*, the frigate which carried the admiral-in-chief during the return from Cherbourg on the 27th September. The commissioners appointed by the Minister of Marine to witness the experiments have embarked on board the two ships of the line and the three frigates. The screw ships of the line *Tourville* and *Napoleon* are to serve as points of comparison with the iron-clads. The squadron will probably visit the Azores and Canaries.

A late number of the Paris *Constitutionnel* has a long article on the relative positions of the United States and Canada, and after touching on the probabilities of the former invading the latter, asserts that the French Canadians would oppose a stout resistance to existing Yankee encroachment. The same paper makes an announcement that a statue, presented by Prince Napoleon to the Canadians, will shortly be sent to that country, has just arrived in Quebec. The statue figured at the London Exhibition, and is intended to be placed on a monumentative monument erected on the Plains of Abraham, where Wolfe and Montcalm both fell. The statue, which is in the form of an obelisk, is destined to commemorate the great feat on the patriotic parties who contended for the possession of Canada; on one side it bears the name of the French, and on the other the name of the English general who fought the deciding battle.

Arrangements are making at Woolwich Arsenal for the manufacture of a new kind of naval and garrison 600-pounder muzzle-loading gun. It is believed that the projectile is to be elongated and hardened at the point, so as to penetrate the armor-plating of the present method of protecting ship-buildings; and to be effected at a considerable distance from the point of contact. It is also stated that it will be somewhat similar to the 160-pounder smooth-bore gun, which within the last few years experimented at Shoeburyness at the commencement of the past summer, and which was afterwards tried with success on board the gunnery ship *Excellent*, at Portsmouth. Tenders have been issued by the War Department for the contract supply of a large amount of pig iron, to be prepared for the manufacture of this new species of naval gun, 50 of which are ordered. The officials of the Ordnance department at Woolwich have received instructions to construct an equal number of carriages on a principle already approved by the Secretary of State for War.

The Armstrong and Whitworth guns are to have a competitive trial before the end of the year. Several of the latter have been forwarded for the purpose. The Armstrongs are three muzzle-loaders of about the feet in length, and three breech-loaders of about the same length as the old service guns, which they resemble in outward appearance: but all the guns differ in the internal purchase of having steel (toughened in oil) instead of cast iron tubes. The muzzle-loaders are rifled with three shunt grooves, and are intended to fire projectiles with copper studs: three in each of the three rows upon the shell—total nine, and two in each row on the shot—total six. The breech-loaders will fire hexagonal projectiles, similar to those now used in the British service. Mr. Whitworth sends one gun—a muzzle-loader, made apparently of block of solid steel, and is about seven feet long. The rifling is very deep, and the projectile is to leave no angle; a modification that is expected to get rid of the wear previously complained of. The time pitch of the rifling is apparently rather quicker than that of the Armstrong muzzle-loader, which is again sharper than that of the breech-loader.

The Iron-clad Fleet.—The launch on the 4th of October at the English Admiralty yard, Isle of Dogs. She is one of quite a new class of iron frigates now commencing, to be specially known as the *Warrior* and *Defence* and *Resistance* classes. Her length over all is 280 feet, her extreme breadth 56 feet, and her depth from the upper deck 26 feet. The lines are infinitely finer than the broad-bowed vessels like the *Minotaur*, but yet are not to be compared in fineness to the *Warrior*; while, on the other hand, her bows, without having a regular beak to be used as a ram, will have specially projecting beneath the water line to enable her, if she sees a chance of striking an enemy, to inflict a good deal of mischief. In length she will be about half the principle is the same as that of all the iron frigates—that is to say, the *Valiant*, within her armor of teak and iron, will have a complete skin of iron plates ribs and longitudinal girders. Like the new frigates, however, she is to be plated from stem to stern in armor, and the thickness of the plates is to be 4½ inch, with an additional plating of iron over her outer stern-post and rudder-head. About eighty feet from the bows is to be placed a kind of iron breakwater, which, extends from one side of the vessel to the other, and rises from the main-deck to the level of her bulwarks. This will be formed of two thicknesses of inch armor-plates, and lined with teak as with the broadside. On the main-deck it is closed, but on the upper is pierced with holes for musketry fire, and for placing an enemy, or when bearing down on one to strike with the ram. The *Valiant* has been about three years under construction, and two contractors have had her in hand.

The new armor-clad frigate *Lord Warden*, like the *Royal Oak*, will be constructed almost entirely of iron plating. The system of manufacture is that of Dudan and African timber is piled up on each side of the slip on which she is to be built. She will differ from the *Warrior* in that she will have no ram at the bow, inasmuch at her bow, as well as at her broadsides. She will carry her armament of bow guns *en flute*, and as from the construction of the vessel's plate, rendered the more necessary from the weight of that description of her armament, and the heavy strain which will arise from the concussion of firing those guns. A solid plated bow of the frigate will be carried up sufficiently high to form a tower for the purpose. The additional weight that these plates will be will necessitate an alteration in the form of the stem, and consequently it could consequently be taken of this to construct a projecting prow to form a ram, which besides giving her additional buoyancy, will at the same time serve the purpose of a ram. The prow will be furnished with a wedge-shaped, solid cast-steel beaver. The defects in some of the British iron and wooden-clad ships, whereby the ports too near the water-line, will be remedied in the *Lord Warden*, which will have her gun ports very considerably raised, while her armor-plating will be carried lower than is the case in the existing iron-plated ships. Not the least important feature in the *Lord Warden* will be the plating of her bilge-keels, so as to effect at a considerable distance from the point of contact. It is also stated that it will be somewhat similar to the 160-pounder smooth-bore gun, which within

The Turkish Police.—A correspondent of a local paper writing from Constantinople, says:—

"By-the-bye, some of the English ship-builders having said that they were building armed steamers of iron for the Ottoman Government, I learn that the Porte is desirous to have it known that all the vessels which are building in England are built by Napier of Glasgow, and by Penn of the Thames Iron Works," London. All auctions in the

contrary are totally false. The SULTAN'S Government will plead also a Confederate cruiser to enter its ports on any pretense whatever. Its principle is not to admit the armed vessels of any power which it does not recognize, or with which it has no relations of amity, especially if those belligerent vessels of those Powers with which it has treaty relations. In this the Turk—the "barbarous Turk"—offers a good lesson to civilized Europe. And yet he takes no counsel from Christian books or writings, is devoted to him, and grows out of the rights of bread and salt, of which all the people of the East entertain a high estimation."

From the London Engineer of October 23.

WHAT ARE THE RUSSIANS DOING?

THE RUSSIANS are preparing for war, and their preparations are upon the largest scale. They have men and money enough for any contest; they lack only the most effective agencies of modern warfare. These they will not long be excluded from. CAIL, an artillery manufacturer, inundates the imaginature of working out every practicable idea for offence and defence. Nothing comes of it. No one sees or nothing for pre-ident, and is untramm eled by red tape. When he has once decided upon his course he stops at nothing. At present, determined not to be outstripped in the Western nations, he is creating a fleet of iron-clads of most formidable character, and he is possessing himself of machinery of the most elegant and perfect kind, wherewith to produce further additions to his fleet. It is wise to be forearmed, but there is time enough to make the requisite preparations of Russia. There is no attack hammer in this country, and although much is talked of, there is no one at KRUPP'S, there is some doubt whether it is really as large as that now making at Newcastle. The latter will weigh, in all, 350 tons, but about 200 tons will be the limit. The hammer-head and hammer-bar is forging of 40 tons and will have a fall of 25 feet. The cross-head and hammer-bar will be 6ft 6in in diameter. Messrs. TANGYE, BOURNEMAN, and PARK, of Birmingham, have just completed a pair of hydraulic engines destined for a Government dock-yard at Petersburgh, and weighing 24 tons. These steam can exert a pressure of 1,000 tons, and can cut in two a bar of iron 18in square, or bolt of 24in in diameter, and it is hoped to gain increased strength. The nut is 16in in diameter, and each of the steel screws is 14in. long, 14in. thick, and 24 in. broad. Messrs. MARSHALL and HARRIS have made, and, we believe, are still making hydraulic presses for Russia, which are capable of lifting 1,000 tons 3 yards. These presses are of unusual size and power, as, indeed, is all the machinery for kindred purposes going out to Russia. We mention these facts as being characteristic only of the character of vast quantities of machinery which the Russians are ordering in various parts of the world.

There have been, also, lately made in Russia trials of guns and armor plates at St. Petersburgh. Instead of incurring the heavy expense of an establishment for manufacturing experimental guns, such as the Woolwich one, the Russians have ordered 9-in. cast steel guns of KRUPP, guns of which we have given a full description, and one of each sample in the rough. One of these guns, it is reported from St. Petersburgh, was tried last week, with 90 lb. of powder and 800 lb. shot and the Sheffield 9-in. gun, with 100 lb. charge, against a target of 43-in. plates, made by Messrs. CYRUS BROWN and Co., of Sheffield. Every shell, filled with sand and weighing 250 lb., passed through the 9-in. and one shell, of puddled steel, went through, and, the report says, at least 3 ft. beyond. The steel-armor shells, it is said, passed through the plate, although they were themselves destroyed. Eight clean holes, indeed, were punched through a portion of one plate, each 9in. in diameter and 3ft. 6in. wide, the plate not being even cracked between the holes. Two steel shells, charged with powder, bursted within the holes. The 9-in. steel gun, it is said, has been fired seventy times with 30 lb. of powder and 300 lb. shells, without exhibiting a flaw; and no less than fifty of these guns are now at delivery at the Sheffield steel works for the Russian Government. The CZAR, however, does not intend to be dependent upon foreign aid for his supplies of war. The great Newcastle hammer is to be employed in making a large supply of steel guns from Russian iron, and by Russians, on ARMSTRONG'S system, which is much the same as KRUPP'S.

We, for four years, have been blundering in the attempt to produce a few hardwrought steel guns. We have only one 68-pounder, cast-iron, smooth-bore, to show for our guns and our money. A very competent engineering critic predicted, from the first, that the cast-iron system would be failure. Wrought iron, we long ago pointed out, would never answer for the class of guns we require. Cast steel tubes are being employed, but yet the 103-in. guns are of little use except for a few experiments at Shoeburyness. Indeed, we have not settled plain as yet the very question whether it is to be a muzzle-loader or a breech-loader or a "shunt" whether the rifling is to be coarse or fine, deep or shallow, few or many. The choice of guns is, therefore, still a matter of uncertainty. There are leading principles which, one would suppose, are beyond dispute. We ought to know that steel of the right temper is better than wrought iron, and that although the principle of ringed structure with initial tension is very beautiful in theory, a single piece of metal is, where admissible, always preferable to a compound arrangement. We ought to know that, in naval actions, the fast and fine rifling which, when a gun is carefully laid, will give remarkable accuracy in shooting at fine mile ranges, is of no use in the case of guns which are only required a pith and depth of rifling which shall keep an elongated shot "end on," and fairly to its mark at a range of a mile or so. This is really all that is wanted, and a sharper pitch of rifling only strains the gun, while fine grooves only break down, strip the shot, and give trouble in numberless ways. Why have we not good naval guns? Why have so many millions been spent in the vain attempt to make a gun upon unsound mechanical principles? Why will not our Government, at last throw overboard the whole Armstrong fallum, and, if great steel guns cannot be made in England, order a few hundred from KRUPP. Let us for the present, at least, be content to BUY guns, and not waste for the best gun. It would appear that he has found it, and that he is possessing himself of a goodly number from the same pattern, and that his adversaries with this, he is undertaking the manufacture of guns of the same or greater size upon a like principle?

A CINCINNATI SPY.

THE following account of one of the spies of the Army of the Cumberland is extracted from the "Annals" of that army, written by one of its officers, and recently noticed in these columns:

For several months past the Army of the Cumberland has known a jovial, smiling, wide-awake personage (calling us of the "Great Army of the West") mingling with outside-dried and seasoned, nevertheless, by the name of M. E. JOYCE. He corresponds for different Northern papers, visits around among the troops, is always in good spirits, and, in a word, and is as fond of accompanying an expedition, sharing danger, and having a rough time, as "any other man."

One of our correspondents has dubbed him our little JOYCE, "our JOYCE," as we termed him. That he is useful as well as ornamental, his fellow-brass-wires put in pretty nearly the right place, let the following facts testify:

In November last, while prodding in the vicinity of Nashville, crossing the river occasionally, where we have now picked up, or, rather, pulled down, from his house by some rebel guerrillas or patrols. He was rather slim about, but he was not long in getting fat, and very fat he got. He got them—telling them all sorts of a story, and, as he states it, "letting on" beside like the d——s as a butternut citizen. Satisfied that he was "all right enough dinkum" for them, he was not retained long; and he hastily scrambled back to the city, highly delighted with his success.

Hark'ee, now, JOYCE; you are just my man," and Colonel TRUESDAIL. "You can go to Murfreesborough without any trouble—you can get through the lines. I will give you a good horse and outfit, and pay you three hundred dollars for the trip, if you are quick and smart."

The newspaper man's "pluck" was shown in an attentive period, as he pondered over the idea, and heard all about the "how to do it." The "how to do it" was to be: to ride boldly up to the rebel lines and claim to be the newspaper correspondent of the Cincinnati *Inquirer*—a man of conservative sentiments and of Southern birth. Once fairly conveyed to the war, was in the Union army as regular correspondent, had written something to offend General ROSECRANS, and the latter had ordered him outside of the lines. He was now determined to injure ROSECRANS and his crowd all he could. Having made JOYCE fully understand the feasibility, would take him into full company, and would pay well. JOYCE, therefore, prepared, and about the 25th of November last he sallied forth from the outposts of Nashville, in Dutchman, the leader of the Yankee fanatics and cowards at Nashville.

In this capacity he succeeded admirably. He was taken to Murfreesborough, and into the august presence of BRAGG. He told his tale with an air of injured innocence, and swore by all the gods of Olympus and Jerusalem that Dutchman, the leader of the Yankee fanatics and cowards at Nashville, etc. His statements were believed, and he was put on General BRAGG'S principal officers, who stated that he had recently seen an account in a Nashville or Louisville paper of a difficulty between General ROSECRANS and Dutchman, whom the Union commander had imprisoned and then banished from his army lines.

BRAGG was highly pleased at the incident. A tyrant in his own "dukedom," he was gratified to hear of the methods of ROSECRANS and his Abolition fanatics of the North, and, now that he was in the proper position, it should not be his fault if he did not "give them fits" in retaliation. *The same homely truths, pro bono publico.* His only fear was that he would not be able to send his productions to the *Inquirer*.

"NEVER MIND THAT, GENERAL BRAGG." I will see to that. My man JOHN MORGAN is squaretendent of the railroad-system in the Southwest, and will get your letters through in double-quick time."

Pleased with the conceit, BRAGG and JOYCE both smiled over a nice dinner, and, after a good cigar and cup of coffee, supper being announced, JOYCE was invited to the table, and, with the usual modesty and timidity of his associates, "put in his best licks" at the bacon and beans, coffee, and corn bread. BRAGG and his staff were there assembled, and the tale of JOYCE was again enfolded to admiring auditors. After supper, retiring to a warm corner, and with pen and paper he toiled for an hour, writing up one of the most scathing and libelous articles upon the Army of the Cumberland and its loved gentlemen, the horrors of war, the blessings of peace, and the ignorance and folly of Northern fanatics ever penned. The article was properly enveloped, addressed in style (for JOYCE is an elegant and rapid penman) to the editor of the Cincinnati *Enquirer*, and handed to an aide of General BRAGG'S to be forwarded by the MONDAY line; and thus ended the tale of our quondam correspondent. He strolled over the town in company with an water-officer or two, and a fair cigar. To his companions he expatiated largely upon Nashville army affairs and Northern fanaticism and cowardice.

Next day the man of the *Enquirer*, after breakfasting with some officers at BRAGG'S headquarters, set out to view the town, as per assurance of the officers that he was quite at liberty to do. The railroad depot, the store-houses, the machine shops, etc., were visited, in the absence of the unconcerned manner. Ere long, however, some military officer dressed up in a little "brief authority," accosted our explorer after it was, and demanded that he give an account of himself.

Matters began to look serious for JOYCE. The town was all astir, for this was but a few days before the battle of Stone River. He told his story to the marshal, and it was agreed that if he should go back at once to BRAGG'S headquarters and get a pass, or endorsement, it would be all right. JOYCE did so; and an actual pass was granted to him, over BRAGG'S own signature, and out of the town—which pass JOYCE showed to the marshal with considerable glee and, withal, a slight taste of impudent defiance.

After looking about the town, our correspondent took the train for a few miles to Murfreesborough, where he was two or three days, going as far as Atlanta, Ga., ascertained the position of affairs in the rebel rear, and returned to Murfreesborough. Again he visited the tent of the Adjutant-General BRAGG and his officials, and wrote lively and caustic philippics for the *Inquirer*, and out of BRAGG'S tent and discussed the war and his' matters. And, to cap the very climax of absurdity and impudence, our man mounted his "confederate" horse, and, his sallied forth with from the police stable at Nashville—and rode out to one or more of the guard division outposts with President JEFFERSON DAVIS, BRAGG, and his escort—DAVIS having fled on his Southern tour.

It was now time for JOYCE to be off, while his budget was full of news and the signs were favorable. Some officers invited him on the night of the review to go out with them to see some mules and have a night ride. The guards were at an out-of-the-way place; and the less said about these matters the better, says reports JOYCE. Arrived there, the party dismount, hitch their horses, and the mules become agreeable within doors. JOYCE watches his opportunity, pulls up the reins of his horse, and, ere he is missed, then loose in the darkness to prevent possible pursuit, stealthily mounts his own horse—or, more probably, the best one of the lot—and rides off for the lines. He is fortunate enough to elude the pickets, the night being very dark; and in the morning he make his way across to the Cumberland River, and thence to the Ohio.

His information was received with the liveliest satisfaction, and the letters of our correspondent upon BRAGG and the Cincinnati *Enquirer* was the talk of the day. Its importance can be estimated when we state that the Union Army advanced immediately upon BRAGG'S withdrawal from his return. His statements were corroborated by two other spies just in from Murfreesborough, and two days after his return the army was in line of battle from a strong position, previously and now a merchant of Murfreesborough, who has continued to furnish BRAGG with all the army information, but as to the *rôle* he had played, and the manner in which it was done.

NAPOLEONIC DOCUMENTS.

FEW people pass through the Rue de l'Université without remarking at No. 14 a large building which is guarded and is stationed. It was formerly the Hotel de Noailles-Mouchy, and is now one of the depositories connected with the War Office. On the evening of the 24th of February, 1848, a number of insurgents, imagining from the inscription *Dépôt de la Guerre* over the principal gate that gunpowder or deadly missiles were contained in it a number of families. The people endeavored to force an entrance, when General PAJOL, director of the dépôt, explained to the crowd the nature of the establishment, and the great importance of the documents contained in it to a number of families. The people understood the General and retired. The first and second floors are arranged downstairs relating to private individuals. One room is specially devoted to those referring to merchant and other seamen. The third floor from this is a book bound in green morocco leather, bearing the name, "NAPOLEON BONAPARTE." The first document which appears in it is a statement of the number of troops engaged in the usual form, next a copy of his baptismal registry in Latin, bearing the stamp with the inscription "Island of Corsica." On the backgrounds of the large pendulous signed "HORTENSE BEAUHARNAIS," countersigned by the judge-at-arms of the French nobility, "Count DE NARBONNE," and dated NAPOLEON, born the 15th August, 1769, is possessed of the nobility necessary for being admitted among the number of gentlemen pupils who are brought up at Her Majesty's and the Royal Military Colleges. Then follow in succession the various orders of service addressed to him in his character of officer and general. A great deal of this is copied from the Constitutive of Public Safety, on the 23d Vendemiaire of the Year V. By the commencement of the Consulate he became master of the army and navy, is of opinion that "General BONAPARTE may be authorized to pass on his demand to the service of Turkey." He was also appointed "Member of Science and Captain MARMONT." Some autograph letters of the young officer are to be found in his book. One of them addressed to the Minister of War, is in the Secretary and Engineer Department at the War Office, is in the following terms:—

"SIR—A stranger in Paris without any acquaintance, my only hope is in you. The friendship you express for me induces me to hope that you will not refuse me. I find that I am to be removed from my regiment to another, which affects me in the highest degree, . . . while there are some officers who are immediately under me who have not served so much as I have. I rely upon your kindness in the matter rests, I flatter myself that you will please to interest yourself for me. I am with the most profound respect, etc., etc. BUONAPARTE."

With respect, etc., your humble and very obedient servant.

"Lieutenant of Artillery, Regiment of La Fere.

"AUXONNE, June 3, 1791."

Another letter addressed to Messieurs the Administrators of Versailles, the 1st Sept., 1792, petitions in favor of that sister, MARIANNE BONAPARTE, of whom he is the guardian, and who is without an asylum in consequence of the suppression of the establishment of St. Louis, and who prays for the allowance of 20 sous a league to which she is entitled, as she had left Paris by the authority of Administrators of her birth. The depot of the War Department was created by LOUVOIS at the suggestion of LOUIS XIV., 200 years since. It was intended to preserve the documents relative to the

ancient wars in order to prepare for those which may arise, as well as all works requisite for the defence of the country. No establishment in Europe possesses so many letters, maps, and plans. None execute more important works or with so much precision. The historical archives commenced in the year 1639, have been conducted successively since that period with dispatches from Ministers and Generals relating to the campaigns of the French armies until 1793. They consist of 5,000 volumes. The documents received from 1793 to the present time fill 2,215 drawers; the Emperor's letters alone fill 300.—*Paris Gaiignani.*

ARMY GAZETTE.

CHANGES OF COMMANDERS.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE; WASHINGTON, Oct. 31, 1863.

General Orders No. 386.

By direction of the President, Major-General William T. Sherman is appointed to the command of the Department and Army of the Tennessee, to relieve Major-General Ambrose E. Burnside, who is assigned to the command of the 9th Army Corps.

By order of the Secretary of War.

E. D. TOWNSEND,
Assistant Adjutant-General.

PURSUIT OF GUERRILLAS.

CHATTANOOGA, TENN., Nov. 3, 1863.

Major-General H. W. Halleck, General-in-Chief, Washington:

Major-General Granger reports from Nashville that he sent a detachment of cavalry from that place, under Col. Shelby, to pursue Hawkins and other guerrillas. He overtook Hawkins near Finney Factory, and routed a portion of his command, killing 7 and capturing 4 armed, routed him south, and pursued him until the forces dispersed. The chief fled via 30 or 40 Alleds, and 60 prisoners. Curtis was slightly.

GEO. H. THOMAS, Major-General.

OFFICERS OF INVALID CORPS.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, WASHINGTON, Oct. 30, 1863.

Special Orders, No. 281.

The Provost Marshal-General having been authorized, September 4, 1863, to organize the companies of the Invalid Corps into regiments, the following assignments to the regiments of the 17th, under which no officer of the corps can receive a commission higher than that of captain, by direction of the President, of colonel and lieutenant-colonel are authorized from September 5, 1863:

By order of the Secretary of War.

E. D. TOWNSEND,
Assistant Adjutant-General.

MAJOR-GENERAL BUTLER.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE; WASHINGTON, October 31, 1863.

General Orders, No. 359.

I. By direction of the President of the United States, Major-General B. F. Butler, United States Volunteers, is appointed to the command of the 18th Army Corps, and all the troops serving in the State of North Carolina. Major-General J. G. Foster, on being relieved by General Butler, will report in person, by order, to the Adjutant-General of the Army.

II. Major-General John M. Palmer, U. S. Volunteers, is assigned to the command of the Fourteenth Army Corps.

By order of the Secretary of War.

E. D. TOWNSEND,
Assistant Adjutant-General.

FIGHT NEAR CHATTANOOGA.

CHATTANOOGA, Oct. 29, 1863.

Major-General H. W. Halleck, General-in-Chief:

In the fight of last night the enemy's enemy has not disturbed us. Hooker took as prisoners four officers and the hundred and three men, who explained nearly a thousand more. Of these, 3 were three hundred and fifty officers and men killed and wounded.

GEO. H. THOMAS, Major-General.

HONOR TO THE BRAVE.

DEPARTMENT OF THE SOUTH,
HEADQUARTERS, MORRIS ISLAND, S. C.,
FOLLY ISLAND, S. C., Oct 28, 1863.

General Orders No. 90

I. Medals of honor for valiant and meritorious conduct during the operations before Charleston, will be awarded by the Major-General Commanded to a number of the enlisted men of this command, not exceeding eighteen in all, by boards composed of officers of the several regiments, companies and detachments that have been in action or on duty in the harbor of Charleston.

Candidates for these honors will be nominated by company officers, and by their respective commanders. The names of the three highest on the recommendations of these Boards will be forwarded to the Department Commander, who will submit the same, with any the commander of the officers and men of the 10th and 24th corps is entitled to the highest praise.

GEO. H. THOMAS, Major-General.

FROM MAJOR-GENERAL THOMAS.

CHATTANOOGA, October 26—11.20 p. m.

Major-General H. W. Halleck, General-in-Chief:

Since the fight of the night of the 24th the enemy has not disturbed us. Hooker took as prisoners four officers and the hundred and three men, who explained nearly a thousand more. Of these, 3 were three hundred and fifty officers and men killed and wounded.

GEO. H. THOMAS, Major-General.

The following orders have been received at the Adjutant-General's office:

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, WASHINGTON, Oct. 30, 1863.

Special Orders, No. 281.

The Provost Marshal-General having been authorized, September 4, 1863, to organize the companies of the Invalid Corps into regiments, the following assignments to the regiments of the 17th, under which no officer of the corps can receive a commission higher than that of captain, by direction of the President, of colonel and lieutenant-colonel are authorized from September 5, 1863:

By order of the Secretary of War.

E. D. TOWNSEND,
Assistant Adjutant-General.

MAJOR-GENERAL BUTLER.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE; WASHINGTON, October 31

The frequent strifes at the different yards, and the no less frequent applications of workmen for increase of pay, having embarrassed the Government very much, the Secretary of the Navy of late has been forwarded instructions to the commanding officers of the Charlestown, Portsmouth, Brooklyn and Philadelphia Navy Yards, requesting them to appoint each a board of officers for the purpose of investigating the matter at the different ship-yards and workshops in the cities named, with the view to ascertain the wages paid by the Government and by private parties.

The Navy Department has purchased of the Virginia Steamship Company, for service in the Sounds, five splendid propellers, all steamers. They have been examined by the Admiralty Navy Yard, and formally turned over to the representatives of the Government. Some of them are now in commission. Volunteers to perform the service are rapidly at hand for the service, and workmen are already tunning them into the harbor. The names of the vessels are the Virginia, Seminole, Commodore Jones. They are built by J. D. & J. D. Van Dusen: are 200 feet long, 32 feet wide, and 11 feet deep, and are capable of the best class of vessels in the last manner.

The United States steamers *George Mangham* and *Ethan Allen*, employed in cruising among the British Islands, have been summarily seized by authorities in ports of Europe and Africa, in the last month. Their commander has been left without a vessel. Their officers and crews, in consequence with the United States Consul at Cadiz, have been landed in Simon's Bay by her, will endeavor to claim her as she did the *San Jacinto* at Martinique. Captain Semmes is of opinion that the *Tuscarora* is very much faster than the *Alabama*, and that if he should come in contact with her, he would be certain of a victory from her.

The U. S. iron-clad steamer *Winnebago* left St. Louis on the 20th October on a trial trip, under the command of Chief Engineer James W. King, U. S. N., and Superintendent of the works. On the trip she was operated on seventy-two consecutive hours, the engines making sixty-seven revolutions per minute, and the propeller 13 revolutions. With this speed of screw, the vessel rolled nine miles an hour in smooth water. Her draught was seven feet. The trial was perfect in her hands, and considerable anxiety was therefore manifested in the result. She is a gun-boat, carrying four guns, two Dahlgren and two rifled guns. The vessel is of 700 tons burthen, 65 feet wide and 7 feet deep. She has two turrets, one Ericsson and the other Eads. The first has two guns, the latter four guns. Ericsson's, among other things, has the peculiarity of the shell entered down to, and through the weight of the turret pulling the shell out of the bore of the vessel. The guns are loaded by means of a tube attached to the hold, and raised in the turret by steam power. They are worked out by steam power, and revolved on a pivot by steam. All the working apparatus, guns and all, is operated by one man (an engineer), no other person being required in the turret. The loading is accomplished by tackles below the turret, in the hold.

NAVY GAZETTE.

A FEDERTHEAN FEAT.

U. S. BARQUE W. G. ANDERSON,
OFF NEW ORLEANS, Oct. 14, 1863.

Hon. Gideon Welles, Secretary of the Navy:

SIR—I have the honor to report to the Department that James Cobar, boatman, one of the crew of this vessel, on the 10th inst., while the vessel was at anchor off the Balize, Mississippi River, left the vessel, returned to this ship, having effected his escape from the enemy's pickets, and reported to me that he had, on the 9th inst., made a journey of six hundred miles on foot, through the enemy's country, and had succeeded in getting to the Union lines at Brashear City.

Cobar was discharged from the vessel on the 10th inst. and left the vessel in accordance with his request.

Very respectfully, your obedient servant,

F. S. HILL, Lieut. Com.

DISMISSED BY NAVAL COURT-MARTIAL.

General Order No. 23.

At a Naval General Court-Martial, assembled at the Navy Yard, Philadelphia, and of which Commodore Levin M. Powell, U. S. Navy, was recently tried on the following charge, preferred against him by the Department:

Charges.—Misconduct of an ordinary nature subject to his orders.

Specification.—In this, that he, the said Commodore Powell, on board the ship Supply, one hundred and sixty-three, on board the U. S. steamer Wyandank, in the Gulf of Mexico, on or about the month of January, A. D. 1863, did, in the presence of the crew of said steamer, maltreated George T. Hughes, an officer of the said steamer, by striking him with his fist, and by striking him with his fist, striking him on the mouth with a loaded revolver, and otherwise assaulting the said petitioner, George T. Hughes.

Of which charge he was found guilty, and sentenced by the Court "To be dismissed from the service of the United States."

This sentence having been approved, Acting Volunteer Lieutenant F. W. Kittredge is accordingly dismissed from the service, and will from this date cease to be regarded as so officer of the United States Navy.

The Department trusts that this example will have a proper effect both on officers and men, and that the former, remembering that they are the law framed for the purpose of protecting seamen from a wanton or tyrannical exercise of authority, will be careful to avoid all violence, and giving seamen to understand that, while they find their officers liable to a strict accountability for the exercise of authority, they, in turn, will be expected to discharge their duty, and conform to the requirements of discipline, with readiness and cheerfulness.

GIDEON WELLES.

REGULAR NAVAL SERVICE.

ORDERS.

Captain John Rodgers, to command the *Dictator*.

Commander Stephen Decatur Trenchard, to command the *State of Georgia*.

Surgeon J. J. Abernethy, to the naval rendezvous at New York.

OBITUARY.

COLONEL CHARLES S. ELLET.

Colonel CHARLES S. ELLET, the commander of the infantry forces belonging to the Mississippi Marine Brigade, who whose death takes occasion in the battle Ellet, the 29th ult., was born in Philadelphia, Pa., about forty-five years ago. He was the son of Colonel ELLET, who died not long since from the effects of a severe fall. After receiving a liberal education at the best institutions of his native city, he studied civil engineering, but while a youth was called to sea, when the war broke out, preferred to follow the fortunes of his father, and became a lieutenant in the force of which his father was colonel and his uncle Brevet-Brigadier-General. After the death of the latter, in 1862, he assumed command of one of the vessels of the fleet, which, by his having been promoted to colonel, he to the fleet which vessel fortunate-coloncy. The uncle was named the Queen of the West—a fine, clean-gi-ned, and young Ellet's time became the colonel and commander of her fleet-footed vessel. The name she had made his headquarters on the Queen of the West—the name he himself had chosen for the vessel—and there with the vessel made sure very daring expeditions. He commenced in running the rebel batteries at Vicksburg, and was for some time engaged in cutting about Yazoo City. He was also engaged in the capture of Fort Pemberton, in March, he started upon an expedition to Yazoo City, and, after destroying the enemy's stores, returned the following afternoon. The Gen. Lovell Ellet's capture the rebel steamer Era No. 5, and after putting them, the force of Confederates, the Queen was driven by the pilot, who was a rebel, into such a position that she was fired into two days after and so injured that she fell into the rebel hands. Colonel Ellet encountered the rebel ram Arkansas, and came on a boat of cotton, which carried him down the stream almost to the Arkansas Post, where he was picked up.

When the Mississippi Marine Brigade was organized, under Colonel Ellet the colonel's uncle, the command of the infantry forces was given to him, consisting of the infantry forces attached to it, the number being about 1,000 men. Colonel Ellet was in command of the brigade was engaged in several most important expeditions, and rendered valuable assistance to the army. Among the duties of this station of many of the guerrilla bands that infested the country in the latter end of the year 1862. He was stationed at the town of Austin, thirty-five miles above Helena, and the centre of the guerrilla bands that infested the country. Here he was attacked by a force of rebels on the 5th of August, and after a severe engagement defeated them and drove them from the town, which was soon after occupied by a rebel force under Marmaduke.

During the operations of General GRANT at Vicksburg, Colonel ELLET was stationed at Helena, and rendered assistance in keeping open his communications. Since that time he has been on duty at Memphis, but the principal part of its duties were removed for the time. Colonel ELLET has been in command of the post, but his health somewhat shattered by the intimation of the rebel movements, has unfortunately prevented him he had been operating, retired to Illinois to recruit if possible, his health and strength. He returned to Memphis to be enrolled, and he died on October 29, at the house of his brother-in-law,

LOCIS BLESZER.

LOUIS BLESZER, late Quartermaster-Sergeant of U. S. Volunteers, who died at his residence in New Jersey on Saturday, October 24, was born in Wurtemburg, in the grand duchy of Hesse Darmstadt, during the year 1824. He was in his thirty-first year when he died. He was the son of a working jeweller, and, in his youth, was apprenticed to the business. On arriving at the age of twenty-one, instead of following his trade he joined the thirty-five hundred that enlisted to support Prince Otho, of Bavaria, in the occupation of the kingdom of Greece. From a private he became a sergeant, and when the Bavarian troops returned to be received a lieutenant's commission. While in this rank he returned home to Wurtemburg, where he married a Munich lady, and settled with the view of becoming professor of mechanics. Subsequently he changed his mind, and again engaged in jewelling business. He and returned to Wurtemburg, where he was married, and established himself in the wholesale trade. He was thus employed when the European convulsion broke out in 1848.

Lieutenant BLESZER was next appointed the commander of the National Guard at Worms, and took a very active part during the revolutionary struggle, joining the popular army at the head of a considerable force. The revolutionary movement being ultimately crushed, he retired into Switzerland, which country he was ordered to leave in September, 1849, and, embarking at Havre, he in due time landed at New York.

When the President called for volunteers he at once offered his services, and was promoted to the rank of Sergeant-Major and transferred to the Seventeenth New York on May 15, 1861. After being encamped for some time near Meridian Hill, the regiment was incorporated with others into a brigade, of which Colonel Lowell was appointed commander. The brigade was then attached to McDowell's army as a portion of General Miles' Fifth Division. During the battle of Bull Run, July 21, 1861, Colonel MILES' division was not actively engaged, having remained in reserve at Centreville. He was promoted Brigadier-general of volunteers, with a commission dating from August, 1861, and was soon after placed in command of a division. When the Army of the Potomac was organized into corps during the spring of 1862, the Sherman troops were formed into one division of three brigades, under the command of General BLESZER, and formed the Second Division of the Second Army Corps, under the late General Sumner. He was afterwards detached from the Army of the Potomac and sent to Harper's Ferry, where he remained in command for some time, having been raised to the permanent capacity, but as last became incorporated in the army advancing over the mountains into Western Virginia. General BLESZER participated in the battle of Cross Keys, June, 1862. He was shortly after relieved from the command of the division, and ordered to report to Boston. He was dismissed the service on March 31, 1863.

Including a Uniform Coat and the Instrument.

U. S. PENSIONS.

The undersigned, as General Subscription Agent, is authorized by the Secretary of the Interior to continue the sale of his popular Loan, and TEN DAYS public notice will be given of the withdrawal.

About two hundred millions remain unsold, and his amount is not expected to last more than ten days, the discussion of the National Banking Associations offering a more profitable investment. Subscribers to the above must enquire before this loan is wholly withdrawn, as no subscriptions will be received subsequently—hence

As it is well known that the Secretary of the Treasury has ample subsidiary resources in the multitude on imports, internal revenues, and in the issue of interest-bearing notes, to meet the expenses, it is simply certain that it will not be necessary for him, for a long time to come, to call for the remainder of the Loans, the interest and principal of which are payable in Gold.

These considerations must lead to the prompt conclusion, that the time to buy is immediately, before "Five-Twenties" will act as a handsome premium, as was the case with the "Seven-Thirties" Loan, when it was all sold, and could no longer be subscribed for at par.

This is a

SIX PER CENT. LOAN.

the interest and principal being payable in coin, thus yielding about **EIGHT PER CENT.** per annum, at present greenbacks gold.

It is called "Five-Twenty," from the fact that whilst the Bonds may run for twenty years, yet the Government has the right to pay them off at par, after five years, at any time after five years.

The interest is paid half yearly, on the first days of November and May.

Subscribers can have Coupon Bonds, which are payable to bearer, and issued for $50, $100, $500, and $1,000, or Registered Bonds of similar denominations, and also $5,000 and $10,000.

The Coupon Bonds can always be taxed by States, cities, towns, or counties, and the Government tax on them is two per cent. per annum. The tax on Registered Bonds, when the income exceeds six hundred dollars per annum, is three per cent. per annum.

Subscriptions, either for Coupon Bonds, which are payable to bearer, and issued for $50, $100, $500, and $1,000, or Registered Bonds of similar denominations, and also $5,000 and $10,000.

The $50 Bonds will generally

THE MILITARY SITUATION.

THE foremost military event of the week is the advance of the Army of the Potomac, by which Gen. MEADE has transferred his front of operations from the line of Cedar Run to the line of the Rappahannock. The advance began early on the morning of Saturday, 7th. The Sixth Corps moved from Warrenton to Rappahannock Station. The Second, Third, and Fifth Corps marched by Warrenton Junction along the line of railway by way of Bealton, where the First Corps brought up with the extreme left. Previous cavalry reconnoissances had shown that the enemy occupied the forts at Rappahannock Station, and were also in force to the South of Kelly's Ford. From Bealton the Fifth Corps continued in direct line of march to form a junction with the Sixth at Rappahannock Station. The Second and Third deployed for Kelly's Ford. At this point the Third was in advance, and as they neared the Ford they threw out strong lines of skirmishers and sharpshooters. Batteries were planted on the range of hills rising abruptly along the North side of the river, and sweeping the extensive plateau on the South side. Under cover of their fire the pontoons were successfully laid, and the attacking party, consisting of BERDAN'S Sharpshooters, the Fortieth New York, the First and Twentieth Indiana, the Third and Fifth Michigan, and the One Hundred and Tenth Pennsylvanis, rapidly crossed the bridge. Having gained the opposite bank, the rifle pits were charged, and the rebels, finding themselves surrounded on all sides, surrendered. The captures at this point were found to include over one hundred prisoners; General FRENCH'S loss was about seventy.

While the Third Corps was thus passing the Rappahannock at Kelly's Ford, the Sixth was effecting the crossing under more formidable difficulties at Rappahannock Station. On the North side the defences consist of a strong fort, two redoubts, and several rifle pits. These works were held by nearly two thousand men belonging to EARLY'S division of EWELL'S corps. Commanding positions to the rear of the fort having been obtained, heavy batteries were planted thereon, and a fierce cannonade opened between the two sides. Just before dark, the storming party, consisting of RUSSELL'S and UPTON'S brigades, was formed, and the works carried by a very brilliant *coup de main*. Over fifteen hundred prisoners, four guns, and eight battle-flags were taken. General SEDGWICK'S loss was about three hundred killed and wounded.

The Third Corps, after the successful crossing at Kelly's Ford, camped for the night on the South side of the Rappahannock, and on the following morning (Sunday 8th) resumed the advance, followed by the Second and First Corps in order. About noon they came upon a strong force of cavalry and light artillery, two miles east of Brandy Station, engaging and pursuing them to a point two miles beyond that place, the fighting continuing till after dark. Meanwhile, the other corps (the Fifth and Sixth) were scouring the country up the river and towards Stevensburgh. The rebels had all retreated but a few hours before. Camps were found prepared for winter quarters, with log-huts, etc. Prisoners stated that it had been the full expectation of the Confederates to winter in this region. General LEE's headquarters had been a mile North of Brandy Station. The larger portion of both corps of the rebel army (EWELL's and HILL's) had been *en echelon* nearly parallel to the Rappahannock, the right resting below Kelly's Ford, and the left near Rixerville, on the Aesthanis river.

The sum total of the movement thus far has been to transfer the line of the rebels from the south side of the Rappahannock to the south side of the Rapidan; and of the Army of the Potomac from the line of Cedar Run to the line of the Upper Rappahannock. Here General MEADE has for the present taken up his position, which has been further strengthened by breastworks. The railroad is now completed to Bealton, and will be hurried on to Rappahannock Station as fast as possible. It is not probable that the Army will move from its present position until the road is repaired to the river. The rebels had entirely destroyed the railroad for a distance of twenty-three miles north of the Rappahannock. Seventeen miles have been relaid, and the remainder, it is expected, will be completed in a week; but so rapid was their flight south of the Rappahannock that not a rail had been disturbed, and they had just finished a new platform and other station buildings at Brandy Station, now in our possession. In the meanwhile reconnoissances have been sent out to feel definitely the enemy's position. On Tuesday General BUFORD passed through Culpeper and reconnoitered the rebel position on the Rapidan. Another cavalry reconnoissance was pushed out as far as Falmouth. The enemy has merely a small *corps de place* at Fredericksburgh.

From Southwestern Virginia we have the tidings of a brilliant cavalry exploit. Generals AVERILL and DUFFIE, commanding separate forces, after several engagements, on Friday (6th) and Saturday (7th) moved from Clarksville, Va., and succeeded in driving the enemy, under "MEDWALL JACKSON," for several miles down the valley, into and through Lewisburgh. On Saturday the commands combined and totally routed the enemy, capturing guns, colors, supplies, etc.

The situation at General GRANT'S central position, Chattanooga, has remained unchanged; but both the forces forming his flanks, the corps of SHERMAN on the right and BURNSIDE on the left, have been in motion—SHERMAN moving forward with the view of effecting a junction with the main body, and BURNSIDE drawing in from the advance of the rebel column into East Tennessee. Two of General BURNSIDE'S most eastern outposts in Tennessee have been attacked by the rebels, and half of the garrisons, consisting of two regiments and a battery, captured. The point at which this disaster occurred is at Rodgersville (sixty miles from Knoxville), the terminus of the branch of the East Tennessee and Virginia Railroad. No further developments of the enemy's intentions against East Tennessee have been made, but the situation there is still critical.

From Chattanooga we learn that an expedition of the 143d New York and 23d Wisconsin Regiments, of General SCHURZ' division (11th Corps), went up a branch railroad from Shell Mound to Gordon's Coal Mines, and recaptured a locomotive and two freight cars which the rebels thought they had secreted there. In order to get the cars down it became necessary to build a bridge, 123 feet long and 100 feet high, on the line of the railroad, which was completed in three days. By this means the railroad on the south side of the Tennessee has been again opened to Running Waters, and transportation gained for supplies. In the meantime, thanks to the river, General GRANT has easy communication with Bridgeport, and the force at Chattanooga lacks for nothing.

Of rebel purposes and movements in front of Chattanooga we have nothing but rumors. One report has it that they are evacuating the position in front of Chattanooga, and retiring to Rome or Atlanta. LONGSTREET, also, is said to be organizing a large force for a raid on GRANT'S communications at Bridgeport.

The rebels have been so far successful in annoying and retarding the eastward movement of SHERMAN'S column to effect a junction with GRANT, that it has been compelled to make a retrograde movement, evacuate Tuscumbia and fall back westward to Evansport, when the whole force crossed the Tennessee river to the north side, and the eastwardly movement continued on the new line. At last accounts the advance had got beyond Florence, and has probably by this time effected a junction with the right wing of the Army of the Cumberland at Stevenson. The design in bringing General SHERMAN'S column along the south bank of the Tennessee was, that he might open the Memphis and Charleston railroad from Bear Creek as far east as Decatur, and as much further towards Huntsville as possible, under intimations from the War Department that this would be the main channel of communication with Chattanooga. Work was accordingly immediately commenced, and by the 1st of November the road had been opened from Corinth, through Iuka and across Bear Creek to Cherokee Station, Ala. As soon, however, as this intention was apparent to the rebels, a swarm of their cavalry settled on the railroad, harassing the advance and destroying everything destructible. After enduring this annoyance for some time, the programme was changed; General SHERMAN abandoning the attempt to open and guard the railroad line and crossing to the north side of the Tennessee, where his march cannot be interrupted. Latest accounts report that the rebels have burned the bridge at Cherokee Station, and on SHERMAN'S evacuation, served the town of Iuka in the same manner.

At Charleston the bombardment is still continued, but Fort Sumter has not yet surrendered.

SURGEON-General HAMMOND has returned from his extended Southern tour of inspection.

GENERAL TAYLOR, Commissary General of the United States Army, has been relieved from duty and ordered to Chattanooga. Colonel SHIRAS succeeds General TAYLOR at the head of the department at Washington.

A BOARD for the examination of candidates to fill vacancies in the rank of second lieutenant in the Ordnance Corps of the Regular Army is now in session at the Ordnance Office in Washington. All officers of the Army, whether regulars or volunteers, are eligible, provided they pass the requisite examination.

THE Governor-General of Canada has given notice through Lord LYONS to the Secretary of State of rebel plots hatched in the British provinces to deliver the prisoners on Johnson's Island, in Lake Erie, and harn Buffalo and Ogdensburg. Adequate measures to defeat the enterprises have been promptly adopted, and Major-General DIX has been ordered to Buffalo to adopt measures for the security of the frontier.

MILITARY EDUCATION.

THAT there should be some systematic training for the exercise of every calling in life, would seem to be the universal opinion among men. There is no occupation, however low a degree of intelligence it may seem to demand for its exercise, and no profession which offers a career of great success, except to those gifted by Nature with the highest powers of mind, to which some apprenticeship has not to be served. With us, however, there seems to exist two exceptions to this general assent of mankind, and these, curiously enough, in those professions which all agree can only be well filled by men of the most superior intellectual attainments, and force of character. These two are Statesmanship and Generalship. Why this is so with us is easily explained. The exercise of both is dependent on the popular will, and our whole system of government, and the habits of our people, are such that no one but all may pretend to, and every one who by sky art or influence can sway popular bodies may hope to attain.

Hence a training for the military profession has always met with more or less opposition among us, from men having some temporary influence with popular masses; and the National Military School has been the object of numberless speeches, resolutions and reports adverse to its existence, in Congress, in State Legislatures, Militia Conventions, and elsewhere. Few questions of a public interest have been more thoroughly investigated than this. It has occupied the attention of the leading men of the country, from WASHINGTON down to the present; and from all of them, including WASHINGTON, JACKSON, and SCOTT—men who themselves had not had the opportunities for becoming acquainted with the elements of their science and art which we desire to form the education of an officer in the military schools of Europe—there is but one testimony, and that in favor of fostering such establishments among ourselves, for supplying the Army with thoroughly educated officers, and to diffuse through our militia military knowledge in the persons of the graduates of such establishments, who retire into private life and become a part of this body.

A slight glance at the military educational establishments of European States will show the importance which these countries attach to long standing armies attach to this subject, and the care which they bestow upon their organization.

France, the leading military power of Europe, was also for a long period the best organized for military education. The Polytechnic School, organized on a military basis, is chiefly a school for the sciences, and from its graduates all her public bodies connected with the industrial or the scientific military corps are supplied with persons thoroughly trained to enter upon the special studies required for the officers' exercise of these branches. From this school are also recruited, by yearly additions to their numbers, the Corps of Civil Engineers, the Corps of Artillery and Military Engineers, the Corps of Naval Architects, some portions of the Staff Corps, and some minor branches of the public service. From one of these schools has its special training for the application of the sciences acquired at the Polytechnic to the specialities belonging to that corps. Besides these, there is the military school of St. Cyr, numbering from five hundred to a thousand pupils, which supplies the infantry, cavalry, and staff corps, with thoroughly trained subjects; those for the staff and cavalry going through the special schools of each of these corps, before going on duty in the corps to which they are assigned.

Thorough as is the organization of the French schools, those of Austria seem to have advanced, in some respects, beyond them, in a more perfect and detailed system. In the French service, one-third of the vacancies among the commissioned officers are filled from the rank and file. These are promoted, however, with very little regard to merit, in the line corps. The staff and other scientific corps are recruited exclusively from the Polytechnic, and the military school of St. Cyr. To provide, however, for the instruction of the non-commissioned officers and the best of the privates, the French have their schools of regiments, where an instruction sufficient to prepare the soldier for the performance of the duties of a subaltern, is provided. But these schools have no connection with the higher schools, except that a private or non-commissioned officer is allowed to enter the Polytechnic School, if found qualified for it, at a more advanced age than others.

The events and disasters of the Hungarian war aroused the Austrian government to the defects of its military system, and its efforts have been unremitting since to place them in complete order. Among the means adopted has been a series of *connected* military schools, where a training for military life is given, from the ages of eight years, upwards, and in which provision is made for intellect of every capacity; the highest finding their places in the schools for the staff and the scientific corps; the lowest in companions of the line as non-commissioned officers or privates.

These schools consist, first of schools for boys, from the ages of eight to eleven, where they remain four years. These are termed the Lower Houses of Education, and contain 1,200 pupils: second, of schools termed the Upper Houses of Education, for boys from the ages of twelve to fifteen. These schools are supplied partly from the Lower Houses and partly from what are termed the Cadet Institutions, which are training schools for officers. The best pupils of the Lower House are sent to the Cadet Institutions, the rest to the Upper Houses, which also receive the worst, from the ages of twelve to fourteen, from the Cadet Institutions. The total number of pupils in these Houses is 2,400, and they remain in them four years, from twelve to sixteen. Third, of company schools. There are eight of these schools, termed Infantry, Cavalry, Pioneer, Artillery, Engineer, Pioneer, Flotilla and Marine Schools. All of these schools except the Marine, are supplied with the pupils of ordinary capacity who have passed through the Upper Houses. The Marine School is supplied with pupils of ordinary capacity who have passed two years only in the Upper Houses. The pupils of the Cadet Institutions who at the end of their term are found incapable, are sent into the Infantry and Cavalry Company Schools. Fourth, of five training schools for officers, which consist of the Cadet Institutions, the Weiner Neustadt Academy for cavalry and infantry, the Artillery Academy, the Engineer's Academy, and the Marine or Naval Academy. The Cadet Institutions contain 800 pupils; these, after four years' sojourn, if found capable, are sent to the three first named academies; the Naval Academy is supplied with pupils who have passed a five years' course standing. Fifth, of Special Schools for officers from the Academies. These are the Military Teachers' Institution, to provide teachers for the Company Schools, and which numbers sixty pupils; the Special School of Artillery and Engineering; and the Staff School.

Such is a summary of the means provided for military education by the two oldest, most powerful, and most civilized powers of Europe. In both of them one striking feature is noticeable in all their institutions, from the beginning to the end; and that is *regard for merit, irrespective as to high a standard of requirement as the age of the pupils will warrant.* In this way every man gets his deserts; and no man gains a position until he shows that he has both capacity and acquirements equal to the demands of the position itself.

Of the European Powers, Prussia is most deficient in her military schools. Like Austria, after the Hungarian, she, after the Crimean campaign, was aroused to the inefficiency of her military system. A commission sent by her to the Continent in 1855-56 collected a large amount of statistics on military education, which have been published, and upon which her military schools have since been reorganized; the same leading feature, *competitive examinations*, underlying, as a foundation, the structure she has raised.

As it is not the object of this article to give a history of military education, but to point attention to the great importance that the first military powers of the world seem to attach to it, by the means they have adopted to promote it, further details on this point are not considered necessary. Our own country has suffered from the want of military power on a gigantic scale. In looking at the condition of the world around us, whatever may be our desires, whatever our apprehensions of large standing armies, we cannot conceal from ourselves that, probably, for all future time, a much larger military establishment than we have ever contemplated must be maintained by us. This is a fixed fact. Of all political plagues, of all dangerous institutions, the greatest and worst is a standing army officered by ignorant and incompetent persons. Formidable alone to the unarmed population, it overawes and controls it, only to become, in some unprincipled leader, to rivet the shackles of slavery on every other class. Such is the teaching of history, as we see it in the Pretorian Cohorts, the Janizaries, the Strelitzes and other like military mercenaries. There is but one remedy against the evil, and that is the one which we have in view, to secure leaders of the highest intelligence by enacting a high standard of acquirement as a qualification for military office. This is also the only way to maintain efficiency in the Army, without which it is only an institution of danger to the country, being ever a foe in the bosom of rest.

It would take more time and more space than can be given in a weekly paper to go into full details of what ought to be done to promote military education with us. To do all that should be done in this direction it would be best to adopt the European system in a series of make-shifts. Our social condition has made us so, and we are as yet too young to change our acquired habits. We have now one military school; if we can only make shift with this, and turn it to the account we possibly can, it will be a great boon to us. Reduced at the outset of the rebellion to the number of cadets allowed the Free States, the PRESIDENT, upon the suggestion of the Secretary of War and the General-in-Chief, has lately authorized appointments to be made to supply the vacancies which have existed for the past two years. To do this, some forty young men have been selected, by examination, from the Volunteer force, and, with others, sent to the Military Academy. This may be truly said to be a move in the right direction in the mode of appointment, and will favor a more thorough system to be hoped, in the mode of selection of candidates for the Academy.

Hitherto, cadet appointments have been virtually made by favor alone. The qualifications of the individual appointed, whatever his recommendations, have never been inquired into. A member of the House of Representatives nominates, and the PRESIDENT appoints, without demur, the individual to fill the vacancy from the Congressional district open. It could subserve no good end to expose the abuses of this mode of appointment. They must be patent to all. One glaring consequence, however, cannot be concealed, and that is, of the whole number of persons appointed as cadets, not more than *one-fifth* are ever graduated. Of the graduated no inconsiderable portion are men of quite ordinary mental capacity. This last may be said with equal truth of every profession in life; but if *preventives* can be adopted, why not use them in this case at least? It is thought that there is one, and that a single and efficacious one. And that is, selection by *competitive examination* of future cadets.

That this can be done here, the fact that it is the mode in Europe, and has even been adopted in England, where army appointments were so long regarded as belonging to the highest bidder, is sufficient answer. That it ought to be done here, justice to the country that requires the best talent for the public service; justice to the people, all of whom have equal claims to such appointments; justice to the Army, from which the Nation draws its officers in time of war; justice to the very groundwork of all our political institutions, *focus to none*; and justice to our representatives themselves, who by the use of their privilege often lay themselves open to the charge of favoritism, and, sometimes, even worse insinuations, all seem to be self-evident. That it can be done, when once only the National Legislature shall decree it, may be readily shown. Until this preliminary action is taken, every college and officer, who takes a pride in and values his profession, should urge it upon all who may have any influence in bringing about so desirable a result.

Will not these members of the House who have so honorably and well given their services to the country, look to and promote the interests of their young fellow-soldiers, take this opportunity to serve them, and through them the Army and country? Let us hope they will.

LORD CLYDE.—At a meeting in Glasgow, held with a view to provide for the erection of a monument to the late Field Marshal Lord CLYDE, Sir ARCHIBALD ALISON, in the course of a long address, said:—

His mind was simplicity itself; he never harbored a thought which did not belong to the heroic character. Hear him after the sword had been given to his public duty. He was ambitious, but it was for his country, not himself. Like the Roman General whom TACITUS has immortalized, he "sought no honor to himself except the honor of his country, and he shunned praise the more was he deserving of glory." To the last he was the same man. He was unassuming, he was never ready to bestow praise on others, and desired only to conceal from observation his own great exploits. He was also superior to the meanness of all the little jealousies of ordinary, and the thirst for praise, the "last infirmity of noble minds." His modesty was such that it amounted to a fault. It often prevented him from receiving the honors which appear that he was indifferent to the gratitude of countries. He was indifferent to the object of public admiration in public assemblies, so often coveted by eminent men, was so painful to him that he would do anything to avoid it. After the sword had been presented to him by his daughter in 1856, he said to me, "I would rather have stunned the Indian. And when about to embark from India, on his return to Europe in 1860, the words he uttered in the most earnest terms that I would endeavor, if possible, to have his quarel the agency of any public reception in Glasgow. And he left India in the most private manner, fearing to death," he may well say that this was his ruling passion; for he left a deep impression on the minds of the natives of India, and any posthumous memoir he made of his actions, except in the simplest terms, and without eulogy of any kind. He was unassuming to the last. He was the soul of his soldiers, he was prodigal, but it was of his own his alone. He never would owe to favor what he could gain by skill, and his first point in every campaign was how to gain it with the least diplined with the least loss to his men. Profoundly versed in the science of war, he was also a great tactician, and the ordered and attained with a surprisingly small loss of life. But when the decisive moment arrived, and it was necessary to strike with an iron hand, no one could strike a heavier blow, and none ever preceded him in the field in delivering it. He rode with the foremost skirmishers in the attack on the Secundra Bagh, and when the gallant Commander-in-Chief in India resumed his old post of leader of the fortieth lope on the assault of the Shah Nujeef Mosque at Lucknow, he was found at the head of his soldiers, as he always was of his soldiers, or exceeded him in the eloquence with which it commanded change to animated their courage. He was for generous to be wealthy—too independent to be carry your persons. The rank which he attained—the Peerage, the Field Marshal's baton—were given to him by his gallantry, and the fortune which he left was the reward of his public services, not earned by his private exertions. What he gave to his country he gave freely, and he has made a handsome competence for an ordinary man. In a word, he was, to use the language of the Roman orator, "a man of ancient virtue in all the duties of life most admirable."

MAJOR N. H. MCLEAN.—We take the following from the Washington correspondence of the New York *Times*:—

The army, and the country at large, will be astonished to learn of the resignation of the War Department. Dies but out of a cloud, upon Major N. H. MCLEAN, the nephew of the late Justice MCLEAN, of the United States Supreme Court. Major MCLEAN was serving as the Chief of General BURNSIDE'S Staff in Cincinnati, and as that General's com-

ciller and indispensable right-hand man. He was the Assistant Adjutant-General of the Department of the Ohio. In the Peninsular campaign he was Chief of General McCLELLAN's Staff in reality. He is as thoroughly loyal as any man in America. Superabundant proof of this can be brought. Before the war he declined an important and lucrative appointment tendered him by the State of Virginia, expressly for the reason that the culminating slavery excitement threatened to embroil the State with the Federal Government, and that he never would bear arms against his country, or get into a position where he would seem to be arrayed in arms against it. He is a man of the purest of unembellished patriotism, and undoubted patriot, to be selected by one EDGAR CONDELKO, of Cincinnati, as the object of an infamous and villainous attack upon the fair fame of the public good, and the opportunity for a personal display of zeal of the most unquestioned description. He actually published Major MCLEAN in a newspaper as an official if not thoroughly loyal, basing the impudent and outrageous charge upon the allegation that he had declined and would not fire the Union candidates at the recent Ohio election! The Major answered this strange attack by showing that he was not a citizen of Ohio, and, therefore, not liable to vote there at that State. Unabashed by this reply, which should have been stunning, CONDELKO assailed Major MCLEAN again in the newspapers, and, incorrigibly fanatical in his fancy that the officer was disloyal, devoted days to obtaining signatures to a petition addressed to Governor TODD, setting forth charges that McLEAN was notoriously "secesh" in his sympathies, and demanding his removal from office. And with his treasonous industry he got a great many signatures to his petition—some of them of gentlemen who knew better than to sign it. The document was forwarded to the War Department at once. Immediately on the receipt thereof STANTON sent an order to Cincinnati relieving Major MCLEAN, and directing him to report in person, and without delay to some volunteer Brigadier-General at Fort Vancouver, Washington Territory!

CORRESPONDENCE.

THE BATTLE OF CHICKAMAUGA.

To the Editor of the Army and Navy Journal:

SIR:—Now that the facts of the battle of Chickamauga Creek are all before the public, I think it will be just for me to draw some comparisons between it and Bull Run, and to state the position of CHITTENDEN with THOMAS on the 14th, and in a failure in the rebel plan; not to any adequate provision for such a contingency by the Federal Commander. Judge McDOOL effected his junction successfully, it was as probably due to his own correct judgement in reversing the mountain to Wartha Bridge, as to any orders from me. I left to him the concentration of the army, instead of attempting to come down on the road with my staff.

The movement of the army from the Tennessee river, seems to have proceeded upon the supposition that the enemy was already in full retreat, and pursuit was the order, without a suspicion that he was only retiring to meet his reinforcements, as proved to be the case. It was a matter of course at that time, to find Commanders under the influence of panic, and the neglect to destroy bridges or obstruct roads, indicated the enemy's confidence in his ability to repossess the country quickly.

When the battle commenced on Saturday, the 19th, there was probably a majority of numbers on the two armies. But one of LONGSTREET's divisions (HOOD's) was absent, and not three brigades of that. Statements of prisoners, and previous information of the rebel organizations, give to five more than thirty-four brigades; and this, at the fair allowance of 1,000 to a brigade, would make the rebel strength between 30,000 and 35,000, exclusive of cavalry. General ROSECRANS had very nearly the same number of men in his Army. This will be remembered in the estimate for the Saturday's battle; the enemy had reinforcements for the march, including the Georgia militia, some part of LONGSTREET's corps, and probably a division of BUCKNER's army. Sunday's fight ROSECRANS got into the fight only the two brigades of STARKWEATHER's division in addition to what he had on Saturday. Probably it was the enemy's purpose to attack rather than the assertion of "overwhelming numbers," for an explanation of the disaster to the Union army. At all events, it is certain that the rebels had the fighting beside on Saturday, were able, with all the disadvantages of a divided line and a pursuit, and after the disastrous retreat of four divisions, with the loss of a number of artillery and ammunition, &c., to hold the battle-ground against the onset Sunday's fight.

it certainly appears strange to us that no attempt has ever been made in this country to defend the gun from the first strain of the exploding powder; which is, we believe, the real element of destruction, owing to its localization. Notwithstanding our knowledge of the peculiar and apparently paradoxical effects produced by the combustion of explosive compounds of every kind, scarcely any alteration has ever been made in the methods of loading a gun since the days of "Mons Meg." Cartridges of an invariable pattern are nearly always employed; the powder, placed in a more or less compact mass next to the charge, is ever cut off from its connection alike with the projectile and the walls of the gun. The expedience of a different arrangement, in this country, has never been called in question; yet some recent American experiments have given such remarkable results, as would seem to denote that even in this matter of great gun we may depend more or less on the management of the charge. We have already alluded to this experiment, and we deem it advisable to place the details once more before our readers. A 7-in. gun was loaded with a full charge of powder, made up in a cartridge only 6 in. in external diameter, and supported within the bore of the cannon in such a manner, that a clear space of half an inch remained between the circumference of the cartridge and the chase round; the shot was in immediate contact with the powder. The result of this arrangement was that, while the shot entered its full initial velocity, the first charge of the weapon, the strain on the gun was reduced nearly one-half. The terms of this experiment have been stated to us on authority which we have no reason to consider doubtful. The explanation of the phenomena is not, however, very easy; yet this is not the only one connected with gunpowder away; yet this is not the only one connected with gunpowder which is apparently paradoxical. General Piobert relates an experiment made in 1829 by General Pelletier, in which several pounds of powder were spread on a wooden table laid on soft earth. The combustion of the powder caused only a slight depression of the table; but when the experiment was changed by placing a sheet of paper over the powder, the table was shattered to atoms; and many experiments equally strange in their results are of every-day occurrence to those who have studied the subject even superficially.

The results obtained by Lynall Thomas, in the course of his investigations, seem to afford conclusive evidence, that the first and by far the most powerful action of fired gunpowder is central; the effect of which is to make an orifice resembling, more or less, those of a blow. The second effect is that of pressure, due to the gases evolved by the explosion, and by the heat. What the precise cause of this pervasive action is, no one, we believe, has as yet positively determined. But whatever the cause or the existence is admitted, we are placed in a position to understand in some degree, the *rationale* of the American experiment. The relation of air between the projectile and the surface of the chase evidently acted the part of a cushion, absorbing a great portion of the initial strain as is indeed compressible by means of transmitted force being unable to pass through it with sufficient velocity to affect the gun materially, and the partial effect of the heat of the powder. To the secondary strain the gun was fully exposed, as shown by the pressure plug. The projectile being submitted to the pervasive action of the powder, and to the impulsive force of the gases, of course, pursued its flight as usual. The action is sufficient to reach the range of a battery, but the muzzle of which becomes stopped with a little snow or earth. Its discharge, under such circumstances, generally causes it to burst, especially if the gun is of the rifle pattern; but because the compression of the air extends with such slowness, as compared with the rapidity of the combustion of the powder, that, while one end of the column moves, the barrel is compressed sufficiently to burst it, the other end is not confined enough to remove the obstruction. The gun barrel frequently swells under such circumstances, the obstacle being expelled before a bursting pressure is arrived at. Ramrod found that by placing the shot at the muzzle, as stated at the distance of 11 4-5th inches from the charge, its velocity was increased by 200 feet per second; and it has therefore been argued that the existence of a vacuum or compression through the column of air in the gun, has nothing to say to its explosion when an obstruction is placed in the muzzle. Yet it must be remembered that the recoil of the gun is always materially increased under such circumstances, as is shown by the entire force of the powder. But the effect on the projectile must be secondary, and in no way due to the pressure action of the powder—the force, of all others, most dangerous to a gun.

We do not wish to be understood as making any positive assertions on the subject. We prefer suggestion to dogmatism; and we feel certain that the question of the practicability of obtaining a gun from the initial action of the explosive alone, is one fraught with the deepest interest. A series of experiments carefully conducted with this end in view, are absolutely essential to the increase in our knowledge of the use of gunpowder, and will prove more useful than ever by our continued failures in the attempt to produce a weapon as well as great gun. But, whether the completion of gunpowder it, they remains no room to doubt that the operation is really divided into several stages, each of which is attended with a distinct effect on the gun and projectile. Did the strength of a gun depend on its power of resisting a steadily exerted pressure, there would be little or no difficulty in making it strong enough to resist a strain of perhaps 30 tons on the square inch. It is not in the mere pressure of the gases that the danger consists, but that the difficulty resides, but in its, to some extent, mysterious initial force. Whether this force can be absorbed by an elastic cushion, or otherwise, we do not know. It is highly probable that it can. We have no positive evidence to the contrary; and until we have, we will continue to believe in the practicability of the gun. It would not be deemed advisable to construct guns with a considerable enlargement at the breech, into which the powder cartridge, probably affixed to the rear end of the shot, would project; a clear space of an inch or so being left all round between it and the metal. Coiled guns have always proved deficient in longitudinal strength. An air-cushion between the powder and the breech might possibly aid in overcoming this objection. Many of the most powerful forces of nature have been made available for the service of man by careful management. We have encountered the power of gunpowder by sheer brute force for a long time without success; and it is manifest that we endeavored to elude that which we cannot conquer. *London Mechanics' Magazine.*

INFANTRY CLOTHING.

The great question "wherewithal shall we be clothed," excites as much interest in the army as anywhere else, and is quite as important to the soldier's well-being as to that of the Broadway dandy, even though it engross the latter's entire attention.

As the subject has become of fresh interest to the new levy, we offer them some of the fruits of experience in this matter. One reason why enlisting is no riskier, is found in extravagant notions of the discomforts of military life, apart from its dangers, many persons taking pains to represent Government as the great delinquent in this respect. And with so much cause for complaint against the Departments, it is well to remove odium in others, where it is undeserved.

Nothing, for example, has been more maligned than army *boots*, as Quartermaster parlance styles them. They equals in actual service can seldom be found for double their price. Yet the recruit is usually admonished by the domestic war-council to furnish, above all things, his own shoes. A stylish pair of "Balmorals," with quadruple soles and a complicated network of lacings, is about the ideal. The first long-coil will be likely to find a man struggling with a pair of shoe-string, to thread it through a dozen holes in a hurry. And such occasions, by the way, afford no time for elaborate toilets. You must have garments fit to "jump into" when divested at all. Besides the daily trouble of lacing, the long gaiter-strings will be found to be soon replaced. In the line respect, a buckled shoe is better, though the buckle may rust, or the tongue snap, and leave a worthless fastening, not easy to mend or supply.

The Balmorals, also, while very neat and snug, are apt to be a little narrow. If, by a kin's breadth, there is torture ahead. The superfluity, too, of that extra half-inch of soles will be very manifest, after a day's march of eight or ten hours. Expensive shoes, in short, are often thrown away unused, for the despised "government" substitute. These "substitute" "jackboots" as they are facetiously termed, are low-cut, stitched, very light, and very cheap. A higher shoe would better protect the ankles, but at a much increased cost, and without allowing the feet air or room enough for play. They are very neat, and, with the excellence of the cavalry and artillery overcoats, and the shabbiness of the infantry. Officers are often satisfied to draw and wear a private's cavalry overcoat, merely substituting the "I" button.

In addition to the material to the nine months men were the masterpiece of efforts in that direction—the flimsy fabric almost like tissue, the dyeing of the wretchedest. We have known trousers and dress-coats to be completely spoiled by the inky liquid which exuded from the overcoats in a rainstorm. Again, the colouring matter was often in a composition of moisture, that it was a camp jest that the coats were made for sleeping. And a certain nondescript liquid called indifferently tea or coffee as the cook might fancy, was commonly known as overcoat tea—one boiled coat producing a large barrel of tea. Such were the very tasks of the garments chanced the men. The more comfortably you cloths soldiers, the more neat and becoming their uniform, the better they will do duty. Make their dress a laughingstock, if you would have them lose self-respect, like a patched convict's dress. In the old days, when there was a mode of pardonable pride; furloughed men and discharged men, even, being glad to wear it in the streets.

There is a great difference in the clothing of different departments. East or West, of different corps and divisions, and even of companies and regiments, there is a varied together. There is often as wide a diversity between parts of the same outfit—the overcoat being good and the blanket poor, perhaps, or *vice versa*. Each regiment has a different experience, and that of many readers may differ from our own. In order to be fully informed, the full range of clothing cannot be lettered, but only that it is very good. In style is about half way between the looseness of the French, and the stiffness of the old English pattern. An American has a disbelieving shrug for those tall fellows whom he sees in still leathern stocks, tight coats, trowsers strapped under their shoes, with caps stuck on one side of the head and rattan in hand, parading the streets of Quebec. The French uniform, on the other hand, has hardly succeeded, except after many trials, in pleasing our people. Zouave habiliments have made a decided hit, and the *pantalon rouge* and *chasseurs à pied* have been disbursed for alleged meritorious services. But our troops have generally gone back to the old regulation model.

As to the present quality of the clothing, there is still shouting enough by contractors, but perhaps an improvement from the time when furnished shop-room clothes, cobweb blankets, and shoes soled with pine shingles, was the rule. The dailies now filled with outcries from the soldier, and complaints from his friends at home, against knavish

contractors of shoddy and pasteboard leather. The weeklies joined the pursuit by many satirical cuts. Whether it is that all the old cloths in the country have now been made up for the Army, or whatever the cause, the chase has been abandoned. Occasionally still a discovered swindler starts a hue and cry in the papers, but in the main the shoddy excitement is over.

Government has served its apprenticeship at tailoring, and knows now its customers' needs. It has learned to deal with contractors, its system of protection is better, its inspectors more experienced, bad goods less easily smuggled through, and outrageous swindles less frequent. The veteran, too, has learned how to take clothing. Much that he thought the richest was genuine stuff, only something new to the wearer—coarse and rough in style, but sound in substance. And in short, however it may have been formerly, the recruit no longer needs to supply himself at a hardly-spared expense with the equivalent of the regulation clothing, and especially he should know that such an equivalent can only be had at a much greater price. Two dollars for example, will buy the soldier an extra pair of serviceable shoes. French bootees or top boots may have some advantages over these, but the government could not undertake to equip a million of men on that scale.

Government clothing supplies then, have certain good qualities. They are just adapted to the soldier's needs, being the fruit of simple experience. They are furnished at a very low cost, as any inspection of the price list will show. They are made in a sufficiently neat and becoming style. Being transported with the army, the soldier can have them at the same rates in localities where otherwise he could not get them for months, or only from sutlers at exteriorate prices. The system is likewise a check upon the evils of dismay service. The value of the underwear surplus goes to his credit. Finally, if from any cause he wishes to overdraw his account, the extra amount may be charged against his wages, and payment is now called for in cash.

GENERAL BARRY'S ARTILLERY REPORT.

In our last week's issue we presented a survey of that portion of the combined report of the engineer and artillery operations of the Army of the Potomac which refers to the use of these Departments. We follow it up by a few notes on the artillery portion. General Barry's report covers the period from the organization of the artillery of the Army of the Potomac in July 1861, to September 1862—the time at which he closes his Chief.

When Major-General McClellan was appointed to the command of the "Division of the Potomac," July 25, 1861, a few days after the first battle of Bull Run, the whole artillery of his command consisted of no more than parts of nine batteries, or "thirty pieces of wretched, worn-out smooth-bores," unusual and unserviceable calibres." Most of these batteries were also of mixed calibres. On the re-organization and expansion of that force into the "Army of the Potomac," which followed the event just mentioned, it became necessary to organize the artillery service of the army, and to commence with an infantry force of 100,000 infantry; and taking into account the character and extent of the force to be employed, the probable field and nature of operations, and the utmost efficiency of the arm. This necessity led to the formation by General Barry of a plan for the organization of the artillery, which he submitted to General McClellan, which was approved by him, and which we state in his own words:—

1. That the proportion of the artillery should be in the ratio of at least two and a half guns to each 1,000 men to be expended, and up to three pieces to one thousand (3,000) men.

2. That the guns should be all calculated to one-third, and of smooth-bore two-thirds. That the rifled guns should be restricted to the system of the Ordnance Board (Parrott, Hotchkiss and Wiard) and the smooth-bore (with the exception of a few howitzers for special service) to the 12-pounder Napoleon gun, and the 10-pounder of 1857, variously called the "gun howitzer," the "light 12-pounder," or the "6-pounder."

3. That each field battery should if practicable, be composed of six guns, and not more than six guns, and that the guns in each gun and each battery should be of uniform calibre.

4. That the artillery of the army be so arranged as to "divisions," and not to brigades, and in the proportion of one to each division; of which one was to be held in reserve for the general purposes of the army. The capitals of the regular battery to be the commanders of the artillery of the divisions. In the volunteer artillery, the captain of each artillery corps, at least one-half of its divisional artillery was to consist of regular officers and men.

5. That the artillery of each division should consist of not less than one hundred (100) guns, and should comprise, besides a sufficient number of light divisional batteries, a battery of horse artillery, and, until the army was unmasked, all the heavy artillery.

6. That the artillery organization should comprise the field batteries was not to be less than 600 rounds per gun.

7. A force of 300 pieces. This was subsequently expanded for special service, at the siege of Yorktown, to very nearly one hundred pieces, and comprised the greatest part of the then permanent heavy weight of metal, of one 200-pounders, five 100-pounders, and ten 13-inch mortars.

8. That instruction in the theory and practice of gunnery, as well as in the tactics of the arm, should be given to the officers and noncommissioned officers of the volunteer batteries, by the study of suitable text-books, and by the establishment of schools of artillery under the direction of the regular officer commanding the divisional artillery.

9. That previous inspection, as required in the nature of circumstances, of would permit, should be made by me, to be assured of the strict observance of the established organization and drill, and of the special regulations and orders from time to time issued under the authority of the Commanding General; and to make the proprietary improvements of the officers and men of the volunteer batteries, and the actual fitness for service of the whole artillery of the command.

In the main, these propositions formed the basis of the organization of the artillery of the Army of the Potomac. Of course the enormous expansion of this arm of the service, taking far beyond their capacities the various arsenals and private foundries which had hitherto filled all the wants of the service, demanded a great development of the establishments for the creation of artillery and ordnance *materiel*. The facts laid before us in General Barry's Report furnish striking evidence of the marvellous rapidity and energy with which the immense artillery force of the Army of the Potomac was created. "We know in military history of but one parallel to it—and that was the case of Napoleon's use of his artillery force previous to the invasion of Russia. Both exploits were equally grand; but one was the work of an absolute autocrat; the other the result of the resources and energies of a free democracy. As has been before stated, the whole of the field artillery of the Division of the "Potomac," July 25, 1861, was comprised in nine imperfectly equipped batteries of thirty guns, 650 men and 460 horses. In March, 1862, when, after an interval of but seven months, the army took the field, it consisted of *ninety-two batteries and one hundred and ninety guns*, 12,000 men, and 10,000 horses, fully equipped, and in readiness for active field service! Of the whole force, thirty batteries belonged to the Regular and sixty-two to the Volunteer service. When the Army of the Potomac, on the 1st of April, 1862, embarked for Fortress Monroe, and the Virginia Peninsula, the whole field artillery, organized under General Barry's direction, had been disposed as follows:

	Bat.	Guns.
Detached for service in the Department of South Carolina.	1	6
Detached for service in the Department of North Carolina.	1	6
Detached for service in the Shenandoah Department (Banks).	4	24
Detached for service in the Mountain Department (Division of General Blenker).	3	18
1st Corps (Major-General McDowell).	10	60
4th Corps (Major-General Buckly).	10	60
Reserve of Artillery (Brigadier-General Barry).	3	18
	92	600
Embarked (March 18th to April 1st) for the Peninsula.	60	371
	32	229
	92	600

During the Peninsular campaign, the artillery force, from first to last, made a grand total of sixty batteries of 345 guns. It was during this campaign that our volunteer batteries received their first instruction in that great school of practice whose lessons have brought this arm of the service in the Potomac army to such splendid perfection. General Barry pays a just compliment to the docile and industrious spirit of the volunteer artillery officers at that period. "Many of the Volunteer batteries," he says, "evinced such zeal and intelligence, and availed themselves so industriously of the instruction of the Regular officers, their commanders, and of the example of the Regular batteries, their associates, that they made rapid progress, and finally attained a degree of proficiency highly creditable." General Barry, in a sub-report, gives a detailed diary of the artillery operations of the army from the time of the siege of Yorktown; and he states it as a matter of bitter professional disappointment to him that the enemy's premature and hasty abandonment of his line deprived the artillery of the Army of the Potomac of the opportunity of exhibiting the superior power of its arm of the service. The unusually heavy metal used in the siege, and of reaping the honor and just reward of their unceasing labors, day and night, for nearly a month. The siege train consisted of 101 pieces, as follows, namely:—

2	200-pounder Parrott rifled guns.	
11	10 " " "	
12	30 " " "	
2	4½ " " "	
15	4½-inch rifle siege-guns.	
10	" seacoast howitzers.	
10	10 " " "	
10	8 " siege-mortars.	
5	5 " "	
24	24 " howitzers.	

During the subsequent operations of the Peninsular campaign, the services of the artillery were very arduous, and as brilliant as they were arduous. On more than one occasion (at the battle of Malvern particularly) it confessedly saved the army from serious disaster. Of these important actions we regret to say that General Barry furnishes no report.

General Barry, like his confrère General Barnard of the Engineers, has a word to say of the deficiency of rank in the artillery service. "With the large force in this army of artillery, and the great number of volunteer officers, the general and field officers were: 1 brigadier-general, 4 colonels, 3 lieutenant-colonels and 3 majors—a number obviously insufficient, and which impaired to a great degree the efficiency of the arm, in consequence of the want of rank and official position of the commanders of corps and divisional artillery. "This faulty organization," justly remarks General Barry, "can only be suitably corrected by legislative action, and it is earnestly hoped that the attention of the proper authorities may be at an early day invited to it." We regret to say that though their "attention" has often since been "invited" to it, the evil remains to this day in almost equal force, and the gross injustice is seen of a body of officers, whose services are unequalled in their value and importance, suffering from the false organization of their arm. This radical defect has already lost us some of our finest artillery officers; and, if not corrected, it must, we fear, lose us a great many more.

DISQUALIFICATIONS FOR MILITARY SERVICE.

War Department,
Provost-Marshal-General's Office,
Washington, D. C., Oct. 8, 1863.

Circular No. 109.

Paragraph 88 of the Regulations for the Government of the Bureau of the Provost-Marshal-General of the United States is amended to read as follows:

88. The following diseases and infirmities are the ones which disqualify for military service, and for which the surgeon must rate to be "rejected on physically or mentally unfit for the service," viz.:

1. Manifest imbecility.

2. Insanity. This includes well established recent insanity, with liability to a recurrence.

3. Epilepsy. For this disability the statement of the drafted man is sufficient, and it must be established that he has been afflicted with convulsions of a physician in good standing, who has attended him in the disease. He must also be medically examined by a physician appointed by the Board.

4. Paralysis, general or of one limb, or chorea; their existence to be carefully ascertained. Decided atrophy or a limb.

5. Disease of the heart, which is to be known as the result of the heart sounds, or the error or opinion of the following or whatever, which have so seriously impaired the functions of the heart as to lead to habitual palpitation on the slightest exertion.

6. Confirmed consumption. Incipient consumption does not exempt. Nor does hemorrhage from the lungs unless recurrent.

7. Inveterate and extensive disease of the skin, such as will necessarily appear in military service or exposure.

8. Decided feebleness of constitution, or deficient size of chest, sufficient in degree to leave no doubt of the man's unfitness for military service.

9. Scrofula, or constitutional syphilis, which has so seriously impaired his general health as to leave no doubt of the man's incapacity for military service.

11. Habitual or confirmed intemperance, or military vice, which has so materially impaired the constitution as to leave no doubt of the man's incapacity for military service.

12. Chronic rheumatism, unless manifest it by positive change of structure, wasting of the affected limb, or sufficient distortion of the joints, more than slight, and frequent returns of pain and retention of the limbs stinged to arise from rheumatism, and in which the retention of the limb is also sufficiently frequent, are to be rated as disqualifying, while in a state of convalescence induced by other only.

10. Chronic disease of the kidneys, manifested in any of its forms, rheumatism, lumbago, or effects—as of the muscles, bones, or joints, in a degree sufficient to render the man unfit for military service. Also, when as a cause for exemption, injuries accompanied with a manifest derangement of the urinary organs, or the effects of such injuries, are to be rated as disqualifying.

13. Chronic diseases or diseases of the skin, occasioning impairment of the health, debility, emaciation, epilepsy, or other transient nervous or spasmodic symptoms.

14. Total loss of sight of both eyes; loss of sight of one eye; cataract of sight eye; loss of eyeball the best of sight eye.

15. Partial loss of sight of both eyes, when being an equally impaired as to leave no doubt of the man's inability to perform military duty. Any permanent disease of the eyes or eyelids, or any injury affecting the use of the eyes as to leave no doubt of the man's incapacity for military service. Nearsightedness to the extent of 2 inches, or 1 inch, if it be decided as an intermediate for field service, the man may be transferred to the Invalid Corps.

17. Total loss of sense; deformity of nose, so great as seriously to obstruct breathing, or to destroy the sense of smell.

18. Decided deafness. This disability must not be admitted on the mere statement of the drafted man. It must be established by the testimony of positive ill-ness, or by other satisfactory evidence; and it must be so decided as to render the person unfit for the duties of military service. Chronic purulent otorrhœa.

19. Incurable disease or infirmity of either jaw, such as will necessarily greatly impede mastication or speech. Anchylosis of the lower jaw, except of the temporo-maxillary articulation, is to be considered (prima facie) as a cause for exemption.

20. Deficiency of teeth, so great as to render mastication without great and contributory pay of.

21. Total loss of speech; hypertrophy, atrophy, mutilation, or obstinate chronic ulceration of the tongue, if sufficient in degree to interfere seriously with the use of the organ.

22. Stammering, if excessive and confirmed; to be established by medical testimony.

23. Loss of all the front upper and lower set of teeth by natural death. This applies to those cases only where the loss is so great, that if the loss were confined to the front teeth, the man would be disqualified for military service.

24. Tumors or wounds of the neck, impeding respiration or deglutition; fistula of larynx or trachea; tracheotomy, if of long standing and unhealed.

25. Deformity of the chest, or excessive curvature of the spine, sufficient to prevent the carrying of knapsack and military equipments; caries of the spine, tabe, or sarcoma.

26. Aneurisms and diseases of the blood vessels, of a character to render them unfit for military service.

27. Hernia—double or single, when large, irreducible, or strangulated.

28. Artificial anus; stricture of the rectum; prolapsus ani. Fistula in ano is not a positive disqualification, but may be so, if excessive or complicated with visceral disease.

29. Old and ulcerated internal hemorrhoids, if in degree sufficient to impair the man's efficiency. External hæmorrhoids do not constitute exemption.

30. Total loss or nearly total loss of penis; epispadia or hypospadia at the middle or near the root of the penis.

31. Incurable fistula in perinæo; stricture of the urethra, in which the urine is passed drop by drop, or which is complicated by disease of the bladder; urinary fistulæ; retention of urine from any cause for more than three not evil exempt.

32. Scrofulous testicle, being a disease frequently feigned, and of rare occurrence, is not, of itself, a cause for exemption. Loss of the testicle, or disease by the operation of the metallic catheter, is a positive disqualification.

33. Varicocele, incipient atrophy at both testicles from any cause; prolapsed testicle; hydrocele; fistula in perinæo; scrotum swollen to an unusual extension does not exempt.

34. Cachexia of a decided character; anasarca; hydrocele, if complicated with organic disease of the testicle. Varicocele is not, in itself, disqualifying.

35. Loss of a leg or arm, or the loss of the hand or foot.

36. Wounds, muscular or cutaneous contractions from wounds or burns, deformity of the hand or fingers, or any other injury sufficiently incapacitate the man for military service.

37. Fracture, dislocation or deformity of anchylosis of the large joints, or chronic diseases of the joints or bones, that would prevent walking, or the use of the arms, to the extent required.

38. Total loss of a thumb; total loss of the index finger of the right hand. Other mutilations of the fingers, short of the loss of a hand, is declared as to leave no doubt of the man's incapacity for military service.

39. Total loss of the great toe of either foot. Other mutilations or deformities of the foot, such as will necessarily prevent marching.

40. Varicose veins, when extensive and enlarged, or ulcerated, and accompanied with chronic swellings or ulceration.

41. Chronic ulcers, especially when of a varicose character of lower extremities.

The Provost-Marshals of Enrollment in reporting "the statistics of the case of exemption on account of physical disability" (Circular No. 76, paragraph 5) are to subdivide the list of disabilities required by Circular No. 76, from this order, report the number rejected under each paragraph of the above list of disqualifying diseases.

JAMES B. FRY, Provost-Marshal-General.

The disasters to the New York during the year were not numerous, the *Philadelphia, Washington and Baltimore Railroad Company's Report* has been published, and from it we learn that there will be no material alterations, except that in the Treasurer's and Auditor's Reports in the new register. At the last Admiral Dahlgren and Charles Stewart will still occupy his place, having been of the retired list. Charles Stewart will still occupy his place, having been of the retired list. Charles Stewart will still occupy his place, having been of the retired list.

FORTIFICATION—LAND DEFENCES—PROFILES.

FORTIFICATION being the art of so preparing certain positions that in them the few can successfully resist the assaults of the many—the points to be considered in fortifying are, the cover from the enemy's fire, the distant defence by artillery, the near defence by musketry, the obstacles by which assault is to be prevented or retarded, and the defence of these obstacles. The new facts in fortification are dependent upon the new facts in artillery. They are, that the distant defence must include at least a radius of 5000 yards, that the near defence of musketry extends to 800 yards, and that the increased penetration and accuracy of rifled projectiles require increased care in the construction and modifications in the nature of the cover to be provided. Instead of examining in detail the follacies of books, a work which would occupy much time to little purpose, it will be better to lay down certain simple principles and from them deduce the forms to be adopted.

The cover necessary to give a work depends upon its position and the projectiles it has to resist. It depends upon the position; because certain positions give cover without any parapet. The reverse slope of a hill, for instance, is selected for a battery, because of the cover it gives; the more nearly the position of a work approaches this, the less cover is necessary. A work between two hills could only be covered from those by being roofed in. A work upon a hill requires but little cover against the plunging fire of guns. Eight feet of ground has been laid down as essential upon level ground. Cover is obtained by digging a ditch and throwing up the earth in front or in rear. If in front, the defenders stand in the ditch, and the cover is merely made more than 6 or 8 feet thick—two feet in the ditch and four or six inches of parapet in front;—such cover is only protection against musketry fire, grape, canister and shell splinters; but the small mark which it presents makes it practically almost impossible to injure it by artillery fire. This sort of cover is the most available for the use of infantry defences. It has been extensively used, for the first time, in this war, and its advantages, though long theoretically known, have been for the first time practically tested. It is the useful application of that which has been in the principles which regulated the construction of the continued lines and redoubts used in and antecedent to the days of MARLBOROUGH. No work gives so much defensive power with so little labor. Its chief defect is that it gives no cover to the ground in its rear, and that therefore shelter can reimburse only a part of the defenders withdrawn without being much exposed. This was exemplified in the passage of the Rappahannock at and below Fredericksburg, where the defenders were prevented from leaving their rifle pits, or even firing from there by a close artillery fire, while the assailants, marching securely in boats under its protection, captured them all.

When six feet to eight feet of cover or more are given, the ditch is placed outside. The parapet then consists of a mass of earth with a flat or three steps. The exterior of one in one, or a base equal to its height; the interior of one in two, one in four to one in six, and the interior as steep as possible, usually four in one. The rule for the exterior slope appears faulty. In the bombardment of Fort Wagner, little or no effect was produced on the parapet by the guns, because being constructed of sand, it had assumed a very flat exterior slope, probably one in two or one in three. With flat exterior slopes and unmounted earth, the effect of exploding shells is merely to blow a small quantity of earth up, which falls down again close to the same place. With steep exterior slopes and dense parapets, the shells penetrate deeply and throw the earth back into the ditch, thus weakening and destroying the parapet. A shell with a 5 lb. charge falling at an angle of 30° and penetrating five feet and then exploding, will displace 197 cubic feet in a direction of 30° to the vertical, it out at an angle of 45° 73 cubic feet in a slope of one in two, throwing it up at an angle of 63°, and only 57 cubic feet in a slope of one in three, throwing it up at an angle of 72°.

The rule laid down for the thickness of parapets is that they should be one-half thicker than the penetration of the heaviest projectile which can be brought against them. The projectile most effective to earthen parapets being shells, the rule should be that the thickness of the parapet should be sufficient—allowance being made for the increased penetration consequent upon the earth being disturbed by previous explosions—to prevent the exploding shell from exerting any power to overthrow the interior slope.

The ordinary arrangement for acting offensively from the parapets are three-fold. For musketry, a banquette, or footbank, as the old English writers have it, four feet three inches below the crest of the parapet and three feet to four feet six inches wide, on which the defenders stand to fire over the parapets. This foot-bank, admirably adapted to this special purpose, is defective in that it affords no means of mounting the parapet, where all assaults should be met. In hand to hand conflicts the advantages are with those who stand highest. They have the upper hand. The Romans, who fortified entirely for hand to hand conflicts, raised a bank of earth three feet high and very wide, steep in front, on which the defenders stood. The assailants of a work, if they force the passage of the ditch, have for the hand to hand conflict the very position of the defence in the former days. To obviate this, the banquette should be raised to two feet nine inches below the crest, arranged for kneeling fire, and this height broken by a step, on which the elbow can be placed. The defenders could then mount and receive the assault on the crest of the parapets when the assailants passed the ditch.

Guns are fired from works either through embrasures or *en barbette*. Barbette guns have the advantage of range, and, unless it is intended to roof in the gun with baxo or other casemates, timber, bricks, iron, &c., embrasures as regards cover is not sufficient to compensate for the diminished range, except when the guns can be attacked by sharpshooters. The cover of embrasures and the exposure of barbettes, are both much exaggerated. The former acts as a funnel, and looks shot to the gun, and the latter admits of guns being hurriedly over. Every precaution shell which explodes on any part of the cheek of an embrasure, bursts just where it will do most injury to the gun detachment. The exposed side of a barbette should always be covered by a high traverse bonnette. The practice inaugurated at Schastopol by TODLEBEN, and practiced in all rebel works, of having a large number of good traverses, is thoroughly sound. The defences of Washington are singularly faulty in this particular. In covering guns from enfilade and reverse, some portion of the covering over the embrasure must be exposed. Where the work is intended to make a stout defence, as the works around Charleston, Richmond, Washington, &c., this portion should invariably be protected with railroad iron, in three or four thicknesses, laid on the earth per own advisable, that the density of the parapet should be everywhere alike. Shot revolving round a fixed or predetermined axis, as do all rifled shot, are specially susceptible to differential resistances. A slope of denser material proceeding from the foot of the exterior slope to the crest of the parapet, would be almost certain to deflect upwards and outwards any shot which should penetrate far enough to strike it.

In profile, then, a distinction should be clearly drawn between works for near and for distant defence. The parapet for the former should have exterior slopes of one in two, and should be so constructed in the interior as to facilitate offensive returns, and the density of the parapet should when possible be increased towards the interior.

In another paper the trace or outline of works will be considered.

PROMOTIONS IN THE REGULAR ARTILLERY.

The following is a list of the promotion of Field-Officers of the United States Artillery, since the publication of the *Army Register* on the 1st inst.:

FIRST ARTILLERY.—Lieutenant-Colonel ISRAEL VOORHIS, of the 5th, to be Colonel, vice DUNCK, retired.

Major WM. HAYDEN, of the 2d, to be Lieutenant-Colonel, vice NAUMAN, deceased.

Captain JAMES A. HICKEY, to be Major, vice VOORHIS, promoted (as Lieutenant-Colonel) to 5th Artillery.

Captain JOHN M. BRANNAN, to be Major, vice ARNOLD, promoted to 2d Artillery.

SECOND ARTILLERY.—Major LEWIS G. ARNOLD, of the 1st, to be Lieutenant-Colonel, vice BROOKS, promoted to 4th Artillery.

Captain R. A. ALLEN, to be Major, vice HILL, promoted to the 5th Artillery.

THIRD ARTILLERY.—Lieutenant-Colonel T. W. SHERMAN, of the 5th, to be Colonel, vice GATES, retired.

Major HENRY S. BURTON, to be Lieutenant-Colonel, vice BURKE, retired.

Major HENRY J. HUNT, of the 5th, to be Lieutenant-Colonel, vice SHERMAN, promoted to 5th Artillery.

Captain A. A. GIBSON, of the 2d, to be Major, vice BURTON, promoted.

FOURTH ARTILLERY.—Lieut.-Colonel HORACE BROOKS, of the 2d, to be Colonel, vice MERCHANT, retired.

Major JOSEPH ROBERTS, to be Lieutenant-Colonel, vice WYSE, resigned.

Captain A. P. HOWE, to be Major, vice ROBERTS, promoted.

FIFTH ARTILLERY.—Lieutenant-Colonel HENRY S. BURTON, of the 3d, to be Colonel, vice BROWN, retired.

Major BENNET H. HILL, of the 2d, to be Lieutenant-Colonel, vice VOORHIS, promoted to 1st Artillery.

Captain WM. HAYS, of the 2d, to be Major, vice BARRY, promoted to 3d Artillery.

Captain GEO. A. CUTTY, to be Major, vice HUNT, promoted to 3d Artillery.

UNION OFFICERS IN THE HANDS OF THE REBELS.

THE list of officers now prisoners in the hands of the rebels, which has been extensively published in the papers of the country, came to us at a late hour last week and was crowded out of the JOURNAL. We therefore give below the names of the field, staff and regular officers included in the list:—

BRIGADIER-GENERAL.

Neal Dow, 2d Me., 1863—Libby Prison, Richmond, Va., Jan. 20.

COLONELS.

T. A. Bartleson, 80th Ill.—Chickamauga, Tenn., Sept. 20.
C. H. Carlton, 86th Ohio—Chickamauga, Tenn., Sept. 20.
D. P. de Cornoh, 6th N. Y. cavalry—Loudon Co., Va., Sept. 17.
W. G. Ely, 10th Conn.—Winchester, Va., June 15.
W. F. Eldridge, 2d N. Y. cavalry—Carlisle, Miss., Sept. 10.
D. L. Lowson, 2d Ohio—Rome, Ga., May 3.
E. W. Mason, 25th Mich.—Chickamauga, Tenn., Sept. 20.
W. M. McKinn, 94th Ohio—Chickamauga, Tenn., Sept. 20.
W. H. Seward, jr., 1st N. Y. cavalry—Culpeper, Va., July 13.
Thomas J. Wood, 15th Ind.—Chickamauga, Tenn., Sept. 20.
A. D. Streight, 51st Ind.—Rome, Ga., May 3.
Wm. Wallace, 77th Penn.—Chickamauga, Tenn., Sept. 20.
A. H. Tippen, 68th Penn.—Gettysburg, Penn., July 1.
W. F. Wilson, 123d Ohio—Winchester, Va., June 15.

LIEUTENANT-COLONELS.

F. Canedy, 104th Penn.—Chickamauga, Tenn., Sept. 20.
W. H. Olson, 58th Ohio—Chickamauga, Tenn., Sept. 20.
H. C. Hobson, 115th Ohio—Chickamauga, Tenn., Sept. 20.
H. G. Hasbrouck, 5th Md.—Winchester, Va., June 15.
C. A. Harris, 6th Md.—Winchester, Va., June 15.
W. P. Berry, 14th Ky. cavalry—Jackson, Tenn., June 20.
E. L. Hayes, 104th Ohio—Lone Creek, Tenn., Sept. 8.
G. G. Jefferson, 18th Wis.—Chickamauga, Tenn., Sept. 20.
J. H. Mapes, 8th Ky.—Chickamauga, Tenn., Sept. 20.
W. P. Lavelle, 6th Md.—Chickamauga, Tenn., Sept. 20.
W. E. McMackin, 21st Ill.—Chickamauga, Tenn., Sept. 20.
R. S. Newcomb, 12th N. Y.—Shepherdstown, Va., June 15.
C. H. Morrison, 36th Ill.—Chickamauga, Tenn., Sept. 20.
D. Miller, 9th Ohio—Chickamauga, Tenn., Sept. 20.
M. Nichols, 18th Conn.—Winchester, Va., June 15.
W. Ledlie, 13th N. Y. cavalry—Culpeper, Va., July 13.
F. S. Tyler, 78th Penn.—Chickamauga, Tenn., Sept. 20.
A. H. Tracy, 1st Ohio—Rome, Ga., May 3.
G. Von Heinrich, 4th Mass. cavalry—Jackson, Tenn., June 23.
W. H. Hamilton, 1st Md. cavalry—Fort Delaware, Del., Sept. 1.

MAJORS.

Jas. F. Scofield, 6th N. Y.—Gettysburg, Penn., July 1.
S. S. Wyer, 58th Ohio—Chickamauga, Tenn., Sept. 20.
J. H. Wing, 2d Ohio—Rome, Ga., May 3.
J. Jones, 5th Ohio—Chickamauga, Tenn., Sept. 20.
J. Sanderson, Staff officer—Bentonville's Fort, Va., July 20.

John B. Clark, 8th Mich.—New Baltimore, Va., Oct. 19.
F. T. Cheney, 9th Penn. cavalry—Culpeper, Va., July 13.
C. Forsworth, 1st Conn. cavalry—Hallowell, Va., July 24.
A. H. Fitzsimmons, 3d Md. cavalry—Hallowell, Va., July 24.
C. C. Hall, 1st Vt. cavalry—Martinsville, Va., Oct. 12.
Wm. Hamilton, 1st Md. cavalry—Fort Delaware, Del., Sept. 2.
S. Keene, 84th N. Y.—Gettysburg, Va., July 1.
W. P. Richardson, 1st N. Y. cavalry—Newport's Cove, Miss., June 8.
A. McMahon, 21st Ohio—Chickamauga, Tenn., Sept. 20.
D. McKendrick, 14th Ky.—Chickamauga, Tenn., Sept. 20.
S. McGuin, 2d N. Y. cavalry—Liberty Mills, Va., Sept. 22.
P. B. McDonald, 4th Ohio—Chickamauga, Tenn., Sept. 20.
W. R. Neeper, 57th Penn.—Gettysburg, Penn., July 1.
H. Pinckney, 1st N. Y. cavalry—Culpeper, Va., July 13.
L. A. Phipps, 5th Pa.—Guyandotte, Va., Aug. 16.
C. S. Wainright, 1st N. Y. artillery—Culpeper, Va., July 20.
J. A. Hopkins, 104th Penn.—Gettysburg, Penn., July 1.
W. H. Jenkins, 1st Md. cavalry—Fort Delaware, Del., Sept. 2.
W. C. Cornyn, 3d Ohio—Rome, Ga., May 3.
J. H. Hooper, 18th Miss.—White Plains, Va., July 28.
A. White, 18th Penn. cavalry—Hallowell, Va.
A. Von Mitzel, 74th Pennsylvania.
J. H. Wilson, A. A. G. to General Hooker.
J. N. Walker, 92d Indiana.
H. White, 8th Indiana.
George Stow, 84th Indiana.

STAFF OFFICERS—CAPTAINS.

F. Burton, A. A. G., 2d brig., 2d div., 6th Army corps.
J. COKER, A. A. G. to General Buford.
E. S. Parkin, A. C. S.
S. P. Lyford, Ordnance.
B. E. Thomas, A. A. C.
A. A. Pennington, commanding 3d division, 6th Army corps.
J. Gale, A. Q. M. 2d division, 6th Army corps.
H. B. Wheelan, A. Q. M. 1st brig. 1st div., 6th Army corps.
J. R. Muhleman, A. A. G.
Wm. Hamilton, Commissary.
W. H. Doughas, Commissary.

JOHN BARNARD, commanding 1st brig., 1st div., 6th Army corps.
R. C. Smith, A. A. G. to General Barnard.
W. G. Colonna, A. D. C. to General Upton.
B. Cole, A. Q. M. 3d brig., 1st div., 6th Army corps.
H. Mudge, A. A. G. 3d brig., 1st div., 6th Army corps.

OFFICERS OF THE REGULAR ARMY—CAPTAINS.

John Chevedden, 1st U. S.; Thomas Wilhelm, 1st U. S.; L. H. Rucker, 1st U. S.; T. Turnipseed, 1st U. S.; W. H. Wyckoff, 1st U. S.; Henry, 10th U. S.; M. A. Cochran, 10th U. S.; Thomas Chandler, 10th U. S.

LIEUTENANTS.

H. B. Freeman, 10th U. S.; W. G. Gallaway, 10th U. S.; R. H. Graham, 10th U. S.; F. W. Hamilton, 10th U. S.; N. C. Curtis, 10th U. S.; J. B. Bowles, 2d U. S. cavalry; E. P. Brown, 10th U. S.; F. T. Dent, jr., 4th U. S.; Frederick Dent, 4th U. S.; Wm. Dougherty, 2d U. S.; W. H. Smith, 5th U. S.; W. F. Randolph, 5th U. S. Artillery; J. Conline, 5th U. S.; Wm. Ludlow, 5th U. S.; Wm. Quinton, 5th U. S.; 5th U. S. artillery; H. C. Pentchard, 5th U. S.; H. Moulton, 1st U. S. cavalry; W. Wallace, 1st U. S. cavalry; M. McMahon, 1st U. S.; F. Mowley, 19th U. S.; J. R. Sanger, 19th U. S.; R. C. Gotts, 19th U. S.; J. Lee Humphrey, 19th U. S.; A. Wainwright, 1st N. Y. cavalry; M. Tracy, 19th U. S.; E. McK. Timmony, 10th U. S.; E. J. Conger, 19th U. S.; J. Lee Humphrey, 19th U. S. Cavalry; W. Nelson, 13th U. S.; Byron Dawson, 19th U. S.

NAVY.

W. G. Saunders, Master's Mate, steamer *Satellite*.
E. H. Fenton, steamer *Mahaska*.
L. B. Bates, acting Master's Mate, steamer *Penobscot*.
John Mee, Third Assistant Engineer, steamer *Penobscot*.
D. McCormick, steamer *Satellite*.
James McCauley, Second Assistant Engineer, steamer *Rhode Island*.
S. B. Rothwell, A. A. Paymaster, steamer *Satellite*.
E. J. Robinson, Pilot, steamer *Satellite*.
A. D. Bradbury, Second Assistant Engineer, steamer *Rhode Island*.
W. W. Myers, U. S. N.
J. D. Utley, U. S. A.

The following is a list of the casualties among officers in General Geary's division during the recent attack upon it at Whitehall on Bloody Run:

KILLED.—Lieut. Clending, Adjutant 109th Penn.
Major John A. Boyle, 111th Penn.
Lieut. M. H. Pettit, 111th Penn.
Lieut. Ed. R. Geary, Kingy's Penn. Battery.
Adjutant Mudge, 33d Mass.

WOUNDED—GEARY'S DIVISION.—In 2d Brigade: Captain J. F. Ballier, 28th Penn., leg amputated. In 2d Brigade: Captain C. A. Atwell, Kreap's Penn. Battery, severely; Colonel Ireland, 28th Penn., probably mortal.

WOUNDED.—Brigadier-General Candy was wounded while in line of battle. A gun-shot struck him in the mouth, carried away a portion of his teeth, a piece of his jaw-bone and passed out through the cheek.

Lieut. L. R. Davis, Aide-de-Camp, Geary's Staff, wounded severely in the shoulder.

Captain Moses Veile, Commissary of Musters, Geary's Staff, wounded slightly in the shoulder.

Assistant-Inspector-General John J. Haight, Cobham's Staff, severely.

Lieut. John McFarland, Pa. Vols., slightly.

Lieut. Albert Black, 111th Pa., severely.

Lieut. A. H. Tracy, 111th Pa., slightly.

Lieut.-Col. James M. Lamb, 111th Pa., slightly.

Capt. James M. Wells, 111th Pa. slightly.

Capt. Wallace Warner, 111th Pa., slightly.

Capt. Silas Barnes, 111th Pa., severely.

Lieut. Marshal Corbett, 111th Pa., severely.

Capt. Charles A. Atwell, Independent Battery E, Pa. Vols., seriously.

THE following Union officers died in rebel prison from January to September, 1863:—

Captain O. S. Schaffer, 6th Penn., Jan. 30
Captain D. Bahman, 7th Penn., Jan. 3.
Captain S. S. Marshall, 105th Penn., Feb. 18.
Major Robert Morris, 6th Penn., Aug. 13.

ARMY AND NAVY PERSONAL.

MAJOR-General B. M. Prentiss has tendered his resignation to the War Department, and it has been accepted.

LIEUT.-Colonel S. W. Beall, of the Invalid Corps, has been ordered from St. Louis, Mo., to Camp Chase, Ohio.

BRIGADIER-General James Steedman, of the Army of the Cumberland, reached Washington on the 6th.

MAJOR-General Benjamin F. Butler left Washington on the 9th for Fortress Monroe to resume his former command.

H. S. NEWCOMB, late commander of the U. S. steamer *Tioga*, died at Key West recently. He was from Rhode Island.

CAPTAIN John S. Jordan, of the 24 Pennsylvania Heavy Artillery, died suddenly on Monday, at Fort Thayer, in the northern defences of Washington.

LIEUTENANT-Colonel Parker A. Porter, Commissary of Subsistence, has been ordered to report to Major-General Thomas at Chattanooga.

THOMAS Francis Meagher has been reinstated in the rank of Brigadier-General, with permission to recruit to its complement his old Irish Brigade.

LIEUTENANT Commanding H. H. O. Eytinge, U. S. gunboat *Chillicothe*, Mississippi Squadron, has been granted leave of absence on account of sickness.

LIEUTENANT Commander E. K. Owen, U. S. N., Division Commander of the Mississippi River Squadron, is now on a brief leave of absence to visit his friends in Illinois.

BRIGADIER-General Charles D. Jameson, having nearly recovered from the effects of his wound, and the subsequent confinement in Libby prison, has left New York to rejoin his command.

MAJOR-General Augur has been relieved from the Presidency of the General Court-Martial which is about to proceed to the trial of Dr. Samuel Mudd, and Major-General Heintzelman has been assigned to the position.

COLONEL Moses N. Wiswell, of the 6th Regiment Invalid Corps, late of Newark, N. J., arrived in Washington and Brevetted Rank in charge of the Invalid Corps Bureau of the Provost-Marshal-General's office.

J. O. MOSELEY, a banker in the U. S. A., was arrested a few days ago in New York for drunkenness and disorderly conduct, and taken to the station house, where $8,596 was found upon his person.

COLONEL Bedwell, Commissary U. S. A., has left Washington city for St. Louis, to which post he has been transferred. His successor here is Colonel Beckwith, who has long been Chief of the Commissary at Alexandria.

BRIGADIER-General G. H. Gordon recently came North from the Department of the South, in the *Arago*. He had been summoned to testify in the Stimers Court of Inquiry, but that court has been dissolved before he arrived.

LIEUTENANT-Colonel Thomas T. Taylor, late Inspector at the Quartermaster's Department in the Army of the Potomac, has been transferred to General Hooker's command on his own request.

COLONEL Richard H. Rush, Assistant Provost-Marshal, has been relieved from charge of the Invalid Corps Bureau. Lieutenant-Colonel Cahill, his assistant, is left temporarily in charge.

THE following officers have been honorably discharged the service of the United States, to date from the 5th inst.: 9th Penn. Vols.: Lieuts. J. J. Doyle, 99th Penn. Vols.; T. D. Cunningham, 69th Penn. Vols.

LIEUTENANT-Colonel Provost, Provost-Marshal of Alexandria, has been relieved of his command by an order from the War Department, and Captain Gwynn, Medical Inspector on General Slough's staff, has been appointed to the office.

THE following officers who were ordered before the Retiring Board now in session at Washington, have been returned to duty:—Lieutenant Geo. B. Butler, 3d U. S. Infantry; Gen. Williams, 4th U. S. Infantry, and 2d Lieutenant Geo. Worrell, 3d Infantry.

BY order of the Secretary of War the office of Provost-Marshal of the War Department has been discontinued. Colonel L. C. Baker, formerly Provost-Marshal, has received 30 days' leave of absence for the purpose of recruiting his Battalion of Rangers to a regiment.

MAJOR Frederick Townsend, 13th U. S. Infantry, has been assigned to duty as Superintendent of Volunteer Recruiting Service at Albany, N. Y., and Major Wallace, 6th U. S. Infantry, to the same Superintendent, has been ordered to join his regiment in the field.

THE following deaths are reported in the Mississippi Squadron:—Acting Assistant Paymaster Wm. Hall, Jr., of 10, Lafayette Dunn, Acting Master's Mate; Oct. 16, R. H. Wells, 1st Coast Pilot; Sept. 29, Andrew J. Rich, Acting Ensign.

BY special order from General Martindale, Military Governor of Washington, Lieutenants Baker, 86th New York, Thompson and Stiner, 19th Massachusetts, and Quartermaster, 14th New Hampshire Volunteers, who have been for a long time past on duty at the Provost Marshal's office, have been permanently assigned to duty at the Capitol.

BRIGADIER-General Canby, who since about the middle of July has been in command of the United States troops in the city and harbor of New York, has been relieved, and ordered to Washington. Brigadier-General Stannard, who has been in command of Fort Richmond, Sandy Hook, and the defences on that side of the harbor, succeeds General Canby.

ON the 10th inst. Colonel Upton, who commanded the brigade which last Saturday so successfully charged and captured the enemy's works at Rappahannock Station, accompanied by deputations from each of the regiments participating in the assault, presented General Meade with eight battle flags taken at that time. General Meade replied in a few judicious remarks.

THE following officers of the regular army have been retired:—Lieut.-Colonel Daniel F. Whitney, 6th U. S. Infantry; Major Bruce Cameron, Paymaster, U. S. A.; Captain Joseph H. MacArthur, 6th U. S. Cavalry; Captain J. H. Carlisle, 3d U. S. Artillery; Captain Wm. Austin, 1st U. S. Artillery; Captain J. W. Magruder, 7th U. S. Infantry; 1st Lieut. F. E. Brownell, 11th U. S. Infantry.

TWO Union officers named Major John B. Homans of the 132d New York Volunteers and Lieutenant D. Von Hamm of "Scott's 900 Cavalry" arrived in Washington last week, having escaped from Libby Prison on the 30th ult. They were eleven days in making their way to the Union lines, the greater portion of their journey they had many narrow escapes from capture.

On the morning of the 5th Lieutenant Hedges, of the Second New York, Aide-de-Camp to Brevet Major-General Kilpatrick's Cavalry division, while riding, accompanied by a single Orderly, from Catlett's Station to a point three miles distant, was fired upon and shot mortally wounded. This occurred almost within sight of General Pleasanton's headquarters, and within a mile of the headquarters of General Kilpatrick.

THE following resignations have occurred in the Mississippi Squadron:—Oct. 8, Geo. W. Armstrong, Acting Carpenter; Oct. 9, Francis Hoffman, Acting Assistant Surgeon; Wm. O. Sherry, Pilot; Oct. 13, Archibald Miller, David E. Wade, Acting Second Assistant Engineers; Oct. 20, Ed. H. Timmond, Acting Master's Mate; Oct. 21, Aaron Barron, Acting Ensign; James C. Dohrmann, Acting Third Assistant Engineer; Thos. L. Dohrmann, Third Assistant Engineer; Thomas Gardner, Acting Gunner.

THE appointments of the following officers have been revoked, and they have been honorably discharged from service in the naval service, or to the Mississippi Squadron:—Oct. 9, 1863, T. J. Sheets, Acting Master's Mate; Oct. 15, 1863, Chas. W. Pratt, Acting Third Assistant Engineer, ill health; Oct. 24, 1863, E. A. De Camp, Acting Master's Mate, *Petrel*, ill health; James E. Russell, 1st Class Pilot, *Ore. Lowe*, disloyalty; David Stevens, Acting Third Assistant Engineer, *Chillicothe*, inefficiency; John K. Myers, Acting Third Assistant Engineer; Thos. Gardner, Acting Gunner; Wm. Hall, Acting Assistant Paymaster, *Osage*, inefficiency.

THE following promotions are reported in the 26th Pennsylvania Cavalry:—Major Robert L. Bodine, to be Lieutenant-Colonel; Captain Samuel G. Medlett, to be Major; First Lieutenant Robert Bruce, to be Captain Company A; Second Lieutenant Samuel Yohe, to be First Lieutenant Company A; First Sergeant Harry Clifton, to be Second Lieutenant Company A; Second Lieutenant Henry J. Hastings, to be First Lieutenant Company D; First Sergeant John Flannery, to be Second Lieutenant Company D; First Sergeant James D. Head, to be Second Lieutenant Company I.

THE following is a list of promotions in the Department of the South, for the month of October:—Reliefs: Duryea, 1st Lieut. and A. D. C., 7th Connecticut Vols., to be Lieut. Col. same regiment; Wilber F. Lane, 1st Lieut. 6th Maine Vols., to be Captain same regiment; Lieut. 48th New York Vols., to be 1st Lieut. same regiment; Lieut. 8th Maine Vols., to be 1st Lieut. same regiment; John Stevens, 1st Sergt. 8th Maine Vols., to be 2d Lieut. same regiment; Sergt. 8th Maine Vols., to be 2d Lieut. 100th New York Vols., to be Capt. same regiment; Henry V. Stonehouse, Private New York Vol. Engr., to be 2d Lieut. 3d South Carolina Vols.; Hillman Jones, 1st Lieut. 8th Maine Vols., to be Capt. same regiment; Frederick Metcalf, civilian, to be 1st Lieut. 6th Connecticut Vols.; Sergt. Bands, 2d Lieut. 3d South Carolina Vols., to be 1st Lieut. and Adjutant same regiment; John M. Cowen, 2d Lieut 8th Maine Vols., to be 1st Lieut. 6th Connecticut Vols.; Wesley W. Brockett, Major 48th New York Vols., to be Lieut.-Col. same regiment; William H. Dunbar, 1st Lieut. 48th New York Vols., to be Capt. same regiment; Lieut. 48th New York Vols., to be 1st Lieut. same regiment; V. R. K. Hilliard, 2d Lieut. 48th New York Vols., to be 1st Lieut. same regiment; John L. Sergeant, 1st Sergt. 8th Maine Vols., to be 2d Lieut. same regiment; Robert M. Lavy, Private, 6th Connecticut Vols., to be 1st Lieut. and Q. M., 4th South Carolina Regiment; Charles G. Wheeler, Private, 6th Connecticut Vols., to be 1st Lieut. same regiment; Samuel C. Peck, 1st Lieut. 6th Connecticut Vols., to be Capt. same regiment; Walter S. Fitch, 2d Lieut. 6th Connecticut Vols., to be 1st Lieut. and Adjutant.

ITEMS AND INCIDENTS.

THE numerous disqualifications for service framed previous to the 1st inst. have been reduced in number, by an order from the War Department, from fifty-one to forty-one.

OFFICERS are to be detailed from regiments now in the field for recruiting service, in Massachusetts, New Jersey and other States.

THE people of Indiana, without distinction of party, are straining every nerve to raise the quota of men required by the call of the President, and the ablest orators of the State are taking the stump.

PROFESSOR Henry Coppée, of the University of Pennsylvania, is delivering a course of lectures in Philadelphia on "Fortifications, Attack and Defence, and How a Great Battle was Fought."

MR. Seward has authorized the announcement that the six rams building at Nantes and Bordeaux, France, for the rebels, will not be permitted to leave port. The French authorities will do this course in response to the remonstrance of Minister Dayton.

THE mortality among our exchanged prisoners at Annapolis, and the still more severe testimony of the barbarous usage of those in Richmond, have determined our Government to apply corrective retaliation if the rebel authorities do not, upon remonstrance, treat our captured men according to rules of war.

THE authorities at Washington some time since issued orders for the erection of barracks at the various posts about that city, in place of the tents heretofore in use. That portion of the 126th Pennsylvania Volunteers doing garrison duty at Fort Lincoln, D. C., have completed theirs already, and recently gave a grand party in honor of the event.

DR. William P. Rucker, by whose detention at Richmond on charges of criminal nature the exchange of surgeons had been stopped, arrived at Dunlap's Bridge, Virginia, on Saturday last. About two weeks since he eluded the vigilance of his captors and came safely through to our lines.

COMMANDING officers of companies in the Invalid Corps are directed to call the attention of the men of their commands to a long list of letters which have been forwarded to the Invalid Corps Bureau from the Washington City post-office, in which they remained (uncalled for) a reasonable time, and which, owing to whom they are addressed to and for them immediately.

R. W. GANTT, formerly a Congressman in rebeldom, and a brigadier-general in the army, but now a private citizen of war at Little Rock, has issued a remarkable address to the people of Arkansas, in which he counsels submission to the Union arms, and denounces Jeff. Davis and his associates as a hypocritic and tyrannical set, and by no means the man for the occasion.

THE Richmond *Examiner* of Nov. 6th says:—"Grant is no longer dependent upon the railroad for food. His troops have to carry but 15 days' rations, and it is no longer impossible for him to Winter at Chattanooga if he should prefer to do so. Nor will his threatened advance be any more difficult than the march of sixty miles to Knoxville, *over the battlegrounds of the battle of Chickamauga. The battle of Chickamauga was not fought upon*."

GENERAL Peck, commanding the District of North Carolina, at Newbern, in a recent order, calls attention to the number of regiments without chaplains. He recommends that the office be abolished, and in Congress has made liberal provision for the supply of chaplains. He characterizes the neglect of his duties as regardless of the instincts and feelings of the American people, and on evidence that seldiers have retrograded from the high moral standard maintained at the beginning of the war.

MARSHAL Forey, the chief of the French expedition to Mexico, and under whose command Puebla was taken and the capital of the country occupied, is on his way to France. At Havana, where he arrived on the 27th ult., he was received with honors. His frigate, the *Panama*, being short of coal, put in at Key West, and he took the opportunity to make a trip to Niagara. Many hence undoubtedly greet the conqueror of the Mexicans, on his arrival in France.

MISS Charlotte Cushman's noble efforts in behalf of the Sanitary Commission have drawn from Mr. Bellows, on the Secretary, a grateful tribute in acknowledgment of the receipt of over $8,000, the proceeds of entertainments in Boston, New York, Philadelphia, Baltimore and Washington, given by her. Mr. Bellows says: "It is due to Miss Charlotte Cushman to say, that this extraordinary gift of money was accompanied by her own loyal heart, a large part of the service which, ever since our war began, she has been rendering to her country. Her earnest faith in the darkest hours, her prophetic confidence in our success, her eloquent patriotism, in all presences, have been potent influences which should deserve and command the gratitude of the whole Nation."

THE Washington correspondent of the Cincinnati *Gazette* says that the following promotions in the artillery arm have been received in Washington from General Rosecrans:—"As to any removal from the command of the Army of the Cumberland, I have only to say that I do not think the country may be as well and better served by another. As for the infamous lies which are put forth through the press to blast my reputation, and so disabling mental disease, the use of opium, disobedience of orders in not advancing when ordered, &c., they are unmitigated falsehoods, &c., if thought they came from our Government I would despair of a nation headed by such a Government. That the people will accept them, on the evidence of the Chattanooga battle, I do not believe. Personally, I commend myself to the just and merciful One, who knows what is best for me."

CASUALTIES AMONG OFFICERS.

The following is the list of casualties among officers during the late fight on the Rapphahannock. It is as complete as it ispossible now to make it:

KILLED.

Captain R. W. Furlong, Co. D, 6th Maine.
Captain Horace Wyman, Co. B, 6th Wisconsin.
Captain Thomas Conway, Co. D, 6th Wisconsin.
Lieut. Lorenzo Barnes, Co. A, 6th Maine.
Lieut. James B. McKinley, Co. E, 6th Maine.
Lieut. Wm. Hale, Co. K, 6th Maine.
Lieut. Chas. R. Ilsley, Co. K, 6th Maine.
Captain Benjamin Brown, 6th Maine.

WOUNDED.

Brigadier-General Robt. C. Buchanan, severely disabled.
Colonel T. S. Allen, 5th Wisconsin, in hand.
Lieutenant-Colonel Ed. S. Bragg, 6th Colonel, 6th Wisconsin, slightly.
Lieutenant-Colonel D. F. Harris, 6th Maine, hip shattered.
Major Thomas S. Allen, 6th Wisconsin, thigh wounded in side.
Major Fryar, 6th New York, in wrist.
Major H. C. Merriam, 6th Maine.
Adjutant Charles A. Clark, 6th Maine, leg.
Captain Cyrus Gardner, Co. A, 6th Maine, back, shell wound.
Captain J. G. Roberts, Co. H, 6th Maine, arm.
Captain C. C. Wentworth, Co. K, 6th Maine, in abdomen.
Captain O. W. Russell, of General Russell's staff, hip.
Captain Kinsley Keith, Assistant Adjutant-General on General Bartlett's staff, arm.
Captain H. A. Perry, Light New York, left arm severely.
First Lieutenant H. H. Wait, Co. D, 6th Maine, chest.
First Lieutenant Lorenzo Barnes, Co. A, 6th Maine, shot.
First Lieutenant Solomon J. Morton, Co. G, 6th Maine, hip and thigh.
First Lieutenant Seymour Potts, Co. F, 6th Maine, arm fractured.
First Lieutenant Wm. Smith, Co. G, 6th Maine, leg.
First Lieutenant Wm. Hale, Co. K, 6th Maine, shot.
Second Lieutenant Wm. H. Coon, Co. H, 6th Maine.
Second Lieutenant E. C. Chamberlain, Co. D, 6th Maine, head.
Second Lieut. Edward Williams, Co. D, 6th Maine, head.
Second Lieutenant Wm. Cummings, Co. F, 5th Wisconsin, head.
Lieut. E. P. Mills, Co. B, 5th Wisconsin, arm, slight.
Lieut. Fassett, Co. E, 5th Wisconsin.
Assistant Surgeon D. L. C. Colburn, 5th Vermont.
Lieut. Ed. E. Cole, 126th Pennsylvania.
Lieut. Geo. S. Weston, 19th Maine, leg.
Second Lieut. J. A. A. Packard, Co. I, 83d Maine.
Lieut. G. H. Gilbert, Co. B, 122d N. Y.
Lieut. Wm. Hale, Co. K, 6th Maine.
Lieut. George Pierce, Co. C, 5th Maine.
Lieut. Edward Potter, Co. F, 5th Maine.
Lieut. R. R. McCormick, Co. E, 2d U. S. Cavalry, N. Y., hip, right.
Capt. Chas. Lovell, Co. B, 2d Maine.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Editors are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels; of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to tactical and other matters.

From gentlemen in the medical service we shall be glad to receive communications on military hygiene, practical surgery, and reports of notable operations and novel forms of treatment.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

The Editor does and holds himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

Subscriptions will be received for not less than a year, payable quarterly in advance, as the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, NOVEMBER 14, 1863.

THE REMOVAL OF GENERAL ROSECRANS.

WE have thus far refrained from any comment on the removal of General ROSECRANS from the command of the Army of the Cumberland, save to repel with indignation the malignant assaults that have been made on his personal courage and character. The shafts of malice strangely overshot themselves and fell on the other side when they took their *charges* for their aim; for one might as well impugn the courage of JULIUS CÆSAR as that of ROSECRANS, and as for the latter charge, every one who knows aught of General ROSECRANS is aware that he pushes the doctrine and practice of personal purity, temperance and virtue to lengths that emulate the antique days, and find few examples in these degenerate times. To conduct as a military commander is a different affair; and having given our best study, with such lights and aids as are at our command, to this matter, we shall state the case in the form it has assumed in our own thought.

It is hardly necessary to say that the imputations above referred to had nothing to do with the displacement of General ROSECRANS. They were never for a moment entertained by the military authorities at Washington. If *personal* impressions entered into the question—and we shall presently see that they did to an extent greatly to be regretted—they were impressions founded wholly on the views entertained by the war-authorities as to his military conduct.

It is no longer a secret that General ROSECRANS' military conduct from the time of the battle of Murfreesboro, (Stone's River), in the first month of the present year, up to the end of his career at Chickamauga, had given rise to angry bickerings and recriminations between himself and Mr. STANTON and General HALLECK. It is the old story, so oft repeated in military history, of the differences of opinion as to the operations of war, between those whose angle of vision is in the cabinet, and the general whose angle of vision is the field. The first great source of difference was the failure of General ROSECRANS to advance from Murfreesboro' during the Spring months of the present year. From the beginning of January to the end of June—six months—he lay at Murfreesboro' in *apparent* inaction, and so month after month went by, the representations from Washington, (we mean of course from General HALLECK and Mr. STANTON), became more and more pressing. It was urged that by lying idle he was imperilling the fortunes of both wings of our great military line, then engaged with the enemy—the right at Vicksburg, the left in Virginia, Maryland and Pennsylvania; whereas, by moving on Bragg it was urged he would make an important diversion in favor of both. Out of General ROSECRANS' failure to comply with this request grew an irritating correspondence with the authorities at Washington. On this head a writer who obviously draws his information from official sources says: "Without "quoting fully the language of any one set of dispatch- "es, scores passed, of the tone and temper of which "this is a faithful reproduction: Secretary STANTON "would telegraph, 'I am very much dissatisfied with "your long delay, and think, unless you move at once "the country cannot justify your course.' General "HALLECK would write, 'I feel very kindly to you, "General, and have the highest respect for the abili- "ties you have so signally displayed; but be assured "that neither your reputation nor mine can withstand "the effects of this delay, at a crisis when the exigen- "cies of the service so imperatively demand move- "ment.' The President would write, "I am very "much grieved by your unaccountable delay. I am "bound to believe that you, on the ground, are the "best judge of what you can do; but you see how "vitally important movement is, and you give me no "reasons that seem to me satisfactory for your delay." "To all this General ROSECRANS would answer, "I "know what the country, and I know, too, what the "army needs; I must have my communications and "supplies secure. I am never been my habit to move "into a place till I could secure them. If I am not "competent to command the army, you can remove "me; but while I remain in command I must use my "own discretion, and move when I get ready." Such "passages as this did not occur once or twice only, "but frequently."

Such were the causes of that official hostility to General ROSECRANS which took the *occasion* furnished by the battle of Chickamauga to consummate a long-settled determination, by removing him from the command of the Army of the Cumberland. Before passing on to this part of the subject, however, let us briefly examine the reasons of General ROSECRANS' delay.

To those who know aught of the condition of the Army of the Cumberland at the time General ROSECRANS took it in hand, just previous to the battle of Murfreesboro', it is unnecessary to say that the fieldhunters during the Spring months was an absolute necessity. He had to take a demoralized mob, to make out of it an army. He had to form a securely fortified secondary base. He had to *create* a cavalry force —absolutely indispensable to meet the enemy's great superiority in this arm. All these things were accomplished during the six months' *seeming* inaction at Murfreesboro'.

The time at length came when an advance could be thought of. So long as the fortune of two wings of our great line was unsettled, it was judged wise to see that the *centre*—the Army of the Cumberland—was held fast and secure. Bragg had been chased out of Maryland, and the siege of Vicksburg was nearing a successful issue. General ROSECRANS judged a forward movement could now be made. In this opinion he was in advance of his corps commanders, and the fact we are about to mention—and of which we were personally cognizant—should go some length in the public estimation to show that ROSECRANS' judgment was justified in his delay. About the middle of June, the commanding General addressed a circular letter to each of the corps and several of the leading division commanders, asking whether he "was in favor of an "early or immediate advance?" *The reply from each of them was one and the same.*

Nevertheless General ROSECRANS determined immediately to move, and the boldness and brilliancy of the campaign on which he then entered have their parallel nowhere in the history of the war, save in General GRANT's campaign against Vicksburg. The Forces Vedette of Murfreesboro—positions rendered by art the most formidable on the continent —were successfully turned by a flanking movement on the enemy's right. Many thousands of prisoners were taken, the whole of Tennessee recovered, and the enemy driven across the mountains to their stronghold at Chattanooga. It was a brilliant but bloodless victory.

At Tullahoma, General ROSECRANS found it necessary to plant himself down for a brief season. His communications had to be seen to. The rebels had burned the bridges and destroyed the railroad on their retreat, and June freshets of a severity unparalleled in the experience of the oldest inhabitant of this region, which would have rendered the best roads impassable, had put the poor mountain roads beyond the possibility of immediate use. For this delay he was once more blamed and reprimanded by those who sat in their bureaus at Washington. ROSECRANS, feeling keenly the injustice of these complaints, from men wholly ignorant of the topography of the country in which he was operating, resented them with corresponding bitterness—perhaps even with a bitterness beyond the bounds of military propriety, and than which his resignation would have been more dignified.

Imperative orders now came from the War Department that he must advance; and although feeling that his army (then about fifty thousand strong) was insufficient for a decisive campaign, he obeyed. The Tennessee river—a stream half a mile wide—was passed; the Cumberland range was crossed—a task equivalent to the crossing of the Alps. In moving against Chattanooga two methods were open to him: he might move by the north bank of the Tennessee river and force the passage of Chattanooga from the river thirty miles below, force his way through the passes of Lookout Mountain, and take Chattanooga in reverse. He chose the latter.

And here is the point at which it is proper to correct an erroneous public impression as to the true aim of the battle of Chickamauga. It is currently supposed that General ROSECRANS took possession of Chattanooga, and then imprudently passed beyond and got beaten at Chickamauga. Precisely the reverse is the case. The rebels, finding their position at Chattanooga turned, moved out to plant themselves on the main road (the Rossville road) between ROSECRANS and Chattanooga. The contest of two days at Chickamauga was for the road by which he might get *into* Chattanooga. By an all night march, he succeeded in reaching the road first, soon followed by the rebels, each coming to it at an angle, the heads of the columns giving battle, and the line gradually closing together in the manner of the two ends of the illustration of General GARFIELD, "we should close up a pair of "shears." General ROSECRANS held the road and then the situation, but Chickamauga was the price that had to be paid for it.

We have no intention of again entering upon an analysis of this battle, and will merely touch upon such portions of General GRANT'S conduct during this action, as were made the occasion for his removal. When the rebels pierced the right wing (a fatal step which was occasioned by an ambiguously-worded order of a staff officer, which occasioned the *withdrawal* of General WOOD'S division from its position in the line of battle) General ROSECRANS and Staff were forced back in the rear of General GRANT, who directed the right and centre of the army. In order to reach the right and centre, General ROSECRANS had to climb Mission Ridge and make a detour of seven or eight miles. When he had got as far as Rossville, the point at which he might either turn Southward and make to the right and centre, or turn Northward and make to Chattanooga, word was received that STANLEY'S division had been broken and routed. Now NEGLEY held the extreme left. Unfortunately, at the same time, there was a general lull along the whole battle front; so that, to General ROSECRANS' apprehension every circumstance conspired to raise the conviction *that the whole army had been routed and that the last thing to could do was to return to Chattanooga, prepare for the reorganization of its shattered fragments and for a defensive battle.* He did so, and on reaching Chattanooga telegraphed to Washington his belief that the army had been beaten and routed.

The question of how we are to judge this conduct is so strictly bound up with the peculiarities of General ROSECRANS' mind that it may almost be said to turn on a question of metaphysics. General ROSECRANS is a man whose mental processes are incapable of staying at those half-way houses of impression and belief in which men ordinarily rest when they have not the means of judging with certainty.

He is by constitution an absolutist in thought. He knows only *convictions*, and when he has made up his mind to a conclusion, he cannot be moved from it. Hence he is either tremendously right or tremendously wrong. Unhappily, it was the latter at Chickamauga. General GARFIELD, his Chief of Staff, who had accompanied General ROSECRANS to that point, which in his career, as well as in the face of the country was the "crossing of the roads," requested that he might be allowed to go on and try and reach the right and centre under THOMAS. He did so, and by night was able to send a dispatch to his Chief, telling him that not only was the army not routed, but that it had made most gallant fighting and held its own. If General ROSECRANS had been correct in his theory and right in his convictions as to the fortune of the day, he did the best thing that could possibly be done in returning to Chattanooga. He was *not* right in theory, and his action in accordance with that theory was the fatal step of his life.

But was this a meet reason for removing General ROSECRANS? For our own part we think not. He

had achieved successes enough to wipe out many such errors of judgment. But those who sit in the war-offices at Washington thought differently. We have seen the hickerings and recriminations that passed between General ROSECRANS, the Secretary of War and General-in-Chief. We think we do not overstate the matter when we say that something like hostility had been engendered in their minds towards him. We would fain not credit the reports which we receive on good authority, that the Secretary of War has actually charged General ROSECRANS with cowardice! We hope he is incapable of such an access of folly. Nevertheless, as we before said, we consider the removal of General ROSECRANS a deplorable mistake, and the motives for the removal of an order unworthy the dignity of those who direct the military operations of a great nation engaged in war. ROSECRANS was no doubt rash and in some regards wrong. Secretary STANTON has also been rash and in other regards wrong. We could have wished that the President, at the beginning, had come between the angry points of the two and saved to the nation a man who is so generally regarded as perhaps, on the whole, the ablest military head the war has produced, and whose services to his country have been of incomparable value and splendor.

LANCERS AND DRAGOONS.

IN our service, both regular and volunteer, as at present organized, we have nothing but cavalry; or rather, as that is the genuine term for mounted troops, we should say we have no distinction of corps in that arm. During the Mexican war, and since 1836, indeed, we had dragoons, at least in name, and at one time a regiment of mounted riflemen. Soon after the war broke out they were all merged into the single cavalry force. But of *lancers*, we have in the regular service made not a single experiment, and *but* a single one that of Colonel RYAN'S regiment, among the volunteers. The fate of that is well known; the steeds are sent out, but "the lances are rust," "turned in to the "quartermaster," and unlikely to see the light again. The regiment, losing its old designation, is now the 6th Pennsylvania cavalry. And yet in the European service the lancers have been a favorite corps, and have been a useful weapon. The philosophy of it in charging *en fond* upon infantry in line or square is evident. The bayonets of the infantry, added to the length of the horses' neck, keep the trooper at such a distance that he cannot use his sabre; while the lancer, with a weapon from eleven to thirteen feet long, overcomes the distance, and impales the footman in spite of his bayonet. On this ground MARMONT recommends it strongly against infantry, but he goes on to say "all other "things being equal, it is certain that a hussar or "chasseur will beat a lancer; they have time to parry, "and return the blow, (*ripostez*) before the lancer who "has thrown himself upon them, can recover himself "for defence."

In theory at least the lance is admirable, but in practice it is unwieldy and awkward, and, if useful at armslength, is by no means so serviceable in a *mêlee* as a sabre. We were told by one of RUSH'S men, on asking how he liked the lance :—" The officers like it, but "the men do not, and the officers wouldn't if they had "to use them."

While granting that the weapon has not had a fair trial in America, we are inclined to think it better for show—a forest of spears and pennons—than for use. It is, however, just to say that this is an individual opinion, for Lord BLANKENSHIP, writing in the *Quarterly Review* for June 1855, declares his opinion—and it was not an ignorant one—" that the lance is by far "the superior weapon, in the hands of a horsemen "bred and trained to its use."

Dragoons, in the best appropriation of the word, are mounted infantry; men who use their horses only to get over or over-take the enemy, and then dismount to fight. We are glad to see that this arm is being renewed in our service, and it will be especially valuable for reconnoissances, and sudden dashes at points which if taken should be held. Cavalry, as such, only capture and turn over to infantry. Well-drilled dragoons will both capture and hold.

In so vast a service as ours, with such various and manifold demands upon our skill, ingenuity and cleverness, it is worth considering whether a reorganization of our cavalry would not be an excellent movement; dividing it into several arms and distinctions of service.

THE ADVANCE IN VIRGINIA.

GENERAL MEADE, by an advance movement, begun on Saturday last, has transferred his front of operations from the line of Cedar Run to the line of the Rappahannock. This river was crossed at two points, at Rappahannock Station and at Kelly's Ford, the passage at the former place being forced by the Sixth Corps (General SEDGWICK) and at the latter place by the Third Corps (General SICKLES), in a manner that may justly be called brilliant. Public expectation will no doubt be on tip-toe to catch the sounds of battle resulting from a farther advance. But those who know the conditions under which military operations are conducted in Virginia, will hardly expect anything quite so prompt. It will be necessary to make a effective advance from the Rappahannock until the railroad shall have been completed down to that point, and it will take a week yet for that to be done. It is certainly desirable, however, that when the necessary preliminaries shall have been completed, a vigorous forward movement shall be made; for the capture of two of General BURNSIDE'S wagons in East Tennessee indicates that the rebel movement in that direction, whose extreme probability we pointed out last week, has already been begun. There is nothing in General MEADE'S line of advance thus far, or in the points at which the passage of the Rappahannock was made, to indicate by what line he purposes pushing on his advance beyond the Rappahannock. His present position is such that he can move either by the Fredericksburgh or the Culpepper route. If he means to take up the former line, the necessity of reopening the Acquia Creek and Falmouth railroad is obvious. The bridges over the Rappahannock, we should have it, is believed, been destroyed, but it is understood that the iron has not been disturbed. The enemy, however, is on the Rapidan, and it may be that General MEADE will be compelled again to take that line, the disadvantages of which had become so obvious when our Army occupied it last winter. We presume we have the best assurance that if the public is eager for active work in Virginia, it is not half so eager as is General MEADE.

As historical documents of great interest and importance, we need hardly do more than call the attention of our readers to the report of General MEADE on the battle of Gettysburg, and the report of Gen. LEE on the late campaign in Virginia. We published a few weeks ago the report of General LEE on the invasion of Maryland and Pensylvania, culminating in the battle of Gettysburg. The report of General MEADE now completes both sides of that campaign and battle. It is a little remarkable that the Confederate commander should be ahead of the Union General in the publication of his account of those campaigns, considering that both told against him. General MEADE, however, may have the good excuse that he has been too busy preparing to fight to have found time for historical composition. It is certainly much more important that he should *make* than that he should *write* history.

In the return of Hon. E. W. GANTT of Arkansas to his allegiance to the Government, we have the first instance of the return to the Union cause on the part of any confederate officer of prominence. Mr. GANTT is a well known citizen of Arkansas, and has held positions of influence in the Confederacy, having served with their armies in the field as a general and been twice taken prisoner by our forces. He has issued an address to the people of his State, in which he presents with great force the reasons for his abandonment of his comrades. The chief of these is the thorough conviction to which he has been brought by the stern logic of events that the rebels are fairly beaten and may as well end the contest at once. "Our armies," he remarks, "are melting, and ruin approaches us. "The last man is in the field, half our territory over-"run, our cities gone to wreck—peopled alone by the "aged, the lame and halt, and women and children; "while deserted towns, and smoking ruins, and phan-"atisos abandoned and laid waste, meet us on all "sides, and anarchy and ruin, disappointment and dis-"content lower over all the land."

And this dreary picture of the condition of the Southern States he finds unrelieved by a single ray of hope for the future. The United States will never abandon the struggle while a man remains, and when over the armed divisions at the North, Mr. GANTT sees clearly that they are only on the surface, scarcely going to the bottom of our politics, much less shaking the great masses of our determined people, among whom there is no division as fars as fighting is concerned. Therefore he wisely counsels submission to the inevitable, believing that the sooner the South lay down their arms and quit this hopeless struggle, the sooner wil the days of prosperity return. Seeing clearly that they have failed in the contest for negro slavery, which he presents squarely as the real issue of the contest, he urges that the negro should be no longer suffered to stand in the way of friends and kindred.

It will not be long before this instance of bold abandonment of the hopeless cause of rebellion will cease to be a solitary one. It is inevitable that the stern logic of necessity should soon lead many men fighting in the Confederate armies to the same conclusion with this repentant general; though all may not have the frankness or the ability to present so clear a showing of the reasons for their return to the protection of the old flag.

IN the list of Army Corps published last week, Major-General GEORGE STONEMAN should have been mentioned as the Chief of the Cavalry Bureau, and not the Cavalry Corps, as it was incorrectly printed. There are two Cavalry Corps; one in the Army of the Potomac, commanded by Major-General PLEASONTON, and one in the Army of the Cumberland, commanded by Major-General STANLEY. Major-General SICKLES was given as the commander of the Third Corps, but since the battle of Gettysburg, where that officer was disabled, the Third Corps is commanded by Major-General FRENCH, who has led it in all the actions in which it has been engaged since that battle. Gen. FRENCH now has the command of the united First, Second, and Third Corps, forming the left wing of the Army of the Potomac, and Major-General SEDGWICK of the Fifth and Sixth, forming its right wing.

INDIAN names are frequently euphonious and musical, but to see that they are not always so, one has only to read the names selected for the majority of the new fleet of wooden steamers lately ordered by the Government. Though Mr. LONGFELLOW succeeded in adapting some of those names to the trochaics of his *Hiawatha*, and aided the stumbling speech to pronounce them, we fancy our sailors will prefer choosing some nickname for their vessel to stopping to articulate "Kenamuxpa" or "Kontoonook" or "Pushmataha." The word *Antietam* for the designation of one of the vessels of this fleet is a good one, and we are glad to hear that the Navy Department will continue to recognize the valor and success of the sister service, by attaching to its war vessels the names of some of our victorious battle-fields.

THE accounts we got from the officers of the Squadron off Charleston of the ability and endurance of the *Ironsides* are of the most flattering kind. Of all the iron-clad fleet, that vessel has been the least injured, and has done by far the most service. She has required few repairs, and in every respect has worked admirably. The lesson of the success of this broadside iron-clad will not, we are sure, fail to be heeded by the Navy Department.

SEVERAL of the daily newspapers having asserted that the Secretary of War had communicated through the Adjutant-General a modification of the late order relative to the discharge of men from military service by civil courts, it is proper that we should state that no such modification of the order referred to has been made in any form whatever.

IT is not Brigadier-General ALEXANDER HAYES who has been ordered to duty as Assistant Provost-Marshal-General in Kentucky, as has been incorrectly stated; but Brig.-Gen. WILLIAM HAYS, who had previously been on court-martial duty in Washington. Brigadier-General ALEXANDER HAYES continues with his command in the Army of the Potomac.

WE commence this week a series of articles on Fortifications. In view of the frequent lack of opportunities for the study of military science among our brave officers, we shall make these articles of a somewhat elementary character; hoping to excite, especially among Volunteer officers, a greater degree of zeal in the study of their profession.

THE PRESIDENT has accepted the resignation of the following officers:—Brigadier-General THOMAS L. KANE, U. S. Vols; Captain W. C. PAINE, U. S. Engineers; 1st Lieutenant HARRISON MILLARD, 19th U. S. Infantry; 2d Lieutenant WILLIAM DEVINE, 9th U. S. Infantry.

FOREIGN MILITARY AND NAVAL MATTERS.

The Agramer *Zeitung* states that apprehensions are entertained of an impending conflict between Turkey, Servia, and Montenegro. The signal is expected to be given by Servia, which is in a state of great disaffection.

SPAIN is not behind the rest of the countries of Europe in war expenditure this year. The estimates for expenses for 1863 show an augmentation already of eighty millions of reals, originating, doubtless, in some measure from the expedition to Mexico.

A SCORCHING journal proposes a recent speech of the King of Denmark in which he declared his readiness, in case of his States being overpowered by Germany, to start a republic, to consist of the Danish Isles. The KING said: "I will descend from the throne to declare the republic. I am convinced that no people in Europe is more fitted for the republican regime than my dear Danish people."

THE old NAPOLEON, with Briesne hat and historical great-coat, is to come down from the Vendôme column at last. The first NAPOLEON put it there to the honor of an Imperial CÆSAR, but this angry Prussians and returned emigrants pulled to the earth with a crash. The present NAPOLEON was then hoisted on the column—the NAPOLEON of the French people; but this modern hero on a Trajan column was an anachronism no longer to be endured. A new statue is ready that announces the advent of a third NAPOLEON, to replace the present bronze.

THE Spanish screw frigate *Concepcion*, thirty-seven guns, Captain MCCRODEN, from Carthagena, arrived at Cadiz on the 15th of October, with the first battalion of infantry marine, which is to relieve the Spanish marine army in the HAVANA. The fourth battalion of infantry marine was expected at Carthagena to replace the second battalion, which was to proceed immediately for the HAVANA. The Spanish contingent destined for Cuba, Porto Rico, and St. Domingo, viz.:—4,000 infantry and 250 artillerymen, is to be ready to march from the ports of the Peninsula by the 15th of November.

BY the last accounts from New Orleans," says RUSSELL'S *Letter of New York*, "we have learnt that two officers—the Paymaster and Assistant-Surgeon of Her Majesty's steam-sloop *Styx*—had descended, We do not know in what other capacities, to make, we more to one of the contending parties in America than to another. All that we have been told is that they have seceded from the *Styx*, and that there is no service on the part of the commander or their shipmates to re-unite" them, from the fact that before taking flight they had "left the commission of their resignation under the Articles of War and good discipline, rendered themselves amenable to be tried by a court-martial. The service is short of such fellows as these Paymasters, who might almost be tempted to wish General BUTLER once more on the banks of the Mississippi. Cowhides, however, notwithstanding his absence, are not altogether obsolete in Louisiana.

AN English officer engaged in the war in New Zealand, writing from the Waikato river, on the 27th of July, bestows the highest praise on the gallant conduct of General CAMERON, the commander of the British forces there. It appears that the enemy, 450 strong, came in front of the British position, when the 40th regiment's troops walked out in equal numbers. The regiment, a young one, hesitated for a moment to charge the rifle pits, and then it was that the General rushed on with his cap in one hand and a riding whip in the other, within fifteen yards of the work. The enemy aimed at him, and shot Colonel CRISPIN, who was close to the right of the arm. The troops then rushed on and carried all before them. In an hour and a half they had scattered their assailants, killing forty of them, and wounding as many more. General CAMERON, in short, displayed his gallantry at the right moment, and set an example which was not lost upon those who followed him.

"The General," the writer adds, "is a wonderful man under fire. We must not let him get so far ahead again. It is a misery to see him in danger."

THE following improvements in the manufacture of armor-plates have been recently patented by Mr. T. BROWN, of Sheffield, England, being a communication from ALEXANDER HOLLEY, of New York. The invention has for its object improvements in the manufacture of armor-plates for ships and other structures. For the construction of these plates of armor it is usual to one on the other, having between them crushed or pulverized frankincense, spiegel iron, or similar metal; this pile is then subjected to a suitable heat, and the frankincense, spiegel iron, or other similar metal to unsome a pasty or melted state, and the wrought-iron plates to be brought to about a welding heat, so that when rolled or pressed the parts of the pile will combine. The rolling is to be continued till the mass is reduced to the thickness of any definite plate, or pairs of such compound plates are piled one on the other with pulverized frankincense, spiegel iron, or other like metal between them, and this pile is to be heated and rolled or pressed, and reduced to the desired thickness, either for an armor-plate, or for being again piled with other plates, as above explained. Plates may be used when found desirable."

MR. P. M. PARSONS, of London, has lately published a practical treatise on great guns, the main object of which is to explain the probable advantages of lining with wrought-iron tubes the cast-iron ordnance of which England possesses so great a quantity. It does not appear that he has thus actually altered any guns, or made any experiments; his conclusions being founded wholly upon reasoning, partly of a theoretical, and partly of a practical character. He proposes to bore out the breech of a cast-iron gun, and to bore out the chase to the same diameter, and to turn truncated. Thus an 8-inch gun may be bored out to say 16-inch at the breech, the boring tapering to perhaps 10-inch at the front of the trunnions. He proposes to make the cylinders of a form to fit the enlarged cavity are then to be forced in by pressure from the rear. The breech is then to be closed by a screw plug, screwed in. The transverse strength, Mr. PARSONS estimates, would be increased nearly five-fold, while the longitudinal strength would be almost doubled. In altering such a 68-pounder, Mr. PARSONS estimates boring out 7,500 cubic inches of cast-iron, surface turning and boring 2,500 square inches, and forging and cutting 1,116 square inches of screw thread, all costing £50 at the outside, and where guns are altered in quantity, "considerably less."

GAS AS A FUEL FOR STEAM BOILERS.

That the comparatively non-portable character of steam engines has prevented their application on carriages in very numerous instances where that agent could, under other circumstances, be most advantageously employed, will be readily acknowledged, even by those who are unacquainted with the continued efforts that have been from time to time made by inventors to obtain a truly efficient substitute for the steam engine, owing to that very circumstance. At present, however, it appears to be beyond question that no substitute for steam power has been hitherto discovered which has been seriously looked forward to as an economizing of fuel; but at present used, no discovery of a new and economic power is capable of widely replacing it, in the precise place where the power is required—capable of locomotion. Steam power is entirely a question of too costly to be employed, and it has hitherto been considered that, inasmuch as the substitution of gas for coal was superseding a cheap fuel by a dearer one, gas power, if it could could not fail to be unsatisfactory. With regard to the employment of gas, adequate proof has been given that the argument against it is fallacious. That it is cheap per and actually is, employed in the generation of steam in a manner which proves that the economic value of the coal from which it is made, while it, moreover, possesses advantages to which coal can lay no claim. We have, during the past week, seen in operation at the works of Messrs. Price and Butler-Works, Wenlock-road, an exceedingly compact vertical steam-boiler made by them for the purpose of supplying heat from gas, as referred to by Professor Jackson, in which ordinary coal gas was the only fuel used. The boiler in question is of the ordinary kind of a hoop gas engine, and the steam was maintained at a pressure of about 5 lb. with one small burner only in use, the consumption of which is stated to be about 4 cubic feet per hour. Upon the sixteen burners being turned on (they all light from one another), the pressure gradually increased, until it reverberated between 8 and 9 lb. on the square inch had been attained, the aggregate consumption of gas during that time being 64 cubic feet. In fact, for per hour, so that a pressure of 4-lb. was obtained with gas, which, at the price charged by the London gas companies, would cost less than 10½d. The gas was used in the manner of steam, and in the careful construction of the boiler, by which a heating surface of 10ft is secured, and in the use of a kind of fire-bridge, which, by means of a current of steam, supplies air to be consumed in combination with the gas.—*Mining Journal.*

CELEBRATION OF THE BATTLE OF LEIPSIC.—Sunday, October 18th, the fifty-first anniversary of Leipsic, on which NAPOLEON I was defeated by the allied German armies, was celebrated with much ceremony and rejoicing at Leipsic, and also at many other places throughout the German states. The countries where troops were sent to form the allied host. Public worship was conducted, and at some particular places great pains had been taken with the ceremonies and in the preparation of devices. One of the most notable of these places was the ancient grain market of Leipsic. The Konigsberg Corps fought their way, and thus obtained an entrance into the town. There and also at the small monument which was erected upon the field of battle, triumphal arches full sixty feet high were erected, and were decorated with laurel banners. Four other arches were erected, and were decorated with laurels. The Corinthian column, and with a profuse display of the black, red, and gold flag, the German emblem. The gate from the town over which Prince was blown up by NAPOLEON'S command, to prevent the pursuit of the enemy, was also gaily decorated. The ancient council-house of Leipsic was decorated during the day's display of flags, and other festive emblems. Over the marketplace entrance was a rich green and white drapery, whilst over the portal of the council-house was a shield, and also the word "October" shone resplendently in golden letters of large dimensions. The Rathhaus also bore a gigantic cubana, also decorated with laurels and flags, and on it the *Te Deum* was sung in the morning by the united soldiers of the churches. Grand music, including the "Hallelujah Chorus," from HANDEL'S "Messiah," and with a song of praise composed in 1814, which was succeeded by the air, well known to Germans, "Ich bin ein Preusse," took place in the proceedings. The houses opposite the Council-house, the station of the Thuringian railway, were also decorated, and on one was a large transparency, on which were the words, "Base is the nation which does not stake all upon its honor," while many of the decorations also contained allusions and patriotic expressions of a similar nature. Most of the cities, towns, and villages were represented by deputations of two of their inhabitants, but Berlin sent fifty-two persons as representatives of the capital. Many veterans who had been present at the battle were also present as honored guests, and in the morning these men naturally visited those places most hallowed in their memories. One principal point of attraction to these aged warriors was the Napoleon stone, a simple block of granite, which marks the spot on which the Emperor stood when he directed the fight on October 18, and whence he issued his orders during the battle. Here, also, in the afternoon, he received intelligence of the continued superiority of forces on the part of the enemy, and here it was that he issued the order for the retirement of the French troops; and from whence, being exhausted, and his maps and field plans, he sank into a short slumber, in which he was awakened by MURAT, King of Naples. Although the celebrations in Leipsic were to a close, nothing was done to offend the national pride of the conquered. The principal ceremonies took place on the evening of Sunday, and on Monday a procession, consisting of 20,000 persons, paraded the town and scoured the battle-ground. At 2 P. M. on Monday there was a solemn religious service, in accordance with the proclamation issued by the KING, expressive of a wish that a service should be held in every church throughout the kingdom in commemoration of the people's battle; and at various other places the day was observed in a similar manner.

FRANCI AND MEXICO.—M. GUTHROLE, deputy from Paris, takes notice in the *Opinion Nationale* of the rumored intention to annex Mexico to the empire. He says the project most vehemently. *He says that instead of* 30,000 *French troops which were sent to Mexico, 100,000 or 120,000 will be required to hold the country permanently.* To show that this estimate is not extravagant, he observes that 40,000 men were thought sufficient to conquer Algeria many years, although the area of that country is eight or nine times less than that of Mexico. In this provision he bases one of the principal objections to the war with the Dukte States; but if only thirty thousand filibusters and volunteers were sent annually to help FRANCE in keeping up guerilla warfare, *he thinks that a third of the French force would be attached to waiting hand against them.* To put the matter in a still more striking light, he says that the war in France has already spent two hundred millions to get back sixty; and that it continues the occupation to get back not two hundred millions, but two thousand, by the total withdrawal of the army of occupation without delay.—*Paris Correspondent.*

A GOOD MAN AND A TRUE.—The following remarks, from the *Army and Navy Journal of Connecticut*, from a non-commissioned officer of the New York Artillery we have the number but prefer not to give it), is a hotel in the city occupied by the soldiers of the Union, and we have given him on account of his remarkably good conduct and bravery. Though he describes himself as a "cook," he can still claim that he is a hero of no pretentious soldier. The conversation was started by the entrance into the room of a black French poodle. The following is the result:

"There's a French poodle. I know it is. I used to be in the line of promotion myself, and I know it's something. Did I find soldiering pay better? Yes I did! I always spend all I can get. I can't help it. You see I've had a family, and I've my little account at a bank ready for the little place I have in the battery, and I spend it all, and I fight for my country. Here in New York I used to get some money, but I'm off now. I'm a hero, and the more good than what I get now. And then I know, all the time I'm doing my country's work. I'm a soldier, and soldiers and there are 'segars!' I'm a *soldier*, dear through.

"I have lost two batteries since this war began, and I have been all through the fighting from the first. We came out of one fight with seven men, and out of another with 17. I should be sorry to say how many I was out of those five. It seems strange to me that while I have not laid out an excused me, who had wives and mothers and children, I shouldn't be. I'm a hero, I am. I haven't got a sucker, or a wife, or a baby, or a sister, or a brother that they depend on me for. I've laid hundreds of men in lots of folks to mourn for them. I wish, sometimes, that I could have been laid out in the place of any of those poor boys. Some of them had wives and babies, and I've seen some honor in dying for my country. I am going back in a few days, and if I should get an arm or a leg shot off, I'll come back to New York and live on it. I'll use my living. I hope if they hit me they will kill me. I am ready to die, any day, for my country!"

THE LIGHT DRAFT MONITOR "YAZOO."—One of the twenty light draft Monitors ordered in March last by the Government, is now nearly completed at the yard of Messrs. Sheldon and W. A. CRAMP & SONS, Kensington, Philadelphia. The *Yazoo* will be 225 feet in length over armor, breadth of beam 45 feet 6 inches, and depth of hold 11 feet 6 inches. Her vessel will have a flat bottom, with one inch dead rise, the keel to be formed of three thicknesses of iron.

The sides of the inner hull are vertical, and standing while is another iron hull, having also vertical sides, the depth of which is about 6 feet, and the space left for coal. The space between these hulls is arranged so as to be filled with water at pleasure, for the purpose of giving the vessel greater stability when steaming, and to enable her to float in shoal water. The interior of the vessel is divided into compartments by means of iron bulk-heads of plate-iron, communication between them being afforded by watertight doors and hatchways. The water compartments will be filled and emptied by two powerful pumps, each capable of delivering three thousand gallons per minute.

For propelling the vessel, two engines, working entirely independent of each other, are provided. They are 24 cylinders of each will be 22 inches diameter, and 30 inches stroke of piston. These are to be connected with two propellers of cast-iron, 9 feet 3 feet in diameter and 12 feet pitch. The surface condenser will have 3,294 inches, with a cooling surface of 2,500 square feet. There are to be two horizontal tubular boilers, each to have four furnaces, with a grate surface of 150 square feet, and a fire surface of 4,120 feet.

These are also to be two circulating pumps, with a double oscillating engine for driving them. The draft of water for this vessel, when loaded, will be 6ft feet; area of water line 7,875 feet; displacement of water when loaded, 1,335 tons; 17 2-10 tons; and total displacement at 6½ feet draft, 1,177

tons. The work on this Monitor is of a superior character, and will regain sold to the reputation of her builders. The lofting and backing of wood, size of turrets, condition of deck and interior being the same as the old Monitors, a description is rendered unnecessary.

NEW JERSEY VOLUNTEERS.

List of promotions, appointments and casualties in the New Jersey Regiments, in the service of the United States, since October 1, 1863.

1. PROMOTIONS AND APPOINTMENTS.

FIRST REGIMENT.—First Lieutenant Isaac T. F. Silvis, of Company B, to be Adjutant, September 29, 1863, vice Vroom, promoted.

SECOND REGIMENT.—Captain Robert Gaston, of Company A, to be Major, June 25, 1863, vice Stickney, resigned.

First Lieutenant Joseph C. Bedle, Regimental Adjutant, to be Captain of Company K, to be Captain of Company I, September 24, 1863, vice R. H. Lee, resigned.

SIXTH REGIMENT.—First Lieutenant Michael Mallory, of Company K, to be Captain of Company I, July 24, 1863, vice Barrett, Quartermaster, promoted.

Sergeant Major Joseph W. Johnson, to be First Lieutenant of Company A, October 27, 1863, vice Conrein, promoted.

Fourth Sergeant Henry Hall, of Company B, to be Captain of Company D, to be Captain of Company D, October 8, 1863, vice Sine, appointed.

First Lieutenant Joseph E. Mason, of Company K, to be Captain of Company K, October 8, 1863, vice Dorrance, promoted.

Second Lieutenant Henry Burtis, of Company A, to be First Lieutenant of Company K, October 8, 1863, vice Donald, dismissed.

Second Lieutenant Martin A. Gunning, of Company I, to be First Lieutenant of Company K, October 8, 1863, vice Mason, promoted.

Sergeant Major John W. Whitall, to be First Lieutenant of Company B, October 8, 1863, vice Page, resigned.

Sergeant James Lilley, to be First Lieutenant of Company H, October 8, 1863, vice Longstreet, resigned.

Private Smith Hall, Hospital Corps, to be First Lieutenant of Company D, October 8, 1863, vice Todd, promoted.

TENTH REGIMENT.—First Lieutenant Joseph H. Franklin, of Company C, to be Captain of Company I, September 11, 1863, vice Hall, resigned.

Second Lieutenant John E. Pepper, of Company C, to be First Lieutenant of Company C, October 8, 1863, vice Franklin, promoted.

Second Lieutenant George W. Hummell, of Company D, to be First Lieutenant of Company B, October 7, 1863, vice Axe, retained.

Second Lieutenant Silas R. Kester, of Company B, to be First Lieutenant of Company D, October 7, 1863, vice Sooy, promoted.

Color Sergeant George W. Taylor, to be Captain of Company E, to be Captain of Company E, October 24, 1863, vice Kester, promoted.

Sergeant Benjamin A. Pine, to be Second Lieutenant of Company E, October 24, 1863, vice Taylor, promoted.

Sergeant Robert Love, to be Second Lieutenant of Company F, October 24, 1863, vice Hoagland, resigned.

ELEVENTH REGIMENT.—Second Lieutenant James A. Carr, of Company D, to be First Lieutenant of Company D, July 3, 1863, vice Lydon, promoted.

Sergeant Thomas H. Egan, to be First Lieutenant of Company D, October 8, 1863, vice Corry, promoted, and Axtell, declined.

SEVENTH REGIMENT.—Captain Edward G. Bibbins, to be Assistant Surgeon, October 2, 1863, vice Dayton, promoted.

First Lieutenant Charles Hopkins, to be Captain of Company E, October 8, 1863, vice Koster, promoted.

First Lieutenant Edward Hall, of Company F, to be Captain of Company F, October 29, 1863, vice Lucas, promoted.

THIRTEENTH REGIMENT.—First Lieutenant Charles J. Field, of Company E, to be Captain of Company E, October 14, 1863, vice Sandford, promoted to Major.

Second Lieutenant Samuel S. Miller, of Company B, to be First Lieutenant of Company B, October 14, 1863, vice Field, promoted.

Sergeant Major Thomas Bowne, to be Second Lieutenant of Company B, October 14, 1863, vice Miller, promoted.

II. CASUALTIES.

RESIGNATIONS, &c., REPORTED SINCE OCTOBER 1, 1863.

SECOND REGIMENT.—Second Lieutenant Edward C. Schenck, of Company E, resigned, October 17, 1863.

Second Lieutenant Wm. T. Adamson, of Company K, dismissed, September 30, 1863.

James Bell, to be Second Lieutenant James Dalzell, of Company B, dismissed, October 2, 1863.

FOURTH REGIMENT.—First Lieutenant George A. Bennett, of Company G, resigned, April 6, 1863, previous report of dismissal incorrect.

First Lieutenant Edward Hall, of Company F, resigned, September 28, 1863, to accept appointment in Signal Corps.

SECOND REGIMENT.—First Lieutenant Joseph C. Bedle, of Company I, resigned, October 24, 1863.

SIXTH REGIMENT.—First Lieutenant Charles M. Patrick, of Company K, resigned, October 7, 1863.

Second Lieutenant Wm. Hands, of Company B, died ——, 1863.

ELEVENTH REGIMENT.—Captain William B. Dunning, of Company K, dismissed, September 14, 1863.

First Lieutenant Henry B. French, of Company B, resigned, October 5, 1863.

First Lieutenant Edwin R. Good, of Company F, resigned, October 7, 1863.

Second Lieutenant Joseph C. Baldwin, of Company F, declined appointment as First Lieutenant of Company C.

TWELFTH REGIMENT.—First Lieutenant Theodore T. Lowe, of Company G, died, October 30, 1863, of wounds received in action at Bristoe Station.

FOURTEENTH REGIMENT.—Captain Ralph B. Gouley, of Company C, resigned, October 3, 1863.

THIRTEENTH REGIMENT.—First Lieutenant Charles M. Patrick, of Company K, resigned, October 7, 1863.

Second Lieutenant George Martin, of Company C, dismissed, October 5, 1863.

THIRTY-SECOND REGIMENT.—Second Lieutenant Joseph F. Penn Gaskill, of Company D, First Sergeant Frederick Wentworth, appointment as Second Lieutenant declined.

THIRTY-THIRD REGIMENT.—Captain John Sinclerd, of Company C, dismissed, August 29, 1863.

Captain Henry C. Bartlett, of Company G, dismissed, August 29, 1863.

Second Lieutenant Francis Tully, of Company K, dismissed, October 5, 1863.

MASSACHUSETTS VOLUNTEERS.

The following Commissions have been issued by direction of the Governor of Massachusetts:—

FIFTEENTH REGIMENT.—First Lieutenant-Colonel George C. Joslin, of Worcester, to be Colonel, July 4, 1863, vice Ward, killed in battle.

FIFTEENTH REGIMENT.—Second Lieutenant Charles H. Ward, of Boston, to be Captain, April 13, 1863, vice N. F. Hallowell, promoted.

Lieutenant John Kelliher, of Bridgewater, to be Captain.

Lieutenant Edward Bowditch, to be Captain.

Sergeant Simeon Spencer, of Taunton, to be First Lieutenant, September 9, 1863, vice Bowditch, promoted.

Sergeant Charles A. Reed, of Boston, to be First Lieutenant, September 9, 1863, vice Kelliher, promoted.

Sergeant John Wilson, to be First Lieutenant of Company H, October 3, 1863, vice Longstreet, resigned.

John Smith, Hospital Corps, to be First Lieutenant of Company D, October 8, 1863, vice Todd, promoted.

TENTH REGIMENT.—First Lieutenant Joseph H. Franklin, of Company C, to be Captain of Company I, September 11, 1863, vice Hall, resigned.

Second Lieutenant John E. Pepper, of Company C, to be First Lieutenant of Company C, October 8, 1863, vice Franklin, promoted.

Second Lieutenant George W. Hummell, of Company D, to be First Lieutenant of Company B, October 7, 1863, vice Axe, retained.

Second Lieutenant Silas R. Kester, of Company B, to be First Lieutenant of Company D, October 7, 1863, vice Sooy, promoted.

Color Sergeant George W. Taylor, to be Captain of Company E, October 24, 1863, vice Kester, promoted.

Sergeant Benjamin A. Pine, to be Second Lieutenant of Company E, October 24, 1863, vice Taylor, promoted.

Sergeant Robert Love, to be Second Lieutenant of Company F, October 24, 1863, vice Hoagland, resigned.

ELEVENTH REGIMENT.—Second Lieutenant James A. Carr, of Company D, to be First Lieutenant of Company D, July 3, 1863, vice Lydon, promoted.

Sergeant Thomas H. Egan, to be First Lieutenant of Company D, October 8, 1863, vice Corry, promoted, and Axtell, declined.

SEVENTH REGIMENT.—Captain Edward G. Bibbins, to be Assistant Surgeon, October 2, 1863, vice Dayton, promoted.

First Lieutenant Charles Hopkins, to be Captain of Company E, October 8, 1863, vice Koster, promoted.

First Lieutenant Edward Hall, of Company F, to be Captain of Company F, October 29, 1863, vice Lucas, promoted.

THIRTEENTH REGIMENT.—First Lieutenant Charles J. Field, of Company E, to be Captain of Company E, October 14, 1863, vice Sandford, promoted to Major.

Second Lieutenant Samuel S. Miller, of Company B, to be First Lieutenant of Company B, October 14, 1863, vice Field, promoted.

Sergeant Major Thomas Bowne, to be Second Lieutenant of Company B, October 14, 1863, vice Miller, promoted.

THE BATTLE OF BRISTOE STATION

REBEL OFFICIAL REPORTS.

GENERAL LEE'S REPORT.

HEADQUARTERS ARMY OF NORTHERN VIRGINIA, }
Oct. 20, 1863. }

General S. Cooper, Adjutant and Inspector-General:

GENERAL—In advance of a detailed report, I have the honor to submit the following account of the operations of the army, following those of the recent operations of this army:

On the 13th inst. General Hill engaged an engagement with the Federal army, which was encamped around Culpepper Court House, extending from the Rapidan to the Rappahannock River on the 9th inst., and advanced by way of Madison Court House. Our operations were completely successful, the enemy was driven and cut-up, and the movement proceeded with the observation of the enemy.

General Fitz Lee's division, supported by a brigade of Stuart's cavalry, was ordered to hold our lines south of the Rapidan. General Stuart, with Hampton's and Robertson's brigades, was ordered to cross the Rapidan at Raccoon Ford, and attacked the advance of the enemy near James City, on the 9th, and drove it back to the main body of the enemy, which was encamped in force on the north bank of the river, and discovered that the enemy had retreated from his position. Pursuit was immediately ordered, and the movement of the army was continued during the rest of the day to position the troops, but the cavalry, which had been ordered to the front, was pushed forward to the Rappahannock. A large force of Federal cavalry was found to cross the Rappahannock at Kelly's Ford, and pursued towards Brandy Station.

Near that place the commands of Stuart and Lee united on the morning of the 11th, and the whole force of the enemy became drove the enemy's cavalry across the Rappahannock with heavy loss.

Upon the morning of the 12th we were prepared to cross columns, with the design of reaching the Orange and Alexandria Railroad, between the Rappahannock and Bull Run, at Warrenton.

After the retreat with some of the Federal cavalry at Jeffersonton, we reached the Rappahannock at Sulphur Springs on the night of the 12th. Hill's advance at the river was disputed by cavalry and artillery. The enemy's infantry was found to be in considerable force on the north bank, strongly intrenched in industry and a battery. Early next morning, 14th, the march was resumed, and the enemy's position was found to be strongly intrenched on the north bank. Preparations were made to supply the troops with provisions. The enemy fell back at this point, and the line of the Rappahannock was held by the 14th. The pursuit was continued a portion of the army moving by way of New Baltimore, towards Bristoe Station. The movement proceeded with the main body of the cavalry, proceeding to the same point by Auburn Mills and Greenwich. On the 14th, Hill's corps encountered the enemy between General Lee's advance and the rear guard of the enemy, which was forced back to the line of Cedar Run.

The retreat of the enemy was conducted by several direct parties which, while they were unsuccessful, were made in difficult and delicate routes. We were consequently unable to intercept him. General Hill's corps, with Fitz Lee's division, and Stuart's cavalry, leading of two brigades, became engaged with a force largely superior to their own, which they drove back with considerable loss. The enemy's force of which we have not been officially reported, but the brigades were engaged were Kilpatrick's division of cavalry, with a number of infantry regiments. Before the rest of the troops could be brought up and the position of the enemy ascertained, he retreated in the direction of Centreville. The enemy was reported to be fortifying beyond Bull Run, extending his line from Centreville to Manassas Junction.

The vicinity of the intrenchments around Washington and Alexandria rendered it useless for us to attack them, as it was apparent that he could readily retire to them, and would decline an engagement unless attacked by us. Under the circumstances, therefore, it was deemed unnecessary, and after destroying the railroad from Cub Run to Bristoe Station, the army returned to the position on the 18th, to the line of that river, leaving the cavalry in the enemy's front.

The cavalry of the latter advanced on the following day, and some skirmishing occurred between them and General Hill's Hampton's division, retired slowly towards Warrenton, in order to draw the enemy in that direction, and ascertained that the force of General Lee, who moved from Auburn and attacked him near Buckland. It was no intention of the enemy to engage in force by turning upon the enemy, who, after a stubborn resistance, broke and fled in confusion, leaving in our hands many prisoners. The pursuit by the cavalry and artillery was continued, and the entire rear infantry was encountered, and, after capturing a number of prisoners, the enemy was finally driven across Broad Run, and the pursuit ceased. When the movement of the army from the Rapidan commenced, General Ewell's corps was ordered to move by the mountain roads, keeping in sight of the mountains on our left. This duty was well performed by that officer, and the enemy's line of communication Charlottesville and succeeded, by a well concentrated plan, in surrounding the place and capturing the garrison, with a large number of guns and all the stores and transportation. Only a few escaped to Harper's Ferry. The enemy advanced from that place in force to threaten the attack. General Imboden, who retired, bringing off his prisoners and captured property, his command not having lost a man. He destroyed some damage upon the pursuing column. In the course of these operations two thousand prisoners, with seven pieces of artillery, were captured, including forty-one commissioned officers. Of the above number, 1,600 prisoners and seven guns were captured by General Ewell.

A more complete account, with a statement of our loss in killed, wounded and missing, will be made in a detailed report as the necessary official reports have been received.

Very respectfully, your obedient servant,

R. E. LEE, Commanding.

GENERAL STUART'S REPORT.

BUCKLAND, VA., Oct. 20, 1863.

GENERAL—After effecting some considerable resistance to the advance of the enemy on the 13th instant, in accordance with the suggestions of Major-General Lee, I united with Hampton's division and Robertson's brigade, and moved to the front. On the 14th, in order, in order that Major-General Lee, coming from Auburn, might attack the enemy in flank, I moved by the road to Auburn, and on arriving at the point where the road to Auburn crosses the road from Bristoe's division, when, on hearing Major-General Lee's guns in their front, I immediately attacked and drove them back. They resisted my attack stubbornly, but once broken, the route was complete. We captured over two hundred prisoners, eight wagons and ambulances, arms, horses and equipments. The rout was the most complete that any cavalry has ever inflicted during this war.

Crossing at Buckland, General Lee was pushed down the pike towards Gainesville, and I moved in advance with the purpose that the's brigades who could not be collected after our unmanning long pursuit. Robertson's brigade was ordered to move on the left flank of the enemy's column, and, by moving rapidly, to attack in flank and rear the Cavalry brigade of Kilpatrick, which was encamped near Haymarket. Here I encountered, besides a large cavalry force, the First and Second Brigades of Cavalry, with the Fifth Corps of infantry, and the Carolina road. I attacked their infantry picket by moonlight and scattered them over the fields, capturing many. General Lee pressed down to within a short distance of Gainesville, when he encountered their infantry, and, supposing pressure was from Longstreet on that road else. The pursuit was continued until after dark. The cavalry force was commanded by Kilpatrick, and consisted of ten regiments. Most respectfully,

E. B. STUART, Major-General.

GENERAL IRDOEN'S REPORT.

HEADQUARTERS, VALLEY DISTRICT, }
IN THE FIELD OF THE SHENANDOAH, }
NEAR FRONT ROYAL, Oct. 16, 1863. }

Colonel R. H. Chilton, Chief of Staff:

COLONEL—Leaving Gainesville Sunday morning at two o'clock, I moved by Thoroughfare Gap, and reached Haymarket about daylight the same morning. Information on the enemy having no suspicion of our approach until I had reached the vicinity of the town, I moved my brigade in the rear of the town and Bull Run, and, one contingent halting on the brow of the hill, I moved with the cavalry, and the demand for a surrender Colonel Simpson requested to see Major-General Stuart. I refused him any audience. He said he would surrender if you can." Immediately opened on the building, while there was a free issue of prisoners. Many of the cavalry and officers rushed out the enemy into the streets, where he formed and fled in confusion. Colonel Wm. H. Payne, with the First Virginia, and the Eighteenth Cavalry, Colonel Imboden's and Gilmore's battalions, made a charge on the enemy's infantry, and completely routed them, and pursued them unconditionally. The colonel, lieutenant-colonel, and major, with the colors, surrendered to me. The rout was complete, and I moved forward to Harper's Ferry. The force I captured numbered between 1,200 and 1,500 men, and five hundred men and officers. I have not had time to have them counted. The number of wagons, ambulances, and ammunition destroyed, were considerable, all of which I have saved, and will have brought in. Before I left, I reported, the Harper's Ferry force—cavalry, artillery and infantry—appeared to Charlestown in less than two hours after I left, and I am informed that they pursued me to Gainesville, but reported I was prepared for them. I retired from the town and fell back on the Shenandoah Valley, taking the enemy's route. Our own cavalry still hung on their rear. My loss, as far as ascertained, is very small—five killed and fifteen or twenty wounded. Not a man, officer or free surrendered unconditionally. The colonel, lieutenant-colonel, and major, with the colors, surrendered to me. The rout was complete, and I moved forward to Harper's Ferry. The force I captured was the Ninth Michigan Cavalry, and the number of prisoners and horses between 1,200 and 1,500 men

DISMISSALS

During the week ending Saturday, November 7, 1863.

Surgeon William Worthington, 93d Pennsylvania Volunteers, to date October 12, 1863, for failing to report at headquarters Provost Marshal, under arrest, as ordered. Sentence has been published officially and failed to appear before the Commission.

Desertion.

Captain L. Ewell Kinzie, 26th Michigan Volunteers; First Lieutenants J. S. Huffman, 6th Pennsylvania Reserves, and John H. Reynolds, 6th Pennsylvania Volunteers; and Second Lieutenant C. Ritzy, 1st Maryland Potomac Home Brigade, to date October 12, 1863, they having been published officially and failed to appear before the Commission.

Captain Edward H. Brewster, 7th Maryland Volunteers, to date October 12, 1863, for absence without proper authority, having been published officially and failed to appear before the Commission.

Desertion.

Captain B. Bowley, 69th New York Volunteers, to date August 31, 1863; Captain Alfred J. Prentiss, 1st Maryland Cavalry, to date December 31, 1862 (and Second Lieutenant F. Stanley Bradshaw, 7th Maryland Volunteers, to date August 31, 1863, they having been published officially and failed to appear before the Commission.

Captain Lyman Wilson, 103d New York Volunteers, to date November 4, 1863, for violation of the 52d and 77th Articles of War, and absence without leave.

Captain William H. Leiser, 7th Indiana Volunteers, to date November 7, 1863, for disobedience of orders and absence without leave.

First Lieutenant W. H. Eacott, 2d Ohio Heavy Artillery, to date November 4, 1863, for disobedience of orders, neglect of duty and military discipline and unbecoming an officer and gentleman.

First Lieutenant Albert Pinkham, 1st Rhode Island Cavalry, to date January, to date November 4, 1863, for incompetency, and absence without leave.

First Lieutenant James P. Hall, 19th New York Cavalry, to date November 5, 1863, for absence without leave.

First Lieutenant and Quartermaster Henry Paschall, 58th Pennsylvania Volunteers, to date November 7, 1863, for incompetency.

Volunteers, to date November 7, 1863, for incompetency.

Assistant Surgeon Charles W. Lowell, 1st New York Cavalry.

Assistant Surgeon Charles W. Lowell, 1st New York Cavalry.

DISMISSALS REVOKED.

The orders of dismissal in the following cases have been revoked:—

Captain Zalman S. Main, 42d Indiana Volunteers; and he is allowed to remain in the service as of the rank to which he has been promoted.

Colonel H. Fowler, 6th New York Volunteers, he having been honorably mustered out of service on the 3d inst., the Secretary of War directs that they will stand dismissed from the service of the United States unless within fifteen days (to-day) from the 7th instant, of which the Adjutant-General should inform the 6th New York Volunteers, he presents, and make satisfactory defence to the charges against them.

Desertion.

Colonel A. H. Tippit, 39th Pennsylvania Volunteers.

Drunkenness.

Captain B. L. Thompson, 11th Pennsylvania Volunteers.

Absence without proper authority and drunkenness.

Second Lieutenant Thomas L. Stewart, 24 Pennsylvania Artillery.

Absence without proper Authority.

Second Lieutenant William Statham, 4th Delaware Volunteers.

Captain Alfonso P. Hinkle, 164th New York Volunteers.

Absence without proper authority, and failing to report at headquarters, Military District of Washington, as ordered.

First Lieutenant John Brooks, 1st Virginia Battery.

Absence without authority and attempting to leave the city of Washington in citizen's clothes.

Captain John McGeehan, 11th Connecticut Volunteers.

EXEMPT FROM DISMISSAL.

Colonel H. Reeder, 1st Regiment Sharpshooters, heretofore published, is exempt from being dismissed from the service of the United States, the Military Commission instituted by Special Orders No. 53, current series, from the office, having reported that satisfactory defence has been made in his case.

MEDICAL DEPARTMENT.

ORDERED.

Assistant Surgeon J. K. Rogers, United States Volunteers, has been relieved from duty in the Department of the South, and ordered to report to Surgeon Smith, No., and report in person to the Medical Director at that place.

Surgeon Thomas Reid, United States Volunteers, has been relieved from duty in the Department of the Gulf, and ordered to proceed to Cincinnati, No., and report in person to the Medical Director of West Virginia, for duty.

The Medical Board convened by special Orders No. 414, September 15th, 1863, of the War Department, and of which Lieutenant Colonel J. H. Hoffman, Assistant Inspector-General, is President, has been ordered to proceed without delay to inspect and report upon the United States General Hospital at Annapolis, Md.

Assistant Surgeon Thomas McMillan, United States Army, has been relieved from duty at Fort Monroe, Va., and ordered to report in person without delay to Surgeon General United States Army, to wait orders at the seat of government.

DISMISSED.

Assistant Surgeon W. B. Towne, 104th New York Volunteers, for conduct unbecoming an officer and a gentleman, drunkenness on duty and evil practices.

Surgeon William Worthington, 93d Pa., Volunteers, for failing to report when ordered to the Military Commission instituted by Special Orders No. 53 of the War Department.

MISCELLANEOUS.

So much of Special Orders No. 259, September 29th, 1863, from Headquarters of the Mississippi, as mustered out of service, Surgeon Rainer Stallman, 55th Ohio Volunteers, have been revoked, and he has been honorably discharged the service of the United States.

So much of Special Orders No. 479, October 26th, 1863, of the War Department, directing Surgeon J. H. Brinton, 13th Pennsylvania Volunteers, to report in person to the Medical Director of the Department of the Susquehanna for duty, is revoked, and he is directed to report to the Medical Director of the Army of the Cumberland for duty.

DISCHARGED.

Surgeon C. A. Robertson, 104th New York Volunteers, on account of physical disability.

Assistant Surgeon E. C. De Forest, 20th Ohio Volunteers, for incompetency.

Assistant Surgeon Charles Ferchaut, 12th Kansas Volunteers, for having failed to appear before a Medical Board or Examination, appointed to report upon his qualifications as a Medical Officer.

Assistant Surgeon J. H. Cassenglen, 39th Pennsylvania Volunteers, has been honorably discharged the service of the United States.

THE BATTLE OF GETTYSBURG.

GENERAL MEADE'S OFFICIAL REPORT.

HEADQUARTERS ARMY OF THE POTOMAC, Oct. 1, 1863.

GENERAL: I have the honor to submit the following report of operations of the Army during the month of July, including details of the battle of Gettysburg, and the pursuit of the enemy to the Potomac, to receive the reports of the several corps and division commanders, who were severally engaged in the battle.

On the 28th of June, I received orders from the President, placing me in command of the Army. The situation of affairs at that time is as follows:—The Confederate Army, commanded by General R. E. Lee, had defeated and driven the Army of the Potomac across the Potomac River, and advanced up the Cumberland Valley. Both the infantry and cavalry were divided, the former on the Susquehanna, between Harrisburgh and Columbia, and on the west bank of the Chesapeake and Ohio Canal, between Hancock and Clear Spring.

The 29th of June was spent in ascertaining the position and strength of the different corps of the Army, and issuing the necessary orders for its concentration at Frederick, which had been covering the rear of the Army in its passage over the Potomac, and was the point nearest the enemy. On the night of the 28th the force previously attached to the defences of Washington, Orders were issued for a day's rest to the troops at Frederick, and the Reserve Army, movements of the enemy, which indicated a concentration of his forces on the line of the Susquehanna, and the necessity of my own concentration, to meet the enemy, I issued orders for the movement of the Army on the following day, the 30th, in the direction of Gettysburgh, the Reserve Army, under General Sedgwick, leading the advance, and the First Corps, under General Reynolds, following on the road to Emmittsburgh, the Eleventh Corps, under General Howard, moving on the road to Taneytown, and the Twelfth Corps, under General Slocum, moving on the road to Littlestown. The Third Corps, under General Sickles, was ordered to follow the Twelfth Corps, and the Fifth Corps, under General Sykes, to follow the Third Corps. The Second Corps, under General Hancock, was ordered to Taneytown, to be in position to support the Eleventh or Twelfth Corps, as might be necessary. The First Cavalry Division, under General Buford, was ordered to Gettysburgh, and the Second Cavalry Division, under General Gregg, was ordered to the right flank of the Army, to watch the passes through the South Mountain, and to guard the trains. The Third Cavalry Division, under General Kilpatrick, was ordered to Emmittsburgh, to watch the roads leading from Gettysburgh to Frederick, and to keep me informed of the movements of the enemy on that flank. The Reserve Artillery was ordered to Taneytown, and the Reserve Brigade of Cavalry, under General Merritt, was ordered to the front, to report to General Reynolds. The Headquarters of the Army were ordered to Taneytown.

On the 30th the Army was put in motion, and on the evening of that day one of the corps (the Eleventh) reached the field in front of New-Windsor. Buford's division of cavalry was on the left flank of the corps, and encamped for the night on Marsh Creek, about Fairfield. However, when he encountered the day General Stuart's Cavalry Division, which had passed through Hanover, and was moving on the road parallel to the line of march of the Army. Before leaving passing our right flank, was making its way toward Carlisle. Leaving Hanover Gregg's division marched to Manchester, leaving Hanover on the right flank by the occupation of Hanover by the enemy's cavalry. On the 30th the Twelfth Corps was moved up to Manchester, the left still being at Emmittsburgh. The Reserve Army, the Third and Fifth Corps remained at Taneytown. Three were collected, under the command of Major-General Reynolds, and ordered to advance, with instructions to ascertain the appearance of the enemy on the Cashtown road, to some force in front of Gettysburgh, and to hold the position if possible. On reaching that place on the 1st of July, General Reynolds found Buford's cavalry engaged with those of the enemy. The latter having ed his infantry through the mountains on the Cashtown road, but the First Corps, under General Reynolds, and the First Division of cavalry.

Major-General Reynolds immediately moved around the town of Gettysburg, and advanced on the Cashtown road, and without a moment's hesitation formed his line of battle, and attacked the enemy, at the same time sending orders for the Eleventh corps (Howard's) to hasten forward to his support, and directing the other corps to make the dispositions for the attack. Major-General Reynolds fell mortally wounded just after making the disposition of his corps, and the command of the field devolved on Major-General Howard. Doubtless, and the command of the field on Major-General Howard. Doubtless, and the command of the field on Major-General Howard. On reaching that place on the 1st of July, General Reynolds found Buford's cavalry engaged with those of the enemy. The latter having ed his infantry through the mountains on the Cashtown road, but the First Corps, under General Reynolds, and the First Division of cavalry.

Major-General Reynolds immediately moved around the town of Gettysburg, and advanced on the Cashtown road, and without a moment's hesitation formed his line of battle, and attacked the enemy, at the same time sending orders for the Eleventh corps (Howard's) to hasten forward to his support, and directing the other corps to make the dispositions for the attack. Major-General Reynolds fell mortally wounded just after making the disposition of his corps, and the command of the field devolved on Major-General Howard. Doubtless, and the command of the field on Major-General Howard.

The arrival of reinforcements to the enemy on the Cashtown road, by the Fairfield road, and through Gettysburgh, by the Harrisburgh roads, which occurred between 1 and 2 o'clock P. M., enabled the enemy to overlap the right flank of the First Corps, the Third and Eleventh corps, outflanking our line of battle and pressing it so severely that about 4 P. M. the First and Eleventh corps, with the exception of the Reserve Artillery, which had gone to the rear of the left of the town, were withdrawn through the town, but in good order, not however, without considerable loss in prisoners, arising from the confusion incident to passing through a narrow town, filled with streets, and the men getting confused in the narrow streets.

About the time the First and Eleventh corps of General Hancock arrived, whom I had directed to report to General Reynolds, and Major-General Howard, General Reynolds had in operation with Major-General Howard, General Reynolds had in operation with Major-General Howard, General Reynolds had in operation with

every other way ready for sea; but they must wait months before they can be put in active service.

The Navy Department determined to build a fleet of vessels of war entirely made of iron, with double propellers. An important addition has been made to the proposed fleet, and instead of three it now numbers six. One of the class has been finished and is nearly ready for sea; the others are about to be built. The Department has received it in contemplation the contractors to complete these ships as soon as circumstances will permit. The following are the names of the vessels of the new fleet:—*Sassacus, Shamokin, Ironsides, Mahonga, Winnepec, Ashuelot, Metacomet.*

The Navy Department has contracted with the following parties to build unarmored vessels for the fleet of vessels commanded by Admiral Farragut:—Jacob Bell, New York, 1 iron-clad; Allen Iron Works, New York, 2 at 1,000 tons each; Harlan & Hollingsworth, Wilmington, Del., 2 iron-clads; Charles Iron Works, Providence, R. I., 100 inches; Woodruff & Beach Iron Works, Hartford, Conn., 100 inches; Continental Iron Works, Brooklyn, 2 inches; Globe Iron Works, Boston, 60 inches; Secor & Co., Iron Foundery, New York, 60 inches; Novelty Iron Works & Shipbuilding Co., New York, 60 inches; Hoole & Hunt Iron Works, Baltimore, 60 inches; Port Richmond Iron Works, Philadelphia, 60 inches; Delamater Iron Works, New York, 60 inches; Providence, R. I., 30 inches.

The vexatious delay in the payment of the captors by the U. S. steamer *Ossipee* of the British schooner *Herald*, from Nassau, off Fayetteville, Texas of the British schooner *Matilda Jane*, from Bayport bound to Havana—loaded with 12,000 pounds of cotton—has been settled by the payment of eighty-one thousand dollars in gold, silver, and U. S. treasury notes, the other vessel captured by the *Ossipee*, the British schooner *Rose*, with 500 bales of cotton on board, under bonds for the payment of the proceeds of the sale of the cotton, was allowed to proceed to Wilmington with stores and ammunition.

A correspondent writes us as follows from the United States gunboat *Kanawha*, off Nassau:—"The vessel is one of the best in the squadron, and has been constantly on the coast since the commencement of the war. She has been doing very efficient service on this station for the last summer. February 22, we captured the British schooner *Rose*, in charge, and succeeded in capturing her cotton cargo. On the 1st of October last we captured the British schooner *Matilda Jane*, with 500 bales of cotton and no earthly use for it. We exchanged a few shots with Fort Morgan on the occasion of the capture of the *Matilda Jane*, but no damage was done. The meeting between the upper clumsy and sombre planking, or decks, and the light, graceful, and beautiful hull of the *Kanawha*, is a sight it remains for the pen of a ready writer to describe. The vessel is now at anchor in Nassau harbor, and will remain there for the arrival here of her relief, acting Assistant Surgeon Charles Bahnson. Our officers are as follows, viz.—Lieut. Meigs, Lieutenant Commanding; Levi S. Pickett, Acting Master; Wm. Cunningham, Acting Master; W. W. Bailey, Acting Ensign; Ensign J. H. Tinkham, Assistant Surgeon; L. L. Pennington, Acting Assistant Paymaster; Wm. Bennett, Second Assistant Engineer; W. S. Cherry, Third Assistant Engineer; Maurice Murphy, Third Assistant Engineer; Wm. Hall, Acting Gunner; Wm. Cunningham, P. P. Boss, Acting Master's Mate. The *Penola, Arcadian* and *Aroostook*, belonging on this station, have gone to New Orleans for repairs.

NAVY YARDS.

BROOKLYN NAVY YARD.

The U. S. steamship *Ossipee* sailed on the 12th for New Orleans and intermediate ports. She had on board an immense cargo of stores, provisions and ammunition for the squadron. She also had on board one mule: a large number of officers and some sailors for the squadron also went out.

Orders have been received from the Navy Department to send the U. S. steam gunboat *Pensiva* to New Orleans for service in the East Gulf Squadron. She has received her sailing orders, to be ready to sail, and was to leave the Navy Yard the following morning.

The Secretary of the Navy has ordered Admiral Paulding to ascertain on the arrival of each vessel ordered to the yard for the removal of repairs she needs, and to report to the Department the amount of time it will take to effect them; if the authorities of the Yard cannot complete the work in a sufficiently short period, she is to be sent to New York to some private yard, and to be turned over during her stay to the superintendence of Rear-Admiral Gregory.

Orders have been received to change the name of the steam-tug *Vanderbilt*, which was purchased by the Department a few days ago, to *Zapin*. A steamer called the *Vanderbilt* has been purchased to take the place of the *Vanderbilt* temporarily.

Admiral Paulding has ordered the commanding officers of all vessels of the Navy Yard, hereafter, to furnish him each week with the number of officers and crew on board their vessels, with a statement of the deficiencies in both.

The paper says twenty-five hundred men on board the receiving ship *North Carolina*, a great proportion of them being landsmen. Within the past few days, however, more seamen have enlisted than ever before.

Within the past week the officers of the Russian and Italian frigates have visited the Yard, and been received cordially. One of the Russian officers, who was wounded in battle during the late fight, is now at the Yard undergoing repairs.

The iron-clad *Onondaga* will be ready to make her trial trip in about two weeks. She has been up on board for some time, and the engines are reported to work admirably.

The following vessels are now at the Navy Yard:

Steamers—Ajax, 4 guns; R. R. Elliot 4, Sumpter 6, Sagamore 6, Nereus 9, Proteus 9, Galatea 10, Winooski 11, Hartford 22, Gladiator 11, Neptune 13, Vicksburg 1, Stockdonnah 4, Tecumseh 3, Osceola 4, Kansas 4, Lackawanna 6, Onondaga 4, Dictator 10, Passaic 10, Peosic 10, Tullahoma 10, Susquehanna 10, frigate Savannah 22.

PHILADELPHIA NAVY YARD.

Rear-admiral Lee, U. S. N., and Board, on board the commission at the Philadelphia Yard on the 6th, and will sail for active service as soon as orders from the Department are received. The *Quaker City* is still on the dry dock, undergoing repairs, and when completed the *Kansas* will be placed on it in order to have her hull coppered. The *Powhatan* is still at anchor in the stream, but will soon be hauled in to one of the vacant docks for a thorough repairing.

BOSTON NAVY YARD.

The chief interest during the week has centered upon the combination of the engineers to demand the removal of Commodore Smith, regarding work to commence at sunrise. Of the thirty-eight hundred employed, only five hundred continued work, the remainder holding meetings and sending committees to Commodore Montgomery, the commandant, to express their purposes to retain the new order. He told them that his orders from Washington were imperative in regard to the hours of labor, and that he could not make any essential alterations as his own responsibility. He was willing, however, to agree that a certain number of minutes at noon and night should be stated at sixteen minutes earlier. No satisfactory arrangement had at last accounts been effected. The following are the prices which the men now ask at this year's piece-workmen. It will be seen that they are far from liberal:

Caulkers, $3 per day; carpenters, $3; blacksmiths, $2.75; machinists, $2.75; boiler makers, $2.75; pilotmen, $2.50; coppersmiths, timbermen, $2.50; joiners, $2.50; boatbuilders, $2.75; engravers, $2.50; ropemakers, $2@2.50; joiners, $2.75; spermakers, $2.50; painters, $2.25; blockmakers, $2.75; messen, $2.25@2.50.

Steamship Relief, 5, from Nassau, arrived on the 9th. Bark *Ethan Allen*, 9, sailed on the same day on a cruise.

NAVY GAZETTE.

L. Thompson, landsman, chronic dysentery, October 23, Naval Hospital, Beaufort.

THE REBEL PIKES.—The Mobile correspondent of the *Atlanta Appeal* thus speaks of the pikes which the rebels have brought into considerable use:—

"Every regiment is armed with a new weapon in this war and in modern warfares generally, but a most effective weapon it is, and will compel the northern men to arm with the same weapon, and throw the northern on the worst, to wit: hand-to-hand fighting. This weapon is the pike, a large number having been and still being manufactured under an appropriation by the legislature. The Alabama pike consists of a keen, two-edged steel blade, like a large bowie-knife blade, near a foot and a half long, with a sickle-like hook, very sharp, heading back from near the socket. This is joined to a handle, being the bridle of cavalry men, or taken from off their horses, or catching hold of the enemy when they are running away. This head is mounted on a staff eight feet long."

MARRIED.

(Announcements of marriages and deaths should be paid for at the rate of *fifty cents* each.)

WARNER—LEE—On Wednesday, the 4th inst., at St. Clement's Church, Philadelphia, by the Rev. H. A. Spackman, Stephen H. A. Ayres Warner, to Elizabeth H. Lee, all of Philadelphia.

PROPOSALS FOR RATIONS FOR 1864.

Quartermaster's Office, U. S. M. Corps,
Washington, October 16, 1863.

SEALED PROPOSALS will be received at this office until Wednesday, the 25th day of November next, for furnishing rations to the United States Marines, at the following stations, during the year 1864, viz:

Portsmouth, New Hampshire;
Charlestown, Massachusetts;
Brooklyn, Long Island, New York;
Philadelphia, Pennsylvania;
Washington, District of Columbia (navy yard);
Gosport, near Norfolk, Virginia.

Each ration to consist of three quarters of a pound of pork or bacon, or one and a fourth pounds of fresh beef, or one pound of salt beef, and one pound of cornmeal, made of cotton superfine flour, or in lieu thereof twenty-two ounces of soft bread or hard bread, or one pound of hard bread, at the option of the Government; and for every one hundred rations, ten pounds of peas or beans, or ten pounds rice, or ten pounds pea-potatoes, or in lieu thereof one and a half pounds of tea; fifteen pounds of good New Orleans sugar, or twenty-four quarter pounds of spermaceti candles, or one and a fourth pounds of tallow candles; one gallon and a half pounds of good, hard, dipped tallow candles; four pounds of good, hard, brown soap, or one pound of good soap; and one hundred pounds of potatoes, to each hundred rations.

The increased allowance of four ounces of flour or bread, and the commutation of vinegar now provided, will cease at the termination of the present insurrection, and will be so stated in the general regulations on the 1st of July, 1865.

The beef shall be delivered in the order of the commanding officer of each station, either in bulk or by the whole rations, and shall consist of the best and most choice pieces of the carcass; the pork to be No. 1 mess pork, and the bacon sides, and not to be of the rejected heads of hogs.

All subject to inspect on.

Each bid must be accompanied by the following guarantee:

Form of Guarantee.

The undersigned, ——— of ——— in the State of ———, and ———, of the same place, do hereby guarantee that in case the foregoing bid of ——— for rations at ——— shall be accepted, he or they will, within ten days after the receipt of the contract at the post-office named, execute the contract for the same with good and sufficient sureties; and in case the said ——— shall refuse to enter into contract as aforesaid, we guarantee to make good the difference between the offer of the said ——— and that which may be accepted.

Witness: A. B., Guarantor.
C. D., Guarantor.

Bids.

I hereby certify that the above named ——— are known to me as men of property, and able to make good their guarantee.

E. F., United States District Judge.
United States District Attorney, or Collector.

No proposal will be considered unless accompanied by the above guarantee.

Offers are also required to publish the above will send the paper containing the first insertion to this office for examination.)

Proposals to be endorsed "Proposals for Rations for 1864," and addressed to the undersigned.

W. B. SLACK,
Major and Quartermaster.

U. S. FIVE-TWENTIES.
The undersigned, as General Subscription Agent, is authorized by the Secretary of the Treasury to continue the sale of this popular Loan, and Ten Days' public notice will be given before its withdrawal.
About two hundred millions remain unsold, and the amount is limited by the Act of Congress to that the circulation of the National Banking Associations may not being formed for conversion of the Loan. But a short time must elapse before this loan is wholly absorbed, the demand being now unprecedented, and practically being entire notice.
As it is only known that the Secretary of the Treasury has ample means to meet the interest on the Five-Twenties, Inland revenues, and to the loan of November, 1861, and the Seven-Thirties, it is scarcely certain that it will not be necessary for him, for a long time to come, to negotiate another National Loan, the interest and principal of which are payable in Gold.
Those considerations must lead to the prompt conclusion that the Five-Twenties are the cheapest which any "Five-Twenties" will sell at a handsome premium, as was the case with the "Seven-Thirties" Loan, when it was all sold, and could no longer be subscribed for at par.
This is a
SIX PER CENT. LOAN,
the interest and principal being payable in coin, thus yielding about 8¼per cent. per annum, at the present premium of currency.
The Legal Tender "Five-Twenty," from the fact that exhibited no disposition to withdraw its support, and recommend him the right to pay them off in gold at par, as they fall due.
The interest is half yearly, on the first days of November and May.
Subscribers can pay the amount in sums of $50, $100, $500, and $1,000, or Registered Bonds will be issued in such amount and in addition $5,000 and $10,000.
These "Five-Twenties" may be taxed by States, cities, towns, or counties, and the Government tax on incomes is only one and a half per cent. on the interest thereon, when the income exceeds six hundred dollars per annum. Income from other Government securities such as mortgages, railroad stocks, bonds, &c., must pay from three to five per cent. on the income.
Banks and bankers throughout the country will continue to receive subscriptions for a short time, as well as otherwise properly attended to.
The Treasury Department is making perfected arrangements for the prompt delivery of Bonds, subscribers will receive their Bonds at their own home or vicinity, or within four days. This arrangement will be gratifying to many persons who live at a great distance from the agency, and will greatly increase the sales.
JAY COOKE, Subscription Agent,
No. 114 South Third Street,
PHILADELPHIA.

PENNSYLVANIA MILITARY ACADEMY, AT WEST CHESTER.—Pennsylvania Military Academy, at West Chester, Pa., with the following Board of Trustees:
HON. JAMES POLLOCK, LL.D., President; WM. B. APPLE, Vice-President; WM. E. BARDEN, Esq., Secretary; JAMES M. WORRALL, Esq., Treasurer; Hon. Richard Vaux, LL.D., Hon. Wilson M. Jones, Hon. Staff, Field, and Horse Equipments, &c.
Sold, or made to order in an elegant style.
Swords, Sashes, Belts, Gorgets, Buttons, Sword-knots, Shoulder-straps, Chapeaux, Feathers, Lace, Cloths, Embroideries, Presentation Swords.
Every article in the Navy line, from the Officer's Sword and Marine Officers supplied with everything required by Regulation, such as Epaulettes, Caps, Patents, Epaulettes, Swords, Belts, &c., &c. Silk and Bunting Flags, Guidons, Standards, etc., etc.

PRESENTATION SWORDS,
REGIMENTAL COLORS, Etc.
TIFFANY & CO.,
550 & 552 Broadway, New York,
DEPOT OF ARMS AND EQUIPMENT.
Comprising everything pertaining to the Personnel or Care (Field or at Stations), Officers study-ing the necessities of active service, or the perfection of uniform and neatness, will do well to examine the large collection of Foreign and Domestic Goods, Arms and Military Fittings.

EVANS & HASSALL,
MILITARY FURNISHERS,
418 Arch street,
Philadelphia.
Swords, Sashes, Belts, Plastrons, and everything necessary for the complete outfit of Army and Navy Officers. Banners, Regimental and Company Flags. A liberal discount to the trade.

SMITH & SPALDING,
(Late Jones & Smith),
Nos. 15 Dutch and 10 Platt st., Broadway,
Beaufort, S. C., and Vicksburg, Miss.
Manufacturers of and Dealers in
MILITARY GOODS,
Swords, Belts, Sashes, Epaulettes, Shoulder Straps, Caps, Hats, and in fact, everything required by the Army and Navy. Also, Medals, Checks, Stamping and Press Work, done at short notice.

THE MILITARY SITUATION.

WHILE grand operations over all the accustomed theatres of war have for some time been in abeyance, an important movement suddenly discloses itself on the line of the Rio Grande, where General BANKS has landed with a powerful expeditionary force on the Texan frontier, for the triple object of crushing out rebellion in that region, seizing one of the main *entrepôts* of contraband commerce, and watching the movements of a foreign power in Mexico.

The expedition was fitted out at New Orleans, under the command of Major-General DANA, General BANKS and staff accompanying it. After a stormy passage, the troops were on the 4th inst. safely transferred from the transports, and landed on the Texan shore of the Rio Grande. Upon seeing our troops landing, the enemy destroyed the Government works at Fort Brown, and the town of Brownsville was set on fire by the rebel cavalry. The Union men in the town resisted them, and a bloody street fight ensued between the two factions, while the houses were burning around them. The Fifteenth Marine regiment was ordered up to Brownsville to support the Unionists, and the rebels were routed. General MAGRUDER, who is in command of the rebel forces in Texas, is said to be now at Houston. He has only two thousand troops (cavalry) there, the remainder of his army being scattered about at various places, chiefly at Galveston and Sabine Pass.

Of course the main immediate practical purpose of this expedition is the interception and destruction of the immense contraband traffic carried on between Europe and the Southern States by way of Mexico; and in this respect its importance can hardly be overestimated. When our fleet arrived off the coast, no less than *twenty-seven* blockade runners were in sight in the Mexican waters! Indeed, since the sealing up of Charleston and the stricter watch at Wilmington—hitherto the two chief inlets of rebel trade—Matamoras bade fair to become the great *entrepôt* of contraband commerce. The estoppel to any purpose of this kind which the present expedition will furnish is of the highest value, and its bearing on the general course of the war cannot fail to be very great.

THE situation at Chattanooga, so far as published accounts show, up to the hour of writing, remains unchanged, although we had through private channels reports of a battle actually in progress on Wednesday, 18th. All that had disturbed the monotony of life at Chattanooga was the occasional shelling of our camps by the rebels from their position on Lookout Mountain; for though the enemy was, by the movement of General HOOKER'S force, drawn from the possession of Lookout Valley and the abutment of the mountain, he yet holds points within rifle-range of our camps. This, however, does not seem to trouble our troops much, and no casualties are reported.

The movements of the rebels at the time of our last writing seemed to indicate a determination on their part to snatch back the prize which General THOMAS seized from them in the possession of Lookout Valley, the south bank of the Tennessee, and the consequent command of railroad and river communication with Bridgeport; but the tenacious hold which General HOOKER has of the ground seems to have disinclined them to make the attempt.

General SHERMAN'S column, which we left last week still on the march, the advance having only reached Florence, has at length made a junction with General GRANT. This force will form the right wing of Gen. GRANT'S grand front of operations. The addition of General SHERMAN'S corps will form a powerful reinforcement to General GRANT'S command; and we are not to count as the least part of this reinforcement the skill and energy which General SHERMAN—acknowledged one of the ablest military heads in the Army—will bring with him.

But while General GRANT has been augmenting his army, the rebels have not been idle. It is said that the Western and Atlantic Railroad is being worked to its full capacity in bringing reinforcements to BRAGG, and that the road from Chickamauga Station for eight miles south is lined with rebel camps.

In East Tennessee the enemy still continues his menacing attitude towards General BURNSIDE. The latest information from that quarter is to the effect that LONGSTREET is moving on our position at Knoxville, and some skirmishing is reported to have occurred between BURNSIDE'S outposts and the advance of LONGSTREET'S column. We last week recorded the capture of the garrisons of two of General BURNSIDE'S outposts near Rogersville, about fifty miles from Knoxville, on the 6th inst. The points at which the later encounters took place are not stated, so that we have no means of judging the precise nature of the enemy's intentions. But whatever may be the rebel plan, it is entirely certain that they have set out with the intention of crossing the Tennessee, and compelling BURNSIDE to fight at disadvantage, or fall back so as to uncover Knoxville and an important part of East Tennessee.

WE still remain in an attitude of expectancy towards the ARMY of the Potomac, there being as yet no further advance to record. The railroad is now completed down to Rappahannock Station. The bridge across the Rappahannock is also completed now, and thence the railroad is undisturbed to Culpepper and the Rapidan. This was one of the prime desiderata for which General MEADE was waiting; and there is good reason to hope that we shall in our next issue have stirring deeds to chronicle. The main Confederate force lies between the Rapidan and Orange Court House—the Rapidan being strongly guarded. On Sunday 15th inst., KILPATRICK'S cavalry force was sent forward to the river with a view to develope the real strength of the enemy. In advancing it was fired upon from the heights on the south bank of the river, and on retiring was followed by a small force of rebels, who had the temerity to cross the river at Raccoon Ford, but were immediately driven back. Our loss was very slight, but four or five being slightly wounded. The rebel defences on the South side of the Rapidan are of a very formidable character, being situated on ridges from thirty to a hundred and fifty feet above the river level, and elevated considerably above the northern bank, where the ground falls into an extended plain, presenting on our side every possible disadvantage for strategic movements.

General LEE has not left for the Southwest as was recently reported, though it is believed that a portion of his troops has been sent off, leaving only portions of two corps on the Rapidan. From rebel sources it is learned that the enemy has little or no apprehension of being assailed in his present position, and with winter approaching feels secure in his quarters. Hats are in procession of erection, and the indications are that LEE proposes to winter behind his intrenchments on the Rapidan. *Nous verrons!*

THE great drama of the siege of Charleston as yet stands still, while the episode of the bombardment of Fort Sumter goes on by day and by night. A Charleston telegram to the Richmond press states, that from Thursday morning till Saturday evening last, 1543 mortar shells and rifle shots were fired at the fort. The telegram adds: "The enemy's fire has ceased to "be of any injury to the fort"—a remark which is probably true, as the ruined structure must be by this time beyond any further damage. We have still the best reason to hold on to the good hope we some time ago expressed, as to the result of the coming combined land and naval attack.

A PRIVATE letter, received from Captain SZRAD, who was taken prisoner at the battle of Gettysburgh, and is now confined in Richmond, gives the following touching personal testimony with reference to the treatment of the Union captives: "*If the Government "wait much longer, very few will remain for exchange; "cold, hunger and creeping filth—these are our daily "enfocer!*" Captain SZRAD is a brave Hungarian, well-known to us, and to military readers by his "Theory of War." He joined the service many months ago, and has served without pay or commission. His distressing testimony may be relied on.

THE dedication of the Soldiers' Cemetery at Gettysburgh, Pa., took place on Thursday, in the presence of a large concourse of spectators. President LINCOLN, Secretary SEWARD, and many gentlemen of distinction in civil and military life took part, and Hon. EDWARD EVERETT delivered an address. We go to press too early to give any particular account of the ceremonies this week.

A BATTLE IN TENNESSEE.

THE following dispatch is received just as we go to press:

KNOXVILLE, *November 19*, 1863.

The enemy began skirmishing from their position on Kingston road at ten this morning. Our advance alone, composed wholly of mounted infantry and cavalry, commanded the position, under General SANDERS, and each man fought like a veteran.

At noon the enemy opened with artillery at short range, their battery protected by a large house.

BENJAMIN'S battery was the only one which replied, occupying the chief fortifications half a mile in front of and to the right of the town.

A desperate charge was made by the enemy about 3 P. M. Our men were protected by rail barricades on the crest of the hill.

General SANDERS was severely wounded, and was borne from the field.

We yielded the position, and fell back about a third of a mile to a stronger one.

We have lost about one hundred, one quarter of whom were killed.

The enemy have completely invested the place, but General BURNSIDE will defend it to the last man, and it is believed successfully.

The troops are in the best spirits.

Every important point is fortified, and confidence prevails that we shall whip the enemy out.

FORTIFICATION—LAND DEFENCES—TRACE.

The trace of a work depends upon the ground it occupies, the ground it is to command, and the force available for it. There is, therefore, little virtue in the regular forms laid down in works upon this subject. A redan, or work with two faces or sides, or a hunette, or work with four faces, has no advantages *per se* over works with one, three, five or more faces, which writers have neither described nor named. There is no necessity that any two faces of a work should have the same size; they do not depend upon one another in any way, nor can they be influenced by the same considerations. The great rule is to proportion the amount of fire which can be brought to bear upon any point, to the facilities for attack or approach. As a rule, this is to be done, by pleacing the largest and best-armed faces at right angles, or nearly so, to the directions most favorable for assault, so as to bring the fire of those faces directly against the attacking part. Frequently, however, the greatest amount of fire can be accumulated in front of a salient. The assumption that the fire from the face of a work is necessarily at right angles to it, is only partially true. In infantry tactics every regiment is taught oblique firing. Artillery is frequently directed 30° or more from the perpendicular. The fire from the faces of a parapet will be right angles to those faces when not oblique to them, provided the ground to be defended by the right-angled fire is as strongly occupied by the attacking force as that to be defended by the oblique fire. This is more true of musketry than of artillery fire, and is more the reason for the trace than is to the work. The rule limiting the salient of a work to angles over 60°, allows too much margin. A salient of less than 60° is absolutely inadmissible; one between 60° and 90° is very objectionable; between 90° and 120° there is still a small angle not deprived of fire which requires to be commanded from some point other than the salient; above 120° the oblique fire may be partially relied upon.

The trace of a work depends upon the ground it occupies, because this limits its possible extent. Works are generally placed upon high ground, the summits of hills, ridges or secondary slopes. A work should not be so placed on the slope of a hill that the ground included within it is seen from without; that is—all the ground included within the limits of a work must be covered from all points which can be occupied by the enemy. Some writers would also be so placed back from the crest of a hill that any portion of the slope shall be hidden from the work. The result of such a construction would be to furnish a rallying point for the enemy from which to make successful assaults. This was illustrated in the defence of Kars by the Turks against the Russians, when an unseen piece of ground within 150 yards of the works, commanded by Major Teesdale, afforded the Russians an opportunity of rallying for seven successive assaults.* The combination of these two conditions, viz: crest, and, will in broken ground, be frequently impossible without auxiliary defences. These latter should always be so placed as to be completely commanded and controlled from the main work.

The trace of a work depends upon the ground it commands, as upon that depends the work it has to do. For distant or artillery defence the same rules apply to the position of artillery in works as to field artillery. Too much elevation is bad. An elevation above the object aimed at of 1 in 15 or 20 is as admissible. The best elevation for artillery is about 1 in 100 above the object aimed at. For near defence, the more grazing the fire, the better. The ground near the work should be covered with a cross fire wherever it is practicable. Therefore, with salients of 120°, are useful on ground demanding no special trace.

The trace of a work depends upon the garrison available for it, for a work inadequately manned is capable of only a very feeble resistance. Yet it is seldom necessary to count upon a work being defended vigorously at all points, and a very inadequate force may, by manœuvering, hold a very long line. The way in which Wilcox's brigade manœuvered to hold the heights of Fredericksburgh against Sumner's corps, at the time of the battle of Chancellorsville, was a very good illustration of this point.

There are two leading classes of works which must be clearly distinguished. Those of which the garrison and armament form an integral part, intended to be captured when the work is taken, and those from which the garrison and armament are intended under certain contingencies to be retired.

In positions hastily fortified, in which to accept battle, there will rarely be any work the garrison of which should be considered as an integral part of the work. There may, however, be some key position which, if held, may, even when entirely disconnected from the rest of the defending force, so cripple the assailants, limit their movements and facilitate reprisals and the retaking of the surrounding ground, that it might be worth while to risk a small garrison. Such instances would, however, be very rare. Works not intended to be held in this way should not be closed at the gorge. Field artillery should never be placed in closed works unless the garrison of the works is intended to stand or fall with it. In the work it is in the same relative position as in front of a defile. To the neglect of this simple principle the loss of many of the guns at Fair Oaks is attributable. Field artillery should never be placed in an open work without having provided for the horses and all the material of the battery. Otherwise these will be destroyed and the battery cannot be retired at the right moment.

It is only by a proper distinction between these two classes of works and their relative positions, that the large extent of ground which it is necessary now to occupy by works can be held by garrisons which will not materially weaken the manœuvering armies. This distinction cannot be made without it is distinctly perceived and borne in mind that there is no necessary connection between these portions of a work, or those works in the defence of an extended position, designed for the artillery or distant defence, and those intended for the near defence and for assault.

To fortify a position:—Select the positions for the artillery precisely on the same principles and according to the same rules which guide a field artillery officer in placing his batteries. Determine the number of guns available for each position, the directions in which they are required to fire, and the ground required in front of each.

Ascertain the minimum infantry guard for the artillery which the local position permits. Distribute these as the artillery was distributed in the directions and in proportion to the probabilities of attack. Those data give the position and length of the lines of infantry fire, and its size.

The work should then be constructed with all the perfection which time affords, the maximum of cover given to the guns, good traverses, good magazines, good bomb-proof cover constructed, and the approach rendered as difficult as it can be by removing or constructing obstacles.

The garrisons of such a work as this forms an integral portion of the work, to live in it, to fall with it, never to abandon it so long as one ounce of powder, one ration remains. They should understand that in this is their glory.

But it must be forcibly borne in mind, that every man belonging to such a garrison is non-effective for all other purposes, and that if 500 men, for example, are available for the defence of a line, and one-fifth part of a general position, and cannot, therefore, be isolated, a better defence will be made if the work be constructed for 200 men, and the remaining 300, after being driven from the advanced rifle pits, rally in rear of the work, ready to charge round the edge of the parapet, attacking the assailants in reverse flank at the moment when they are in the greatest disorder from the fire of the defenders and their own advance, than if the whole 500 were placed in the work incressed so as to give full scope for their judicious employment.

There may sometimes be the necessity specially of placing the artillery on secondary slopes, positions which command the artillery. These must be held, like the artillery positions. They will rarely require guns or large garrisons, and frequently not even every against artillery.

In distant defence, as contrasted with the near defence requires an entirely different class of work, extensive and slight in profile where the former was very limited, but elaborate in defensive resources. To skirt the crests of hills, see into every slope, enfilade every ravine where reserves will be concealed, and bring every advancing columns should advance. To command in front and flank every possible approach, giving at the same time every facility for retaliatory movements, limiting the front of the enemy and breaking his formation by obstacles from 300 to 800 yards distant, prepared at the same time to meet his every approach thus broken not only by the steady fire from the works, but by sorties and the much more effective steel. This part of the work requires but little labor and little constructive skicty. It requires, however, great judgment in the construction of sites.

The above principles apply equally to permanent and field or temporary fortifications. The essential difference between them is in the substitution of brick or masonry constructions in the long-exposed cover for earth material, in the nature of the obstacles against assault, and in the preparation of the ground for near defence. These points will be considered in the next paper.

*The ground between Fredericksburgh and the heights in the rear afforded cover for the formation of five or six successive assaults.

THE MONITORS IN CHARLESTON HARBOR.—A Port Royal correspondent of the Baltimore *American*, writing under date of November 6th, says:—

The Monitor *Montauk*, which has been at Port Royal repairing, arrived here on Wednesday, and has already been trying her guns on Sumter. The *Montauk* is a clipper among the Monitors, and moves about the harbor at the rate of eight miles an hour. The *Passaic* has also returned from Port Royal, where she has received a thorough overhauling, and can now be relied upon. Everything now promises promise that the long deferred attack will soon commence.

It was feared that the *Passaic* would have to be sent North to remedy some derangement of machinery that no one but Ericsson is able to set right, which was beyond the ingenuity of the machinists at Port Royal to remedy. Fortunately the Navy Department has recently sent to one of Mr. Ericsson's assistants, Mr. Griffin, a persevering and energetic gentleman, as Superintendent of Iron-Clads, who declared that the machinery could be made to turn. There is a good deal in working with a will and determination to succeed.

Mr. Griffin, since his arrival here, has also done a most important work in improving the speed of the Monitors. An iron vessel, after lying in the waters of the Southern coast a few months has her bottom and bottom covered with barnacles, grass, hornacles, &c., that greatly impede her speed. Some seven feet of the bottom of the *Passaic* was found to be of Monitors. The consequence was their speed was reduced to about three knots an hour, and the facility in steering greatly lessened. Attempts were made to have them cleaned by divers, but did not succeed very well. Mr. Griffin, on learning the difficulties, suggested that the boats should be hoisted to Port Royal ferry, and that the bottoms be scraped and painted. Doubts were entertained by some whether Mr. Ericsson would like the Monitors to be put in ferry, with Admiral Dahlgren's authority, made an experiment with the *Passaic*. It proved entirely successful; the vessel was not strained or injured in the least. The speed was a surprise and gratification to everybody. The *Passaic*, on arriving off Charleston Bar, cast loose from her tow, and came in, nobly keeping way with the *Canonicus Bristol*, fast steamer, formerly the English blockade runner *Ogden*. The next day the *Passaic* steamed up the bay, across the harbor, and made us all stare by showing a speed of nine knots an hour. Nearly all the Monitors have now been subjected to the same process, and have attained about the average speed of six knots an hour. This result is equal to a reinforcement of three Monitors, and will abundantly pay for the delay it has caused.

VOLUNTEERS AND VETERANS.

Years ago, when our army was a little band of five or twelve thousand men, and the term of enlistment to for five years, after a soldier had been nine months or a year in the service, he ceased to be considered a recruit, and, being attached to a company, became, if not a veteran, at least in some senses fairly entitled to the old soldier. At the time the English army of service was twenty-one years, and although for special good conduct a man might get his discharge after twelve years, most of their soldiers served the whole term, and then—the rest of their lives. With this striking contrast in their organizations, the English officers of the frontier used to call all our men recruits, and laugh at our idea of old soldiers, regarding none of our men as such, except the few who had served two or three terms of enlistment. Their view was not unjust, nor their laughter entirely misplaced. Even in our own army, in a time of war as found peace, a short service is worth nothing. But it is far otherwise in war. When Napoleon applied to the Directory for a command after his brilliant artillery service at Toulon, he was told by Barras that he was too young. "Too young to command a battalion, Citizen Barras," was the reply. This aphorism applies to length of service as well as number of years. One battle goes farther to make a volunteer or a conscript a veteran than years of peaceful life. Is the latter he learns his lesson; but it is only in the former that he realizes the full meaning of the task. It tests it; it proves the pure gold; it purges the dross away, and it gives him a moral power which nothing else can give. Our volunteers of a score of fights are veterans already. With the men there is, as a general rule, little trouble; the chief difficulty has been with the officers. Many of the men have been provided that the incompetent are readily weeded out, while the good ones develope with Napoleonic rapidity.

In this connection there are some curious facts to be observed; at least at first sight their philosophy, which is very simple, does not appear. The volunteers and the old conscripts are set up and developed by being placed in veteran ranks. Pride, ready imitation, and hourly encouragement, will explain this. His instructor, *malgré lui*, is at each elbow, before and behind him; he has from the first only to do what he sees others do. And the old saying, "Once a like a veteran some time before he knows the why and wherefore.

Again, it is related of the conscripts in Napoleon's Legacy campaign that they went readily into "the jaws of death," whom veterans would have shrunk back, because they knew too well the danger.

We do not intend to make comparisons between volunteers and conscripts, nor indeed do we think there is much difference between the two when fairly in the field. In the accreditation of services upon great thermometer of esteem in, and become one in aim and in hope.

When we consider the smallness of our regular army and the valiant and veteran service of our volunteers, we are often led to the conclusion that there should be something like a qualification between the two. Perhaps of words do not quite convey our idea. We do not mean to take the volunteer service just as it is, and no our existence need has compelled us to accept it, but to increase the regular army—which must assuredly be done—by taking good volunteer regiments, critically examining the officers, and only retaining and appointing those whose merit in war claims reward. But such changes, in so vital a matter, usually work themselves according to some organic law, and the necessity for that law is now manifesting itself.

CORRESPONDENCE.

AN AMBULANCE SYSTEM.

To the Editor of the Army and Navy Journal:

SIR,—I was glad to see in one of your late numbers (October 31) an extract from the Boston *Medical and Surgical Journal* on the "want of an ambulance system. The matter should be further looked to as well as in Boston. A considerable warmth has been exhibited on both sides of the question, whether we have not any ambulance system. I have read and thought somewhat on this subject, and I hope you will allow me to contribute a little towards the decision by letting you know my opinion as briefly as possible: I, the actual condition, so far as I can learn it, of the *so-called* ambulance system; and 2d, with great deference to the judgment of others more practically acquainted with the matter, let me suggest a few thoughts upon the precise objects such a system should embrace, and one or two points in relation to its working.

It has been stated by good authority that "on the 20th of April, 1863, the Army of the Potomac had but a single ambulance carriage this side of the Mississippi."

All this is now changed. Ambulances—four-wheeled and two-wheeled—are found in abundance in the Army of the Potomac. I have grave doubts whether as much can be said of any other of our armies, and in some of those some recent Gen. Washington Hunt is a proud delicacy in this respect. At Port Hudson there were scarcely any; and similar statements, I fear, may with truth be made about most of the forces in the Mississippi valley still further. I am not aware that "mule ambulances" have ever been widely, if at all, introduced into the Army of the Potomac. It is evident that well-trained mules, with a litter on each side, would do much better service in a broken, rocky country, like that in front of Richmond, than all the paraphernalia, connected with the surgeon's department. I believe that now all the armies are, or ought to be, well supplied.

The drivers of the ambulances have doubtless improved much in the last year. The system introduced by Surgeon Dr. CONDON, U. S. A., and Drs. STEADMAN and BOWDITCH, gave their terrible experiences of the careless inhumanity and drunkenness of the same. Judging from what I can learn, the class of men described by those physicians is not yet wholly extinct and it seems evident that when men are chosen for this part of the service, regard should be had to fitness for the work, carelessness and inhumanity will be likely to occur. But I believe that, on the whole, matters are in consequence of public attention having been so fully called to the matter.

In the Army of the Potomac, under the various "orders" issued by successive Generals, from General MCCLELLAN down to General MEADE, a method, originally devised by the enlightened mind of Dr. JONATHAN LETTERMAN, was brought into operation, which is a vast improvement upon what previously existed. It is based upon the principle of placing the working admirably in certain divisions and regiments, as appears from the testimony of chaplains, division surgeons and sanitary commissioners, published in the Army, admirably as a *perfect system*, if we may take the testimony of the Secretary of the Sanitary Commission. Mr. OLMSTED, in his report of the labors of the Commission at Gettysburg, gives us to understand that thousands of our wounded in that fight were brought in ambulances or carts or sled, to the terminus of the railroad at Hanover Junction "did devote under a July sun or in a drenching rain without food for twenty-four hours or more." Now, this fact, which is evident not been for the wise *foresight* of the Commission's agent, who *anticipated* some such results, they would have laid still longer in the fields around Gettysburg. Under the said agent, the Sanitary Commission was, at the end of these twenty-four hours, enabled to properly cover and feed the sufferers. It is to be hoped that this fact may be impressed upon the minds of all who see them. The bare statement of them reflects no credit upon the medical staff of the Potomac, no *system*, commensurate with the necessities of the case, does at present exist. And this may be said without in the least detracting from the well-earned praise of many of those excellent officers and surgeons, who have, with so much labor, built up a plan which, though quite perfect in many, fails to grasp the *true idea* of the Ambulance Department for the armies of our wide-spread Republic.

If now, we examine this department of service in any other of the armies of the Nation, we shall find a still more lamentable deficiency. In the Army of the West the highest authority for asserting that the "detailed soldiers" have been sent back to their respective regiments, because as at present organized they are useless, and not entirely satisfactory." This was done notwithstanding the commanding General wanted a proper system. I have endeavored for months, in Ohio, to obtain the "detailed soldiers" of all *potential* orders establishing ambulance corps in the various armies. I have been more or less successful, though I do not deny that such may have been issued, but I cannot get them. On the contrary, whenever I have seen officers or men coming from the West, I have inquired if they had ever been on the battle-fields from Vicksburgh to New Orleans, I find the one universal assertion—" We had none or very few ambulances and no effective force whatever for carrying off the wounded." At the same time, I got stories of individual suffering of the most distressing character, and which might have been relieved had any proper system prevailed in the department.

Similar complaints have arrived at by others who have enquired in the matter. Congress has been asked to do something. Twice a bill for this purpose has passed the House and been defeated in the Senate. It is for us to ask ourselves what reason the Senators can give for this opposition.

It is proposed in New England to again petition Congress to discuss the question, and by law establish an ambulance department. Whether Congress should itself undertake to pass upon all the details of such a vast scheme is a matter of doubt, but it certainly can direct the President to appoint a commission of distinct and high character, and of practical men who have served in the field and know what is wanted and how the proposed plan should be carried out. This commission should at as early a date as possible report some scheme, one not merely for the immediate contest now going on, but one capable of being followed in any future war in which we may be engaged. The New England petition seems reasonable. In the war of opinions now rife upon this subject, one party claiming that there is nothing but chaos, while the other equally positive that we have a better system than any other on the face of the globe, and that it is quite astonishing that any one having any knowledge on the subject, by any chance, should ever go to an empire to prepare to settle all dispute as would be the Congress of the Nation. Let us by all means, therefore, second the petition. Let us send to Washington, England, by similar ones from this metropolis and other parts of loyal States.

On the score of good policy, if for no higher motive, it behoves us to urge Congress to act in the premises. Our wish is well called with more unanimity if they feel sure that everything will be done to ward off suffering. Good policy also dictates to the Government to endeavor to make the army efficient in the field, thereby strengthening it towards damning the fight, and by early restoring the wounded to the ranks. Nothing will so well secure the zeal of these objects as a well-arranged and efficient Hospital and Ambulance Department.

Finally, we have no hope to throw out a few hints upon what, in my opinion, ought to be our aim at the present hour. I have already suggested that any system that may be desired ought to be based upon the principle of the present emergency, but to be capable of being applied to any future war. We should ignore the idea of the speed of the necessities of war. Humanity has now progressed so far in its views of what may be styled the *amenities* of war, that an ambulance department is necessary in every army to any army. Let the clash of arms be as fierce and as brief as possible. But immediately after the necessary carnage, let gentle company and humane attention succeed. Assume the blood stained battle-field, to mean from all unnecessary suffering the wounded and dying. Let the dead be buried, the wounded a fallen foe. I am well aware that strategic reasons may, when the issue of battle is still undecided, prevent the agents of any system of ambulances from early visiting the field. But I hope that matters have now progressed sufficiently for them to make one step further forward, and that, hereafter, the rules of war may be so modified as that of international law that the agents of the ambulance corps of two belligerent armies may become as sacred *with their perfectly distinctive badges* as those of the Red Cross.

I am quite willing to admit that the suggestion of two ambulance corps meeting in safety on the field may be quite Utopian in the eyes of an old army officer. He may hold such opinions, and yet I have faith that much progress has made some progress since it was considered allowable to drag a dead hero's body at the chariot-wheels of the victor: and are many of us not willing to believe that the wounded will be looked back upon with the same horror and disgust that we have when reading the story of the brave patriot Leonidas and his three hundred? Now is the hour, and this the God given battle for advances to be made in many departments of science and humanity. He sustained great lessons in the art of war. Our guns are more effective, and throw destruction from a greater distance and with more terrible force than ever before. The modern soldier can boldly into dangers such as none of the fur-famed fleets of Europe would dare to meet. Our Northern people are sustaining a war for the preservation of Life and of Human Liberty a war of unexampled magnitude. Our armies are numerous, and equipped in the most perfect manner. These armies are composed of some of the noblest and best, most intelligent and most self-sacrificing patriots of the land. Scarcely a household throughout the North but has one representative in this noble fight. Our power seems every day increasing, and the burdens of war we bear with a grace rather than complaint. Surely, we have sustained the milder burdens of a bounteous and long-enduring peace. In every path-way of life we seem, as a Nation, to progress, as in the days of our fathers. Our developments, they believe human woe. Necessary agent as we are of untold suffering to thousands of our fellow-men, we invite them, through our regularly-constituted authorities, to do aught to relieve their sufferings. We leave to the kindness and energy of our Government, and to the duty of the whole *Nation*, as such, should direct to be done. And this, too, in the fact, while the people, as individuals, are pouring of their unstinted wealth into the coffers of the noble and humane act of the Sanitary and Christian Commissions, while also thousands of individuals are flocking to the battle-field, not for the mere soldiery that Congress virtually neglects. This state of things seems to me most strange. Congress should initiate a system, and then call upon the Christian generation which should devise a plan thoroughly commensurate with the wants of the hour. Let us ask Congress to demand that henceforth care be taken to bring within points of international law shall be that the lives of men engaged in the saving of the wounded shall be inviolate. Let measures be by have in the days of succeeding general as soon as possible after a battle, to direct that the wounded shall be *sacred for, and inviolate to, each other*, from the time they fall. In a word, I would have Congress take such action that what is now a mass of individual "orders," may be thoroughly systematized, and made worthy of a great nation. CIVIS.

FROM MISSOURI.

To the Editor of the Army and Navy Journal:

SIR :—For some time back military operations in the State of Missouri have been at a stand still. There are now no armed rebels in the State, the raid of Gen. SHELBY did not amount to much. After making a very quick march from Arkansas to Boonville, he, without meeting any U. S. troops till he arrived at Boonville, where the Missouri State Militia and the Enrolled Missouri Militia met him, under the command of Brigadier-General BROWN. SHELBY was here routed, his artillery taken from his forces scattered and running in every direction. As the rebel forces have given up the chase, it was taken up by General EWING, the Commanding General of the Missouri Border, who followed him to the old battle-field of Pea Ridge, where he abandoned the chase, and General JOHN MCNEIL, commanding the district of Southwest Missouri, took it up and followed across the Boston Mountain in Arkansas. General PRICE, commanding the District of the Frontier, having been relieved by General CURTIS, has started to attack the rebel Command of BLUNT'S army; and from last accounts will have soon a fight. There is no guerrilla force in Missouri, so that they now number about 10,000 to our 6,000; but we all have confidence in General MCNEIL, and do not fear the odds.

Lieut.-Col. ROBERT ANDERSON, who has been charged with the regulation of our steamboats, no more boats have been burned, and we are in hopes that the efficient detective force of Provost-Marshal-General FISHBACK, attached to this Department, will put an entire stop to this devilish work, and in three weeks twelve of our largest first-class steamers.

Last week I sent you the orders in the case of JOHN A. NICHOLS, and the trial of the officers of the 39th Missouri. They found him guilty, ordered him hung, which was approved by the PRESIDENT, and he was duly executed at Jefferson City.

Arkadelphia, late the headquarters of "Old Pap Price" and his rebel army, has been taken by the forces under General STEELE, U. S. A. Old PAPE has fallen back in good order to Texas, but will not be allowed to remain long in quiet, if all the reports of the Staff of this Department, under General J. W. DAVIDSON, will soon again be called to arms. General DAVIDSON left the city last week for his command in the field, where he will start on a vigorous campaign for South Arkansas and Texas. The General is an officer of the right stamp, and wherever he has been in the field he has shown by the fact that every officer of the cavalry division has signed a petition to the Secretary of War, asking for his promotion to the rank of Major-General, which was done by Major-General STEELE, Commanding Army of Arkansas.

ST. LOUIS, MO., NOV. 13, 1863.

UNION PRISONERS.

To the Editor of the Army and Navy Journal:

SIR :—Every one must sympathize with the deep feeling of the welfare of our own held as prisoners in Richmond. Authentic accounts place the number at this time confined in Libby Prison and Belle Isle at between seven and eight thousand. Of these a portion are wounded, and a portion sick. The intense suffering on the part of these unfortunate soldiers, both from a want of food and clothing, there can be no doubt is. The actual facts, so far as relates to clothing, we are told, has been admitted by the Commissary of Prisoners, Commissary CHRISTIAN, Confederate States. This is welcome news, especially to those who have friends incarcerated in those wretched abodes of misery and suffering, and who have received no direct relief. But the gnawings of hunger he not also stayed. It may be "*duke de Bragance ses patriæ mori*," but it is very bitter to be starved to death, and that is what it is, I fear, in a large portion.

Shall how is this to be rectified? The system of exchange of prisoners seems to have come to an end, at least for the present. No hope whatever exists that any increase in the number of exchanges will be made under the rule adopted by the rebel authorities. On the contrary, it is reported that the scanty supply of meat heretofore allowed is cut off entirely. Under the LIEBER code, adopted by the Confederate Government is lured to the utmost to secure the necessary supplies for the armies in the field, including of course the wants of the population of Richmond and other cities within the rebel domains. Under these circumstances, were individuals of the rebel people to be held as hostages, there is a lack of provisions, the rations of hated prisoners will most certainly be reduced, rather than that of rebel armies and civilians. Under the new general military order the rebels will be led to come upon any considerable class of the population.

In this condition of things, and especially considering the unfortunately scanty supply of rations to Union prisoners within the hands of the rebels? What security can there be that an inquiry would be responded to favorably by the rebel armies or starving citizens? A government that, in bad faith, retains prisoners when it is unable to feed them, would probably not hesitate to feed them on those who, captured at a critical period, or a time of special need or danger such as might occur at any time by the breaking up of some portion of our military organization, and who are re-receiving and turning over to prisoners substance needed to prevent the sufferings of those men subject to whom it is practicable to afford the necessary relief by feeding Union prisoners within the rebel lines, it would certainly be a new feature in war for the party in power thus to feed prisoners upon whom it can not keep from starving, acts in a manner as positively cruel and barbarous as though it were to put to death by the sword. Such is the plain fact in regard to them. Such treatment, then, as clearly cruel and unjustifiable as any direct murder or torture, is practiced by the rebel authorities upon the same light and remedied in the same way.

Retaliation is the only weapon of defence in cases affecting the unjust conduct of an adversary. And there are many who believe retaliation *in kind*, made positive and effective, to be the only means to prevent the present cruel system practiced towards Union prisoners can be arrested. We can teach the rebel authorities by this, if we have not yet learned the principles in our hands, according to the usages of war, we have also the *means of averting* the same when it is necessary to secure compliance to the requirements of civilized war. Measures of this kind, where the cause was well known, and the way to effect a remedy clear, would be looked upon in

THE HISTORY OF WEST POINT.*

OUR national institution at West Point has found a historian in the present custodian of the records of the Academy, Captain EDWARD C. BOYNTON, who has with pains-taking industry gathered into one view whatever could be gleaned from our annals, not only in regard to the origin and progress of the Military Academy, but in reference to the previous history of West Point as an important military station during the American Revolution. Attention was first called to the value of West Point, as a military position, by a committee appointed by the Continental Congress of 1775–6 to take an accurate view of the state of the fortifications then in progress of erection on the Hudson River, for the purpose of defeating the attempts of the British Government to control the navigation of that important river. It was not, however, until after the capture of Forts Montgomery and Clinton, below West Point, by the British forces in the fall of 1777, that an attempt was made to fortify the position. In January 1778, a work was laid out on the northeast angle of the plain at the Point, and a series of water batteries commanding it, was placed on the eastern front by Lieutenant-Colonel RADIERE, Engineer, under the supervision of Major-General PUTNAM. RADIERE was subsequently superseded by KOSCIUSKO as the Engineer, under whom the works were pushed forward with vigor to their completion.

Meanwhile the command at West Point had been transferred from PUTNAM to General MCDOUGALL, and from him to General ROBERT HOWE, coming finally into the hands of Major-General BENEDICT ARNOLD, who had matured that treason which has made his name infamous in American history. At this time the supplies gathered at West Point were very great, and if lost could hardly have been restored by the impoverished country. The work, now, were extolled "as American Gibraltar," impregnable to an army 20,000 strong. Though yet unfinished, they had cost three years' labor of the army, and drawn 83,000,000 from the lean treasury of the infant State. Hence the eagerness of the British Commander-in-Chief to avail himself of ARNOLD'S defection.

General KNOX was ordered to succeed ARNOLD, and remained in command until his appointment as Secretary of War in March, 1785, when he was succeeded by Major GEORGE FLEMING, who commanded the arsenal, and ranked as an ordnance and military storekeeper, and not as West Point in charge of the arsenals, of repairs and storage until after the establishment of the Military Academy. During FLEMING'S administration the redoubts at West Point were dismantled of their artillery, and a large number of guns were sold for old iron.

The idea of establishing a National Military Academy was brought to the attention of the provincial authorities at the very outset of the struggle for independence; but it was not until the need of military operations had become itself upon public attention as a necessary consequence of the Nation's experience in that war, that the idea took sufficient root to produce a definite result. It was then seen and declared that the bitter struggle from which they had just emerged might have been sooner brought to a triumphant close, had the Army been led by officers accomplished in the art of war. Impressed with this idea, public sentiment was prepared to encourage any effort in the direction of military education; and the sound of the conflict had scarcely closed when the matter was brought to attention of Congress by WASHINGTON, in response to a request for his views as to a proper peace establishment. Some years later, in 1796, in his annual Presidential Message to Congress, he made a distinct recommendation for the institution of a Military Academy, from which he had heretofore refrained through delicate as to the constitutionality of the measure. Previous to this, Congress, by the act of the 7th of May, 1794, had provided for a corps of artificers and engineers, to consist of four battalions, to each of which eight cadets were to be attached; and made it the duty of the Secretary of War to procure, at the public expense, the necessary books, instruments and apparatus for the benefit of said corps. In 1798, authority was given to raise an additional regiment of artificers and engineers, and the number of cadets increased to fifty-six. Thus the "principle upon which the institution now rests was fully "sanctioned; a new grade (cadet) was created in the Army, "to which young men were exclusively entitled to be admitted," and means were appropriated for their education in the "science of war." In the subsequent act of the 16th of March, 1802, by which the military peace establishment was determined, the artificers and engineers were formed into two distinct corps. To one regiment of artillery, forty cadets were allowed; to the one corps of engineers, ten cadets; the corps when organized to be stationed at West Point, and to constitute a Military Academy, under the superintendence of the senior engineer officer present.

By subsequent enactments at various periods the curriculum of study was extended to include the present Departments of Engineering, Philosophy, Mathematics, French and Drawing; a Department of Geography, History and Ethics; a Department of Chemistry, Mineralogy and Geology; of Infantry Tactics, of Practical Engineering, of Artillery and Cavalry, of Spanish, of Ordnance and Gunnery; a Department for Equitation and Cavalry Instruction; and a Department of Fencing and Bayonet Exercise. The number of cadets was also changed, by the addition at one time of one hundred and fifty-six members, and by the limitation at another of the whole number to two hundred and fifty. Rules were also established with respect to the promotion of the cadets, by which their distribution to the different corps in the army and their relative rank were made to depend on the proficiency determined by annual Board of Examiners, and that no cadet should be presented until he had completed his course of studies, and received his diploma. A uniform was also prescribed, which was substantially the same as that now worn. Provision was also made by which the superintendent should have exclusive control of the institution, under the direction of the Secretary of War; no officer of the army of any rank whatever being allowed to exercise command at West Point, unless subordinate to the Superintendent or the Commandant of the Corps of Engineers, who was made Inspector of the Academy, and from whom the Superintendent was to receive orders, and to whom he was to make all returns and communications relative to the institution. The position of the Superintendent as regarded the officers of the army was not definitely settled, until after much vexatious questioning he was finally, by the act of August 23, 1842, declared to be the Commandant of the Post.

Owing to various circumstances connected with the condition of the country, and of the Army, previous to 1817, admission to it was less an object of ambition than it has since become. The war of 1812, however, revived the public interest in military education, which had gradually died out after the Revolution, and with the return of peace the demand for graces in the institution increased to a degree that for the first time it became necessary to adopt some equitable rule for the admission of candidates. At this time originated the custom of selecting one candidate from each Congressional district, and of allowing great weight to the recommendations of the representatives of the respective districts. This rule, for a long time founded only upon custom, was at length established by law.

Up to this time the Academy may be considered as in its infancy, but little system or regularity appearing in the government of its affairs, which proceeded without examination and without the least regard to their age or qualifications, as required by the law of 1832. They were not regarded as amenable to martial law; no class-rank was established, and no diplomas were published, and in the assignment to positions in the army, they demanded the right to select such corps as they preferred. In this embryotic condition the Military Academy furnished but seventy-one graduates during the first ten years of its existence, and was looked upon as "existing barely over "sting among the mountains, nurtured at a distance, out "of sight of, and almost unknown to, its legitimate parents."

On the 28th of July, 1817, Brevet-Major SYLVANUS THAYER, of the Corps of Engineers, assumed command, as Superintendent, of the Academy. He had then had a long period dates its efficiency as an educational institution and its reputation for that strict and impartial government which has done so much for the military service of our country. Major THAYER was an early graduate of the Academy, had served with distinction in the war of 1812, and from an intelligent study of the military schools of France, had acquired views concerning the management of such an institution much in advance of those generally entertained. Possessing rare qualifications for his position and blessed with health, ability, firmness and firmness of purpose, he was enabled, during the sixteen years of his administration, to organize a system for the Academy and perfect its operations.

In 1818, during the administration of the affairs of the War Department by JOHN C. CALHOUN, the custom was adopted of publishing in the Army Register the names of the five cadets in each class most distinguished for attainments and meritorious conduct. In November of this year the question of the amenability of the Corps of Cadets to martial law and trial by garrison courts was brought to a test, by a combination of one hundred and ninety-four of the cadets to defend their supposed rights and establish their title to a free expression of opinion in regard to the management of the Academy. An attempt to try by courtmartial the members of the committee representing the cadet, was defeated by a decision of the court, that according to their construction of the Rules and Articles of War, they *had no authority to try cadets*. This decision was overruled, however, by Hon. WILLIAM WIRT, the Attorney-General, whose opinion was confirmed by President MONROE and Mr. CALHOUN, Secretary of War. By this it was established as supreme law "that the corps at West Point "form a part of the land forces of the United States, and "have been constitutionally subjected to the Articles of "Rules and Articles of War, and in trial by court-martial." Earlier in this year (1818) authority was granted for the employment of cadets as Acting Assistant Professors, "each "cadet so detailed to receive ten dollars per month," and have an addition to the number of buttons on his uniform as a mark of "honorable distinction." Practical instruction at this time was given by excursion matches, made on different occasions by the cadets, to Boston, Philadelphia, Princeton, and other points, during which all the duties incident to camp life and field exercise were regularly performed.

Colonel THAYER was relieved as Superintendent by his own request on July 7, 1833, Major R. E. DE RUSSY, of the Corps of Engineers, succeeding him, who was in turn followed by Major RICHARD DELAFIELD, of the Corps of Engineers, September 1st, 1838. After seven year's service he was succeeded by Major WILLIAM GILPIN, Brevet-Lt.-Col. AYRAU G. BARNARD, successively, all of the Corps of Engineers; but returned for another term of five years from 1856 to 1861, when he gave place to the renowned PETER G. T. BEAUREGARD, whose brief rule of five days was on event by an order from the Secretary of War, directing him to transfer back the command to Major DELAFIELD, who was relieved in another month by Major ALEXANDER H. BOWMAN, of the Corps of Engineers, the present Superintendent. During these various administrations the Academy has continued with no cessation of its organization and conduct. The course of study has been altered during the time from five years to four, back again to five, and once more to four years, at which it now stands. The monthly pay of the cadets has been increased from twenty-five to twenty dollars, and provision has been made by Congress for an annual Board of Visitors to attend each yearly examination, and report upon the affairs of the Academy. Various additions have also been made to the buildings of the institution.

In answer to the repeated representations of successive boards of visitors, a sergeant and five dragoons were on June 12th, 1839, transferred from Carlisle Barracks, to aid in the introduction of exercises in riding at the academy. At the same time the superintendent was authorized to form a battery of light artillery for the use of the cadets. It was infused into the light artillery and mounted corps of the army, and instruction in both these branches has since continued without interruption.

The space we have given to this cursory summary of the leading events in the history of our National Military College, leaves us no opportunity in this number of the JOURNAL to follow Captain BOYNTON in his interesting description of the Academy as at present conducted, or to consider the argument in favor of the usefulness of the institution with which he concludes his work. We only say, that the descriptions "of its course of instruction and discipline, it compares favorably with similar European military academies, and "rivals, if it does not excel, the principal scientific institutions of America."

Though lacking somewhat in literary execution, to which it indeed foregoes all claim, this work is a valuable addition to our historical literature, and will furnish to the thousands of graduates from the West Point Academy a most valuable *souvenir* of their *alma mater*. It is issued in the finest style by Mr. VAN NOSTRAND, forming an octavo volume of 331 pages, handsomely printed on tinted paper, and illustrated with a variety of wood-cuts and maps, descriptive of the forts and public buildings erected at different times at West Point, and of the localities in its vicinity.

THE SOUTHERN CAVALRY.

WHILE on the retreat to and across the Rapidan, General LEE, on the 9th inst., reviewed the whole cavalry force of his army on the plain near Brandy Station. The force is greatly consolidated and broken down by its severe service during the past summer and autumn, since the offensive campaign on this side of the Potomac in June and July, down to its defensive struggles on the Rappahannock in October and November. The Confederate authorities have determined to make an energetic effort to re-organize, recruit, and strengthen that arm of the service during the present winter, and bring it into condition to cope with the cavalry in the army of General MEADE; for it is well known on all hands, and is conceded by the enemy, that the cavalry of the North, though inferior in the first year of the war, is now greatly superior in equipment, discipline, fighting qualities and general effectiveness to the Southern cavalry. A rebel writer from the army of General LEE, in recently treating of this subject, says:—

"Whatever the Confederate Cavalry have proved inferior to the cavalry of our enemy, this has been owing to the immense advantages of the latter in point of arms. Many of our horsemen are still miserably armed with double-barrelled shot guns, and, until lately, as wretchedly supplied with serviceable saddles; while proper forage, horse shoes and horse-shoe nails have often been unattainable."

A review of the "Case of the Confederate Cavalry" has just been published in the South. It is a document of considerable value, and throws light on the question which may

* History of West Point and its Military Importance during the American Revolution; and the Origin and Progress of the United States Military Academy. By CHARLES DEW. BOYNTON, A. M., Adjutant of the Military Academy. New York: D. Van Nostrand, 192 Broadway. London: Sampson Low, Son & Co., 1863.

be of service to our military authorities. The writer admits that the Confederate Cavalry is now "viewed with distrust, "if not with contempt" in the South, and thinks "it may "not be amiss to investigate whence this arises." He attributes it mainly to two causes: "First. The popular idea "concerning cavalry is very incorrect. Secondly. Extra "ordinary difficulties have attended the organization, drill, "and equipment of Confederate Cavalry?" which are discussed at length, and we think it worth while to give in full the views expressed.

First. The popular ideas about cavalry are erroneous and exaggerated.

The public makes no distinction between light and heavy cavalry. They make no allowance for the difference between the open plains which are the battle-fields of Europe, and the woody undulations, in which alone we fight in America.

The cry is, if, in NAPOLEON'S age, cavalry could break squares, take batteries, ride over columns of infantry, and, upon almost every field, be used with decisive results, why cannot it do so now? It is forgotten that then, when it was used, were heavy cavalry—picked, both man and horse, for size and weight. That they were cuirass and helmet of steel, which would resist a musket ball, and that they were drilled into the most perfect accuracy of movement. That they were never used for outposts or fatigue duties. That they were never called upon, until a critical moment, and then, only when the ground was favorable.

In Europe, therefore, cavalry forms but one-fourth to one-sixth of the entire strength of the army. The light cavalry is employed as flankers and pickets, and generally for all service out of the line. Heavy cavalry is employed in reserve, and is covered, when necessary, in marches, camps, or because, by the wings or infantry of the line. Modern improvements in ordnance have diminished the importance of heavy cavalry in Europe. It still exists, but is more rarely used. In Prussia, about, one-fifth of the cavalry is of the mass and Italian wars, were the cavalry extensively engaged.

There is no heavy cavalry in America. The scarcity of horses and of forage in the Confederacy, forbids the formation and maintenance of troops who require so much nursing and who could be so rarely used. The genius of our people is opposed to the division of labor, by which alone perfection can be attained. Each man, in every part of it, is preferred to put the same instrument to different uses; though it may be ill-adapted to some of them. We are compelled to have light cavalry. We are unable to have heavy cavalry. We expect our light cavalry to do their legitimate duties thoroughly; and, at the same time, perform the functions of heavy cavalry, and when the infantry of the cavalry arms upon any opportunity to realize this expectation; but, as the infantry of the line is never called upon for upon any extensive scale, and may forbid it in the future, except upon rare and singular occasions.

Our cavalry is *fighting cavalry, one-sixth of the army.* But, from deficient forage and equipments, *one-half of them are always unable to do duty. If destroyed, they could not be replaced.* Our cavalry regiments, in the field, rarely number sixties of instant success, and of results sure to compensate for the injury sustained; or when compelled to sacrifice the cavalry to save the army.

Again. The distances to be traversed by our cavalry are immense; the public force to many points extremely small. Hence, with our scanty numbers it is difficult to concentrate the cavalry, and well-nigh impossible to retain upon the battle-field an adequate force to meet the enemy's cavalry.

More than all, the nature of our country gives advantages to infantry and cripples cavalry.

In the mountains our cavalry figures in none of the battles. The Southern campaigns do not disprove this assertion. Nine-tenths of the battles were fought in woody fields. The number who used the sabre was so inconsiderable that their exploits can only be compared to our partisans and guerrillas. In the battle of Shiloh, not a regiment at Pale Alto stands alone. It was made with sixteen men.

In Europe the forests have nearly disappeared. Most of the land is under cultivation. The fields are large, and divided by hedges or narrow ditches. Battles are fought with the combatants in full view of each other. In Virginia and Maryland the forests are frequent and very heavy, and the country. The fields are small, and everywhere obstructed with rail or stone fences. Battles are rarely fought unless every battle has been fought in woods or behind fieldworks, upon ground impracticable for cavalry. The second battle of Manassas was a conspicuous exception; there a single brigade of our cavalry charged and routed three brigades of Yankee cavalry.

Is it not evident, then, that the popular ideas are incorrect? Has not the public expected the deeds of heavy cavalry from light cavalry, and in a country calculated to paralyze any cavalry?

Secondly. *The organization of the cavalry in the Confederate service has been attended with greater difficulties than any other branch of the army.*

All standing armies are composed, during peace, of from one-third to one-half cavalry. The European governments find that, when war comes, infantry can be increased by levies from the people, but that troopers are like sailors, and cannot be extemporized. When Louis Napoleon, in 1859, called for 75,000 volunteers, General Scorr announced that he did not want any of them. He said he must take six months to drill each trooper, and six months more to make squadrons and regiments from these troopers.

The Confederate States resolved to entertain the same views. They had no standing army from which to obtain cavalry, yet they accepted very few of the numerous companies volunteered them. With singular inconsistency such as were accepted were placed immediately in the field. A few companies received the benefit of a short stay at Camp Lee. They were exceptions. Probably the expense of forage was considered too great to be incurred for camps of instruction. If so, it was a short-sighted policy.

The Yankees had five regiments of regulars, as a nucleus; to which a sixth was soon added. They were the best troops in the U. S. Army; trained to the life upon the plains and veterans in Indian warfare. Their volunteer cavalry was, in material, very inferior to ours. It has, however, the advantage of thorough drill and discipline. While under Washington (1861 and 1862, McCLELLAN'S outposts were composed entirely of infantry. His cavalry was kept at camps of instruction. To this day, no cavalry regiment is sent into the field, until trained for many months in camp.

Drill is infinitely more difficult to cavalry than by infantry.

The nature of our country and our battle fields, which creates unusual difficulties for our cavalry, gives, and, from the beginning has given, unusual advantages to our infantry. Our infantry is comparatively undrilled, but our rugged country compels it to fight, more or the other, as necessary to regulars; and gives free scope to the individuality of freemen, battling for their rights. In the Southern States every man was habituated to the use of fire-arms. To wield a sabre with confidence and effect required months of practice. The effect of a cavalry charge is instantaneous, and not continued. A repulse is soon followed again and again. But all cavalry, even the best drilled, must rally and reform after every charge. Therein consists the test of cavalry. Every man in the Southern States can ride a horse, but to control a horse, so as to use his sabre and fire-arm with every bugle note as it sounds, requires drill and a great deal of it. The very horses need as much drilling as the men. The mere knowledge of the bugle calls requires months to be learned. Enthusiasm, intelligence and courage compensate the infantry, in our brokencountry, in a great degree, for deficiency in evolutions and tactics; but cannot supply the cavalry with the skill necessary to set together and give solidity to their movements.

But our cavalry has been called upon for duty in the field more than our cavalry.—For them camps of instruction were maintained. Even in the field, circumstances favored them. Battles and movements succeeded each other at a campaign. When stationary, outpost duty cannot fall on all at once. Necessarily includes a large number. The rest spend their time drilling. Such was the case at Centreville, in 1861 and '62, and at Winchester, after the Maryland campaign of 1862. Our cavalry, on the other hand, are posts. Their normal condition is that of motion. They never rest, except when broken down, and then the condition of the horses is deplorable. Sore backs, grazed legs, scratches and scanty feed, prevents any practical instruction be commenced.

Our cavalry in Virginia entered service miserably armed and equipped.

The Confederate government had to create resources. Every supply was overwhelmed with the wants of troops in the infantry arms and accoutrements. A few companies of cavalry, by the enterprise of individuals or local authorities, armed efficiently—the hostilities commenced. The majority were armed with double-barrelled shot-guns, and crowded, without organization, into camps, generally without temper, and incapable of receiving or retaining an edge or a point.

Their saddles and bridles were private property, such as are commonly used in the country, suffering for ordinary wear, but unfit for hard riding and exposure of service. As these wore out, the government was at length able to furnish a scanty supply, but of a character almost worthless. The leather of the saddles was poor, and the bridles generally so torn like paper. The buckles beat like tin. The saddles invariably and constantly galled the horses' backs. After a limited use the saddle blankets were worn out, and no conceivable number of blankets under one of them could prevent us torturing any horse it was put upon.

The consequence was that the general condition of the horses (who have never received any long forage regularly, and have been reduced to half rations of corn—full rations of corn—six pounds) is, that from one-half to twothirds of every company has at all times been unfit to take the field. Many of the horses have been worked more than than the inevitable human maladies of a camp. Many a lame man has been confined to camps for weeks, whose horse, otherwise fit for duty, wanted a shoe or the nails to put it on.

In the matter of arms, an improvement has gradually but surely been effected. Many of the companies now carry rifles and have supplied themselves from the Yankees. It is now a rare sight to see one of our men who has not a Yankee rifle and sabre.

Now, when occasion arises, our cavalry can be dismounted and fight on foot, and when on foot are generally very great in a broken country. The supply of ammunition, however, is very difficult for arms of such varied calibers, styles and patterns.

Most of our troopers have also obtained saddles and bridles from the Yankees. They have often got stores of both from the field. But how can they keep from the Yanks or in any other way. Even now it may be safely estimated that one-fourth of every company of cavalry is unable to take the field. After an unusual effort, as the late Pennsylvania campaign, the number temporarily disabled, is of course much increased.

Hobson claimed for his guides and light horse in India that they were the only cavalry on record ever organized in the field. Our cavalry, in Virginia, has been so organized in the field. Like them they have been taught by experience more than drill. It has been a difficult task. Six months ago, at first would have given to see what they hardly acquired in two years' service. Let that pass. They are now the best cavalry in the Light line in the country. They are now able to perform all that is required of them. The fights at Brandy Station and Upperville have been instructive to the enemy's cavalry. On the other hand, the country, they prove an efficiency that could hardly have been expected of them. The Yankees, taking advantage of the country, always support their cavalry closely with infantry. They did so in these battles. Then was shown that our cavalry could not only charge unflinchingly, but effectively, and rally and re-form; fight both on foot and on horseback; engage cavalry and infantry, and thereby drive them back or foil them by skilful manœuvres; charge artillery, capture and hold it; retreat before overwhelming numbers, fighting stubbornly, and, when reinforced, turn upon the foe with unexpected energy.

Have greater difficulties ever been overcome by any troops? Do not our cavalry deserve credit in proportion to the difficulties overcome?

In the foregoing remarks the effort has been made to show: First. That the public and the press have expected from the cavalry in Virginia that which from its character the country, it could never or scarcely have performed. Secondly. That our cavalry in the south-ern army been formed, armed and equipped, under the same difficulties, and done as much, if not more, efficiently. That the public is ignorant in a great measure of its heroic performances. Do not these causes explain the prejudice which has arisen?

It remains to be added that the same credit to be awarded to the cavalry in Virginia as to the rest of the army.

Unhealthfully. Army regulations say, "light cavalry are employed as flankers and partisans, and generally for all "service out of the line."

Judge of our cavalry by that definition, and all must admit they have never been surpassed by similar troops in any army. They have performed all the duties of an army in every battle, and have never suffered it to be surprised, as was done at Manassas or Hooker at Chancellorsville. Imboden, JENKINS, MARSHALL, and the heads of the rest of them, are titans. STUART'S Chickahominy circuit blazed the road for GARDNER'S movement the battle around Richmond. The cavalry outposts, across nearly half the State of Virginia, enabled JACKSON to march from the Shenandoah Valley to Richmond, before the enemy knew that a single man was in existence. STUART'S raid upon Catlett' Station gave General LEE the correspondence, records, documents of POPE—his strength, weakness and plans, and the plans and orders from Washington.

In a word, our cavalry have, in every appropriate sphere of light cavalry, done their duty thoroughly. That service has been incessant; their fatigues, hardships and exposure greater than that of any other troops; their casualties numerous. They have given their lives freely, as evidenced by the grades, as each for Generals in great battles; but oftener in encounters with cavalry, and in the numerous affairs of outposts were unnoticed, and the dead unknown—though buried here.

This war is desolating Virginia. Encamped armies sweep away woods and fences, and they clear the country. Each year the cavalry are compelled to operate in open, open field, crush squares of infantry, and ride over batteries of artillery.

We have intelligences of several changes among rebel officers. General Henry A. Wise has been assigned to the command of the Military District of the Department of South Carolina, Georgia and Florida; Brig.-Gen. Mackall has, at his own request, been relieved of duties in Bragg's Department, and has been ordered to report to General Johnston, in Mississippi; General Hardee is assigned to the command of Bragg's Corps, and he has been relieved by General Longstreet, who was stationed on Lookout Mountain; General Hood has so far recovered that his friends are sounding his praises in the Rebel papers; the wife of the hostess, Jenkins is at Lynchburg; Brig.-Gen. Ramsour is at Raleigh, N. C.; Lieut.-Col. James R. Crockett, an officer of the 19th Va. Cavalry, died at his residence in Montgomery County on 1st, of wounds received at Brister Station.

On the 3rd inst., four rebels, crew of a picket boat in the Savannah River, took their commander, Lieut. Pritchard, and deserted to the Union side. The officer in charge of the party was Acting-Master's-Mate Samuel A. Brockinton, of the Confederate receiving ship *Georgian*. The party were indulging in singing and other convivialities. The commander, finding the intoxication of Brockinton, concealed what his professional and official dignity, and took off his coat to join with all the force of his lungs in the chorus. The pistols were in the pockets of the coat of the boatswain, taking possession of these, informed Mr. Brockinton that he was their prisoner. They gave themselves up to Major Gen. Gillmore's Chief of Artillery, Brig.-Gen. Vinton, commandant of the post, near Fort Pulaski.

Official and semi-official advices have been received in Washington from Gen. Lander at Point Pleasant, announcing the National Government of Mexico. Active preparations are made for resisting the march of the French army into the interior. Considerable forces are under the Juarez command, and is at the head of an army from 15,000 to 20,000 men, and is now at the Central Plain, with an army of about 3,000, is to operate against the French between the City of Mexico and Vera Cruz.

A camp for the collection of such soldiers of the Department of the South as may be recommended for transfer to the Invalid Corps, has been established at Lend's End, St. Helena Island, S. C., under Captain John H. Gould, 3d R. C. Vol. Artillery, is assigned to the command thereof, under the supervision of the Post Commandant at Hilton Head.

Upon the request of Rear-Admiral S. P. Lee, commanding North Atlantic Blockading Squadron, Sub-Assistants John S. Bradford and R. E. Halfter, of the Coast Survey, with Messrs. H. M. Du Wees and J. F. Hetake as Aids, have been ordered to report to him, for the duty of making surveys of the Roanoke and Chowan Rivers, N. C.

The Ordnance Department has advertised for proposals for an aggregate of 71,000 heavy projectiles, consisting of battery shot and shell, to be delivered at the arsenals at Watertown, Mass.; West Troy and Governor's Island, New York; Pittsburgh, Penn.; St. Louis, Mo.; and Washington, D. C.

Late European advices say that the United States steamer *Kearsarge* had been ordered to leave Cork harbor in twenty-four hours, and her commander refused. She was said to be watching the blockade runners at Cork. The *Alabama* is cruising in the Bay of Bengal.!

PRIZE MONEY.

UNDER the act of Congress, approved March 2, 1863, there are three classes of persons entitled to prize money, namely: First, persons who, at the time of presenting their claims, are on board of United States vessels of war; second, persons who have been discharged from the service; and third, representatives or heirs of officers, marines and seamen, deceased. The Treasury Department is ordered to credit the Navy Department with the amount held for distribution from prizes sold, and the officers, sailors, etc., sharing in the prize money are credited in their accounts with the latter department with the amounts to which they are respectively entitled. With a view of saving the claimants from the expense of claim agents, they are to receive their respective shares through the paymasters of the vessels to which they may be attached at the time the proceeds of the various prizes are ready for payment by the Fourth Auditor.

To insure a prompt compliance with the law, the paymaster of every vessel of war having officers or men on board entitled to or claiming an award of prize money, is required to transmit to the Fourth Auditor of the Treasury, as early as practicable, a complete list of the officers and men claiming and entitled to prize money for the capture of any vessel by a United States vessel, on which such officer, marine, or sailor may have served at the time of such capture. These lists are quite distinct from those required for the classification and distribution of prize money and must be approved by the commanding officer. Here the object is to enable the paymaster to pay the claim promptly, while he, the paymaster, conjointly with the commanding officer, authenticates the identity of each claimant. The Report of Prize Cases sent to Congress, in 1862, was furnished to officers in command of United States ships, indicates the name and number of prizes payable to that date; and the transfer rolls from other vessels, with the date of transfer, and the knowledge of each other by the persons transferred, enable the commanding officer and paymaster of each vessel to secure a safe identity. The identity being secured, a list of claimants must be forwarded to the office of the Fourth Auditor, preserving a space following each name for insertion of the amount due to each, as ascertained by Second Comptroller; and upon the return of this list to the paymaster, with the amounts inserted, he is authorized to credit the account of the persons interested, and to take up the same on his quarterly accounts under its proper head. The following is a list of the papers which will be required to give a good guarantee of identity, and the return of the lists good authority for the payment of the claims. Officers on leave or waiting orders are equally with the same rules. They report to the paymaster upon whose books they are registered, and receive his prize money as if they were present on shipboard. Persons out of the service entitled to prize money, are paid by certificate on a navy agent, upon transmitting to the office of the Fourth Auditor proof of identity. Payments of amounts due deceased officers, seamen, and marines, are made to administrators, who are heirs, or appointed with the consent of the heirs, upon application to the office of the Fourth Auditor. Petty officers and seamen should be furnished with a certificate of identity by the commanding officer and the paymaster of the vessel to which they are attached at the time of any capture upon which they will enable them to establish their identity with facility when the prize money shall be ready for distribution.

Petty officers, seamen, etc., out of the service, must prove their identity by a sworn statement before some public officer duly authorized to administer oaths, and in the presence of witnesses, who must sign the statement. A certificate of identity, by a commissioned or warrant officer of the Navy, is also required. In the discharge, or a certified copy thereof, be furnished, and the certificate of some non-commissioned or warrant officer cannot be obtained, the claimant must so state on oath, giving the reasons, and the affidavit of two credible and disinterested witnesses will be required instead. Persons entitled to prize money who are ignorant of the amount, may be furnished by the Fourth Auditor with a statement of the amount due to each, provided that each shall first file with said Auditor his oath of identity, and, if out of service, his discharge. But if he have not this discharge, he must account satisfactorily for its absence. In case of the death of the party, he/she may be established by the fact being inserted in the letters of administration, and additionally proven by the affidavits of two disinterested persons, taken before an officer duly empowered to administer oaths. When the amount due does not exceed the sum of one hundred dollars, letters of administration are dispensed with, and the prescribed affidavit substituted. The widow, if she be the applicant, should render a certified copy of her marriage certificate. If the heirs be minors, guardians should be appointed. We published in the issue of the JOURNAL of October 10th a list of prizes ready for payment. Since that date the proceeds of the sales of the following vessels have been paid into the Treasury, and are ready for distribution to the officers, sailors, etc., of the vessels named as captors:—

Berry	Monticello, Mary Tames, Mohawk.
Columbia	Santiago de Cuba.
Roberts	Magnolia.
Wilson	De Soto.
Bronx	Hunter City.
Courier	Hunter City.
Lilly	Wm. G. Anderson.
John	Sumpter.
Hamilton	Kittatinny.
Two Brothers	Albatross.
Pilot Henry	Tahoma.
J. O. McNeil	Arthur.
Thurston	W. G. Anderson.

To show how handsomely the vigilance of blockaders has been repaid, we give the particulars of the distribution in the case of a few vessels: The *Memphis*, captured by the *Magnolia*, yielded $810,914 07. Acting Volunteer Lieut. WM. BYAM commanded the *Magnolia*: his vessel not being attached to a squadron at the time of the capture, his share was two-thirds of the whole amount left to the captors. The following is the distribution of the prize money realized—$810,914 07:

Commandant	$38,718 85
Acting Master	12,068 62
Acting Assistant Paymaster	10,463 26
Acting Assistant Surgeon	10,063 26
Acting 2d Assistant Engineer	8,060 97
Acting 2d Assistant Engineer, each	6,045 73
Acting Master's Mates, each	4,030 49
Pilot	4,804 15
Surgeon's Steward	2,417 29
Yeoman	2,216 60
Master's Mates	2,216 60
Acting Gunner	2,215 89
Officers' Stewards and Cook, each	1,207 85
Boatswain's, Carpenter's, and Gunner's Mates, each	2,412 29
Quartermaster	2,216 60
Quarter Gunner	1,809 85
Nurse	1,250 98
Seamen, each	1,206 88
Ordinary Seamen	1,206 88
Landsmen	1,167 91
Asst. Chief Firemen	2,214 75
Second Class Firemen	2,412 29
Coal Heavers	1,206 88

The *Britannia* and *Victory* were captured by Lieutenant-Commander R. H. WYMAN, of the *Santiago de Cuba*, the former yielding the sum of $160,595 72, and the latter $209,962 45, making $469,694 17—the captures being made within the space of a week. The following is the distribution:—

Flag Officer	$11,742 34
Commandant	23,484 71
Lieutenant	7,792 46
Acting Masters, each	4,228 24
Acting Ensign	1,762 84
Acting Assistant Paymaster	4,228 24
Acting Assistant Surgeon	4,104 51
Acting Chief Engineer	3,473 48
Acting Second Assistant Engineers	2,155 48
Acting Third Assistant Engineers	1,762 84
Gunner	1,155 45
Acting Master's Mates	1,994 57
Paymaster's Clerk	1,761 44
Yeoman	1,761 44
Master-at-Arms, Boatswain's, Gunner's and Carpenter's Mates	1,346 69
Commodore, Quartermasters, Captains of Forecastle, and Ship's Cook	1,196 74
Quarter Gunner, Captains of Hold, and Captain's and Officer's Cooks	897 31
Captain of Top	2,991 96
Seamen	897 31
Ordinary Seamen	598 12
Landsmen	598 12
First Class Firemen	1,346 96
First Class Firemen	897 31
Coal Heavers	897 31
First Class Boys	897 31
Corporal of Marines	448 64
Sergeant of Marines	448 64
Private of Marines	448 64

The *Lodona*, captured by the *Unadilla*, yielded a total of $815,915 74, which was divided as follows:

S. F. Dupont, Flag Officer	$ 8,206 78
Napoleon Collins, Lieutenant-Commander	11,261 10
Charles H. Green, Lieutenant	7,730 60
Edward Vanice, Acting Master	4,153 50
William L. Tuttle	4,153 89
Peter W. Crane	4,153 89
Edward Rimmel, First Assistant Engineer	4,153 89
Robert May, Paymaster	4,153 89
Robert H. Thurston, Third Assistant Engineer	2,230 09
Thomas Hall, Acting Master's Mate	2,230 09
Richard Ward, jr., ditto	2,241 69
William S. Gardner, ditto	2,241 69
James Collins, Captain's Clerk	1,661 81
George E. Thomas, Acting Master's Mate	1,538 88
Charles F. Hammond, Assistant Surgeon	1,538 88
Patrick H. Brown, Paymaster's Clerk	1,538 88
Yeoman	1,538 72
B. Kennedy's Mate, Master-at-Arms, Gunner's Mate and Carpenter's Mate	993 79
Quartermasters, Masters	1,192 52
Sylv. M. Barre, Surgeon's Steward	1,192 52
Corporal, Captains of Forecastle, Ship's Cook	894 12
A. M. Drummond, Captain of Hold	894 12
Quarter Gunner, Officers Stewards and Cooks	745 43
First Class Firemen	1,341 18
Second Class Firemen	894 79
Seamen	894 79
Ordinary Seamen	596 86
Landsmen	596 86
Coal Heavers	596 62
Refugee Pilot	1,192 52
Third Class Boys, each	298 49

The large amounts realized out of these captures by even the lowest grades of the ships' crews, ought to excite a healthy influence upon enlistments.

MILITARY MEMBERS OF LEGISLATIVE BODIES.—A statement made by one of the Soldiers' Home journals that gentlemen holding military commissions had been notified that furloughs would not be given to them to attend the session of the Legislature of that State, led to inquiries of the War Department which elicited the following reply from the Secretary:—

WASHINGTON, Nov. 10.

HON. HENRY T. BLOW.—Your dispatch of yesterday is before me. No order has been made by this Department prohibiting furloughs to military officers who are members of the Missouri Legislature. On the contrary, it has been the uniform practice of the Department to grant such furloughs. I have transmitted a General SCHOFIELD a dispatch of which the following is a copy:—

WAR DEPARTMENT, November 10.

To Major-General SCHOFIELD, St. Louis, Missouri:

It has been the uniform practice of this Department to grant leave of absence to officers who are members of State Legislatures or Congress, to enable them to discharge their legislative functions. You are directed to grant immediate furloughs for similar purposes to any officer of your command who are members of the Legislature of Missouri, to enable them to attend the sessions of that body.

EDWIN M. STANTON,
Secretary of War.

You will please give me the name of any officers, and the regiments to which they belong, who are members of the Legislature, to whom furloughs have been refused, or for whom they are desired. EDWIN M. STANTON,
Secretary of War.

REBEL PRIVATEERS AND AMERICAN COMMERCE.

AN APPEAL TO THE SECRETARY OF THE NAVY.

Hon. Gideon Welles, Secretary of the Navy, Washington, D. C.:

SIR: The continued depredations of the rebel cruisers on the mercantile marine of the country have not only developed a large amount of the active capital of the merchants, but seriously threaten the very existence of that valuable part of our commerce.

Apart from the loss of so much individual wealth and the destruction of so valuable a source of material power and enterprise, it is humiliating to our pride as citizens of the first naval power on the earth that a couple of indifferently equipped rebel cruisers should for so long a period thwart our commerce with annihilation. It is a painful source of mortification to every American at home and abroad, that the great highways of our commerce should have been for so unprotected by the almost total absence of National naval vessels as to induce rebel privateers to venture for almost at the entrance of our harbors; and to actually blockade our merchantmen at the Cape of Good Hope recently, on account of which, and the capture of the vessels, a copy of a letter recently received from a Captain of one of the blockaded ships, having a valuable cargo. We are constrained to say that we can perceive no reason a couple of cutters on the boundless waters of the ocean, sailed and abetted, as the Alabama has been, as ports where the international comity, if not international law, has been set at defiance, and we have witnessed with satisfaction the patriotic and energetic of your Department in the numerous accesses of our navy in subduing the rebellion which threatens our National Union.

Still we think that the loyal merchants and ship-owners of the country, whose zeal and patriotic co-operation has generously furnished the funds to sustain the Government, are entitled to have a more energetic exercise of their interest than has been hitherto extended to it. Your very zealous and gallant daughter has not only proved her prowess in vestigating the serious threads which the unprotected state of our carrying trade has produced on our tonnage, and without meaning to reflect on the private efforts of our shipowners sustain in the almost total loss of foreign commerce. It is only necessary to call your attention to the inclosed table, prepared from the official returns of the Richmond commercial journals of the city, showing the loss of the exporting trade in the imports and exports of this city alone; by which you will perceive that while during the quarter ending 30th June, 1860, we imported and exported over $62,000,000 in foreign goods, the blockade has driven to foreign vessels, we have, in the corresponding quarter of this year, only $23,000,00 by our own ships, while we have $63,000,000 by foreign vessels. These figures speaks show a most painful decadence of our shipping interest and tonnage by transfer and sale to foreign flags, which, at this time of considerable commercial activity, and when all trades indicate a want of enterprise in this field of occupation, as a want of confidence in our maritime protection, is a serious one. The natural pride of many of our patriotic ship-owners has subjected them to heavy sacrifices, in deference of numerous national appeals, of which we have given no recent; while the underwriters of the country have been compelled to make great concessions in favor of American shipping, yet without materially affecting the interest of many of them encountering heavy losses by captures in quarter where they have every reason to believe our commerce would be protected by sufficient naval forces of a powerful power. Indeed, the almost total absence of efficient naval force in many of the most important highways of commerce is damaging influence on our prospects by producing a great degree of temerity on the part of the rebel cruisers, and corresponding depression on the part of underwriters and others in interest, as to whether Government protection would be afforded to our ships laden with valuable cargoes.

The want of adequate protection to our merchant naval stations for protection of our ships, has become so notorious that underwriters are very speculative as the chance of the capture of these rebel cruisers by any of our naval vessels, but calculate only the chances of escape of our merchantmen, or the ransom of the captains of National craft from reported unseaworthiness or mutiny. These statements are made with all candor, and in the spirit of captiousness, but with a firmness that the commercial interests of the Department, which it may not be prudent or practicable to explain to the public, may fully justify the unfortunate position which the want of such protection has placed our commerce in. Yet it is respectfully urged that you will give this subject that share of the attention in your power the value of successful commerce at this time of great National expenditure, and a paralysis of so important an interest cannot be contemplated without horror at this period of our National strength. We beg leave also to inclose an extract from the *Connecticut Advertiser* of the 26th inst., and to request your attention to the paragraph marked.

We are, sir, very respectfully,

Signed: Richard Luthers, President Great Western Insurance Company; J. P. Tappan, President Neptune In-

ransom Company; F. S. Lathrop, President Union Mutual Insurance Company; M. H. Grinnell, President Sun Mutual Insurance Company; Moses Taylor, merchant and ship owner; J. C. H. Marshall, merchant and ship owner; A. A. Low & Bros., merchants and ship owners; Grinnell, Minturn & Co., merchants and ship owners; Wilson G. Hunt, merchant; Charles Newcomb, Vice-President Mercantile Mutual Insurance Company; Bowen, Brothers & Co., bankers; E. Trenor, merchant and ship owner; Dupont & Knudsend, merchants; Duncan, Sherman & Co., bankers; Richard Bibby & Sons, merchants and ship owners; E. Morgan, merchant and ship owner; Wm. Whitlock, Jr., merchant and ship owner; Geo. Opdyke, Mayor New York city; August Belmont & Co., bankers; Howland & Aspinwall, bankers; Archibald Gracie, merchant; Howland & Foshburgh, merchants and ship owners; Phelps, Dodge & Co., merchants and ship owners; Jno. H. Earle, President New York Mutual Insurance Co.; Isaac Sherman, merchant and banker; Wm. H. Aspinwall, merchant and ship owner; Thomas Dunham, merchant and ship owner; Stoffard, Tileston & Co., merchants and ship owners; Bailey, Post & Co., bankers; J. P. Morgan & Co., bankers; E. D. Morgan, United States Senator.

SECRETARY WELLES' REPLY.

NAVY DEPARTMENT, Washington, Nov. 14, 1863.

GENTLEMEN: The Department duly received your communication of the 28th ult., in reference to the depredations committed upon the commerce of the United States and other rebel cruisers. The pursuit and capture of these vessels is a matter that the Department has constantly in view, and swift steamers have been employed in search of them, and at times very close on them. They are under orders to follow them wherever they may go. The only vessel that had the impudence to show her flag at the entrance of our harbor—the *Tuscarora*—was promptly pursued, and her arrest was soon accomplished. The Department had about thirty vessels after her.

I thank you for your expression that energy and ability have creditably marked the administration of the Department in all other channels of official duties. A rigid blockade of the coast has been demanded, and its accomplishment has required a large naval force that the Department could bring to bear. To do this it could not send Capricia to keep them in that branch of practical service. It will continue to give this subject its attention, and hopes, as the avenues to the insurrectionary region are becoming closed, that a force will soon be able to be spared to have a larger force to pursue the pirates and secure the safety of our commerce abroad. Very respectfully,

(Signed) GIDEON WELLES,
Secretary of the Navy.

To RICHARD LATHERS, Esq., and others.

ARMY AND NAVY PERSONAL

Major McDOWELL of the 4th N. Y. Volunteers, has been made Lieutenant-Colonel of that Regiment.

COLONEL CHILDERSON of the 3d Massachusetts Cavalry, resigns his regiment after an absence of about three months.

GENERALS Fitzpatrick and Griffin are at Washington on their furloughs.

COMMANDER PARROTT, U. S. N., and Lieutenant-Commander Todd, are stopping at Willards' Hotel, Washington, D. C.

BRIGADIER-General Robert Anderson has been relieved on account of ill-health, from the command of Fort Adams, at Newport, R. I.

CAPTAIN D. H. Buel and 1st Lieutenant G. W. McKee, U. S. Ordnance Department, are announced as Assistants to the Chief of Ordnance of the Department of the Ohio.

COLONEL Hoffman, Commissary-General of Prisoners, has gone to the West, to inspect the condition of rebels confined at Sandusky and elsewhere.

LIEUTENANT-Colonel Frederick has been placed in command of the Invalid Corps depot, vice Colonel Wiswell, appointed Chief of a Staff bureau, Provost Marshal General.

SURGEON-General Hammond has been ordered to Nashville, Tenn., on a tour of inspection among the hospitals of our western armies.

PAYMASTER Henry R. Day, who has been relieved from duty on the receiving ship *Allegheny*, still remains on duty as Paymaster of the Baltimore Naval Station, and Inspector in charge of Apprentices.

BY order of Major-General Butler, Major Joseph M. Bell, has been appointed Provost-Judge of the Department of Virginia and North Carolina, *vice* Major Stackpole, Judge-Advocate, relieved.

BRIGADIER-General Charles K. Graham has been relieved, by order of the Secretary of War, from duty in the office of the Army of the Potomac, and directed to report to General Butler.

MAJOR Charles J. Whiting, 2d United States Cavalry, has been dishonorably dismissed the service for disloyalty, and for using contemptuous and disrespectful words against the President of United States.

BRIGADIER-General Neal Dow, who is a prisoner at Richmond, has been authorized by our Government to draw on General Meredith, Quartermaster at Fortress Monroe, for any articles which his fellow captives may need.

BRIGADIER-General John Gibbon has been assigned to the command of the Conscript Camp at Cleveland, Ohio; his wound, received at Gettysburg, still preventing him from entering the field.

LIEUTENANT-Colonel Gregg, Chief Quartermaster of the Department at Washington, has been relieved. Lieutenant-Colonel Lathrop, Inspector-General of General Heintzelman's Staff, has also been relieved, and ordered West.

COLONEL Isaac F. Shepard, of the Third Missouri Volunteers, recently commanding the colored troops in Northeastern Louisiana, has received the appointment of Brigadier-General of Volunteers.

MAJOR-General Angur, has been relieved from Court-Martial duty, and has assumed permanent command of the Department of Washington. Major-General Heintzelman has been assigned to the place, made vacant by General Angur's assignment.

THE following officers have been honorably discharged the service:—Lieutenant-Colonel Henry C. Turhill, 20th New York; Captain L. A. Johnson, Co. H, 11th Pa. Reserves; Assistant-Surgeon Edwin Boyd, 63d New York; and Second-Lieutenant Daniel O. Sullivan, 61st Ohio.

COMMODORE Wm. D. Porter has been ordered before the Naval Retiring Board, which, after a recess, has again commenced. Commodore Porter is a brother of David Porter on the Mississippi, and also saw some important service himself in the quarrel.

ADJUTANT J. W. Bradford, of the 2d R. I. Regt., has been made aide to Brigadier-General Wheaton. Lieutenant E. H. Rawson, Assistant-Surgeon 2d R. I. Regt., formerly a 2d Lieutenant, has received an appointment from the Governor as 1st Lieutenant, and is reassigned to the 2d regiment.

LIEUTENANT Jones, 2d Lieutenant Leroy, 1st Lieutenant Flint of the United States marines, died on the 15th ult. He was from Wisconsin. The fever, which was unusually fatal, has taken off a large number more than usual, particularly failed to recover. The Marine Guard lost one Lieutenant and thirteen privates.

THE name of the fort on the south side of the Potomac River at present known as Fort DeKalb, has been changed to Fort Strong, after Major-General George C. Strong, U. S. Volunteers, who died on the 19th ult., from the effects of wounds received in an assault upon Fort Wagner, Charleston Harbor, South Carolina.

ASSISTANT-Surgeon Hamilton, United States Army, has been retired from active service, and his name will be entered on the retired list of officers of the grade to which he now belongs. Assistant-Surgeon Hall is appointed on July 17, 1862, he having been borne on the Army Register more than two years.

COLONEL Albert J. Myer, Chief of the Signal corps, has been ordered to Memphis then to report back here to the Adjutant-General. The property of the corps, with the exception of the field telegraphic force and materials and trains, which have been assigned to Colonel Anson Stager, of the Military Telegraph, has been turned over to Captain Nicodemus.

COLONEL Samuel M. Quincy has left Boston to take his place at the head of the Massachusetts Cavalry. Lt. Ardovey, with the rank of Lieutenant-Colonel. He is to be Inspector-General of the Corps d'Afrique. Colonel Quincy was obliged, from ill-health, to resign his command and his appointment after the battle of Cedar Mountain, to resign the Colonelcy of the 2d Massachusetts Infantry.

FIRST Lieutenant Edward Hall, of the 71st Ohio, found guilty of forging an order, detailing him to go from Louisiana to Cincinnati, to arrest deserters, has been reduced to the ranks, and sentenced to seven months under this forged order. A court martial sentenced him to serve three years or during the war, as a private, in such regiment as the Secretary of War may direct. The sentence has been approved.

THE following named officers are announced as upon the Staff of Major-General Butler, commanding Department of Virginia and North Carolina:—Major Ross Bluke, Assistant-Adjutant-General; Lieutenant-Colonel J. Mc-Lean Taylor, Chief Commissary; Lieutenant-Colonel Geo. K. Kendall, Inspector-General; Major R. S. Davis, Assistant-Adjutant-General; Lieutenant-Colonel J. Burnham Kinsmil, Aid-de-Camp; Major James De Hart, Aid-de-Camp; Major Peter Porter Pitcher, Aid-de-Camp; Captain Alfred F. Puller, Aid-de-Camp; Captain Haswell C. Clarke, Aid-de-Camp; First-Lieutenant Frederick Martin, Volunteer Aid-de-Camp.

ITEMS AND INCIDENTS.

AN infant daughter of General Rosecrans died at Yellow Springs, Ohio, last Monday.

THE 12th Illinois Cavalry, Lieut.-Col. Hasbrouck Davis commanding, has been ordered to Illinois to be reorganized as a veteran regiment.

THE French gunboat *Peureuse*, with Marshal Forey on board, sailed from New York on the 14th. She received and replied to salutes from the other French men-of-war in the harbor.

MAJOR-General Thomas, commanding the Army of the Cumberland, has issued an order requiring commanders of corps and regiments to sign their full and proper names to all communications which they may send from that department for publication.

A GRAND farewell banquet was given to the French Admiral Reynaud and the officers of the Imperial navy now in port, at Irving Hall, last night. The affair was a brilliant one, and was most brilliantly attended. More than one hundred and fifty covers were laid for the guests.

THE records of the Surgeon-General's office show that there are 54,642 patients under treatment in the various hospitals throughout the country, including rebel prisoners sick or wounded. The total capacity of these hospitals is 84,473 beds; 30,377 of these are vacant.

THE Richmond *Examiner* of November 11th has a gratifying article on the disposition of the Confederate generals to surrender, and on the disposition of the Confederate government to promote them after performing so equivocal a service. It suggests the idea that "as long as [we] are in foreign nations see surrenders so complacently made, and promotion so often following them, they are uncertain "whether some steamer may not bring the news of our unconditional surrender to the terms of our enemy."

MAJOR-General Angur has, for sanitary and other reasons, recommended that the commands now quartered in Camp Barker, Washington, be removed to the camp on Arlington Heights. The buildings for their reception will be ready by the 20th inst. A small depot will be retained in the city, whence new arrivals will be sent across the river.

THE Richmond *Enquirer* of November 10th, refers to the "great activity in military movements in Northern Virginia, and says that "rebellion has been met by the Yankees with wonderful energy, and has inflicted a terrible blow on the cause of Southern Independence. It suggests the "disaster to General Bragg's command shows the "great necessity, bold and enterprising."

THE Richmond *Whig* of the 12th speaks sent by President Lincoln to General Meade, and published to the army on the 10th inst.:—Washington, Monday, Nov. 9, 1863.—Major-General Meade:—I have just received your despatch in relation to the Rappahannock, on Saturday, and I wish to say, "Well done."—(Signed) A. LINCOLN.

THE Provost Guard, commandant, and Signal Station, Lieutenant of the Italian ship-of-war now lying in the harbor of New York, were on the 16th presented to the Secretary of War by the Italian Legation Portland, Minister of Italy, and by him presented to the President, and afterwards to the Secretary of War. Attended by the Secretary of State and the Italian Legation they visited the Navy Yard, where they received the proper national honors.

CHANGES IN NAVY UNIFORM.

WE are indebted to Messrs. Tower, Son & Meeavis, at No 6 Maiden Lane, New York, for the following amended regulations, in regard to the uniform of staff officers of the Navy, as adopted by the U. S. Navy Department, November 11, 1863:

COAT.

Shoulder straps to be of Navy blue cloth, 4½ inches long, 1½ inches wide, bordered with an embroidery of gold ¼ inch in width, with the following devices in addition:

Chief of Bureau of Steam Engineering—Cotton device, cross and foul anchor, 1 inch in length, in gold, with star, ⅝ inch in diameter, embroidered on the same, to silver.

Engineer-in-Chief, and Engineers after fifteen years—Spread eagle, 2 inches between the tips of the wings, standing on oak leaves spread 1½ inches, embroidered in gold, with star, ⅝ inch in diameter.

Chief Engineers, after first five years—Cotton device, spread eagle, 1½ inches in length, in gold, with star, ⅝ inch in length, oak leaf placed ¾ of an inch from end of strap, embroidered in gold, to silver.

Chief Engineers, after first ten years—Same as Chief Engineer after first five years, except that there shall be two oak leaves.

Chief Engineers, after first fifteen years—Same as Chief Engineer after first ten years, except that there shall be three oak leaves.

First Assistant Engineers—Same as Chief Engineers, except that instead of oak leaves there shall be a single oak leaf placed on each end, 2-10 inch wide, ½ inch long, not placed 4-10 inch from end of strap.

Second Assistant Engineers—Same as First Assistant Engineers.

Professors of not less than twelve years—Cotton device, circle 6-8 of an inch in diameter, and 4-10 inch wide, with 4-10 inch star in relief in silver, with leaf at each end embroidered in silver, as Chief Engineers.

Professors not less than twelve years—Same as for more than twelve years, except leaf at each end to be embroidered in gold.

Secretaries—Letter S in oil English, embroidered in silver in centre, full size, with leaf at each end, 2-10 inch wide, ½ inch long, ½ inch long with 4-10 inch space between each leaf, and placed 4-10 inch from end of strap.

Chief Clerks of Bureaus of Medicine and Surgery—Same as ordered to silver Secretaries, except in gold.

Chief Surgeons and Surgeons of Fleets—Same as Chief Engineers, except that in place of oak leaves there shall be a single oak leaf, 2-10 inch wide, ½ inch long, not placed 4-10 inch from end of strap.

Fleet Surgeons—Same as Chief Engineers, except that in place of oak leaves there shall be a single oak leaf, 2-10 inch wide, ½ inch long, not placed 4-10 inch from end of strap.

Surgeons—Same as Chief Engineers, except that there shall be a single oak leaf at each end, 2-10 inch wide, ½ inch long, not placed 4-10 inch from end of strap.

Assistant Surgeons—Same as Surgeons, except that instead of a single oak leaf there shall be a single leaf of laurel, 2-10 inch wide, ½ inch long, not placed 4-10 inch from end of strap.

Chaplains of not less than twelve years—Same as Chaplains of more than twelve years, except that there shall be no embroidery of gold.

Chief of Bureaus of Provision and Clothing—Oak sprig, 1¾ inch long, embroidered in gold, with star, ⅝ inch in length, in centre of strap, bordered on same in silver, in centre of strap.

Paymasters, first five years—Spread eagle 2 inches between the tips of the wings, standing on oak sprig 1¾ inch long, embroidered in gold, with star, ⅝ inch in length.

Paymasters, first ten years—Cotton device, circle oak sprig 1¾ inch long, embroidered in gold, with star, ⅝ inch in length, oak leaf placed ¾ of an inch from end of strap, embroidered in gold, to silver.

Paymasters, first fifteen years—Same as Paymasters after first ten years, except that there shall be two oak leaves.

Paymasters, first fifteen years—Same as Paymasters after first fifteen years, except that there shall be three oak leaves.

Assistant Paymasters—Same as Paymasters, except that instead of leaves at each end there shall be an embroidered gold bar, 2-10 inch wide, ½ inch long, and 4-10 inch from end of strap.

Chief Clerks of Bureaus of Provisions and Clothing, Secretaries of Provision and Clothing, except that to be embroidered on five oak leaves spread 1¾ inch.

Naval Constructors of more than twenty years—Same as Fleet Paymasters, except that there shall be no oak sprig, with 2 inch star in centre.

Naval Constructors of more than twelve years—Same as Paymasters, after fifteen years, except that there shall be no oak sprig, with 2 inch star in centre.

Naval Constructors of not less than twelve years—Same as Naval Constructors of more than twelve years, except leaves at end to be embroidered in gold.

Assistant Naval Constructors—Same as Naval Constructor, except instead of leaves at each end there shall be one embroidered gold bar at each end 2-10 inch wide, ½ inch long, and 4-10 inch from end of strap.

CAP ORNAMENTS.

Cap ornament to be embroidered gold wreath of oak and olive leaves. Wreath 3 inches in diameter, with 4-5 of an inch space between—and 2 inch star embroidered in silver.

Cap ornament to each shield, embroidered in silver.

Engineers—Oak wreath, 3 inches in diameter, with 4-5 of an inch space between—and 2 inch star embroidered in silver.

Chief Engineers, Commodore, Commander, Lieutenant-Commander, Lieutenant—Oak and olive—Foul anchor ½ inch in length embroidered in silver.

Surgeons—Oak leaf 9-10 inch in length, embroidered in silver.

Assistant Surgeons—Oak leaf 9-10 inch in length, embroidered silver.

Paymaster—Oak sprig 9-10 inch in length embroidered in silver.

Engineer—Cross oak leaves, length 1 1-10 inch, length 9-10 inch, embroidered in silver.

Constructor—Live oak sprig, spread of leaves 1¼ inch, embroidered in silver.

For all other officers—Wreath only, no device.

CAP.

Cap to be of dark blue cloth, and of the following proportions:—Not less than 5¾—not to be 6 inches, band 1½ inches wide; visor 2 inches wide; peak 3 inches wide; not over 3½ inches wide; leather chin strap.

Ornaments to be placed on band.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communication, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels; of casualties among officers; and of military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in reference to tactical and other matters.

From gentlemen in the medical service we shall be glad to receive communications on military hygiene, practical surgery, and reports of notable operations and novel forms of treatment.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS per year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which should be made payable to the order of the PROPRIETOR, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

The Editor does not hold himself responsible for individual expressions of opinion, or communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

Subscribers ordering the address of their paper promptly, should be careful to give their previous address.

NOTICE.

W. R. REDFIELD, of Cincinnati, Ohio, having ceased his connection with this JOURNAL as an agent, our single firm has still after this date no longer acknowledged by the proprietor.

NEW YORK, November 21, 1863.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, NOVEMBER 21, 1863.

THE EXCHANGE OF PRISONERS.

THE perusal of the correspondence lately published between Commissioners OULD and MEREDITH on the exchange of prisoners, leaves the mind in a mood of confusion and pain; because, while the sympathies of every man with a spark of sensibility in his composition must be stirred by the thought of the thousands of brave men in bonds suffering the horrors of half-starvation, it is impossible to fix precisely where the difficulty lies, determine which party is in the wrong, or see the way to a speedy remedy.

The logic chopping between the two Commissioners lands one in flat bewilderment. On the most vital matters of fact involved, their contradictions are so radical as to pose the issue on the simple question of veracity between Mr. OULD and General MEREDITH. General MEREDITH, in his communication under date of the 29th October, reports Mr. OULD as having on a previous occasion made the "unequivocal declaration" that he would "proceed to declare exchanges "*whenever he conscientiously felt he had the right to "do so*, for the purpose of putting men into the "field;" and in another part of the same communication he represents him as having affirmed that he would make declarations of exchange "for the purpose of putting troops into the field, "*whenever he "thought proper.*" In reply to these charges, Mr. OULD declares that after a faithful examination of his correspondence, both with General MEREDITH and his predecessor (Colonel LUDLOW), he can find "no in"stance in which such language has been used by "him:" he further demands from General MEREDITH the date of the communication in which any such statement was made, and claims that, in default, he will "be justified in denouncing the statement as "utterly without foundation in truth." This, to be sure, is very strong, but the denial by OULD of his ever having made these declarations; and whether or not the Confederate Commissioner is a man capable of quibbling about such matters, we know not; but there are other cases in which the antithesis is still more pronounced. Thus General MEREDITH intimates that the Confederate declaration of exchange of the prisoners paroled at Vicksburgh by General GRANT, bearing date September 12th, 1863, was made "as "if for the express purpose of increasing the force of "General BRAGG against General ROSECRANS." Mr. OULD replies that "this is untrue;" that the declaration was not published until several days after the 12th, and that "*not one* of the officers or men named "in that declaration of exchange was on the battle-"field of Chickamauga." Again, General MEREDITH charges Mr. OULD with not having had valid paroles of Federals sufficient to cover the number declared exchanged by him. To which Mr. OULD rejoins that he had enough and more than enough. General MEREDITH affirms that Mr. OULD had not produced the lists. Mr. OULD insists that he *had* produced them. There are numerous other points of minor importance, but respecting which the mutual contradiction is equally emphatic: and finally each party charges the other with bad faith touching the cartel, and a disposition to disregard, override or nullify its provisions.

It appears from the principal communication of Commissioner MEREDITH, that while his predecessor, Colonel LUDLOW, was on duty at Fortress Monroe, Mr. OULD at one time made a declaration of exchange embracing no great number of prisoners of war, not in accordance with the requirements of the cartel, and that he invited the Union Commissioner to make a corresponding declaration of equivalents. Such a declaration was made by Colonel LUDLOW, thus acceding to the proposition of the Confederate Commissioner in this specific case; "but," adds General MEREDITH, "without anticipating the magnitude of the evil which "now appears as the result of that departure from "the cartel." Some months afterwards of the course the war threw into the hands of the Confederates a large body of paroled officers and men (over 30,000) captured by General GRANT at Vicksburgh, and not long afterwards some 6,000 or more captured by General BANKS at PORT HUDSON. The statement of the action which the Confederate authorities took in regard to these men we shall give in General MEREDITH's own language, with the reply of the Confederate Commissioner to each point.

"Suddenly, and without any proper conference or understanding with me, you declare on the 1st of last month, and after the date of that notice, you would declare exchanged a large portion of the troops which had been captured by General GRANT."

To this point no reply is made by Mr. OULD, though in other portions of the correspondence he intimates that this course was pursued in imitation of a similar declaration previously made by Colonel LUDLOW, on his own motion, and without previous agreement.

General MEREDITH says again:—

"When your declaration was made it covered an indeterminate number of troops, designated by commands, brigades, divisions, and corps, without the names of either officers or men being designated. Up to that time you had delivered at City Point a certain number of prisoners of war for whom I had received. Whether you must have known the number you might claim the right to discharge under these paroles, or whether you prefer to limit yourself to this number, nor, in any proper manner, did you refer to it, but made your declaration of exchange in such indefinite terms as to leave me to infer that you did not intend to be governed by the cartel. Without referring to fractions, it appeared, from the best data in our hands, that you had delivered *three for two*, or one-third more than you were entitled to."

To this point Mr. OULD replies:—

"You say I must have known that I had not delivered to you, nor had I valid paroles of your men sufficient to cover the number declared exchanged by me. I knew exactly the number, and so informed you on the 12th of September, 1863, in announcing the declaration of exchange I would make on the following day. I wrote to you that I felt in my possession paroles to cover the number declared exchanged by yourself, and, when I proceeded to make the declaration extending to those men you had delivered, and stated to you my intention to pursue proceeding."

To this Mr. OULD replies:—

"You say your declaration of exchange extended to those whom I had delivered. I say you know that it was limited to such, you are incorrect; for it declared exchanged all officers and men of the United States army, captured and paroled at any time and place prior to the 5th of September, 1863, and included many thousands of prisoners taken and paroled by our cavalry and other forces in many States of the Confederacy, never delivered. As I have already furnished you a memorandum of at least sixteen thousand of the paroled prisoners."

General MEREDITH declares that

"You insisted that you had valid paroles for more than the number that you had declared exchanged, though you failed to produce those paroles or to give any account or history of them."

To this Mr. OULD replies:—

"You say I failed to produce the paroles or to give any account or history of them. The reason I refused to do so, it is not true. I offered to produce them at any time, and importuned you to agree to some principle by which they could be compared and adjusted. When I last met you at City Point, you requested me for the first time to send to you a memorandum of the paroles claimed as valid by me. I furnished you with the list on the 27th instant, that being the first day after your request on which a flag of truce boat appeared at City Point."

General MEREDITH continues:—

"And you then proceeded to make a further declaration of exchange, ignoring the cartel altogether—basing your action upon no data communicated to me, the whole proceeding resting, as I suppose you will say, upon your sense of right, as if you were the only party having a *right* to an opinion on the subject."

To this Mr. OULD replies:—

"You say I then proceeded to make a further declaration of exchange, ignoring the cartel altogether, and resting the whole proceeding, as you suppose, on my sense of right. There again you are mistaken. I did not rest the proceeding entirely upon my sense of right—I relied, in some measure, upon yours."

A point which he proceeds to prove.

It is of course impossible to say anything regarding this maze of contradictory replications. It is obvious, however, that the whole matter is too much out of joint for General MEREDITH to set it right. Even if his correspondence revealed in him the capacity to deal with this tangled skein, (which we must frankly say it does not,) it is evident that his action is embarrassed and complicated by transactions entered into by his predecessor. We take the liberty, therefore, of urging upon the Government, in the strongest terms the appointment of a Commission Extraordinary, for the adjustment of all points in dispute touching the exchange. As the fact of unnecessary sufferings to which, in consequence of insufficient food, our Union prisoners have been subjected in Richmond, although it does not introduce any new point of law into the question of exchange, certainly adds a powerful urgency to the necessity of having all the points of dispute for which it is the cause settled at some agreement speedily reached. The matter is certainly not beyond the power of fair-minded and intelligent men to deal with definitively. In regard to the question of the sufferings to which our prisoners have been subjected, although we would fain believe that there has been some exaggeration in the stories of actual *starvation*, yet enough is known of the fact to touch the dullest sensibility, and cry aloud for remedy. We are not willing to believe that the afflictions of our men in bonds are due to any *policy* pursued by the Confederate authorities; for such diabolical malignity passes what we can credit even of pirates. The prohibitive forces of the Confederacy are amply sufficient to supply all demands; but they are scattered over immensely extended areas of country, and the means of transportation have been greatly reduced. Two thirds of the supplies for Richmond have hitherto been brought over the Virginia and East Tennessee railroads from the South-western States. The other great line leading into the cereal-producing States has lately been absorbed for the transportation of troops; hence, the temporary scarcity at Richmond—a scarcity by which the population doubtless suffer as well as the Union captives. We are thus brought face to face with the conclusion that the more our conquests are extended the greater will be the hardships of our prisoners in the hands of the enemy, unless a well-settled policy shall in the meantime be determined upon.

POPULAR APPRECIATION OF MILITARY EDUCATION.

In tracing the history of national ideas during the past two years of war, it is interesting to observe how the popular appreciation of the value of military education and training has been quickened by the lessons of each successive campaign. In the beginning it was the fashion to sneer at those who had made the profession of arms their study, and an experience in Congress was apparently regarded as a more essential qualification to command, than a course of study at West Point. Indeed, there seemed to be in some quarters a half suspicion that the possession of military knowledge and a conscientious regard for the essential principles of military science, were in some way a disqualification for the public service. It was for a time forgotten by too many of those who influence public opinion and action, that though it is important in a war like the present, that our troops should be led by men of earnest patriotism, that is not alone sufficient, but it is equally essential to success that they should be thorough soldiers, in which term we include just regard for the primary principle of soldierly honor, which demands implicit obedience to lawful authority.

But this lesson would seem to have been learned at last, and we no longer find in our public prints those sneers at West Point and its graduates, which formed the staple of so many editorials in the earlier days of the war. It has come to be generally acknowledged that to the education and influence of our national military

college we, in this, as in the war with Mexico, are chiefly indebted for what success we have achieved. It has been the leaven that has gradually leavened the whole lump, and out of the mobs who first rushed to battle in the early stages of the war, formed our present compact and well-disciplined armies. That this result was not sooner effected, has been due to the erroneous ideas in regard to all military matters, which have controlled in this country.

This is no new experience in our history. It is only gradually that we have been making progress toward a just appreciation of the military profession. In the war of the Revolution we received our first lesson, which resulted in the establishment of the academy at West Point. And as the lessons of that struggle were lost sight of in the pursuits of prosperous peace, this institution languished, forgotten and neglected, taking firm root only when the war of 1812 had recalled public attention to the importance of military education. Shall we, when peace returns to us, again lose sight of the truth in this direction, or will the general diffusion of military ideas lead us at last to the adoption of some system of national military instruction, which shall give us the advantages of an adequate force of trained soldiers for the protection of the state, and at the same time guard us against these dangers and burdens which are associated with powerful military establishments?

FROM a memorial presented by a number of gentlemen of this city to the Secretary of the Navy, in behalf of the "loyal merchants and ship owners of the "country," it appears that in consequence of the depredations of the rebel privateers only our commerce the carrying trade between this country and foreign ports has almost entirely passed into foreign hands. The amount of merchandize imported and exported in American vessels has, we are told, fallen off from $62,000,000 to $23,000,000, while that carried in foreign vessels has increased from $3,000,000 to $65,000,000. It is not surprising in view of these facts that these interested should urge upon our Government the necessity of some more efficient action for the protection of American commerce. It is gratifying to learn, as we do from Secretary WELLES' reply to the memorial, that he is pursuing to send a larger force in pursuit of the pirates as soon as the vessels become available from the enlargement of the Navy, or from the release of vessels on blockading duty. Yet we fear that this will fail to remedy the evil. What we want is not so much an increase in the number as an increase in the speed of our vessels. We believe the only really swift steamer sent in pursuit of the rebel cruisers, has been the *Vanderbilt*.

The swifter vessels of the Navy consume so much coal that the amount they have to take for a long cruise makes it impossible for them to carry heavy guns. We need vessels with engines that can give us an equal power, with a far less consumption of coal than is now required for vessels built on the present plan. With the proper machinery we might rapidly extemporize a fleet of swift steamers by refitting some of our best models.

WE understand, through private advices, that the Government has resolved on the abandonment of the Memphis and Charleston Railroad. It will be remembered that after the taking of Vicksburgh, General HURLBUT's corps (16th) was assigned the duty of holding this line as far east as Corinth, while General SHERMAN's corps (15th) was given the task of reopening it from Corinth to Decatur. The annoyance of the rebel cavalry was so great, however, that the attempt had to be given up, just as the same attempt by General BUELL last year had to be given up. Abandoning the design of opening this line of communication, General SHERMAN passed the Tennessee at Eastport, and has now made a junction with GRANT's main body. In consequence of the policy of giving up the Memphis and Charleston Railroad, the commissary stores and other public property are being removed. To supply the place of this great highway, it is understood, the Government will open the Columbus and Mobile road. Troops and supplies will be transported over that route to Corinth, making Columbus instead of Memphis the chief depôt. From Corinth the road will have to be protected to Decatur. From this point eastward to Chattanooga it is well covered by the Tennessee. This will doubtless be a task of some difficulty, but far less so than to attempt to hold the line from Memphis. Railroads introduce so important an element into warfare that it is a thousand pities the road was not on the north instead of the south side. The Government may even find it desirable to open a line on the north side from Corinth to opposite Decatur.

RUMORS coming from a high source in Washington have for some days been in circulation in this city, to the effect that BRAGG has again assumed the initiative, and attacked General GRANT's force, and that a severe battle was going on on Wednesday. Up to the moment of our going to press, however, there has been no public confirmation of this report, and we can simply say that it is not at all improbable. Even if BRAGG should not attack, there are cogent reasons why Gen. GRANT should do so. The rebel General has command of his communications between Chattanooga and Bridgeport as to render them extremely precarious. Their batteries have full play on the two bridges crossing the Tennessee between the points named, and by this and other means of annoyance, they still succeed in greatly embarrassing communication. His possession of the south side of the Tennessee and of Lookout Valley, which was gained by the brilliant action three weeks ago, it is true, saved the garrison at Chattanooga from the necessity of abandoning that point; but until General GRANT's communications are *secured* by driving back the rebels from that whole region, he will have no certainty of his ability to sustain his army. We take it that General GRANT is not the man to allow his communications to be thus trifled with, and we may soon expect to hear that he has taken steps to that end.

THE daily press have occupied much space during the past week in discussing the rebel conspiracy in Canada, to the discovery of which we made brief allusion in our last number. Some are disposed to contend that our authorities have allowed themselves to be unduly frightened by a small affair. It seems to be proven, however, that a plot has been for some time hatching in Canada, of sufficient magnitude to justify the prompt measures taken by the War Department to protect the border. A rebel vessel, the *Lee*, is said to have arrived in Canada with a band of some thirty or forty picked officers, who were to organize an expedition among the rebels in Canada, seize the *Michigan*, one of the naval vessels on the lake, liberate the rebel prisoners, 2,000 or more, on Johnson's Island, and then march along the lake shore, burning and destroying where they could. Captain WILLIAMSON, of the *Lee*, is reported to have commanded the expedition, assisted by Lieutenants BREST, KELLY,, HUDGINS, GALLATIN, GIFT, BRADFORD, MINOR (of *Merrimac* fame) and TOBIN, of the Confederate navy; and Marshal KANE, of Baltimore notoriety, is said to have had a share in the plot. A full supply of artillery, revolvers, muskets and cutlasses was shipped from New York city to various ports on the border, and from there removed to the places of rendezvous. Such is the story as we receive it.

A CORRESPONDENT suggests that the lack of seamen for our ships of war be supplied by transfers from the War to the Navy Department of soldiers who had been trained in peaceful life to seamanship: "In the "seacoast towns, particularly in the New England "States," he says, "the late draft has brought into "the Army a great many coasting sailors and fisher-"men, and from the Lake regions a great many Lake "sailors. These men, if given the privilege, would "gladly be transferred to the Navy Department for "their term of service, and all of them would pass as "seamen, others as ordinary seamen, while many oth-"ers would volunteer as landsmen." Though under some circumstances our correspondent's suggestion would be a good one, we fear Secretary STANTON would be loth to part with any of his men, even to Secretary WELLES, for service in the Navy is rarely less vapid of men than the Navy. We fancy he would think he was robbing Peter to pay Paul.

THE correspondence of the rebel agents in Europe, intercepted on the *Robert E. Lee*, and other captured blockade runners, shows that a regular system of blockade running had been established, and that the rebel Government and certain merchants of London were jointly interested in the adventurous traffic. Five steamers, owned two-thirds by the Confederate States—which pays its share in cotton at sixpence a pound, delivered at Charleston or Wilmington—and one-third by the London parties, are by special agreement, dated Sept. 30, 1863, to be run from the port of St. Georges, Bermuda, or Nassau, N. P., to Charleston, S. C. The rebel Government agrees to furnish coal and cotton at their port with all dispatch for these steamers; and for so doing a commission of two and one-half per cent. on the value of their one-third is to be allowed them. They also agree to furnish, as far as practicable, officers for the vessels. Two thirds of the Government cargo the agreement requires to be purchased by the London parties for the Confederate States on lists furnished them for the purpose, unless the Confederate States should prefer to purchase directly through their officers abroad. These cargoes are to be sent out in neutral bottoms to the depots in the islands, and there shipped in one of these steamers, to run the blockade into one of the two Confederate ports named.

The opening of the line established under this agreement does not seem to look very auspicious for either of the parties. The Charleston blockade is as close as ever, and at Wilmington is proving equally so, leaving the Anglo-rebel steamers no port in which to enter.

MAJOR-General GILLMORE has ordered that hereafter the ordnance officers for the various posts in the Southern Department shall be appointed by the commander of said Department, upon the recommendation of the chief of ordnance. Post ordnance officers are to be held responsible for all ordnance and ordnance stores in the forts of their respective posts, and for all such stores on hand that appertain to the same.

AN account, which we publish elsewhere, of the condition of the rebel cavalry, will be valuable to our military authorities. It comes from a Southern source, and is evidently written by one who has a thorough understanding of his subject. Though the rebels were the first to give attention to the cavalry arm of the military service, they are now far behind us in respect both of numbers and equipment.

THE report of the battle of Chickamauga, and the movement resulting in the occupation of Chattanooga, which we forwarded to the War Department by Gen. ROSECRANS some weeks since, has not yet been given to the public. Meantime, the Army and the Country await with much interest the publication of this important document.

THE greatest credit is due to the Navy Department for the promptitude with which the deficiencies of the Wilmington blockade have been remedied. That port is now pretty thoroughly closed, leaving the rebels without a single open port for the entry of supplies from abroad.

VARIOUS rumors in regard to a change in the command of the Department of the Ohio are afloat; but we have as yet no official information on the subject.

THE New York *Times* publishes the following extracts from a letter received from a source which entitles it to the fullest credence. It is dated St. Petersburgh, October 30th:

The war preparations continue here upon a scale unprecedented in the history of Russia. An immense workmanship has been ordered throughout the Empire. Very large earthworks and stone forts have been constructed at this place, Cronstadt, Helsingfors, Viborg, and other places. The old granite forts at Cronstadt are to be covered with 12-inch solid cast-iron plates. Ten or twelve monitors, and two or three iron-clads, of a different construction, have been ordered, and will be ready for sea in May or June next. Large quantities of cannon, shot and shell have been ordered from England, and will come overland during the winter. All the Government shops are being enlarged, and every effort is making to render Russia independent of other countries in war material, as she is already in food and clothing for her armies.

On the first appearance of the war cloud, the Russians dreaded it very much, although they were determined to do their utmost to sustain the Empress, if it came to that. Now, however, the feeling has entirely changed, and they do not dread it at all. In fact, I think they rather count it than otherwise. ALEXANDER's popularity is immense, and increasing every day. He is now visiting the southern portion of his empire, but is expected to return to St. Petersburgh in a few days.

FOREIGN MILITARY AND NAVAL MATTERS.

THE *Monarch*, target ship at Portsmouth, England, is a fresh supply of armor plates, of 5½ inch thickness, on her side for testing by the 68-pounder guns.

THE new muzzle-loading guns for the Navy are to be of the bore of 9·22 inches, and are proposed to weigh 11½ cwt., they will thus fire a round ball of 100 lbs., with a minimum charge of 20 lbs. of powder.

AN International Congress, at which General Dupont presides, opened at Geneva on the 26th ult. The object of it is to devise plans for relief societies, the design being to provide assistance for the wounded, in time of war in the military ambulances.

THE British iron-clad frigate *Prince Consort*, on her passage from Plymouth for Liverpool, for the purpose of watching the rebel runs in the Mersey, was seriously disabled, and put into Kingston, where she remained, leaky and half full of water.

THE French transport vessel *Le Finisterre* left Cherbourg on the 25th of October for Vera Cruz, having on board two hundred Zouaves and 164 troops, and fifty other troops to fill up deaths and other casualties in the French army in Mexico.

A REVOLUTION is likely to break up out of the cession of the Ionian Islands to the kingdom of Greece. The Austrians demand that the fortifications, dockyards and arsenals of Corfu shall not go with the islands, for they command the Adriatic.

ACCORDING to the last official accounts, it appears that the Danish steam fleet consists of one ship-of-the-line, five frigates, three corvettes, one brig, three iron-clad vessels, seven gunboats and eight advice boats. Three more iron-clad vessels, one of them a ship-of-the-line, are being built.

THE design for a new class of gunboats, to be iron plated, and of light draught, is now under the consideration of the British Admiralty. Four will be intended to be propelled on the double-screw principle, and will replace the gunboats built during the Russian war, every few of which remain in service.

THE pulling down of the "Petit Corporal" from the Vendome column has not viewed with satisfaction in Paris. Why change the Austerlitz costume for that of an Imperial Consul, is a query asked? The *Moniteur* and *Constitutionnel* have both written articles to oppose the public.

BESIDES the new fortifications at Kertsch, Sebastopol and Enpatoria, a force of 30,000 Russian soldiers will be withdrawn from the Caucasus and placed in these stations. They will be replaced by fresh soldiers from the interior. The CZAR will personally inspect all these points, and the Grand Duke CONSTANTINE will shortly join the command, naval and military, of the whole of the Russian forces in the Crimea.

FLORENCE NIGHTINGALE has published some observations on the sanitary condition of the Indian army, in the report of the commission sent out to India. She was particularly requested to give her opinion on the "consequences of a vicious course of life." The London *Critic* remarks on this request that "one has never been thought" she had no more sex than an angel. But she accepted the task "with the repulsive sigh of a mortal woman, and the courage of an immortal angel."

THERE is no longer room for doubt that the British Government is earnestly intent on preventing the sailing of any more iron-clad rams for the rebel service. Two gunboats have been placed in the Mersey, opposite Mr. LAIRD's yard, to prevent the escape of the iron-clad ram. More than this, the vessels employed by the Messrs. LAIRD in coasting the *El Tousseni* have been ordered to desist, and both rams taken possession of by the Admiralty authorities in the Birkenhead Docks, while the gunboats guard the entrance and exit.

SOME experiments have recently been made at the Royal Engineers' field-works, Chatham, for the purpose of testing a new description of military suspension bridge, the construction of which is due to the Royal Engineers. The bridge experimented upon had a span of some 130 feet, and was formed from the iron boats and other constructions of the kind which also invented by Sergeant-Major JONES. These were inserted together in lengths, and firmly secured, the pontoons chosen forming the piers. The object was to ascertain the comparative fruiness of the structure, horses, guns and troopers were taken backwards and forwards across it, and other exhibitions of the kind made also. The entire structure was completed by thirty of the Engineers in six hours.

THE *Royal Oak*, an iron-clad screw steamship of the British Navy, on being placed in a dry dock has been found in a bad state. The armor-plates adjoining and in contact with the copper sheathing were found to be eaten away by the action of the salt water, a series of corroded holes running into each other from half an inch to five-eighths of an inch deep. Some of the plates measured as far as 1¼ inch in depth, while some had less than 40. Several detached holes are of an oval form, as though gouged out with a steel tool of all irons, from that of the bowl of a salt spoon to that of a gravy spoon, and of equal depth, and some of the heads of the bolts had become recessed to the depth, size and appearance of the bowl of a sauce ladle. Numbers of the holes had run one into the other to the extent of five or six feet, five-eighths of an inch deep, and upwards, altogether presenting one of the most remarkable appearances ever witnessed. The ship has only been about eight months in the water. What will be done with her has not yet been decided. These holes and corrosions appear to have occurred wherever the red lead preventing it had been rubbed or washed off. The French *La Gloire* is said to be in a still worse condition than the *Royal Oak*.

AN English scientific journal says: "Our cousins across the Atlantic have a new bomb charged with inflammable liquid, and which, in bursting, splashes *Greek fire* all around, kindling objects. That is only the natural effect of the discovery of the volatile oils of Canada. It was only natural that the discovery of the volatile oils of petroleum should lead to the employing these matters in setting fire to objects at short distances. Supposing that one takes a portion of each of the oils according to dissolution in phorates or hydrogen of phosperds, a liquid of fearful inflammability, and which water will not extinguish, and to which neither acids or carbonic acid or sulphur, and other inflammable compositions, more or less happily combined with phosphorus or phosphorets, will be found to add to the problem."

THE *Moniteur* contains a long report from the Minister of Marine on the subject of maritime inscription. No sailor will now be obliged to serve more than six years, and during the second year of this period leave will be granted, so that in fact but three years actual service will be required of him. The seven years' apprentice system is also done away with, and those who were engaged in studying for a merchant captain's diploma to serve on board the Imperial fleet a year, or at least a month. The Naval Artillery Institution has also been admitted and assimilated to that which exists in the army. It is hoped that these benefits accorded to the sailor service will induce others also to frequent the coast and adopt a seafaring life. Recruiting offices for sailors were not long ago opened in the principal ports.

THE officers of the "Empress" Dragoons" lately gave a dinner in the Salle Louis XII. of the Palace of Versailles, to which the Duke de MORNY and Lord CAMPBELL and PAUL, the English Consul, and many other persons of rank were invited as guests. Covers were laid for two hundred and thirty. Toasts were, of course, given to the EMPEROR, EMPRESS and Prince IMPERIAL.

THE officers of the "Empress" Dragoons" lately gave a dinner in the Salle Louis XII. of the Palace of Versailles, to which the Duke de MORNY and Lord COWLEY in garrison in that place. Marshals MAGNAN and REGNAULT de St. JEAN d'ANGELY, Generals CANROBERT and PAUL, and many other persons of rank were among the guests. Covers were laid for two hundred and thirty. Toasts were, of course, given to the EMPEROR, EMPRESS and Prince IMPERIAL.

THE

sum than £87,692. He demands of the Confederate States £93,000 and he has a bill of £7,500 against the King of Italy. The losses on ships and cargoes sold to the Confederate government, who refused to fulfill their contract, and the capture by the officers of the Federal Government of sundry ships, are thus given:—The *Petrel*, with freight and cargo, £8,375; *Emily Farnie*, £16,840; *Gemsies*, £6,000; *Empress*, £3,603; *Lowlorer*, £14,744—in all, £87,692.

We believe Mr. PEABODY's claims against the Federal Government are for vessels seized by their blockading squadron. Driven, it is said, to almost desperate expedients by his gallant privateers, Mr. DAVIS has resolved to blockade running. He was singularly unfortunate. He is, if the accounts be accurate, to be out-blockaded, one of the most congenial witnesses living as regards the efficiency of the Federal blockade. One after another his vessels were seized by the Federal squadron. He claims, we believe, that some of these ships were illegally seized, and he therefore demands restitution. Perhaps he may get it. Or perhaps not. Mr. DAVIS has found the European governments of the vessels and cargoes sold, in regard to which Mr. JEFFERSON DAVIS and his Cabinet appear to have unparalleled the square of the hypothenuse. The amount sought of the Italian government is for the memorable *Queen*, seized by Garibaldians, and the adventure of which is peculiarly worthy the attention of more than one lengthened debate in the House of Commons.

PRINT SALES AT NEW YORK.—We are indebted to United States Marshal MURRAY for the following statement, showing the proceeds of sales of prize property at the port of New York, forwarded to the Secretary of the Navy for distribution, since the 15th of October, 1863 :—

Vessels	Amount of Distribution.	Vessels Entitled to Share.
Means of Prize, &c., &c.,		
Napoleon	$48,489 49	14 vessels.
Cape Stanner Patras	82,468 83	Fleetwood, Restless, Flambeau, G. W. Blunt.
Reuger Hiawatha & Co	208,702 71	Perry, Keystone State.
John Mentz & Co., Leopold	1,814 41	Cornubia, Southwind, Stat.
S. Anglin and Company	84,849 96	Restless and Fair.
Same, Schooner	20,096 55	Pembroke.
Hall & Rowe and Company	34,205 65	Pembroke.
S. & Wm. Wilcox and Company	1,852 64	Arthur, Schooner.
Geo. Gerrish and Company	80,914 20	Vanderbilt.
Cargo Sloop Hunter	1,000 00	Fox, Memphis and Memphis.
Cargo Heliopolis	11,238 89	Flag, Powhatan, Augusta, Tuscarora, Iowa and Flambeau.

Quartermaster's Sergeant John S. Ward, 17th Conn. Vols., promoted to 1st Lieutenant and R. Q. M. in the same Regiment.

Private Woodbury C. Smith, 54th Mass. Vols., promoted to 1st Lieutenant in 1st N. C. Vols.

THE venerable Mrs. Close, a lady whose life began with the career of the country, died at Poughkeepsie a few days since. The deceased lady was a daughter of the late General William P. Van Ness, and a near relative of Lady Gore Ousely and Mrs. Judge Roosevelt. In her girlhood she was a recognized belle at a fashionable court, wherein the late President Madison was the Grave Vice-President Aaron Burr, William Wirt, General Wilkinson, Chief Justice John Marshall, the Van Rensselaers, the Livingstons, the Tibbits, the Hoarts, and, at a later day, President Jackson, the late Secretary of War Eaton, John C. Calhoun, Mr. Webster and other less conspicuous figures, all of whom were accustomed to admire her beauty and eulogize her mental brilliancy. She was buried from St. Paul's, Troy.

ARMY GAZETTE.

THE VICTORY AT BUCKLAND.

CLARKSBURG, VA., November 19, 1863—8 P. M.

Brigadier-General CROOK, Commanding Division:

My information from Lewisburgh is that General AVERILL's victory was more complete than at first reported. The enemy's force engaged was over 4,000. They acknowledge a loss of 800 killed and wounded. General AVERILL took seventeen pieces of artillery, field officers, one stand of colors, three pieces of artillery, a large number of small arms, and a considerable number of prisoners.

A violent snow prevailed at Lewisburgh on the 8th.

JOS. E. KELLEY, Brigadier-General.

BATTLE-FLAGS CAPTURED.

HEADQUARTERS ARMY OF THE POTOMAC,
November 12, 1863.

To the Adjutant-General of the Army, Washington, D. C.:

GENERAL: I have the honor to report, for information, in charge of Brigadier-General D. A. Russell, seven battle-flags and one staff, the flag of which was torn off by the rapid movement of the column as it captured. These trophies were taken in the recent affair resulting in the enemy's abandonment of his intrenchments at Rappahannock. The color-bearer of the seventh flag has been designated by Major-General Sedgwick to the Secretary of War, in accordance with the compliments conferred on the leader of the storming party on the occasion.

I am, very respectfully, your obedient servant,

GEORGE G. MEADE, Major-General Commanding.

DISMISSALS.

During the week ending Saturday, November 14, 1863.

Lieutenant-Colonel Frederick Kopp, late Colonel, to date October 6, 1863, for misbehavior in the face of the enemy.

Captain John Hoffman, late Major, to date October 6, 1863, for misconduct in the field.

Captain Wm. H. Wilson, 2d Penn. Vols., with loss of all pay and allowances, to date November 14, 1863, for certifying to a false and fraudulent account for forage.

Second Lieutenant Frederick Kopp, 35th U. S. Infantry, to date November 13, 1863, for drunkenness while under arrest, and misconduct unbecoming an officer and gentleman.

Second Lieutenant Wm. Hoffman, 1st Pennsylvania Vols., to date November 11, 1863, for visiting a house of ill-fame while under medical treatment, and for disobedience of orders in failing to report, as ordered, at the Provost-Marshal's office in Washington.

DISMISSED THE SERVICE.

MAJOR WM. H. MILES, 3d Wisconsin cavalry, to date November 11, 1863, upon the charge of having, on the 9th of October, wantonly stripping the clothes from a corporal, and of committing and applying to his own use wines and whisky belonging to the hospital.

BROPER.

By direction of the President the names of the following officers have been dropped from the rolls of the Army :

First Lieutenant Benjamin F. Gordon, 15th U. S. infantry.

Frank A. Town, as an officer of the 15th U. S. Infantry.

RESTORED TO COMMISSION.

The following officers, dismissed the service, are restored, provided the vacancies have not been filled by the Governors of their respective States :

Captain F. S. Rutherford, 2d New Jersey Vols.

Captain Peter Bisel, 9th Massachusetts Vols., with pay from the date at which he relinquished command of his regiment.

Captain D. E. Livermore, 3d Ohio Cavalry.

Captain O. W. Robbins, 2d Massachusetts Vols., with pay from the date at which he relinquished command of his regiment.

DISMISSAL REVOKED.

The orders of dismissal in the following cases have been revoked :—Colonel Louis Wahle, 8th U. S. Infantry, to date from leaving his honorably out of the service by resignation.

Colonel Benjamin Simmons, 1st U. S. Cavalry, and he is honorably discharged by resignation, without pay, to date November 12, 1863.

TO BE RECOMMENDED FOR DISMISSAL.

The following officers have been reported to the headquarters of the Army for the offences hereinafter specified, are hereby notified that they will be dismissed from the service of the United States of the United States unless within fifteen (15) days from Nov. 16th, they appear before the Military Commission in session at Washington, of which Brigadier-General Ricketts United States Volunteers, is president, and make satisfactory defence to the charges against them :—

Failing to report at Chicahoo, Ohio, as ordered.

Surgeon James Bryson, United States Volunteers.

First Lieutenant Wm. Hoffman, 1st United States Infantry.

Failing to report at Annapolis, Md., as ordered.

Captain D. B. Perkins, 11th United States Infantry.

EXEMPT FROM DISMISSAL.

The following named officers, reported for offences, and heretofore published, is exempt from being dismissed the service of the United States, unless further proceedings be had in his case :

Captain E. D. Wilford, commissary subsistence of volunteers.

The following officers, reported for offences, and heretofore published, is exempt from being dismissed the service of the United States, the Military Commission instituted by General Order No. 59, current series, from War Department, having found sufficient satisfactory defence has been made in his case :

NOTICE TO DELINQUENTS.

The following officers having been reported at the Headquarters of the Army for the offences hereinafter specified, are hereby notified that they will stand dismissed from the service of the United States unless within fifteen (15) days from Nov. 16th, they appear before the Military Commission in session in Washington, of which Brigadier-General Ricketts, U. S. Volunteers, is president, and make satisfactory defence to the charges against them :

Absence without proper Authority.

Captain F. Jones Goldsborough, 1st Maryland Cavalry.

Second Lieutenant William H. Wallis, 29th Regiment, Pennsylvania Volunteers.

Second Lieutenant George W. Hillary, 29th Regiment, Pennsylvania Volunteers.

First Lieutenant John D. Cooper, 5d Regiment, New Hampshire Volunteers.

Desertion.

Lieutenant N. Murphy, 85th Regiment, Illinois Volunteers.

SENTENCES OF COURT MARTIAL.

First Lieutenant E. A. Palmer, Co. D, 6th Regiment, Corps d'Afrique, to be dismissed the service, with loss of all pay, for admitting to his private quarters a black prostitute for licentious practice.

First Lieutenant Rufus M. Greene, 7th Vermont Volunteers, to be cashiered for drunkenness and neglect of duty.

Second Lieutenant Wm. Hoffman, 1st Pa. Regiment, Corps d'Afrique, to be dismissed the service, for conduct unbecoming an officer and gentleman.

First Lieutenant Henry C. Shurtz, Co. H, 94th Illinois Volunteers, to be dismissed the service, with loss of all pay now due, and that may become due him, and further, that he be confined at hard labor at such place as the commanding General may direct, for the term of one year, for drunkenness on duty, for sleeping on his post as sentinel, and for leaving in charge of Francis Rodriguez, a negro, the property to the amount of eight hundred and fifty dollars, belonging to the said Rodriguez.

Quartermaster Charles Perrott, 11th Missouri Cavalry, dismissed for defrauding the Government.

Second Lieutenant Michael Mungovan, 13th Mo. Volunteers, dismissed for violation of the 6th Article of War.

First Lieutenant Alexander Greene, 2d U. S. Volunteers, to be cashiered for drunkenness, and conduct to the prejudice of good order and military discipline.

First Lieutenant Wm. Hoffman, 1st Co. K, Independent Battalion N. Y. Volunteers, to be cashiered for disobedience of orders.

First Lieutenant Wm. Hoffman, 1st Co. K, Independent Battalion N. Y. Volunteers, to be cashiered for disobedience of orders.

First Lieutenant Wm. Hoffman, 1st Co. D, 5th U. S. Artillery, and Captain S. A. Amelin, 5th N. Y. Volunteer Artillery, and Colonel John Ely, 5th N. Y. Volunteer Artillery, dismissed the service.

Second Lieutenant George B. White, 4th Rhode Island Volunteers, to be cashiered for drunkenness on duty. Sentence not confirmed, but he thereon been released from arrest and returned to duty.

Captain Wm. H. Wilson, 2d Pennsylvania Vols., dismissed the U. S. Army, to be dismissed the service for embezzlement of public property.

Captain James Weldon, Assistant Quartermaster U. S. Volunteers, to be dismissed the service, with loss of pay now due, and that may become due, without a proper order for their purpose.

Captain Charles Hoffman, 1st Co. A, Massachusetts Heavy Artillery, to be cashiered, for the charge of receiving money from a substitute as consideration for mustering him in as a recruit, when he did not have the authority to do so.

Captain C. F. Livermore, and Second Lieutenant U. T. Parker, 1st Rhode Island Cavalry, to be dismissed the service, for the charge of receiving in the escape of rebel prisoners from Fort Warren, Boston Harbor, Mass., while they were on the parole of honor granted and approved by Major-General Dix.

Captain Wm. H. Wilson, Assistant Surgeon of the Board of Enrollment of the 4th Congressional District of Connecticut, tried by court-martial on charges preferred by the Provost-Marshal-General of the Bureau of the Enrolment Act, was sentenced to be fined two hundred dollars, be cashiered from the service of the United States, and be imprisoned for the period of two months, and then be cashiered and dismissed the service. The sentence was approved by Major-General Dix, except so far as relates to his imprisonment, which was strongly opposed to the case designated by the President.

Captain John Carpenter, Co. C, 2d Arkansas Volunteers, tried by court-martial upon the charges of cowardice and neglect of duty, has found guilty, was sentenced to be dismissed the service with loss of pay.

Captain Wm. H. Bennett, 1st Co. A, Independent Battalion Cavalry, tried by court-martial upon the charge of fraud, has been honorably acquitted.

Lieutenant Francis S. Metcalf, Provost-Marshal, 1st Division, was sentenced by court-martial to be dismissed the service of the United States, to forfeit all pay and allowances due or that may become due, and forever debarred from holding office of trust or profit in the United States. Charge—Embezzlement of orders.

MEDICAL DEPARTMENT.

ORDERED.

Surgeon Thomas Anderick, U. S. Volunteers, to relieve Surgeon Thos. H. Burke, U. S. Volunteers, as President of the Examining Board, Cincinnati, Ohio, and to report in person to Major-General Burnside, as attending Surgeon to sick and wounded volunteer officers in Cincinnati, Ohio, and to relieve Surgeon Thos. H. Burke, U. S. Volunteers, to report in person to Surgeon George Suckley, U. S. Volunteers, in charge of the U. S. General Hospital, Chester, Pa.

Volunteers, to duty as Medical Officer in charge of the Invalid Corps, and he has been ordered to report in person without delay, to the Commanding General of the Department, for duty as Medical Purveyor at Nashville, Tenn.

NAVY YARDS.

BROOKLYN NAVY YARD.

Work at this yard has been greatly impeded by the persistent strikes of the laborers engaged on Government work put out to private builders. These have continued some two weeks, and though now the workmen have in most instances been satisfied, yet the completion of some vessels will be put off several weeks, from the necessity of waiting for machinery, &c. The insistance to Government by these strikes may seem by the following list, not entirely complete, of vessels which have been compelled to await the good nature of the workmen:

E. B. Ceyler, steamer, ready in two weeks, if machinery will permit: *Augusta*, steamer, machinery backward; *Magnolia*; *Hemisphere*, tug-boat, hull nearly probably in two weeks: *Brooklyn*, steamer ready for sea, but vessels probably will not be ready to leave yard in one week probably: *Morrimac*, steamer, machinery backward: *Sweet Briar*, tug-boat, machinery backward; *Hydrangea*, tug-boat, ready for sea in about a month, probably: *Bonnie*, steamer, uncertain. A gang of laborers are at work constructing new dock beds in the grass plot on the left of the gate-house, which will be ready for use and not to interfere with the operations of the ship carpenters, who need every space that can possibly be made available. The press of the Winnemuca, the great prize, rises high over the ponton at the upper ship house, and between that house and the lower, in the open air, another vessel of the same class, and made in the same models is constructing. The keel is already laid. The Naval Retiring Board commenced business again on Monday at the Marine Barracks, having been ordered to re-assemble by Secretary Welles. At present the case of Commander Henry K. Thatcher is. The following are the chief officers of the court: Commodore Storer, Commodore Hudson, Mr. Nesbit, and two or three members of the medical profession. The gunboat *Flag*, from Fort Royal, arrived on the 13th inst., having in tow the prize steamer *Hermit*. The *Flag* has since that time left for Port Royal. The *Sassacus*, supply steamer, arrived on the 16th inst., from the North Atlantic Blockading Squadron. She sailed again on the 17th inst. The *Sassacus*, double-ender, whose trial trip was lately completed, sailed on the 16th inst. An alarm of fire was rung on Tuesday night, the mould into which molten iron was being run having become overheated. No damage was done to the structure, the workmen, however, being put to the trouble of occasion of recommanding to the proper authorities that models be hereafter made of fire-proof material, and in this way the slight mishap may result in additional security to Government workships.

BOSTON NAVY YARD.

The workmen at this Yard resumed work on the 16th inst., after a delay of about two weeks. The vacancies for the workmen have been manned the same morning, and had much influence in inducing a return to work in good feeling. Notwithstanding an order had been received at the Yard to discharge fifty hands on the 16th, the commandants have since transpired which will probably cause it to be revoked. The two new sloops-of-war, the *Sacramento* and *Pensacola*, will be launched in a few months to be ready for service as soon as required to supply the machinery. They will be 540 feet in length, and 2,900 tons burden, and will be ready for sea in a year. The pumping of the engines will commmence double their speed to the propeller. The new iron-clad, to be called the *Quinnipiguet*, will have two turrets, is 200 feet in length, with 40 feet beam, and will be ready of 1,5\$ feet, and of 2,200 tons burden. The ironclad *Mondonock*, which is also building at the Yard, is progressing quite rapidly, and workmen are now engaged in putting on her armor plates. There is an additional sloops-of-war, smaller than the *Sacramento* and *Pensacola*, will also be built immediately. They will be 200 feet in length, 40 feet wide, and 20 feet deep, and will be ready for sea in a year. *Madawaska* has been taken from the dry-dock, and will sail in a few days. The *Ticonderoga* will be ready for sea in a few weeks; also the *Canandaigua* and the *Pequot*. The latter has received all her armament and all her officers have reported for duty. The *Pequot* is of 936 tons measurement, and carries a powerful battery. Commodore Charles Wood is still lying at the dock undergoing repairs. Entire new bolters are being placed on board of her, and her engines are also being over-hauled, and will not be ready for service in the spring. The gunboat *Ambrie* is nearly ready for sailing again. She has been furnished with a new boiler, and in other respects improved, both in appearance and efficiency. The gallant old officer, who has been in service on the Potomac for nearly two years, and has rendered valuable aid to the Government in breaking up the contraband trade between Virginia and Maryland. Her appearance again on her station will be hailed with satisfaction by the officers and crews of the Potomac flotilla. The repairs on the gunboat *Kanawha* are now nearly completed, and she will be ready for service in the course of a week. The tug-boat *Uta* is still lying at the wharf.

WASHINGTON NAVY YARD.

The strike of the ordnance laborers employed in the anchor shop has been settled by putting white men in their places. The shop is again in full blast. The ironclads at the Yard this week were as follows:—Diamond Shoals, Potomac flotilla, *Florida* and *Preston*, all under for repairs to boiler; prize schooner *Alsea*, captured in the lower Potomac while attempting to run the blockade; fine-clad *Sassapanon*, from the South Atlantic Blockading Squadron, for repairs; also the supply steamer *Baltimore*, from the same station, for supplies. Great activity prevails in the ordnance shops, and immense accumulations of old kinds are being sent to the several blockading squadrons, especially to Charleston.

VARIOUS NAVAL MATTERS.

The captured blockade runner *Margaret and Jessie* has been purchased by the Government.

The U. S. steamer *Ireland*, from Hilton Head on Sunday, spoke tide-wheel steamer *Starlight*, 75 in. bet. 34', lim. 37', steering bulkhead.

The steamer *Alsea*, laden with salt and liquor, captured while attempting to run the Sydney Smith blockade, arrived at the Washington Navy Yard, in charge of a prize crew.

The U. S. steamer *Uta* was captured on the 25th of October off Matagorda, Texas, the *Anita*, with a cargo of cotton valued at $500,000. The *Uta* and *Anita* are both vessels formerly owned off Wilmington by the U. S. gunboat *Nyphon*, but arrived in Boston.

The Weather bakery Company, lately Secor & Co., of New York, has arrived in San Francisco, after a passage of one hundred and sixty days from this port. She was shipped from here in the ship *Aquila*, and will be put together at the Mare Island Navy Yard.

Admiral Dahlgren, under date of November 6th, reports the capture off Morris's Inlet, of the schooner *Alsea*, a vessel of about fifty tons, and formerly a Wilmington pilot boat. Upon examination she was found to be loaded with a full cargo of salt.

The Navy Department has received information of another capture off Wilmington, particulars of which have not been received. This is what is left best to close up and many blockade-runner will be captured off there the coming winter.

The U. S. gunboat *Saginaw*, Captain Hopkins, sailed from Pensacola on the 15th inst., for Key West to join the coast of Central America. The U. S. sloop-of-war *Cyane*, Captain C. Scott, arrived in the bay of Panama from the Pacific on the 8th.

Orders have been issued to the Commandants of the navy yards to reduce the labor employed where per cent. in view of the delay arising in the progress of the machinery consequent upon the new system of ordnance, and to commence the gradual suspension of work by the machinists known as the Navy Yard Ordnance Corps.

The U. S. steam frigate *Niagara* is still at anchor in Gloucester harbor, Mass. A number of excellent men have volunteered from the harbor, and a full complement of men has been secured in the town, under the charge of two residents who are familiar with the harbor and coast. The *Niagara* will sail for Europe.

One of the Catskill boats, while on picket duty, at a navy fort of the Charleston blockade, recently ran afoul of the obstructions in the channel, between Sumter and Moultrie. Here she hung heavy aground, while the enemy's batteries poured the fire of four together on her, at intervals across the channel. They appeared to have become satisfied that she was aground, and ceased firing, supposing that the projectiles of the monitors

In the Sumter *Patapsco*, recently, one of the cartridges for her fifteen inch smooth bore exploded while being rammed home. Fortunately no accidents resulted, although the gun has been rendered useless. The damage was done to the gun, the turret of the monitor. The same damage was done to the gun, the turret of the monitor. Two men were slightly injured, and the gun itself so crippled were shown to pieces, that the remainder had to be thrown overboard. The gun was loaded with its full charge of powder and shot, and the fact that it only injured, Chestnut Street, Philadelphia, and Boston, Mass., and for wrought-irons.

Two of the *Tecumseh* guns which were shipped from Fort Warren last August have never been mounted for. It now appears that there two guns made their way on board the *Tecumseh* after they were stowed away in the after gun-room, belonging to Joseph Perkins, Esq., as stated in the report of Admiral Dahlgren. Mr. N. B. Crowninshield, the purser on the *Tecumseh*, has resigned.

Lieutenant Commander Wm. D. Whiting, to command the steamer *Vanderbilt*, vice Lieutenant Commander Augustus Brevoort, detached.

Lieutenant Joshua Bishop, ordered to the *Tuscarora*.

Lieutenant J. R. Spencer, to the receiving ship at Navy Yard, Boston, vice Paymaster H. H. Rosser, to the *Kearsarge*.

Second Assistant Engineer Wm. Hunter, to the *Kearsarge*.

Paymaster A. N. Mitchell, to the steamer *Bethlehem*.

Assistant Surgeon Wm. Lee, to the steamer *Kearsarge*.

Surgeon Henry F. McSherry, to the Naval Hospital, Memphis, Tenn.

Assistant Paymaster Henry A. Strong, to the steamer *Sebago*.

Act'g Assistant Surgeon Wm. H. Cook, to the steamer *Sebago*.

Ensign G. A. Batcheller, to temporary duty on the *Sassacus*, and on arrival at New Orleans to the U. S. steamer *Estrella*, of the Gulf Squadron.

Act'g Assistant Peter A. Chanon and Carpenter Ebenezer Thompson, to the steamer *Fort Jackson*.

DETACHED.

Captain George F. Emmons, from duty as Fleet Captain of the North Atlantic Blockading Squadron, and ordered home.

Lieutenant Commander T. S. Fillebrown, from the Navy Yard, New York, and ordered to command the *Sassacus*.

Lieutenant Commander John Irwin, from ordnance duty at Boston, and ordered to the command of the Navy Yard at Philadelphia.

Lieutenant Commander Montgomery Sicard, from ordnance duty, Portsmouth, N. H., and ordered to the *Tuscarora*.

Lieutenant Commander Wm. D. Whiting, from command of the *Tecumseh*, and ordered to command the *Kanawha*.

Lieutenant Commander Wm. D. Whiting, from command of the *Kanawha*, and ordered to return North.

Lieutenant Wm. Gibbons, from the command of the *Monocacy*, and ordered to the *Kearsarge*.

Lieutenant Commander Albert K. Fulton, from the *Harriet*, and ordered to the *Kanawha*.

Lieutenant Commander Albert K. Fulton, from the *Mary Sanford*, and ordered to the *Harriet*.

Ensign Marston Niles, from the *Monocacy*, and ordered to the *Kearsarge*.

Gunner Thomas Stewart, from the receiving ship at Boston, and ordered to the *Kearsarge*.

Gunner Cornelius Dugan, from the *Cayuga*, and ordered to return to New York.

PROMOTED.

Second Lieutenants Newton Mc Coy Cook and F. B. Sturgeon, to be First Lieutenants in the Marine Corps.

First Assistant Engineer C. Bischoff, to be Chief Engineer.

RESIGNED.

J. Otis Bort has resigned his commission as an Assistant Surgeon. Rev. James A. Coleman has resigned his commission as Chaplain.

VOLUNTEER NAVAL SERVICE.

ORDERED.

Acting Master John D. Childs, to the *Sassacus*.

Acting Assistant Paymaster H. S. Bradford, to the *Sebago*.

Acting Second Assistant Engineer Hosford Hall, to the Chesapeake.

Acting Master's Mate James Bach, to the *Alleghany*.

Acting Master's Mate Henry F. Bach, to the *Alleghany*.

Acting Assistant Surgeon T. H. Russell, to the *Vermont*.

Acting Assistant Paymaster Edward Hall, to the *Estrella*.

Acting Assistant Paymaster Griswold L. Fly, to the *Relief*.

Acting Second Assistant Engineer Thomas Ward Jackson.

Acting Master Henry R. Billings, to the Navy Yard, Portsmouth, N. H.

Acting Assistant Paymaster William S. Creevey, to the *Potomac*.

Acting Assistant Paymaster C. Bowditch, to the *Mary Sanford*.

DETACHED.

Acting Assistant Paymaster Edward S. Clarke, from the *Release* and ordered North to settle his accounts.

Acting Master's Mate Charles H. George Wiggin, from the command of the *Tennessee* and granted one month's leave of absence.

Acting Master's Mate Charles H. Wiggin, from the *Estrella* and ordered to command the *Alabama*.

John F. Trenk, Acting Master, yellow fever, October 29, Mississippi Squadron.

ARMY PROMOTION.—The first introduction of flogging into the Army was by Captain H. Nerp, 10th Regt. F. V.—3 months (subsequently 60th Regt. F. V.—3 years), April 18, 1861. This press printed a little paper called the *Sentinel Guard*. The press continued to follow this regiment through all its marches and trials, up to August, 1862, when, on General Pope's retreat, the Rebels, in anticipation, it was destroyed, to prevent its falling into the hands of the rebels.

In October following we hear of a press in one of the Massachusetts regiments in the Army of the Potomac, but we have failed to trace it up to them, fall into our hands; further than this we have no record.

When the Army of the Potomac moved on to Manassas, Captain Inwin had a press in operation at the Headquarters of the Army of the Potomac. By the time the Army had arrived on the Peninsula in the seven days retreat.

The first introduction of the press in the hospitals was in October, 1862, although the publication of the *Sentinel* was not issued till Feb. 14th, following. The press is now in operation in Carver Hospital, as well as many others.

Printing is also carried on in the Navy to a considerable extent and there is a paper, ship *Minnesota*, at Fortress Monroe, the U. S. hulk *Hannibal*, off Charleston, and probably others to us unknown.

The 11th Pennsylvania Cavalry, at Yorktown, published a paper called *The Cavalier*. This paper has been in operation over a year.—*Historical Magazine.*

MARRIED.

[Announcements of marriages and deaths should be published at the rate of *fifty cents* each.]

BRAGG—LEE.—In Charleston, Mass., on Tuesday, the 1st inst., by the Rev. Dr. Eliot, Lieutenant Thomas J. Bragg, U. S. A., to Miss Mary Custis, daughter of the late Gen. Robert E. Lee, U. S. A.

SHERMAN.—On the 10th instant, at the battle of Ringgold, in the battle of Ringgold Gap, Georgia, Captain EDWARD SHERMAN, Company A, Second Regiment Pennsylvania Cavalry, aged 27 years.

OBITUARY.

SERGEANT JOHN MCCLELLAN.

Died, Long Island, Thursday, 12th inst., from disease contracted in the service of the United States, Sergeant FRANK M. MCCLELLAN, aged 26, late of Battery Artillery, and a Sergeant of the Eighth Regiment Artillery, N. Y. Volunteers. His loss will be severely felt by all his brother officers and all who knew him. His entire devotion to his duties, and many acts of kindness to the sick and wounded at Roanoke Island, endeared him much to all who knew him, while in the field. His manly and soldierly bearing, his genial manners, intelligence and generosity of heart made him ever a beloved friend and gallant companion. G.

Authorized Agents for procuring Bounty Money, Back Pay, Pensions, and collecting all kinds of Claims against the Government.

HISTORY OF WEST POINT,
WITH THE
ORIGIN AND PROGRESS OF
THE UNITED STATES MILITARY ACADEMY
By CAPTAIN EDWARD C. BOYNTON, A. M.,
Adjutant of the Military Academy.
One volume, octavo; beautifully illustrated with Maps and fine Engravings, chiefly from Photographs taken on the spot by the Author. In sheets, $6.
Handsomely bound in Morocco, Bevelled Boards, $7.50.
PART FIRST.
Relates to the early occupation of West Point by the American forces—the military importance of the post during the period of the Revolutionary War—the treason of Benedict Arnold—the building and the purchase and management of the Military Academy—the Superintendence of Sylvanus Thayer—Brevet Honors from authentic documents, and illustrated by Maps and Engravings from authentic plans.
The prodigious designs of Benedict Arnold, and his connection with Major John André, Adjutant-General of the British Army in America, are succinctly described; together with the "Proceedings of the Board of General Officers," in the case of Major André, in a *fac-simile* form, as published in the Journals of the Continental Congress of the Confederation.
The grand *Fete de juin* at West Point on the occasion of the Visit of the Marquis de Chastellux, in 1782; with all the changes in the Garrison and the Military Establishment of the Post; and many of the orders of Washington from the Head Quarters, for the first time, given to the public.
PART SECOND
Describes the origin of the Military Academy, and the progress down to the present time, with copious extracts of the accessory for such an Institution at the very commencement of the Republic, and the many interesting notices in its future upon the restoration of the Military Academy, after the close of the war for the country, are given.
The present organization of the Institution, its alleged antecedents tendencies, and the services of its graduates in the field and elsewhere, without, the author has treated at length.
The progress of the Institution under each successive Superintendent, the erection and removal of the many Public Buildings, the changes by academic Regulations and Descriptions, together with those of the Professors, will be found carefully recorded in interesting feature in the work.
The Cadet Life is also embodied into the History of the Post, and the details of the manner of living—the amusements—the opportunities for improvement—the Hops—the Encampments—the Fatigue duties—the Examination afterwards, full and complete information is given, which will be found of interest to the general reader.
To the visitor or tourist, the work points out and describes (with the aid of a Map) all the objects of interest connected with the Post—the Public Buildings, as they now exist, and the method for obtaining access to all such objects.
THE APPENDIX
Contains the roll of the Academic Staff, from the commencement to the present time, with the names of distinguished Cadets in each class from 1817 to the present time. The Register of Graduates (Alphabetical) a numerical list of all the Cadets who have been admitted from the different States, Territories and Territories whence appointed; a similar list of all the Graduates and Cadets who have died, with a synopsis of all the laws of the United States relative to the Military Academy; and a table of the Military Organization and the military schools in Europe.
There are a few copies of the Plates of interest to be found in the work. No effects have been spared to render the Engravings and others, illustrative, with a view to render the work an authority.
The Maps are from original and carefully executed surveys.

UNITED STATES

ARMY AND NAVY JOURNAL;

A WEEKLY NEWSPAPER, DEVOTED TO THE INTERESTS OF THE ARMY AND NAVY, AND TO THE DISSEMINATION OF CORRECT MILITARY INFORMATION.

THE ARMY AND NAVY JOURNAL is established in the interest of no party. It will be conducted by no clique. Its independence will be absolute. Avoiding all personal and political bias, its columns will be devoted solely to the inculcation of sound military ideas, and to the elevation of the standard of in ak its departments. Its pages will be devoted to impartial military criticism by competent authorities, to the dignified discussion of topics coming within the scope of its observation, and to a full and reliable record of all subjects of interest to those in any way connected with military or naval affairs, or interested in the art of war. The Department of Engineering will be now for a time under the direction with wrirks operations, the progress of the same attention to the Military Academy and the interests of our Commercial Marine will be given as heretofore. Correspondence among other matters the columns of the Journal will include from week to week:

A summary, in short, of whatever occurs in all parts of the world of value to our Army and Navy. Its editor will be spared to make the JOURNAL complete in the record of all such communications as may be sent within its province are at all times invited from those interested in the Art of War, and the Publishers of the Projector to make it not only a complete Military and Naval gazette, but at the same time a highclassed, reliable, lively journal, which will be read with interest by the families and friends of persons connected with the public service and by the great body of the intelligent public.

The important which Military and Naval affairs have assumed in the United States demands that they should have in the press an adequate representation, and that by its ability, entire impartiality in the discussion of subjects coming within its province, and by the value of the information which it carries to the national forces, it may command the confidence of the public and to the Army and Navy, and become a necessity to every such. Patronage respectfully solicited.

The JOURNAL is established in obedience to such a demand, and it will be the constant aim of the projector to make a paper of which our soldiers and sailors will be proud to possess as their paper, and which shall be unrivalled in completeness and ability by any of its class in the world. Arrangements for the special aid have been made with some of the most competent writers on Military and Naval affairs in the country, and for such official and departmental assistance as will ensure to the JOURNAL the earliest and best gazettes of changes, orders, &c.

From the numerous expressions of approval the ARMY AND NAVY JOURNAL has awakened in the Army we select the following:

From Major-General GEORGE G. MEADE.

HEADQUARTERS MILITARY DIVISION OF THE POTOMAC, }
September 18th, 1863.

W. C. CHURCH, Esq., EDITOR ARMY AND NAVY JOURNAL:

DEAR SIR—Your circular several numbers of the ARMY AND NAVY JOURNAL, and am pleased to see the publication has been undertaken by a gentleman of your ability and experience. It affords an excellent channel to add my contribution to the enhancement of the profession, and I enclose the name and subscription, $5.

Very respectfully, your obedient servant,

GEO. G. MEADE, Major-General Commanding.

From Maj.-Gen. McCLELLAN, *Commanding Army of the Potomac.*

"It would seem that the country requires such a paper as the ARMY AND NAVY JOURNAL, and I trust that it may very long exist, sufficiently endowed, to do the good work of the kindness that shall be a standard—has been needed. By the selection of its editor it promises well in the interview."

From Major-General W. H. FRENCH, *Commanding 3d Army Corps.*

"I say that the ARMY AND NAVY JOURNAL is a publication that will steal should be a representative of our present great military struggle. In this I wish it success."

From Major-General G. H. THOMAS, *Commanding 14th Army Corps.*

"It will afford me much pleasure to recommend the ARMY AND NAVY JOURNAL to officers in my command, and I shall take this opportunity to express my gratification that its design is to be carried out."

From Major-General JAMES S. NEGLEY, *Second Division 14th Army Corps.*

"I am much pleased with your interest in your enterprise. Wishing it success in the establishment of the Army and Navy Journal."

From Prof. H. COPPEE, *University of Pennsylvania.*

"A good many of the officers have long been in want of a former editor, my knowledge has been a failure; but many promises to be a valuable publication, and will supply service intelligence and official information—the earliest and most reliable—which is now sought in vain through the columns of the daily journal. The typographical execution appears admirable, and your military experience will no doubt prevent any mistakes which might occur in an inexperienced editor."

Of the numerous notices of the newspaper press, we have room only for the following:

The ARMY AND NAVY JOURNAL is an issue to itself and to the country. It is the organ of our military and naval officers, who spoke from their knowledge of the country and the service, and not from the heights of Cabinet. It ought to retain every army officer in the field, and every officer in the navy, as a subscriber. The military officers of the country will find it a valuable medium with the general public, who now take such a deep interest in all matters relating to the Army and Navy of the highest value and interest. Its articles are from the pens of officers who have seen service, and who have studied the profession of arms. The publication office is at No. 322 Broadway.—*New York Times.*

The ARMY AND NAVY JOURNAL, the ablest publication from the army. Handsomely printed, full of variety, well edited, and, in addition to its military information, is highly adapted to the social line of journalism. Its subscription list has already reached a large number, and is rapidly increasing, and will soon include every member of the country who is personally equal to the task of reading. It is the best medium of communication for our Military and Naval officers.—*Boston Traveller.*

The ARMY AND NAVY JOURNAL has proved a success from its start. Handsomely printed, full of variety, well edited, and, in addition to its military information, highly adapted to the social line of journalism. Its subscription list has already reached a large number, and is rapidly increasing, and will soon include every member of the country who is personally equal to the task of reading. It is the best medium of communication for our Military and Naval officers. Its brilliant repute—ours, when recurs at the bottom of official dispatches has made the ARMY AND NAVY JOURNAL a name whose pens are prompted to aid the true establishment of a paper worthy of the country. We hope the JOURNAL may soon be one of the most widely circulated papers in the country, and the interests well as persons of military interest—now more than ever—the ARMY AND NAVY JOURNAL will be the indispensables of the day.

The terms of the JOURNAL are FIVE DOLLARS A YEAR, PAYABLE IN ADVANCE. It is published in a large-sized quarto sheet of 16 pages, printed on fine tinted paper, and printed in the best manner on fine book paper. This will furnish a yearly volume of over 800 pages, filled with information of indispensable importance to every soldier or sailor ambitious of professional skill and success, as well as to every man desirous of keeping intelligently informed upon the questions and events of the absorbing universal situation. Subscriptions and communications should be addressed to the UNITED STATES ARMY AND NAVY JOURNAL, New York.

and specify the particulars cause, matter or thing aggrieving which a decision is requested, and state the ground or principle of inequality or error complained of.

S. P. GILBERT,

Assessor Thirty-second District,

State of New York.

Dated at No. 136 Broadway, this 15th day of November, 1863.

U. S. FIVE-TWENTIES.

The undersigned, as General Subscription Agent, is authorized by the Secretary of the Treasury to continue the sale of this popular Loan, and Ten Days' public notice will be given before withdrawal.

About two hundred millions remain unsold, and it is assumed the remainder will be disposed of before the circulation of the National Banking Associations commences, on the first January next. The Secretary has a sound discretion in the matter, as this loan is strictly protected, the demand from Savings Institutions is perpetually taking from the market.

As it is well known that the Secretary of the Treasury has made no further issue of Legal Tender Notes on deposits, Interest revenues, and in the usual interest Payments, the fact that the Government is in a security certain that it will not be necessary for him, in the future, to make further forced issues of Legal Tender Loans, the interest and principal of which are payable in Gold.

These considerations must lead to the prompt conclusion that the Seven-Thirty Loan and the Five-Twenties" will sell at a handsome premium, as we see this week, with the "Seven-Thirties" fixed, when it was all sold, and could no longer be offered for at par.

This is a

SIX PER CENT. LOAN,

the interest and principal being payable in coin, thus yielding about Seven per cent. per annum, as the present premium on gold.

It is called "Five-Twenty," from the fact that whilst the Bonds may run for twenty years, yet the Government has the right to redeem them at par, at any time after *five years.*

The interest is payable yearly, on the first days of November and May.

Subscriptions will be taken Coupon Bonds, which are payable to bearer, in sums of $50, $100, $500, and $1,000, or Registered Bonds of similar denominations, and in addition to the Bonds,

Three "Five-Twenties" cannot be taxed by States, Cities, towns, or municipalities, and the Government exempts them is only one and a half per cent. on the amount of incomes, when the income does not exceed two hundred dollars per annum. Income from all other investments will be assessed, and collected by the Assessors, at the rate of five per cent. on the income.

Banks and Bankers throughout the country will continue to dispose of the Bonds, and all orders by mail or otherwise promptly executed.

The Treasury Department having perfected an arrangement for the delivery of Bonds at various points will be enabled to receive them at the time of subscription, and will thereby avoid the necessity of subscribers grudging to parties who want the Bonds on payment of the accrued interest between the two dates.

JAY COOKE, Subscription Agent,

No. 114 South Third Street,

PHILADELPHIA.

PENNSYLVANIA MILITARY ACADEMY, AT WEST CHESTER.—Pennsylvania for the Pennsylvanians, conducted by Pennsylvanians, with the following Board of Trustees:

HON. A. L. ROBERTS, President; CAPT. WM. A. PAPLE, Vice-President; WM. F. BARBER, Esq., Secretary; HON. JAMES POLLOCK, Treasurer; HON. Benjamin Newlin, D. D., Benj. Wallace, D. D., Hon. Chas. Brooke, Hon. Wm. Darlington, Hon. Thomas Williamson, Hon. Chas. Gilpin, Gen. F. Rossell, Jos. R. Townsend, Charles Downing, Wm. S. Spriggs, Geo. A. Parvin, Theodore Hyatt, Esqrs.

It provides Primary, Classical, Collegiate and Military Departments of Study, all of which are now in operation, under thoroughly competent Professors. The accommodations for boarders are of the most approved kind. The discipline is strictly military. Cadets are admitted at any time, and charged from the time of entrance. The Academy is furnished by the State with Muskets, Rifles, Swords, Belts and Sashes for Cadets. For circulars apply to Col. THEODORE HYATT, President Pennsylvania Military Academy, West Chester, Pa.

ELECTION NOTICE.

PURSUANT TO THE

PROVISIONS OF THE LAWS

OF THIS STATE.

PUBLIC NOTICE is hereby given, by the COMMON COUNCIL of the CITY of NEW YORK, that an ELECTION will be held in the several ELECTION DISTRICTS of the various Wards of said City on the

FIRST TUESDAY of DECEMBER next, (being the FIRST DAY of DECEMBER, 1863,)

The Polls will be held at the places which have been designated by the Common Council as the places at which Elections shall be held in said Districts during the present year, and the polls will be opened at nine o'clock, and remain open until sunset, when they will be finally closed.

The officers to be voted for at such election, are the following:

A Mayor, in the place of George Opdyke.

A Civil Justice, for the First District, comprising the 1st, 2d, 3d and 5th Wards.

A Police Justice, for the First District, comprising the 1st, 2d, 3d and 5th Wards.

A Civil Justice, for the Second District, comprising the 4th, 6th, 11th and 16th Wards.

A Civil Justice, for the Third District, comprising the 8th and 9th Wards.

A Police Justice, for the Third District, comprising the 8th and 9th Wards.

A Civil Justice, for the Fourth District, comprising the 10th, 15th and 17th Wards.

A Police Justice, for the Fourth District, comprising the 10th, 15th and 17th Wards.

A Civil Justice for the Fifth District, comprising the 7th, 13th and 14th Wards.

A Police Justice for the Fifth District, comprising the 7th, 13th and 14th Wards.

A Civil Justice for the Sixth District, comprising the 12th and 21st Wards.

A Police Justice for the Sixth District, comprising the 12th and 21st Wards.

A Civil Justice for the Seventh District, comprising the 18th, 19th and 22d Wards.

A Police Justice for the Seventh District, comprising the 18th, 19th and 22d Wards.

A Police Justice for the Eighth District, comprising the 20th and 23d Wards.

An Alderman in each of the Aldermanic Districts having an even numbered designation, viz.: 2d, 4th, 6th, 8th, 10th, 12th, 14th and 16th.

Six Councilmen in each Senatorial District.

One Commissioner of Common Schools, for each Ward.

One Inspector of Common Schools, for each Ward.

Two Constables, for each Ward.

By order of the Common Council,

D. T. VALENTINE, Clerk.

THE MILITARY SITUATION.

MILITARY operations in front of Chattanooga have suddenly assumed a complexion of supreme interest and importance. The first three days of the present week witnessed a series of engagements resulting in a very handsome victory, driving the rebels from their late position in front of Chattanooga, and inflicting a severe and damaging blow to BRAGG's force. The latest dispatch, dated on the morning of Thursday 26th, is to the effect that the rebels have been driven from every position, and that General GRANT continues to pursue BRAGG's badly whipped and demoralized troops. The inference deducible from the facts thus far made public, which are neither as full nor as clear as we could wish, is that BRAGG has by General GRANT's forward movement been caught in the very act of retreat. He had already sent away all his heavy artillery, and the weighty part of his *material*, and seems to have been making a retrograde movement, with what precise aim does not yet appear. General THOMAS reports that on Monday 23d, at noon, the corps of Generals GRANGER and PALMER were advanced directly in front of the Union line of fortifications, drove in the enemy's pickets and carried his first line of rifle pits between Chattanooga and Cister's Creek. These formed the outer defensive line of the rebels, and were taken by a charge of the brigades of WILLICH and HAZEN, covered by the fire of our works. This achievement gave General THOMAS possession of all the high ground between him and Missionary Ridge, and secured very important tactical advantages for further operations against the enemy's position in Chattanooga Valley. Over a hundred prisoners, mostly Alabama troops, were taken in the action, which cost a loss of 111 in killed and wounded.

On Tuesday 24th, General HOOKER, in command of General GRABY's division, Twelfth corps, General OSTERHAUS' division, Fifteenth corps, and two brigades, Fourteenth corps, carried the north slope of Lookout Mountain, with small loss on our side, and a loss to the enemy of 500 or 600 prisoners; killed and wounded not reported. At daylight of the same day General SHERMAN crossed the Tennessee at the mouth of South Chickamauga with three divisions of the Fifteenth corps, and one division of the Fourteenth corps, and carried the Southern extremity of Missionary Ridge, establishing his right at the Tunnel, and his left at Chickamauga Creek. General GRANT in a dispatch to General HALLECK, dated several hours later, reports the captures much heavier than as announced by General THOMAS, and carries the number up to the very handsome figure of two thousand. Our own loss he states as "not heavy." General THOMAS declares the behavior of the troops to have been admirable.

Wednesday morning, 25th, witnessed a renewal or offensive operations. During the night the rebels had abandoned Lookout Mountain, and General HOOKER took possession. With the enemy still occupying Missionary Ridge, on the battle-field near Chickamauga, General SHERMAN being all prepared to begin an assault at 8 A. M. upon the strong position of the enemy at the north end of Missionary Ridge. He had the day before taken a hill near the position of the enemy, but commanded by their artillery. He had to descend into a valley, and then make another ascent to the position held by the enemy. Two unsuccessful assaults were made by General SHERMAN, but, with the co-operation of the centre, he ultimately gained the position, and completed the great victory. The brigade of General CARSE, with a portion of General LIGHTFOWS brigade, composed the storming party in the first assault. They were repulsed with quite a heavy loss after an attack persisted in for an hour; but being reinforced, they were enabled to hold a part of the hills.

About 3 o'clock General GRANT started two columns against the weakened centre, and in an hour's desperate fighting, succeeded in breaking the centre, and gaining possession of the ridge in which the enemy was posted; the main force was driven northward toward General SHERMAN, who opened on them, and they were forced to break, and seek safety in disordered flight down the western slope of the ridge, and across the western ridge of the Chickamauga.

The result of this series of superb victories is to give us possession of the ridges, intrenchments and rifle pits in front of Chattanooga, and to rout and demoralize the rebel force, who are in retreat hotly pressed by GRANT's columns. Our captives are put as high as five and even ten thousand men.

These operations can hardly have failed to produce a decisive effect on the prospects of the rebel column operating under LONGSTREET against General BURNSIDE's force. He could scarcely venture to remain in front of KNOXVILLE with the certain danger which General GRANT's operations must present to him of having his retreat entirely cut off. And, indeed, there is good reason to believe that the design of General BRAGG to withdraw from the immediate front of Chattanooga was with the view of taking such a position as would cover General LONGSTREET's withdrawal, and enable that General to form a junction with BRAGG's main body; though this purpose, thanks to General GRANT's fine combinations, has been completely foiled.

BRAGG's advance had been marked with several not entirely inconsiderable successes, resulting in bringing him up to a position to invest KNOXVILLE. We last week reported his capture of General BURNSIDE's outposts near Rodgersville, on the 9th inst. From that point the rebel cavalry advanced towards KNOXVILLE, and on the 15th captured portions of two or three cavalry regiments, numbering three hundred men, at MARYVILLE, fifteen miles from KNOXVILLE, in the direction of the Little Helston, and drove the remainder of the force into KNOXVILLE. This affair is thus announced in a dispatch from General BRAGG:

MISSION RIDGE, Thursday, Nov. 16.

To General COOPER:

General WHEELER reports an attack upon and dispersion of the enemy's cavalry, pursuing them into the woods at KNOXVILLE, and capturing 300 prisoners. The infantry force is close up.

(Signed) B. BRAGG, General.

On learning this result, General SAUNDERS, commanding a cavalry brigade, advanced to give the enemy fight, but finding them too strong for him, he withdrew his force in line of battle three miles from KNOXVILLE. This position, after an ineffectual struggle, was abandoned.

From this point, this portion of the enemy's force advanced on Rockville, eight miles from KNOXVILLE, driving the Union outposts before them close up to the latter place. While these operations were proceeding on the line indicated, the main force of the enemy under General LONGSTREET, CHEATHAM, and PEGRAM, advanced by way of Loudon and Lenoir—the passage of the river at the former place being made on Saturday, the 14th inst., and the Union troops falling back before them in good order. During all Sunday 15th brisk skirmishing was going on, and on Monday the enemy was held in check all day at Campbell Station, twelve miles from KNOXVILLE, on the Lenoir road. General BURNSIDE was, during this action, personally in command. His loss amounted to two hundred and fifty men: rebel loss unknown. During Monday our army fell back on KNOXVILLE, and early on Tuesday morning (17th) the line of battle was formed around the city. At noon the rebels appeared on the Lenoir road, two miles from the town, and heavy skirmishing immediately commenced—General SAUNDERS holding the line gallantly and stubbornly until nightfall. Late in the evening, our troops charged the rebels, and drove them from their ground, but fell back to the original line. On Wednesday 18th, heavy skirmishing was resumed, both parties losing severely. General SAUNDERS, a brave, gallant, and most excellent officer, was among the wounded on this day's fight, and we deeply regret to state that he died of his wounds on the following day. Thursday and Friday, 19th and 20th inst., witnessed a continuation of the struggle, with the element of heavy artillery firing added, and on the 23d we had the following dispatch from General BRAGG:

MISSIONARY RIDGE, Nov. 23.

To General COOPER:

We hold all the railroads leading into KNOXVILLE, except the one between Holston and French Broad Rivers. General Forrest's cavalry might destroy that. The enemy's cavalry is most broken up. WHEELER cut off his train between Cumberland Gap and KNOXVILLE.

(Signed,) BRAXTON BRAGG.

We have, however, official advices from General BURNSIDE, up to the same date as BRAGG's dispatch, to the effect that he is safe and confident. He will be supplied and reinforced.

THE ARMY of the POTOMAC is reported to be again on the march, a movement having begun at daylight on the morning of Thanksgiving, the 26th. The weather was clear and cold, and the roads are said to be in tolerable condition, having dried considerably in the last twenty-four hours. We have no official announcement of the movement, which we give on the authority of newspaper correspondents, who add that "a battle is expected at Germania Ford."

THE siege of Charleston continues without any developments of note. Charleston dispatches to the Richmond papers state that on Thursday, the 19th, General GILLMORE fired eleven shots from Fort Gregg into the city. They report some three or four buildings struck, and no serious damage inflicted. Fort Sumter takes the iron hail with meek silence. Though the sea wall is entirely destroyed, the rebels continue to build a bomb-proof on the ruins. Forts Moultrie and Johnson shoot with no great vigor. A new battery, however, armed with guns of the largest calibre, has been discovered in the rear of the Moultrie House, on Sullivan's Island. Since our occupation of Morris Island, the naval authorities have established a line of interior blockade on the island to a point off Fort Moultrie. The Monitors and the *New Ironsides* were placed on this line, and have thus far effectually closed the harbor against blockade runners. As the rebels have several iron-clads, it has been thought advisable to throw out as a picket boat one of the Monitors well up towards the throat of the harbor. On Sunday last the Monitor *Lehigh*, Commander BYRON, while performing this duty, chanced to get a little out of the channel, and the vessel grounded. In this plight she received the compliments of a salute from all the rebel guns that could be brought to bear against her. Fortunately the vessel was not much damaged, and she was got off on the next tide. Several of the Monitors are at Port Royal undergoing repairs.

STRATEGY OF THE GRAND CAMPAIGNS.

CAMPAIGNS OF FREDERICK THE GREAT.

NO. I.

THE CAMPAIGN OF 1756.

We design to give in this and succeeding papers a critical survey of the great series of campaigns, known in history as the "Seven Years' War," waged between FREDERICK THE GREAT, King of Prussia, and an armed coalition of six of the European Powers, headed by Austria, a little over a hundred years ago. As an illustration of a war conducted on the theory which has received the names of "defensive with offensive views returning," this series of campaigns, directed by the greatest Captain of the Eighteenth Century, is justly accounted among the most interesting and instructive in military history. Its survey will show, in a very striking manner, how the deficiency of military means can be supplied by the resources of military art; it will show how a war was so conducted that a people poor in resources and numbering but five millions was able to make a front against a league of nations numbering a hundred millions, and to come victorious out of the conflict; finally, it will show, in the most conspicuous manner, how invariably in war great results are the fruit of correct and grand military action, and failures the consequence of feeble and faulty military action.

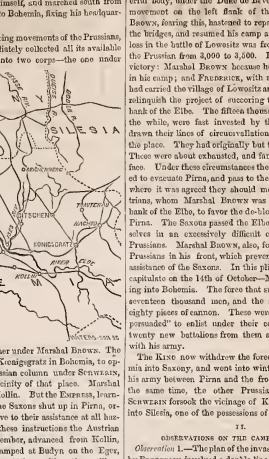
In the year 1756, Austria, then under the rule of MARIA THERESA, after long brooding over the means by which she could revenge herself on FREDERICK of Prussia, for the wrong he had done that Power ten years before in wresting from it the Province of Silesia, had succeeded in uniting in a coalition against the Silesian Power, France, Saxony, Sweden and the Germanic body, against the Prussian Power. It is not necessary in this purely military study to enter into any analysis of the several motives prompting these various Powers to combine in this league: all thought they would find their interest, directly or indirectly, in the humiliation of Prussia.

While the dissection of the terms of the coalition and of the prospective division of the spoils weayed going on, FREDERICK, informed of the danger that threatened him, resolved with prompt and terrible energy to strike the first blow. In the month of August, 1756, that the great war of the Seven Years commenced. The KING demanded of the EMPRESS-QUEEN a distinct explanation of her intentions, and plainly told her that he should consider a refusal as a declaration of war. He received an answer, at once haughty and evasive, which left the KING no other resource than to prepare for his defence, and every consideration prompted him to begin this by seizing the moral and material prestige of the initiative. He had an excellent army, which was brought partly encamped the best drilled and disciplined infantry in Europe. He had the advantage of a central position: his enemies were widely separated from each other, and could not easily unite their overwhelming forces on one point. The military establishment of Austria herself was at the time a weak—the two hundred thousand men who, under the reign of the father of MARIA THERESA, had followed the leadership of the great EUGENE to victory, had dwindled down by war and neglect to forty thousand men. FREDERICK, therefore, had good hope that by promptly assuming the offensive he might overwhelm the forces then collected against him, and by an advance through Bohemia, strike at the "head and "front of the offending" by an advance to Vienna.

FREDERICK began by dividing his force into two armies—the one under his own immediate direction, consisting of seventy battalions and eighty squadrons (64,000 men); the other under Marshal SCHWERIN, consisting of thirty-three battalions and fifty-five squadrons (30,000 men). The latter was sent into Silesia and took position at Nachod, on the eastern frontier of Bohemia, ready to co-operate with FREDERICK in the invasion of that State. With the force under his own direction, FREDERICK, on the 30th of August, began his march in three columns into Saxony. The force of the ELECTOR is variously reported to be 15,000 men, and was inferior to each of the three Prussian columns. The Saxons accordingly fell back before FREDERICK'S advance, evacuated Dresden, which the Prussians entered on the 6th of September, and retired to the entrenched camp of Pirna; a position which was supposed to be impregnable, and which insured the ELECTOR his communications with Bohemia, whence he expected succor, and whither he could retire in case of need.

The acquisition of Dresden was an important conquest to the KING of Prussia, for he fell heir to the ELECTOR'S arsenal and all his military stores. The place, moreover, was a strong one; it afforded him a *point d'appui*, of which he stood in need, and completed the frontier of the Elbe, the whole of which from Magdeburg was now in his power. FREDERICK had not calculated on this opposition to his invasion of Bohemia, and, as we saw, had ordered Marshal SCHWERIN to penetrate the Kingdom by way of Silesia, while he should march due south through Saxony by the Elbe. But judging it imprudent to attempt the advance into Bohemia, leaving the Saxon masters of the Elbe behind him, he determined to reduce them before undertaking further operations. In this task a double object had to be kept in view—first, to effect the reduction of the Saxons at Pirna, and, secondly, to prevent their receiving succor from the Austrians, who, it might be supposed, would hasten to the relief of their allies. For the first of these objects he surrounded the camp of Pirna with forty-two battalions and ten squadrons; for the second he formed an army of observation of 30,000 men (twenty-eight battalions and seventy squadrons), took command of it himself, and marched south from Pirna, following the Elbe into Bohemia, fixing his headquarters at Aussig.

On learning of these menacing movements of the Prussians, the Court of Austria immediately collected all its available troops and formed them into two corps—the one under



Prince PICCOLOMINI; the other under Marshal BROWN. The former took up his camp at Konigsgratz in Bohemia, to oppose the advance of the Prussian column under SCHWERIN, who had moved to the vicinity of that place. Marshal BROWN'S force mustered at Kollin. But the EMPRESS, learning the critical position of the SAXONS shut up in Pirna, ordered Marshal BROWN to move to their assistance at all hazards. In accordance with these instructions the Austrian General, on the 23d of September, advanced from Kollin, crossed the Moldau and encamped at Budyn on the Eger, where he remained until the 30th, awaiting the artillery and pontoons which they were preparing at Vienna. It was for the purpose of anticipating this very move that FREDERICK, as we saw, planted his corps of observation at Aussig. On the 29th of September he advanced for the purpose of meeting BROWN. The KING putting himself at the head of the vanguard, composed of eight battalions and twenty squadrons, moved to Tirnitz, where he learned that Marshal BROWN would pass the Eger on the morrow near Budyn. On the following night the main body of his army, 25,000 strong, joined him, and a reconnoissance disclosed the Austrian camp in the plain of Lowositz. On the morrow, October 1st, the camp that had been discovered was reconnoitered at daybreak. A thick fog extending over the plain prevented objects from being distinctly seen. Presently, however, a strong corps of Austrian cavalry was seen to debouch in the plain. The KING was instantly formed in array in order of battle. The left, commanded by the DUKE OF BEVERN, occupied the heights of Lobosch; the right, under PRINCE HENRY, the heights of Homolka—commanding the position which the Austrian General had neglected to seize. The Prussian line was thus about two miles and two thirds in extent. The front of the Austrian line, exceeding 3500 toises, was covered by a marshy rivulet: their right rested on the Elbe, the left on Techaikowitz. As only the cavalry force of the Austrians had thus far appeared, FREDERICK imagined he had before him nothing but the corps of the Austrian army, while the main body was supposed to have passed to the right bank of the Elbe, for a movement on Pirna by that route. Under this hypothesis he ordered twenty squadrons of SEYDLITZ to charge the Austrian horsemen on the plain to the right of Lowositz. The Prussian cavalry in this charge overthrew them, but were presently brought up by the Austrian infantry and artillery, from whose fire they were compelled to fall back, after being somewhat roughly handled. At this point Marshal BROWN, resolute of his mistake he had committed in not seizing the heights of Lobosch, and emboldened by his success over the Prussian cavalry, ordered the Prussian left, occupying the heights before mentioned, to be attacked by a division of eleven battalions. The assault failed: the Prussians resisted vigorously, and, assuming the offensive, by a bayonet charge drove the Austrians into and through Lowositz, which was taken possession of by the Prussians, and their left reinforced from the right and extended to the Elbe.

FREDERICK now had broken the right wing of the Imperialists, but they had a strong position behind the marshy rivulet. To have moved on this position, the Prussians would have presented their flank and been exposed to a very heavy artillery fire. FREDERICK, accordingly, contented himself with the advantage he had gained, and remained behind Lowositz. There was still danger, however, that Marshal BROWN might pass to the right bank of the Elbe, with the view of gaining Pirna by that route. To prevent this the KING sent a powerful body, under the Duke de Bevern, to make a turning movement on the left flank of the Austrians. Marshal BROWN, learning this, began to repass the Prussians during the bridges, and resumed his camp at Budyn. The Austrian loss in the battle of Lowositz was from 2,500 to 3,000 men: the Prussian from 2,000 to 3,500. Both armies claimed the victory: Marshal BROWN because he had not been forced in his camp; and FREDERICK, with more reason, because he had carried the village of Lowositz and obliged his enemy to relinquish the project of succoring the SAXONS by the left bank of the Elbe. The fifteen thousand SAXONS at Pirna all the while, were fast invested by the Prussians, who had drawn their lines of circumvallation close and tight around the place. They had originally but two months' provisions. These were about exhausted, and famine stared them in the face. Under these circumstances the SAXON Generals resolved to evacuate Pirna, and pass to the right bank of the Elbe, where it was agreed they should meet a force of the Austrians, whom Marshal BROWN was to bring by the right bank of the Elbe, to favor the de-blockading of the camp of Pirna. The SAXONS passed the Elbe, but only to find themselves in an extremely difficult country, surrounded by Prussians. Marshal BROWN, also, found a superior force of Prussians in his front, which prevented his getting to the assistance of the SAXONS. In this plight they were forced to capitulate on the 14th of October—Marshal BROWN retreating into Bohemia. The force that surrendered amounted to seventeen thousand men, and the artillery to more than eighty pieces of cannon. These were "half compelled, half persuaded" to enlist under their conquerors, who formed twenty new battalions from them and incorporated them with his army.

THE KING now withdrew the forces he had had in Bohemia into Saxony, and went into winter quarters, encamping his army between Pirna and the frontier of Bohemia. At the same time, the other Prussian army and Marshal SCHWERIN forced the victory of Konigsgratz and rolled into Silesia, one of the possessions of the KING of Prussia.

II.

OBSERVATIONS ON THE CAMPAIGN OF 1756.

Observation 1.—The plan of the invasion of Bohemia adopted by FREDERICK involved a double line of operations. SCHWERIN with 30,000 men was to penetrate by Silesia, while the KING was penetrating Bohemia by Saxony and the left bank of the Elbe. This was faulty, for it placed his force on exterior lines, and frittered away his strength. The Austrians also employed two lines, but a glance at the disposition of their forces will show that their lines were interior to those of FREDERICK, since the troops upon them were clearly more easily unitable. The radical fault in the plan of operations told most injuriously on the campaign, for while FREDERICK'S force on the whole field of operation was triple that of the Austrians, his strength on the special field of Lowositz—his strength was actually inferior. He had 34,000 men blockading the Saxons in their camp at Pirna; 30,000 under SCHWERIN held in check and utterly neutralized by an inferior force under PICCOLOMINI at Konigsgratz, and the like 30,000 but fifty miles off to oppose a superior Austrian force on the field of Lowositz SCHWERIN'S column should have been united to FREDERICK'S. To be sure, this would have relieved PICCOLOMINI, who would have made a junction with Marshal BROWN; but the Prussian army would still have had the immensely superior strength. The KING might have tored Prague in September with 90,000 men, and fixed his winter quarters in Bohemia instead of in Saxony.

Observation 2.—NAPOLEON, in the portion of his *Memoirs* devoted to the discussion of the campaign of FREDERICK THE GREAT, argues that the KING committed an error in investing Pirna. He thinks that the position should have been assailed and carried by a *coup de main*. The camp of Pirna was a great triangle, 2,500 toises in circumference. Its 14,000 SAXONS were encamped on the left bank, with a detent of line. "If the KING," says NAPOLEON, "had but "nine attacks made, three on each side, only one being a "true one, in one of the points where the ravine [at the bot "of the camp] is safest, by placing there two battalions of "fifty each, he would have succeeded in taking the re"vine. It would have required a quarter of an hour to "construct a slope there, by which he might have made "two-thirds of his army, infantry, cavalry, and artillery, "debouch: the SAXONS, driven under the walls of Konig"stein, would have capitulated." This taken, the place would have required but a small garrison, and thus the 34,000 whose force was frittered away in investing Pirna, would have been relieved to join the KING'S force, and then double the operations in Bohemia might have been much more bold and decisive.

Observation 3.—It has been asserted by some military

writers, among others by JOMINI in his *Traité des Grandes Opérations Militaires*, that FREDERICK should have penetrated through Moravia or Bohemia to Vienna directly and by Bohemia and concluded the war by the taking of that capital. The main objection to this plan of operation is not that urged by the Prussian writer TEMPELHOF, who shows by an elaborate calculation the enormous train this would have required to supply the army. This consideration, brought forward by this critic, as the paramount consideration, to which all others should be subordinated, is simply a proof that the theory of war, at the time he wrote, had made a retrograde step from the great principle that the army is merely ancillaried in his famous maxim, "war must support war." A genius like FREDERICK's might easily calculate that, in a rapid offensive movement, he would be able to find 20,000 men in a sick, fertile country, supporting at the time a population of from five to six millions. The real objection to the plan of invasion by Moravia is that he would have been stopped by the fortresses of Olmutz and Brunn, and that on reaching the Danube he would have found all the fleets of the monarchy collected to dispute the passage with him, whilst the Hungarian insurrection would have attacked his flanks. NAPOLEON, who was not distinguished for want of audacity, either in theory or practice, says: "So vast an operation must evidently have exposed his army to entire destruction."

The successes of FREDERICK in the opening campaign of the Seven Years War were certainly great; but that they were not much greater is distinctly referable to the causes above mentioned—a faulty plan of operation and action not sufficiently bold.

CORRESPONDENCE.

THE BATTLE OF CHICKAMAUGA.

To the Editor of the Army and Navy Journal.

SIR:—In the ARMY AND NAVY JOURNAL of the 26th of September, in the article on the battle of Chickamauga, occurs the following passage:—

"By the time General ROSECRANS is fairly in Chattanooga, the rebels are concentrating their flank range batteries received, as we may suppose, that the Union general shall pay dearly for his next step in advance. *It is not quite clear to us why* General ROSECRANS should make the advance. If he had remained at Chattanooga, looking well to his communications," etc.

The writer of the foregoing was not correctly informed in regard to the character of the movements which occasioned the evacuation of Chattanooga, and, therefore, was not in a position acquainted with the topography of the country, or the necessity for the battle to *secure the possession* of Chattanooga would have been made clear to him.

As the public generally have a very imperfect idea of the movements of the Army of the Cumberland, previous to the battle of Chickamauga, and the subsequent retreat to Chattanooga, be assine.

When it was determined to cross the Tennessee River west of Chattanooga, it became necessary for the army, after effecting the passage of the river, to cross the Sand or Raccoon Mountains, on the level of the mountain road from Trenton River. Lookout Mountain was then the great barrier between them and Chattanooga. This mountain is some 1,600 feet above the level of the river, approaching within fifty miles in length, and ends abruptly on the Tennessee, three or four miles west of Chattanooga. For forty miles its has but three passes practicable for the passage of an army, and these very difficult; one at the point of the mountain, near Chattanooga, another about 25 miles south, and one at Winston's, 40 miles from Chattanooga.

The plan of the campaign was, to hold the rebels in check at Chattanooga with Gen. WOOD's division, and to cross at the north side of the river, opposite the place, while the main body of the army, crossing Lookout Mountain by Steven's and Winston's passes, should march down, destroy their lines of communication, and either besiege them in Chattanooga, or force them on disadvantageous ground. To prevent the rebels from sending a force from Chattanooga, by the pass around the point of Lookout Mountain, into Lookout Valley, the movement of crossing the river was undertaken with our depot Bridgeport and Stevenson, Carter-side's Corps was sent down Lookout Valley, to near the foot of Lookout Mountain, which latter was held by the enemy with infantry and artillery. The corps of THOMAS and MCCOOK were moved rapidly up Lookout Valley, and across Lookout Mountain, the former by the passage at Winston's, the latter by Winston's Gap. As soon as this movement was known to the rebels, who, as yet, had not received the bulk of his expected reinforcements, they were compelled to him that if he remained in Chattanooga the army of ROSECRANS would be upon his rear, with the bulk of his reinforcements, and whip them in detail, besides taking possession of his lines of communication, without which he could not subsist his army a month.

The evacuation of Chattanooga by the rebels was therefore a necessity. BRAGG fell back rapidly, and evidently with the intention of concentrating at Ringgold. Upon discovering the evacuation, moved his corps into Chattanooga by the pass around the point of Lookout Mountain, and moved out in pursuit of the enemy. Facts soon began to be developed which led to the belief that the enemy had not retreated far. A certain concentration of the retreating army, it appears, rendered it certain that they had not retreated on Rome, but were concentrating at Lafayette and receiving reinforcements, and that it was their intention to endeavor to retake Chattanooga.

CRITTENDEN's Corps, at this juncture holding a position on the Chickamauga, near Gordon's Mill, confronted the rebel army. THOMAS' Corps was at the eastern foot of Lookout Mountain, and McCOOK's Corps, near Crawfish Spring, the distance from CRITTENDEN's left, at Gordon's Mill, to McCOOK's right, near Winston's, being upwards of forty miles, while from the best information gathered from all sources, it appeared that the enemy were rapidly concentrating, with a view to attack CRITTENDEN before the remainder of the army could be brought within supporting distance. It was therefore necessary, in order to cover Chattanooga, for ROSECRANS to concentrate with rapidity, and in the face of the enemy. It was while this was being done that the rebels attempted to turn his left flank, and obtain possession of the road to Chattanooga; in the attempt to prevent this, the battle was brought on. It was absolutely necessary, under the circumstances, to secure the possession of Chattanooga, or the whole army would have been never intended to permit us to hold. It was a common matter of surprise to the rebels that we occupied the place, why Bragg left so many public buildings standing—all his hospital buildings and depots, and two steamboats at the landing, all of which could easily have been destroyed in evacuating the place with the intention of leaving it for any considerable time in our possession.

Could General ROSECRANS have concentrated his army at Chattanooga, avoiding a battle meanwhile, the contest would undoubtedly have been transferred to the Georgia Central, Orange Creek. Whether the results of such a battle would have been more advantageous to our arms, or not, is a question which I do not discuss. He could not have done more than hold Chattanooga, and his army holds it now.

OFFICER.

GENERAL ORDERS No. 238.

To the Editor of the Army and Navy Journal:

SIR,—I do not desire to be understood by the War Department, in the article which I have recently given to criticism. I believe in the maxim—First obey, and afterwards respectfully seek redress, if deemed due. At the same time I like to analyse theory by Quadrant-Course, and discussion of my views arises from a motive to gain or give information for the interest of the service.

I take for granted that the Order of General Orders No. 238, War Department, A. G. O., and you will agree with me that the Quartermaster and Commissary officer upon entering the service opens with the Government as it were a debit and credit account; he is debited with what is issued on the debit side, and accounts for the issues under the expenditures, and should have the balance on hand. General Orders No. 238 demand that, before the resignation of any officer of the U. S. Army, he must apply to the proper satisfactory evidence from the head of the Ordnance Department, that the proper accounting officers of the Treasury that all prescribed returns have been rendered, and that he is cleared and indebted to the United States on account of Ordnance. Then, and not before, it is provided, that the resignation shall be approved or forwarded until the evidence is furnished. This, too, is proper. But the means to obtain this proof is vague, indefinite, and at best at the mercy of my grudge who wrote to these respective departments for such a certificate. One favored him with a reply, saying that, upon the resignation being sent to Quadrant-Course, he (the Adjutant-General) would then apply to the Ordnance and U. S. Treasury Departments as to the state of his accounts, &c.

You will at once perceive a dead lock—the respective channels to the Real will not approve nor forward unless this proof is furnished.

Now, I ask you how such a resignation to be acted upon? Surely it was not intended by General Orders No. 238 that General Orders No. 238 not working practically in the field, that it was to put it upon a practical footing the respective departments discontinue the day receipt of such and every return rendered to the office pertaining to the Ordnance Bureau, and not act on it on its receipt by the proper department, as in itself a voucher for any inspecting officer that the prescribed returns have been made and forwarded, and that the last return from the proper accounting officer of the Treasury and the head of the Ordnance Department, furnishes *per se* satisfactory evidence of the requirements of General Orders No. 238. These acknowledgments of receipt can be printed form, ready for the signature of any officer. Any form of blank, signed and addressed to the party whose return has been received.

A COLONEL IN THE U. S. SERVICE.

NORTH CAROLINA, November 14, 1863.

"NO GROG, NO SAILORS."

To the Editor of the Army and Navy Journal:

SIR:—Allow me, in your valuable journal that there is a great demand for seamen in the Navy. Now, this fact, though alarming to our political wiseacres at home, is not at all astonishing to those who are conversant with the recruitment of the Navy. Will you be generous enough to give place, in your columns, to a few grievances that the men of the Navy complain of, and which will prevent from buying beer. It is not often that we "grow" publicly, or have our grievances ventilated in the columns of the Naval Committee would inquire into the few following matters, and Congress pass laws to remedy them, I would stake my life that our noble vessels would not lay idle—as want of Blue Jackets.

1st. Stopping grog. Congress stopped it necessary part of our men on the plea that they were obliged to dismiss about two hundred officers a year for drunkenness. Now, in the last eighteen years I have seen a sailor drunk charged from the service for being a drunkard. And it is preposterous to think that two wine glasses of Navy Whiskey, in twenty-four hours, will demoralize an old man-of-war's man.

2d. The outrageously unfair and unjust division of prize money. A few cruising vessels receiving millions, while the bone and sinews, who have fought the battles, and suffered the privations of the blockade, receive nothing—not even thanks.

3d. Want of liberty on shore. It is a fact notorious to all seamen that when in port, more liberty in every port, American seamen are kept more confined to their vessels than the criminals in the English and French convict hulks. The crew of the ship that I am at present serving in, has not had a day's liberty in eight months.

4th. The unnecessary large numbers of all kinds of provisions, extinguishing all incentives to obtain a higher moral and intellectual condition.

5th. No increase of pay, but a remarkable increase of cost, and diminution of quality in every article of small stores and clothing.

6th. No bounty for the war. While it is an acknowledged fact that the Army cannot gain a battle without the Navy, the Navy cannot gain a victory without supporting the "mudsill." We want an honorable retiring pension. Now the worst-used sailor who has spent his life has only the Naval Asylum to look to for a home. Contrast what American would not prefer a small pittance and liberty, than a splendid palace cabaret of the officers of the Naval Asylum would pension comfortably every 7 long servitude man? In the service.

7th. We want more provisions. The Government has supply steamers running once a month, but they only "supply" officers "grub" for the men, and the rest of the cargo is filled up at sutler's stores on application. It is a melancholy fact that men are suffering from the effects of the scurvy at most of the Navy Yards.

8th. A chance for appeal from the arbitrary decisions of courts-martial. Now the private has no appeal from the most palpable injustice or illegality. Quick would be summary mode of appeal. The law protects the thief and pickpocket from wrong; but the man-of-war veteran must submit tamely to the robbery of his wages by the "*pro tem. thief*" in a court-martial, though without a shadow of justice or legality.

These are the principal grievances that I can suggest to the British government when men are pottioned for a redress of grievances, and the whole world was startled by the murmur of the people, and Government, and Navy Department, has been gradually increasing the burdens of the people, until it finds itself in the midst of a heavy war, wanting blue jackets. Let us, in our memorial of Congress legislate a little more for the men and less for the officers, and all will come right. Instead of the present system of our navy now, are not the ignorant sailors of a hundred years ago, and they should be dealt with as intelligent beings. An intelligent sailor will be as much an enthusiast when fighting the battles of his country on the decks of a ship, as he was at home, and there is no reason why he should not be used as such. God save the Union.

BERTH DECK.

THE GUNBOAT SASSACUS.

U. S. STEAM-WHEEL GUNBOAT SASSACUS, OFF }
WASHINGTON NAVY YARD, NOV. 20th, 1863. }

To the Editor of the Army and Navy Journal:

SIR:—Allow me to inform some of the daily papers inexact lists of our officers, I wish to correct them, and to give you a few facts concerning our ship. We left New York on the 14th inst. and arrived here on the 16th. Our trip was a perfect success, as far as speed is concerned; the vessel logging 13 knots, and steadily steaming during the day-time, coming to anchor at night. On the passage up the Potomac River, out of curiosity we timed her, the distance from Fort Washington to Alexandria (24 miles) in 29 minutes, thus averaging 17.5 miles per hour. This is the best time ever made, and astonishing as usual speed. The draught of her being 8 ft. 9 in., and tonnage, as publicly stated, 1,900 tons, a great many can be made available. Hoping that I have not trespassed on your valuable space, I bid you good-speed. The following is the list of officers:

Lieutenant-Commander Commanding, Francis A. Roe; Acting Master and Executive Officer, W. W. Muldaur; Acting Master and Navigator, C. A. Bastelle; Assistant Surgeon, Edgar Holden; Acting Assistant Paymaster, G. W. Hopkins; Acting Assistant Engineers, Augustus Adler, Forgie, E. A. Sawyer; Second Assistant Engineer, Benjamin E. Wood; Third Assistant Engineers, John W. Hinkley, Frederick Wood, Jr., Wm. Hamilton, Jr., Wm. H. Gridley; Acting Masters Mate, H. W. O'Hara, T. D. Marble, J. S. O'Brien; Captain's Clerk, Michael George; Paymaster's Clerk, Gerhar Schmidt.

JUSTICE TO THE ARMY.

To the Editor of the Army and Navy Journal:

SIR—I desire to call attention through the columns of your paper, to what seems to me and to most of my brother officers to be an injustice, viz.: The distribution of prize money to the Navy, while both the officers and privates of the Army are excluded from any such benefit. It is too frequently the case that our troops march and fight in quarters which have no foundation in justice. It is neither designed nor denied in any way by these remarks to disparage the Navy, for it is quite as much a necessity as was ever built, but merely to obtain justice. It must be conceded that at present the Army is by far the most important branch of the Army. Why is this? Is there any more hazard incurred by our brothers of the quarter-deck? An inspection of the details of the fighting for the last year will show that the percentage of death and disability is largely on the side of the land forces. Have the many soldiers who have died on their fields of battle no claim upon the justice of a suitable provision for their families? No; the widows and orphans of the Army are almost entirely left to depend for a pension upon the uncertain and urgent field for the exercise of our home charity.

Those of our fleet on blockading duty are subject to little more risk of life or limb than that common to all men in the ordinary pursuits of life. And yet each of these engaged in this service are entitled to a certain share of the proceeds of all prizes captured within signalling distance of their vessel. On the other hand, what is the case with our land forces? Let the soldier display no matter how desperate valor and succeed in wresting over as many guns as Napoleon, and he gets not a dollar for his performances. His family, too, suffers much on account of his prolonged absence, while that of his more lucky neighbor, who is in

[1] It will be observed that articles published in the JOURNAL bear the name of the author, with the single exception as above, when given the correct view of the battle of Chickamauga, substantially as it is presented by our correspondent.—ED.

the Navy, are living more comfortable than ever before, on the proceeds of the prize money sent home by the head of the family, who occupies the same position in the family that a head of the poor family does in the land forces of the Republic. Justice cries out most bitterly against such a discrimination. Are those who incur the least danger to reap the largest reward? Is the capture of a blockade-runner to confer a lasting benefit on all who participate therein, while those who at the extreme peril of their lives charge up to the cannon's mouth and succeed in bringing it away as their prize, are to be deprived of all reward, may even be paltry medal, and only be regarded as having established but honored stamp of a sonas sturdy right hand for charity to their more blessed brethren who by the blockading squadron?

These things ought not so to be. It seems no more than fair that those who by the peril of their lives gain an advantage for the common cause, should receive the principal reward with those who, wearing the same uniform, yet incur far less risk. Justice demands of a wise Republic that equal services should be equally rewarded. Why not divide the price of a captured battery or gun among those engaged in taking it? By such a division every piece of artillery would fall into our hands, and the country would be greatly benefitted. AN OFFICER.

THE COLONELS ELLET.

To the Editor of the Army and Navy Journal:

SIR—You have already noticed the death of Colonel CHARLES ELLET, of the Marine Brigade, which is stated to have taken place on the 20th of the last month at Hunter's Hill, in Illinois. It is not but little over a year since the father of the young soldier received a mortal wound on the deck of his own ship, in a successful attack made upon the rebel gunboats at or near Memphis, with a fleet of steam rams constructed and equipped under his immediate superintendence and commanded by himself. His death was followed almost immediately by that of his wife, who, after a long journey, had been able to reach her husband only a few hours before the breath of life had left from herself the sky after its funeral. To this double affliction in the same family is now added the loss of the eldest son, who had distinguished his father in the war, and after his death continued in the service, first as a cadet and volunteer, and finally as a colonel in the Marine Brigade, commanded by Major-General Gilmore. The manner whose direction this branch of the service had been first equipped and organized.

The family who have been thus severely visited had been for several years residents of Washington and of Georgetown. Colonel CHARLES ELLET was known among us as a civil engineer of established reputation, to which he added the more approachable qualities of a good, kind, energetic and estimable citizen. The following are some brief notice of his life and services, and those of his son, who has soon followed him, may not be unacceptable and at any rate will be of a merited tribute (unhappily but a small one) to the true worth and eminent patriotism of both.

The elder Colonel CHARLES ELLET was born in Bucks county, Pennsylvania, in the year 1810, and commenced the career of his life afterwards distinguished by his being an assistant in the exploration of the north branch of the Susquehanna, in the year 1827. Canals were at that time in the chief subject of consideration with our statesmen and economists, and New York having achieved the first triumph in that direction, Pennsylvania and the other States were only in her metropolis to the whole interior of the State, the happy effects of her well-directed enterprise. It needed, however, but little experience in the engineers of the other more southern States which are crossed by the main ridges of the Alleghany, to show that in the passage of these summit mountains a railroad, with its steam-locomotive distances, take the place of canals; and it was left to Pennsylvania to introduce as matter of necessity and for the purpose of passing her otherwise impracticable elevations, the mode of transportation, which though then nearly new and untried on both continents, has become as general as to supersede and supplant all the previous and older methods. Accordingly, we soon after find Colonel ELLET employed, and became soon after engaged in public improvements further south. It would enlarge this notice much beyond its limit and purpose even to enumerate the various public works in which he was concerned either as a directing or consulting engineer. As an instance characteristic both of his ability and confidence in his own resources, may mention the successful passage of the temporary track on the line of the Virginia Central Road at the passage of the Blue Ridge, by which the cars of that road vale in these avocations he found time for a visit to Europe, in which he was accompanied by his family.

A very considerable portion of Colonel ELLET's professional career had been spent in Virginia; and at the commencement of the rebellion there were few persons better acquainted with the general configuration and internal features of the interior of that State than he, or who could be more relied upon for topographical information and suggestion. At an early day he placed both himself and all the knowledge he possessed at the disposal of the Government. It will be remembered that he did not wait to be called upon publicly and in no measured terms the character and conduct of the commanding general. Of the justice of these military criticisms it is not our purpose now to speak.

In the ensuing spring, and after the fatal demonstration made by the *Merrimac* upon our ships at James River, Colonel ELLET was authorized by the War Department to superintend the construction of a ram fleet in the Mississippi, and that would not always be under the orders (or an addition) to command it in its *coup d'essai*. It is a singular fact, in relation to this new mode of naval warfare, that more than thirty years ago it had been strongly recommended and urged upon the consideration of the Government by two officers distinguished in the naval service, and had at that time been with great unanimity consigned to a place among the class of inventions known as humbugs. The *Merrimac* had proved herself a *bug* of an entirely different species and operated a proportional change in public opinion. Colonel ELLET lost no time in the construction of vessels of this character out of such material as he could find in the Mississippi, and fell in the first attack made by them, clothing in the blue of the United States army, at the early age of 52, a life distinguished throughout by eminent ability, integrity and usefulness.

It was not the least excellent or deserving part of this last service of Colonel ELLET, that in rendering it to the country he left behind him a name of the dearest and strongest ties of domestic life. Mrs. ELLET, whose death had followed so closely upon that of her husband, was by birth a Pennsylvanian, connected on the other kind and womanly excellences a deep-rected attachment to her husband, to the place of his birth, and to whatever glories are linked by the choice of the Old Dominion. All these dear and long-cherished memories were now at once to be sequestered and hidden, or abandoned. The choice was a thing most confraband and unlikely. Yet under such torturing and unhappy circumstances, there was on the part neither of the husband nor wife any hesitation. Both felt that the ties of them held freely and fully every merely selfish obligation, however dearly and deeply felt, upon the altar of the public safety. After, however, a short and precious sacrifice of this kind have yet to be made, and that too often amid reproach and opprobrium, Mrs. ELLET was united entirely the death feud now raging among us and gather up again the broken limbs of our once happy Union!

Colonel CHARLES ELLET, the younger, whose death has just been announced, and with a sketch of whose brief and brilliant career we will close this notice, was the eldest son of the gallant and lamented subject of the first of four who survived them. He was at the time of his death a little more than twenty years old, and had received the best education the public seminaries of the country could give; to which had been added, though at an early age, a brief course of practice in the civil engineer's office. All these advantages in his case had been matured and perfected by a home education of infinitely greater value. To him had not been committed the training of knowledge, always gleaned about the family hearth, where the presiding divinities are his wife, preside over the household, and where the hoarded treasure of age and experience are to be garnered up in younger hearts for future use and guidance. Many of these rare opportunities were the privilege of his father's residence in Georgetown, where the full and genial plenty of a Pennsylvania farm-house, was gracefully blended with the more refined elegancies of city life. Doubtless, will remember him not many years since as a sedate, perhaps a serious and rather quiet boy, capable of meditation as a gentleman, and at the outbreak of the rebellion was quietly engaged in pursuing the requisite studies, in which he had already made such progress as to fill competently the place of assistant surgeon in one of the military hospitals. He followed his father westward in the spring of 1862, and remained with him for a time at or near Memphis, in which his father lost his life. On the organization of the Marine Brigade he received the appointment of colonel, being the officer who had at that time reached so high a grade in any active campaign. His subsequent services in the field, however, have justified, and in part the selection, while his farm but modest and equitable demeanor saved him from the envy and detraction which usually follows in the train of military success. He had the advantage of his military life and history which we intend to speak, but in the kindest and more homely part of his character as a citizen and friend. He was a favorite with his own time in Georgetown, and for which he had received his first military drill in the volunteer fire department, and for the purpose of aiding his new doubly-orphaned sister, in some necessary domestic arrangements. At that time, though evidently in the early stages of disease soon contracted among the brakes and fens of the Mississippi, there was as yet visible no dangerous or alarming symptom, and he had the promise of a long career of life before him. But it was not to be so. He had all his life been subject to severe attacks of bilious fever, and his death, which occurred suddenly during a visit to his uncle in Illinois, is supposed to have resulted either from that cause, or from an injudicious bathing of the system in the cold waters of the pass. To the survivors we can but offer our heartfelt sympathies and our prayers; for to them the praise of the departed must be a very poor consolation.

"Though the sound of Fame
May for a moment vibrate in the ear
The fever of vain longing, and the name
Thus honored but assuages a stronger, bitterer silence."

F.

WASHINGTON, D. C., Nov. 13, 1863.

ANDERSON'S FLAG AT FORT SUMTER.

To the Editor of the Army and Navy Journal:

SIR—Since the publication of the rounds of the papers a statement of General BEAUREGARD, to the effect that, with the best's crew that was taken in our unsuccessful assault upon Fort Sumter, he had captured the rebel flag, and that Major ANDERSON had kept flying while there, and had lowered with a salute when he was obliged to evacuate the Fort. The public was led to suppose that it had been carried by our storming party to rebuild it, in great triumph, where it had formerly waved. That the rebels succeeded in capturing it I would not have entered into my mind to recite to you the facts I am about to offer; but, as a flag was captured, and as I made neither of my brother officers of the confederate flag to be identical flag, whose loss would double the discomfiture of our arms, I wish to let the world know that they laughed without wounding, and are merry without cause. When ANDERSON's flag was lowered at Fort Sumter, our spartan sovereign determined to cut it into pieces, and keep the shreds as mementoes of their martyrdom. Every boy took a little piece, which his values as beyond all price. One of ANDERSON's officers, who had been with him from the first our service, was at my house just after his return from Sumter; and as a great favor, after telling the story of the defense, little scrap of his precious piece, which lies before me as I write.

There may be and usually are two flags at a Fort; one by fair weather and one for storm; but only one flag was hoisted during the bombardment; only one "braved the battle and the breeze;" only one can claim to be *the* flag of Fort Sumter. That flag exists only in the little carefully hoarded bits of bunting, and in the memories of all loyal Americans. As for any other, we care nothing; but we do not believe that another flag ever flew before at Sumter as captured by the rebels. I am sure many were anxious at the time BEAUREGARD's story appeared, to know the truth, and even now, from the above statement of Major ANDERSON, you may think it worth while to publish this, giving to any one who desires a voucher my name, and the little red bunting, which can be shown.

PHILADELPHIA, November 21, 1863.

A MILITARY EDUCATION

To the Editor of the Army and Navy Journal:

SIR—To some extent a great change is coming over the minds of the people in relation to the military training of the Nation. This, it is said, must be thorough and universal. We must be a *military* people; and to effect this, a new system of education is speedily begun. The old mania for drills with their holiday "training days"—burlesques as they mostly were—must be left among the debris of the past. We will be perverted influences of the system of officers annually graduated from our National Academies, though, assuredly, these have been the means of a great leaven in the mass with new military knowledge and life; nor are the occasional getting up of a war (as in Florida by the Indians and Seminoles, or in Mexico against the Texan extension of the slave power)—not one, nor all of these, can, by any possibility, suffice for the future military training of a people called to be a nation in arms. *The people of the Nation, it is said, must be systematically and universally trained to the military art.*

Proofs of this demand are fully before us. The Press, so often the mere echo of the popular feeling, calls for it. The impulses of the people, in so many instances even of the merest boys, have largely urged them into military drills; the number of State and of private military schools increases. A discussion is going on in Pittsburgh in the Central Public School System; in Boston, for instance, where memorials to this effect are headed by Hon. EDWARD EVERETT and other prominent men.

All this is the necessary result of our present unhappy contest in behalf of the most accomplished, the noblest, in the Great Powers abroad. Steam and the telegraph have so marvellously brought the military powers of Europe, as it were, on our doors, that we cannot suppose that they have always armed and on guard, if we would be the faithful sentinels of Liberty which Providence invites us to be.

Perhaps, then, the following plan for a general military training of the young is unwarranted. Perhaps the instruction so widely given by the present war may suffice for many years. But, if not, and if, while the preparation for the contest the need of greater military knowledge was soon generally felt, and, though thousands of all the sexes, ages, still was made to stagger under the military blunders of some untaught military man; possibly, it may be discovered that in the type-type of the "Minute Men of Seven" a sentiment of some value surely, and happily used by the redoubted author of "The Physical Geography of the Sea," and as unique as it is valuable. Let us, then, in the Observatory, in the haste with which he left his aids and their researches; or, possibly, in the midst of the Arctic Seas, amid perhaps of combating the war spirit in all our youth may be greater than any supposed or real gains.

But, however these may be, it is conceded that a larger infusion of the military self hereafter enter into our boss and sinew; institutions and appliances for cherishing this rich mingle; a military education will be a term of more meaning and wider application. I propose, then, by one or more brief essays, to invite just answers from abler pens to the important subject of a future military education? This introduction is already too extended.

*E.

THE CROSSING OF THE RAPPAHANNOCK.

A CORRECTION.

To the Editor of the Army and Navy Journal:

SIR—In your issue of the 14th inst. I notice an error in regard to the crossing of the Rappahannock by Gulley's Ford. You mention the pontoons as having been laid under cover of the fire of the batteries, and the attacking party crossing under the same protection. Major-General New York, Twentieth Indiana, &c., crossing over the pontoons that laid.

The Third Corps, under command of Major-General D. B. BIRNEY, moved from Bealton Station at daylight on the 7th inst. for Gulley's Ford, arriving at the latter point one o'clock, P. M. The First Division, commanded by Brigadier-General J. H. H. WARD, consisting of the First Brigade (Colonel C. H. F. TAYLOR, Fifth Maine), the Second Brigade (Colonel WALKER), and the Third Brigade (Colonel R. MCALLISTER), crossed the river in two o'clock, P. M., and, forming three lines of battle about one-half of a mile from the River—three out a regiment of Sharpshooters (the First U. S.) who, immediately upon their being firing on rebel sides, drove the enemy's skirmishers across the river. General WARD then placed a battery (RANDOLPH's R. I.) in position, supported by the Second Brigade behind the rifle pits on the opposite side of the river. The Third Brigade—the Fifth New York and Fifty-seventh Pennsylvania, under Colonel EGAN—was then ordered to Fords Rivers and Gulley by the skirmishers, and take the rifle pits at all hazards. Notwithstanding the water was waist deep in the middle deep and the running quite strong, the men were very enthusiastic, cheering and yelling like demons, so they almost appeared to be while wading through the water.

The number of prisoners captured there was about 480, and nearly 600 Enfield rifles were taken. The pontoons were *not laid down until after the whole of the First Division had crossed the river.*

The Second Division was then posted in line of battle parallel to the river—about a quarter of a mile from it, threw out a line of skirmishers about 500 paces in advance—the right resting

on the river, a lively and brisk fire was kept up with the enemy until quite dark, when the troops relounded for the night.

I trust that you will give this publicity in your JOURNAL.

DAMASCUS.

CAMP 49TH NEW YORK VOLS.,
NEAR CULPEPPER, VA., Nov. 17, 1863.

INFANTRY EQUIPMENTS.

HAVING in a previous article said what we had to say of Infantry Clothing, we now add a few words upon Equipments. The *knapsack* in ordinary use, as is well known, is a wooden frame, covered with leather, painted canvas, or similar material, substantially like the French and English pattern. Its chief objection is that the top boards press directly against the shoulder-blades, and chafe them severely, if the knapsack is carried for a long time very loaded. When McCLELLAN advanced on Yorktown, in the Chickahominy campaign, a reporter sent North the remarkable dispatch, that some of our brave troops, eager to get forward, actually threw away their knapsacks, regardless of the loss. The truth was, that the knapsacks thrown away on the Peninsular march were dropped, less from patriotic fervor than from pain in the back. Some soldiers, indeed, remove the boxes entirely, the old Mexican campaigners often setting the example. The soft knapsacks, or those without frame, are better, as being not on heavy marches in warm weather they lie solid and not between the shoulders, like a sack of meal, and there is no chance for ventilation. The frame might perhaps be fitted to the back, and otherwise improved. In SHORT'S patent, the straps are carried, thin and light, and not fastened together, but easily adjusted. His arrangement of the straps also materially eases the burden, and the whole structure is light and convenient, while capable, apparently, of bearing rough usage. The SHORT knapsack has been supplied to some regiments in place of the old, and appears to surprise—Government being induced to allow commutation value, and the surplus being paid by those undertaking the equipment in this respect. Rubber-covered knapsacks protect their contents from moisture, but are still more uncomfortable than leather, under a hot sun. Those constructed to hide, with the hair outside, are usually thought too clumsy to supersede others to any great extent. Many complaints against the Army knapsack are traceable to an improper method of securing and strapping it, and to excessive packing. Attention to these matters is now the personal duty of company officers in the European service. And with us, Art. XXVI, (687), of the "Revised Regulations" on "Troops in Campaign," says: "When necessary, the orders specify the rations the men are to carry in their haversacks. The field officers and the company officers are responsible for seeing the march; at halts they examine the knapsacks, valises and haversacks, and throw away all articles not authorized." At division or brigade inspections, or perhaps even at Sunday inspections, officers are particular to have the knapsacks packed. But on the march, and especially on muster, there is apt to be only a general warning against overloading, partly because officers dislike to intermeddle in this respect. Sometimes an inspection of the knapsack reveals a small stationer's shop set up in its interior, with hordes of old letters, newspapers, pamphlets, books, relics, geological curiosities, and the like, stuffed into the corners. But experience corrects the evil, and there is a difference between the packs of a brigade on its first and its twentieth march.

The British foot-soldier, according to a London magazine, has furnished to him after battles, and in the cavalry *one eighth*, besides "an infinity of other articles, such as blacking, sponge, button-sticks, &c., which he has to account for at "any moment; which is rather hard, seeing that when a man is campaigning—with the enemy perhaps upon him in a "night attack—he has other things to think of than the scrupulously as a traveller leaving an inn." We incline to think that if a brush or two is missing after half a dozen hivouacs, no great penalty will be incurred. But whatever the French and English soldiers may carry in campaigning, in garrison service, at least, we see them with the knapsack square and nearly flat, the coat tightly rolled on top, and everything tidy and neatly strapped. Our volunteer regiments often march with enormous packs, bulging out to the utmost dimension of the flap, the straps strained, and the whole an amorphous mass, hardly recognizable as a knapsack.

The Government *haversack* will outlast a dozen of the fancy sort sold in the stores. These are invariably used up and thrown away after trifling service, and the regulation style substituted. The latter is a simple, inelegant satchel, costing a quarter or less, but it is strong, lighter, tighter and more capacious. It has fewer pockets, it is true, and the contents are apt to get thoroughly mixed by several days' carriage. It has an inside lining, which, however, usually gets torn up, in time, for gun-wads. Coffee and sugar rations are sometimes doled out for a march in small cotton bags, one to each man, and are so kept clear of the meat and hardtack. Another praiseworthy device is the small tin-box strapped to the knapsack for the same purpose.

The bulging, double-convex shape of the *canteen* prevents it from being worn in the regulation style, "on the left side, "outside the haversack," especially when the latter is crammed with rations. The cloth partially protects the tin from the sun, and wetting it keeps the contents cool. If the canteen be filled with water only, or coffee without milk, it will continue sweet. But some carry whatever liquid they can get—beer, whisky, apple-jack, or milk. Milk soon sours the canteen, and whisky makes it black and foul.

The leather equipments, belts, boxes, bayonet-sheath and frog, seem unnecessarily heavy at first. But they are all substantial, and quite as good as the British ones captured on a blockade and distributed to our troops. It is quickly seen that the belts are not too wide, and that narrower ones would "cut in" too much. Recruits seldom "handle cartridge" neatly, the partitions in the box causing considerable manipulation to get the cartridge out—though less when the box is loaded, than when it is not, as it should be, when loading. Some regiments in the field, and many commands in garrison, where fewer rounds are carried in the cartridge-box, transfer the latter to the waist-belt, dispensing with the cross-belt. The change looks neat, and is favored somewhat by the experience of regulars, but it is pronounced injurious to the loins. At all events, in active campaigning the use of the cross-belt as a support to the full cartridge-box is unquestionable.

It is puzzling to explain the necessity of the tread-plate, except it be to furnish a complement to the *arm-rest*. It requires time to scour the plate and keep it shining. And we have heard men complain sometimes, that the canteen and haversack straps crossing the plate press its spurs into the chest, and create annoyance in that way. The waistbelt plate is obviously the better place, as much less would chafe as well; but what use does the other plate serve? In general, however, the infantry uniform and equipments are good, and everything useless is dropped. For instance, we have but one uniform button for all troops, an initial in the shield denoting the service, and the number of the service they belong. But, according to the English writer above quoted, "every regiment in British pay has its own distinctive button, with its own special device. * * * Silvered ones "for the militia; big-sized page-buttons for the hussars; rich "gilt for the guards; and so on, down to the line." But one button should seem to be distinctive enough regimental emblem, but there is as broad variety in the facings and trimmings of the uniform. "There are no less than sixteen "shades of green alone used in facings of the British army, "besides no end of blues, yellows and blues, and "all the other colors of the rainbow."

Perhaps Government might do well to establish National manufactories of Army clothing and equipments. It may seem strange, at first, to suggest the propriety of Government making its uniforms, as well as its arms. Why not make its own uniforms, as well as its own guns? Experiments in importing Enfields have only established the superiority of our own rifles for ordinary service. Why should not a National clothing workshop secure the same beneficial results in uniforms? Government could direct adaptation to the needs of the service, facility in supply, economy of production, and whatever other good effects flow from our Springfield armories and similar governmental enterprises? At least, we should then have something which could with more propriety be called a National Uniform. The various shades of color, the diversities in texture now prevalent, and the different bean-ideals of martial proportions now contortioned by cutters and stitchers, would be assimilated. We should have a uniform of approved pattern, and be ready for the care and preservation of clothing and equipments. At present it is sometimes hard to tell whether an unsightly appearance in the ranks is owing to the fault of the soldier's fault of the wearer, or to original sin in the garment. Above all, the vexation and mischief worked by dishonest contractors should be avoided. Government, in short, should be responsible for the manufactory should be weighed and measured. Every shoe or coat there sewed together should be examined by competents with a deposited regulation pattern. All this, however, and even the question to what extent, if to any, the Army uniform would be, is rather a consideration for the future, for times of peace. At present, more urgent matters concern us, and we must continue to trust for rapid supplies of clothing to private parties.

THE GETTYSBURG CEMETERY.

The details of the consecration of the National Cemetery at Gettysburgh, have been published so generally in the daily papers, that it is unnecessary for us to give it more than a brief record in our columns, as part of the current history of the war. As the first occasion of the kind in our history, the event has excited unusual interest, and thousands from all parts of the country gathered at Gettysburgh to take part in the ceremony. The proceedings consisted of a grand military and civic display, under the direction of Major-General CURTIS, and an oration by HON. EDWARD EVERETT, which was followed by a dedicatory speech by President LINCOLN, which we give in full, as decidedly the best feature of the occasion, as well as one of the most felicitous utterances of its author:

"Four score and seven years ago," said Mr. LINCOLN, "our fathers brought forth upon this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal. (Applause.) Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battle-field of that war. We are met to dedicate a portion of it as the final resting-place of those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this. But in a larger sense we cannot dedicate; we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our power to add or detract. (Applause.) The world will little note nor long remember what we say here, but it can never forget what they did here. (Applause.) It is for us, the living, rather to be dedicated here to the unfinished work that they have thus so far nobly carried on. (Applause.) It is rather for us to be here dedicated to the great task remaining before us, that from these honored dead we take increased devotion to that cause for which they here gave the last full measure of devotion; that we here highly resolve that the dead shall not have died in vain; that this nation shall, under God, have a new birth of freedom, and that government of the people, by the people and for the people, shall not perish from the earth."

The establishment of this cemetery at Gettysburgh is the result of a noble idea conceived by a resident of that vicinity, and carried out by an appropriation passed by the Legislature. The location of the cemetery is about half a mile southwest of the town, and adjoins the old cemetery, the scene of part of the eventful struggles of July. It is situated between the Baltimore and Emmitsburg roads, and contains about ten acres of land. The ground has been laid out in a semicircle, divided by three principal avenues; one extending along the base line, the second around the arc of the semicircle, and the other forming an interior semi-circle, concentric with the second avenue. These avenues radiate from the centre of the base line, and form divisions lines, whereby to mark the different State appointments. Each State has its separate lot, and the burials have been made in trenches parallel with the main avenues. It is intended to place at the head of the lot assigned to each State a granite curb, running entirely across the lot, upon which will be cut the names of the soldiers, with their regiment, company, &c. A commemorative monument is also in prospect.

PROMOTIONS IN THE REGULAR INFANTRY.

Promotions of field officers of the Regular Infantry Regiments since the publication of the "Army Register" for 1863.

THIRD INFANTRY.—Major Frederick Steele, of the 11th, to be Lieutenant Colonel, vice Wyncoop, deceased. Captain Calvin Benjamin, of the 19th, to be Major, vice Hendrickson, retired.

FOURTH INFANTRY.—Lieutenant Colonel John C. Butterfield, of the 12th, to be Colonel, vice Loomis, retired; Major George Sykes, of the 14th, to be Lieutenant Colonel, vice Butterfield, promoted; Captain Henry C. Ruffin, of the 6th, to be Major, vice Jordan, retired.

FIFTH INFANTRY.—Lieutenant Colonel Abram J. King, of the 18th, to be Colonel, vice Day, retired; Major F. F. Flint, of the 16th, to be Lieutenant Colonel, vice Sykes, promoted.

SIXTH INFANTRY.—Major Henry M. Black, of the 9th, to be Major, vice Haller, dismissed.

SEVENTH INFANTRY.—Lieutenant Colonel D. D. Green, of the 17th, to be Colonel, vice Morrison, retired.

EIGHTH INFANTRY.—Lieutenant Colonel Daniel Huston, Jr., of the 15, to be Major, vice Jones, promoted; Captain T. H. Neill, of the 8th, to be Major, vice Smith, promoted.

TWELFTH INFANTRY.—Major C. C. Augur, of the 19th, to be Lieutenant Colonel, vice Hoffman, promoted; Captain D. Wassell, of the 18th, to be Major, vice Smith, resigned.

FOURTEENTH INFANTRY.—Lieutenant Colonel John P. Sanderson, of the 19th, to be Colonel, vice Sherman, appointed Brigadier General; Major Henry M. Lazelle, of the 3d, to be Major, vice Augur, promoted.

SEVENTEENTH INFANTRY.—Major John H. King, of the 15th, to be Lieutenant Colonel, vice Reynolds, killed in action; Captain L. C. Hunt, of the 4th, to be Major, vice Sykes, promoted; Captain Levi C. Bootes, of the 5th, to be Major, vice Sykes, promoted.

EIGHTEENTH INFANTRY.—Major J. M. Dawson, of the 13th, to be Lieutenant Colonel, vice Anderson, promoted; Captain Albert Tracy, of the 14th, to be Major, vice Dawson, promoted.

NINETEENTH INFANTRY.—Captain L. H. Marshall, of the 19th, to be Major, vice, Flint, promoted.

TWENTIETH INFANTRY.—Major Charles S. Lincoln, to be Lieutenant Colonel, vice Greene, promoted; Captain Thos. S. Pinckney, of the 20th, to be Major, vice Brodhead, promoted.

NINETEENTH INFANTRY.—Major Delancy Floyd Jones, of the 11th, to be Lieutenant Colonel, vice Wood, dismissed; Captain Alfred B. Chandler, of the 1st, to be Major, vice Willard, killed in action; Lieutenant John H. Potter, of the 5th, to be Major, vice Dawson, promoted.

By direction of the President of the United States, 1st Lieutenant Symmes Swaine, of the 1st U. S. Infantry, is appointed Aide-de-Camp of the Army: Lieutenant George F. Sanford, 18th U. S. Infantry, has been detailed for that duty.

The President has accepted the resignations of the following officers of the Regular Army: Lieutenant Colonel Charles S. Lincoln; Captain F. F. Oldersbaw, A. A. G.; Captain John J. Hoogel, A. Q. M.; Captain Richard Arnold, 4th U. S. Artillery; Brevet Major General Edward T. Whittington, U. S. A.; 1st Lieutenant Stephen Whitney Fuller, 2d Infantry.

First Lieutenant George Swaine, 4th U. S. Artillery, has been appointed Aide-de-Camp, in recognition of wounds received at Gettysburgh, and assigned to duty with Major General Hooker: relieved from duty on the staff of 2nd Army Corps, and is assigned to duty with Major General Meade, U. S. A., with rank of Major; 1st Lieutenant Wm. G. Tisch, 2d Infantry, has been relieved.

DISMISSALS, &c.—The following officers were dismissed the service of the United States by direction of the President, during the week ending November 21, 1863—Lieutenant Colonel E. L. Pashby, 16th N. Y. Vols.; Lieutenant Colonel Wm. H. Willard, 19th Infantry; Lieutenant Colonel Spencer H. Olmstead, 10th N. Y. Cavalry; Lieutenant Colonel Wm. Wainwright, 1st Connecticut Heavy Artillery; Lieut. Colonel Wm. Wainwright, 1st Connecticut Heavy Artillery; Lieut. Colonel George L. Gurthie, 5th N. Y. Vols.; Lieutenant Colonel Thomas Cleary, 69th N. Y. Militia; Major Thomas Jones, 1st Connecticut Heavy Artillery; 1st U. S. Cavalry; Assistant Surgeon Wallace D. Martin, 63d Penn. Vols.; Major Charles Wheaton, 19th U. S. Infantry; Major Edward Lieutenant Arthur L. Drew, 1st Mass. Heavy Artillery; Second Lieutenant Horace Burton W. Penn, 5th Cavalry, N. Y. Militia, 83d N. Y. Vols.

First Lieutenant Nathaniel Irish, Hampton's Battery, Penn. Vols., has been restored to duty. The order of dismissal in the case of Lieutenant Colonel Burton W. Penn, 5th Cavalry, N. Y. militia, 83d N. Y. Vols., has been revoked, and he is honorably discharged on account of disability.

REGULAR NAVAL SERVICE.—In addition to the orders published in our Navy Gazette we have received the following:—

ORDERED.—Commander M. C. Meriz, to Ordnance duty at Boston Navy Yard; Assistant Surgeon Wm. Pope Richardson to special duty at Portsmouth, N. H., Navy Yard.

Per steamer *Vanderbilt*, Commander R. B. Lowry, from the command of the Mediterranean Squadron: Commander William F. Spicer, Paymaster Philadelphia Navy Yard and ordered to command the *Tuscarora*; Lieutenant Commander Joseph B. Breck, to the *Tuscarora*; Lieutenant Commander Henry Erben, to the *Kearsarge*; Lieutenant Commander Edward C. Grafton, to the *Sacramento*; Paymaster Henry K. Spaulding, from the *Minnesota* and granted thirty days' leave of absence.

FORTIFICATION—LAND DEFENCES—PERMANENT AND FIELD.

No. III.

The difference between field and permanent fortification is one of degree and not of kind. The permanency of the work, that is, the time and labor expended upon its construction, is the sole difference. There is a regular gradation, through which no fixed line can be drawn, from the tree felled across a road, behind which a couple of advancing riflemen shelter themselves, rifle in hand, and the elaborate iron-clad three-story towers recommended for harbor defence. In the selection of the sites of works, and in the determination of trace, time and labor are the only bounds. Substantially, therefore, the trace and position of a work in field or permanent should be identical. This is unfortunately not the practice. An extension of the works themselves is considered almost an essential part of permanent fortifications, arising from a want of proper discrimination between the two classes of works we have distinguished above. All extension of works we have seen pointed out as an integral and permanent element of the defence, is in opposition to the fundamental principles of fortification, the object of which it to enable the few to resist the many. By withdrawing from the armies of manœuvre unnecessarily large garrisons, they are of course weakened, and an advantage is given to the enemy which more than compensates for any increase in the defensive value of the works. If this extension were an essential point of permanent fortification, it would go far to prove that all fortification not so extended was a disadvantage; but errors of practice must not lead to errors of principle.

The chief point in which a work may be strengthened with time and the judicious application of labor, is in its approachability. In permanent works, the obstacles to assault may be of such a nature that no amount of bravery in the assailing troops can overcome them. The labor of the defence will peremptorily demand a corresponding labor in the attack, and that labor will give full opportunity for the development of all the resources of the defence, as it must take place on ground previously known, which may have been specially prepared, and over which the works for near and distant defence have been designed to operate.

Obstacles are necessary to ensure works against a *coup de main*. For this purpose, in most systems of permanent fortification, a wall thirty feet high has been selected. This height has been determined upon because it requires a forty feet ladder, and such a ladder, sufficiently strong to support a constant stream of men—without which no assault can take place—would be impossible—can with difficulty, if at all, be handled without machinery. The scarp wall of a permanent fortification is of no value, except as a means, when it is properly flanked, of securing a wall against assault. At the siege of Delhi, the French manned eight breaches in succession so as to revolve when trodden upon, and threw the assailants forward upon sword blades. This resisted all attempts to pass it, and was perfectly successful as an obstacle, while the fortress was taken by escalade, at a portion of the enceinte but little lower than the height at which writers declare this to be impossible.

When a work cannot be taken by assault, the besiegers attempt to approach by regular approaches, in order to obtain a position from which the wall can be breached, and thus reduced to a practical shape, in which the assailants may advance and enter the work. It is questionable whether it was ever essentially necessary to approach the edge of the ditch for this purpose. The detached wall of CAMOU was destroyed at 800 yards, by shot thrown with low velocities. The engineers at Fairfield, and the fort at Sumter, can be ascertained from the imperfect records of sieges, would tend to show that the same result would have followed had the wall been an ordinary scarp wall backed with earth. With rifled cannon, it is certain that the escarp, as at present constructed, is no safer than the escarp walls of Fairfield and Sumter. The latter was breached at 4,000 yards. This would require twelve degrees elevation with the 200-pounder Parrott, and would give an angle of descent of 17° 45'. A breach is considered practicable if two-thirds of the height of the wall be destroyed, as the debris accumulating at its foot eases the approach easy. At an angle of 17° 45', a shot would fall 20 feet in 62 feet, so that a ditch wider than 62 feet would give an efficient ester to a scarp wall against breaching batteries.

The first necessity, therefore, of permanent fortification is the discovery of an obstacle, efficient against assault, which cannot be destroyed from a distance. A simple counterscarp, 30 or 35 feet high, with the escarp carried down in a gradual slope to the foot, would fulfill this condition; but, if the enemy reached the counterscarp under cover, they would blow in the wall, and issuing from the breach, assault at all points. A double counterscarp, similar to some of CHOLMA-WA's constructions would probably answer all purposes. Suppose three feet of a counterscarp 20 feet in height, a slope of one-sixth, parallel to, and 2 feet in advance of, the prolongation of the superior slope, ascended towards the ground where another counterscarp of 20 feet high is built. From this main ditch the slope might ascend 2 in 3 to within 10 feet of the ground, when it would be continuous with the exterior slope at 1 in 3. A parapet of 40 to 45 feet command would fulfill these conditions, and the varying width of the main ditch affords every facility for arranging the remblai and déblai. However simple the operation of blowing in the first counterscarp might be, it would be very difficult to make a lodgement at its foot, preparatory to blowing in the main counterscarp.

The ditch of a field fortification is never of itself—and can rarely be made—an efficient obstacle. No more earthen construction is sufficiently steep to resist assault. Of temporary obstacles, abattis is the best. The difficulty is to place them so that they cannot be destroyed by the enemy from a distance. Placed vertically against the counterscarp, they are probably in the most efficient position when the ditch is 10 feet, or more, in depth. They can then only be destroyed from the top of the counterscarp, which should be completely covered by the fire of the defenders. Frequently a double counterscarp, similar to that proposed for permanent works, and defended in this way by abattis, might be constructed around the leading works in the defence of an extended position.

The second use of obstacles is to retard the advance of the enemy while under the most effective fire of the work. In the defence of a river, the stream itself is an obstacle, which should, wherever possible, be under the most effective fire. Entanglements are the best means of retarding the advance of the enemy and exposing to the fire of the works ground which would otherwise have been concealed by the standing timber. In assault the advance of an enemy is above ground; in slow approaches, the advance is partially under cover. The system of mines and counter-mines used in front of Wagner, but they do not appear to have had any result commensurate with the labor which must have been spent in constructing and sinking them. Captain MORRIS, one of the most distinguished of modern European writers on this subject, proposes, in such cases, the first below the surface for one to two hundred yards from the work. In the German fortresses, the glacis is covered with timber, which will be cut down in the prospect of a siege, when it will be very useful to the garrison for repairs and temporary protection. It would be very difficult to construct approaches over ground interlaced with the roots of trees. It has also been proposed to give the ground for 100 yards from the counterscarp a slope of 1 in 20 or 30, so as to expose the approaches still more to the plunging fire of the work.

Permanent fortifications differ from field in their command over the surrounding country. Time, labor, and the earth which it is necessary to excavate for the purpose of obtaining an efficient ditch, permit the construction of a rampart or parapet of sufficient height to command the field. In the case just given, the rampart would have a slope of 1 in 3 in front, continuous with that of the parapet, a slope in rear of 1 in 1, and would be 88 feet wide at top, so as to give room for a very thick parapet, and the working of guns behind it. This increased command is the most important part of the advantages obtainable in the construction of permanent works. It gives much greater control over the ground in front, its plunging fire enables many hollows to be seen into which could not be otherwise, and it renders the near approach by any but covered ways and dangerous.

In permanent fortifications, the men and material can be much better protected. Bomb-proof cover is absolutely necessary for prolonged defence. It is necessary for material, to secure it from the superior force which the enemy is able to direct upon it. For the protection of the men, nothing is so exhausting as to have men not on duty under fire. The great power of rifled artillery will necessitate modifications in the construction of bomb-proof cover greater than in any other portion of fortifications. Masonry can never be opposed, and more cover must be placed upon the arches than has hitherto been done. In covering guns from the fire of the enemy, a certain portion of brickwork must be exposed in any arch which is turned over the gun. In the HAXO casemate, the axis of the arch is at right angles to the parapet, and exposes the whole breech to fire. If the axis of the arch be parallel to the parapet, and the embrasures be constructed by mining out small arches at right angles to the main one, the amount of exposed masonry may be reduced. This exposed masonry must be covered by iron, so as to absorb the shot and not transmit it to the whole arch. If the shock were wholly received by the portion of the arch exposed, it would be destroyed, whatever thickness of metal protected it. This result will most probably be obtained by the use of heavy corrugated iron in connection with plating, according to the system now proposed for monitor turrets. In this and similar constructions, advantage is taken of the elasticity of the corrugations to resist and distribute the strain, and strength is secured without increasing the weight by an increase of thickness.

Permanent fortifications differ from field also in the nature of the constructions for the defence of the ditch. It should be laid down as a definite principle that each part of the defence of a work, the distant, the near, and that of the ditch, requires for its proper development a distinct parapet. The defence of the ditch must be kept intact until the enemy reaches it. This can only be done by placing the work in the ditch. Timber kapnières in temporary works, when there is time to construct them, and the casemates of masonry in permanent fortifications, afford the most efficient means of flank defence. Each parapet thus does one thing, and that one thing well.

THE EMPEROR'S SPEECH TO THE CHAMBERS

The French Chambers were opened at one o'clock on November 6th by the Emperor, who delivered the following speech:

Messieurs les Senateurs, Messieurs les Députés:

The annual assembly of the great bodies of the State is always a solemn opportunity for bringing together the men who are devoted to the public welfare, and for manifesting the truth to the country. The frankness of our mutual intercourse is a pledge and element of our strength. I therefore, feel you welcome. The legislative body has been renewed a third time since the foundation of the Empire, and for the third time, in despite of some local dissents, I can only congratulate myself upon the result of the elections. You have all taken the oath to me. That is a compact to me of your support. It is our duty to attend to the affairs of the country promptly and well, remaining faithful to the principles which have given us eleven years of prosperity, and which you have sworn to uphold.

The relations of the sovereigns with each other will show to you that, despite the forced stagnation of labor in certain branches, progress has not been slackened. Our industry has continued its development. Amid foreign complications, the presence of undeniable facts, the fears engendered by the truth of commerce with England have vanished. Our exports during the first eight months of 1863 exceed, in comparison with those of the corresponding months of the year 1862, show an increase of 233,000,000 francs. During the same period our imports have shown an excess over those of the preceding year of 172,000 tons, of which 136,000 are under the French flag. The public harvest of the present year is a blessing of Providence, which will assure to the population a cheaper price of food. It is also a proof of the progress of our agriculture.

Public works have been actively carried on. About 1,600 kilometres of new lines of railway have been thrown open to the public; our ports have received a still more high rank, have been continually improved. As the session has not earlier than has been customary, the report of the Minister of Public Works will be published, so that I may be spared shortly. You will find therein, that, if our expectations have not been fully realized, the causes have been of a transitory nature, and that without extraordinary credits we have been able to meet the expenses caused by the war in Mexico and in New China. I shall have to submit to you very various reforms which are deemed advisable—among others, one relating to the freedom of the baking trade, one which will authorize the loan of the sum necessary for the Paris fortifications on the coast, a project for modifying the law on joint stock companies, and one for suppressing the exclusive privileges for theatres. I have also to ask you to allow me to take into consideration with a view to increase the powers of the municipal councils, a project which will be a step in advance to which you will gladly associate yourselves.

The sugar question will also be submitted to your consideration. I hope that it will be solved in a manner satisfactory to a more distinct enactment. The project submitted to the Council of State has for its object to home produce the facility of exportation which is granted to sugars of colonial parts. A bill on registration will abolish the double decime, and will give to those that impost a more equitable assessment.

In Algeria, despite the anomaly which subjects the same populations, some to the civil, some to the military authorities, the Arabs have begun to understand the benefit and equitable sway of the French rule, while the Europeans do not place the less confidence in the protection of the government.

Our ancient colonies have seen removed the barriers which the exclusive system created, but circumstances have not been favorable to the development of resources.

The recent establishment of credit institutions will, I trust, improve the state of affairs. The progress of these material considerations, nothing has been neglected which concerns religion and public morals. Religious and benefactant institutions, science and public instruction, have received great encouragement.

Our ancient colonies have seen removed the barriers which the exclusive system created, but circumstances have not been favorable to the development of resources.

The recent establishment of credit institutions will, I trust, improve the state of affairs. The progress of these material considerations, nothing has been neglected which concerns religion and public morals. Religious and benefactant institutions, science and public instruction, have received great encouragement.

Since 1848 the population of the schools has increased one million. At the present day, nearly five million children (one-third of them gratuitously) are admitted into the primary schools. The efforts made to do so, which must be boldly and fearlessly faced, and not without shrinking. If this number be to the total population, the comparative population of Mexico and of Cochin China, the insurrection of Poland. The distant expeditions which have been the subject of so much criticism have not been the result of any premeditated plan; they have been brought about by the force of circumstances; and yet they are not to be regretted. Here in fact, could we develope our foreign commerce, if, on the one hand, we were to relinquish all influence in America; and if, on the other, in presence of the vast territory occupied by the Russians and the English, we were to remain those without possession in the seas of Asia? We have not, however, failed to foresee, during the Mexican war, the objecting us to the difficulties of the local government, will

allow us to turn to account the immense resources of those countries, and civilize them by commerce. In Mexico, after a certain amount of resistance, which the courage of our soldiers and of our sailors overcame, we have seen the population welcome us as liberators. Our efforts will not have been fruitless, and we shall be largely rewarded for our sacrifices, when the destinies of that country, which will owe its regeneration to us, shall have been handed over to a prince whose enlightened and high qualities entitle him worthily to be called a mission. Let us, then, put faith in our negotiations beyond sea. Commenced to avenge our honor, they will terminate by the triumph of our principles; and if propagated India will not see the good promise of the seed sown for the future, let us remember that Europe is looking on to see, at the two extremities of the world—at Pekin and in Mexico.

The Polish question needs a fuller explanation. When a Polish insurrection burst out, the governments of France and of Russia were on the most friendly footing. Since the conference of Stuttgart, they always agreed upon the great European questions, and I do not hesitate to declare so.

During the war in Italy, as well as at the time of the unpossible of Nice and of Savoy, the Emperor gave me his most sincere and cordial support. This good understanding demanded from me, and I gave it to it, the most scrupulous reserve upon the Polish question, which, in Russia, was very popular in France, that could induce me not to hesitate *to compromise one of the first alliances of the continent, and to raise my voice for a nation which, in the eyes of Russia, was, but in ours, heirs to a right inscribed in histories and treaties.* Nevertheless, this question touched upon the most serious European interests. It could not be treated by France alone. An insult to our honor or a menace against our frontiers could alone compel us to fulfil the duty of an act of hostility. It therefore became necessary, as at the time of the events in the East and in Syria, for me to come to an understanding with the Powers, and to equal rights and similar reasons as ourselves to express an opinion. The Polish insurrection, which, in its duration assumed a national character, found sympathy on every side, and the aim of diplomacy has been to attract to its cause as much affection as possible, in order to bear upon Russia all the pressure possible of the public opinion of Europe. This almost unanimous expression of wishes appeared to us to be the best means to induce the Cabinet of St. Petersburg. Unfortunately, our disinterested counsels have been interpreted as an attempt to intimidate; and the steps we took, on the land, animated, on the contrary, of putting a stop to the struggle, have only tended to embitter it. Excesses are being perpetrated on both sides, which, in the name of humanity, must be equally deplored. What, then, is to be done? Are we reduced to the sole alternative of war or of silence? I think not. Between these two extremes, a middle-cut remaining silent, one means remains to us. It is to submit the Polish question to a European tribunal. Russia has already declined the intervention of the Powers in the transactions which agitate Europe shall be discussed and resolved in a Congress. I regret to see a note of that decision in a manner offend her dignity. Russia has not to extinguish one for all the ferments of discord, which are ready to burst forth on every side; and from the moment that the public opinion of, in every quarter is misled by the elements of dissolution, let a new era of order and of peace arise! Has not the moment arrived to submit to the examination of a Congress the treaties at the hand of time, and piecemeal by revolutions? Is it not urgent to recognize by new conventions the rights which have been irrevocably acquired, and to secure by common accord what the peace of the world requires? The treaties of 1815 have ceased to exist. The force of circumstances has upset them, or tends to upset them. They have been disregarded nearly everywhere—in Greece, in Belgium, in Italy, in Germany, upon the Danube. Considered necessary to alter them, England has generously modified them by the cession of the Ionian islands, and Russia treads them under foot at this moment. Is it not time to regulate these infringements of the fundamental European pact, accept cessions become over-excited, powerful interests become agitation in the East and in the North. What, then, can be more legitimate and more sensible than to convoke the Powers of the world, to ask them if the hour of force and resistance would disappear in face of a supreme arbitrament? What can be more in conformity with the ideas of the age, with the wishes of the greatest number, than to place ourselves to the conscience, to the reason, of statesmen in all countries, and to say, Have not the prejudices and rancor which divide us ought to have their end? Is not the rivalry of the great Powers incessantly to obstruct the progress of civilization? Shall we be constantly under the fiance at each step by exaggerated armaments? Are our great precious resources to be indefinitely exhausted in vain contestations of a day? Is it not time to arrive at a positive position which is neither peace with its security nor war with its chances of success? Let us no longer give fortuitous impulses to the universal spirit, but direct it ourselves by opposing ourselves with narrow calculations to the legitimate aspirations of nations. Let us have the courage to substitute a regular and durable order for an uncertain and precarious condition, even if it should cost sacrifices. Let us meet, in short, the necessities of the present with a positive solution, animated by the sole thought of establishing an order of things based henceforth upon the well understood interests of the sovereigns and of their people.

I cannot but believe that this appeal would be listened to by all. A refusal would lead to the supposition of secret projects which fear the light of day; but even if the proposal should not be unanimously adopted, it would have the immense advantage of having shown Europe where the danger and where safety lies. It would open to it the one leads to progress through conciliation and peace, the other, sooner or later, to revolutions, followed by the obstinacy of maintaining a past which is rolling away.

You know now, gentlemen, the tone which I propose to adopt towards Europe: approved by you, instructed by the public assent, it cannot fail to be listened to, for I speak in the name of France.

SONORA-General Hammond, who has recently relieved from a long command in the Department of the West, left for the Mississippi, reports the former to be in excellent condition. No cases of yellow fever had occurred among the troops on shore, and but few cases in the fleet.

ARMY AND NAVY PERSONAL.

LIEUTENANT-Colonel Henry C. Hodges is assigned to duty as Depot Quartermaster at Fort Leavenworth, Kansas.

BRIG.-GEN. Alfred William B. Shubrick has been seriously ill in Washington, but is better.

THE new camp for contrabands at Arlington, Va., was formally occupied on Thanksgiving Day.

CAPTAIN B. T. Frothingham is announced as Volunteer Aide-de-Camp on the Staff of Major-General Gillmore.

EDWIN Henry, of Flushing, L. I., has been commissioned Lieutenant of Infantry in the rank of Captain.

REV. WM. Hunter, formerly pastor of Water's Chapel, Baltimore, has been appointed Chaplain 4th U. S. Infantry, now at Yorktown.

MAJOR-General C. Eaton, Quartermaster U. S. Army, is assigned to duty as Acting Chief-Quartermaster of the Army of the Cumberland in the field.

LIEUT.-Colonel Bell has been fully exonerated from the charge of "speculating in cotton" by the court of inquiry which examined the case.

THE Baron Lerin, Chief United States Minister to Rome, with his wife and daughter, sailed in the steamer *Hansa* last Saturday for Southampton.

BREVET Lieut.-Colonel J. L. Donaldson, Quartermaster, is announced as Senior and Supervising Quartermaster of the Department of the Cumberland.

LIEUTENANT D. L. Montgomery, 19th U. S. Infantry, Chief Ordnance Officer, Department of Washington, is to be relieved.

BRIGADIER-General Rucker, Quartermaster, has been assigned to duty as Assistant Lieutenant-Colonel, vice Lieutenant-Colonel McKelvy, Chief Commissary 22d Army Corps, relieved.

CAPTAIN William T. Gentry, 17th U. S. Infantry, is designated to succeed Lieutenant-Colonel S. H. Lathrop, as Assistant Inspector General of the Department of Washington.

By order of Major-General Thomas, officers of the United States Coast Survey, serving in the Army of the Cumberland, will receive commissions as Chief of Cognats, and will be obeyed and respected accordingly.

LIEUTENANT Frederick Van Vliet, of the 5th United States Cavalry, who was wounded at Bull Run, and is the Texan country, has arrived at New York. He is a brother of General Van Vliet, Quartermaster, in New York city.

THE Board of Officers appointed by direction of Major-General Schenck, to take place on the 20th of December. He will transfer his department to Brigadier-General Lockwood, who is the senior officer present.

A CARRIAGE manufactory in New York has just finished a magnificent "campaigning carriage," designed as a present for Major-General Hooker, the hero son of his army corps. The vehicle is now on exhibition.

BRIGADIER-General S. Meredith, who was injured at Gettysburg by falling upon the pommel of his saddle, Colonel Wm. H. Barton, 48th New York Vols., wounded at the assault on Fort Wagner, July 18th, the 10-inch Mortar Battery, south of "Battery Gregg," and 10-inch Mortar "Battery Seymour," and the one still further south, "Battery Barton."

BRIGADIER-General William D. Whipple is announced as senior and supervising officer of the Adjutant-General's Department in the Army of the Cumberland. General D. S. Stanley, late chief of cavalry, has taken command of Gordon's Division of the Army of the Cumberland. It is rumored that General Palmer will decline the command of the Fourteenth Army Corps.

CAPTAIN Alexander Perry, A. Q. M., regular army, has been assigned to succeed Lieutenant-Colonel F. M. Green, as Chief Quartermaster, Department, Washington. Captain Perry has been on duty in the Quartermaster-General's Office, and there is some doubt whether so efficient an officer can be spared from so responsible a position.

WILLIAM T. Smithson, convicted by the General Court Martial, of having corresponded with the enemy, in violation of the fifty-seventh article of war, and of giving intelligence to the enemy, in violation of the nineteenth article of war, sentenced to be confined in the penitentiary at Albany, New York, or in such other place as the Secretary of War may direct, for the term of five years.

THE Board, of which Lieutenant-Colonel S. H. Lathrop, 17th U. S. Infantry, is President, and Captain Horton, A.D.C., and Assistant-Surgeon Rodgers, U. S. Army, members, has been ordered to visit the Hospitals in the Eastern and Western Departments, with a view to sending all soldiers fit for the field to the regiments. The Board would have been ordered to extend its labors to the Department of the Gulf also. It has already accomplished great good.

UPON the recommendation of the Brigade Division and Department Commanders, Lieutenant Guy V. Henry, has been commissioned by Governor Andrews, of Massachusetts, as Colonel of the 40th Massachusetts Volunteers. Lieutenant Henry graduated at the West Point Academy in 1861, joining the 1st U. S. Artillery. He served on the staff of General Mansfield, till the first battle of Bull Run. During that engagement he was on the staff of General McDowell. He joined a battery in Virginia, after the battle, and remained in the Army of the Potomac till December, 1861, when he was ordered to join the company at Fort Taylor, Key West, Florida. He has been in the Department of the South commanding his battery since June, 1862.

CAPTAIN Thomas G. Baylor, Ordnance Corps, having, pursuant to orders from the Secretary of War, relieved Captain Horace Porter from duty at Headquarters Army of the Cumberland, is announced as Chief of Ordnance for that Army. The General Commanding takes this occasion to express the appreciation of the whole Army of the service by Captain Porter during his connection with this Army. His thorough knowledge of the duties of his position, his good judgment, and untiring industry have secured the efficiency of the Army, and entitle him to the thanks of the General Commanding.

ITEMS AND INCIDENTS.

A QUEBEC paper notices an unusual movement westward from that city of war materials, including eight heavy guns.

PREVOST Marshal General Fry has decided that disabled colored soldiers are not admissible into the Invalid Corps.

C. W. HALL, a horse contractor for the government, has been found guilty, and sentenced to six months' imprisonment, and also fined $10,000 for defrauding the government in purchasing horses.

THE United States District Court at Alexandria, Judge Underwood presiding, has ordered decrees of confiscation and sale against the property of seventeen persons, including Captain French Forrest, late of the United States Navy.

THE Sharp's Rifle Company, Hartford, are adding a new building to their works, measuring 40 by 140 feet, and 30 wide; and four stories high. They turn out 2,000 rifles a month, all of which are taken by the government.

THE Commissioners appointed to investigate the affairs of the Medical Department, after four months' labor, completed their investigation, and are now preparing their report. It is understood that it will recommend that no further establish any serious accusation against the administration of the Medical Department.

ALL persons transacting business with the Pension Office will be required to file in that office evidence that they have taken out the license required by the Excise laws. The fact may be shown by a certificate from the collector of the district the license was obtained, or by a copy of the license duly authenticated.

JEFF. Davis has addressed a letter to General Polk, acquitting him of all blame in the Chickamauga mismanagement. A General Order from General Bragg advises soldiers and officers to perform honorable deeds in the battle-field to laughing in Northern dungeons till the close of the war.

ASSISTANT-Quartermaster Chapman gives notice through the St. Louis papers that the government will no longer pay extravagant prices for hay. If a good article can be had and now come forward at $25 per ton, the government will seize it wherever found, and it to St. Louis or Cairo, and charge the owner with the storage.

THE Acting Surgeon-General advertises for surgeons for colored regiments in the Departments of the South, Gulf, and Tennessee. Examining Boards are now in session at Boston, New York, Philadelphia, Baltimore, Cincinnati, and at the army headquarters in the three departments named. Only graduates of regular colleges will be examined.

A GENERAL Order lately issued by General Wright, commander of the Department of the Pacific, orders that an Invalid Corps shall be organized in that department, and also calls upon every able-bodied company officer to explain to the veteran soldiers of their commands the liberal offers of the government to such men as may re-enlist.

BRIGADIER-General W. K. Strong received the following note a few days before the end of his time and already in the army, who is a young farmer in Wisconsin: "Fond du Lac, Nov. 24, 1863. Gen. Strong: Dear Sir—No. 8 Bond Street, New York.—" I am drafted. What shall I do? Answer immediately. M. V. STRONG. "To which the general replied: "Nov. 25, 1863. Mr. Strong: Go and fight for your country until the Rebellion is crushed. W. K. STRONG."

JUDGE Wylie, of the Prize Court now in session at Washington, D.C., lately made decree of condemnation in a case of blockade running, which is one of the schooners *Neptune, Cassandra, Clara Jane, Three Brothers, and Gold Leaf*, Anthony Bowers, Frederick H. Norton and Mortimer K. Walsh have been appointed appraisers for the District of Columbia. An order has been issued for the appraisement and sale of the schooner *Herald* and cargo.

COLONEL A. J. MONTROSE, who organized the first cavalry regiment sent to the war by the State of New York, is engaged in raising the 22d New York Cavalry. Captain CHARLES C. SUYDAM, of the Cavalry Corps, and formerly Assistant Adjutant-General and Chief of Staff to the 3d Corps, has been appointed Lieutenant-colonel in this regiment.

ONE of the minor indications of the direction of the popular thought in these war times, is found in the catalogue of the "portraits of eminent Americans," published by the photographic house of E. & H. T. ANTHONY. While some five hundred statesmen, we have a list of nearly nine hundred soldiers, and more than half a dozen of thousand of our divines, scarcely more than a hundred are thought, by comparison, worthy of notice.

NOTICES TO CORRESPONDENTS.

The Editor of the JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels; of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to technical and other matters.

Those contributors in the medical service we shall be glad to receive communications on military topics, on hospital surgery, and reports of medical operations and general forms of treatment.

The subscription price of THE ARMY AND NAVY JOURNAL IS FIVE DOLLARS per year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made to United States funds, or Quartermaster's, Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the Journal.

The postage on the JOURNAL is merely coin a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, NOVEMBER 28, 1863.

THE VICTORY IN TENNESSEE.

GENERAL GRANT is in the way of bringing to a logical conclusion the remarkable series of operations which began (not, *ended*, as is popularly conceived) with the occupation of Chattanooga. In a steadily contested conflict, continued during the first three days of the present week, the Union commander who has won more substantial victories than any other general of the war, has succeeded in pushing back the rebel force from their fortified line on the ridges fronting Chattanooga, and at the same time dealt them a blow, which may be counted among the most staggering they have yet received.

Valuable as the material and moral advantage to the Union arms of such a defeat as General GRANT has just brought on BRAGG may be justly esteemed, it is hardly doubtful that those who look upon military operations from their general bearings on the whole course of the war, will regard the strategical advantages won by this victory as of still more commanding importance. We have in this journal constantly held the ground that the possession of the more geographical point named Chattanooga, without the mountain region commanding it, was not only of small account, but that the position was actually untenable. We said at once of this, and in evidence that a correct knowledge of military geography and of the strategical lines of a country, will enable even a distant observer to forecast the fate of campaigns, we may be permitted to reprint an extract from an editorial article in this journal which date of October 3d, immediately followed General ROSECRANS' first possession of Chattanooga:

"The district to be held in order permanently to contest the railroad, the mountain ranges and the valley between, and the entrance into the great seaboard plains of Georgia and the Carolinas without being open to flanking attack, *is a triangle of which the Tennessee from Warrenton to Chattanooga is the base, and Rome the salient; and the possession of this latter place is essential to the full security of the strategic position which commands the rebel centre.* We may, therefore, look forward to a speedy advance of the central movement. This ought to be inaugurated as soon as possible, *for a successful advance upon Northern Georgia, with a force sufficient to retain possession of the key-point of that district is an absolute necessity of military success.*"

General ROSECRANS, at the time of his advance on Chattanooga, with correct military insight, instead of directing his force immediately on Chattanooga, crossed the river at a point thirty miles below, and sent columns to seize the strategic points, giving command of the region we have named. Unfortunately the battle of Chickamauga prevented the realization of this plan, and ROSECRANS was compelled to drive back on Chattanooga. In doing this he lost Lookout Mountain, commanding direct river communications with Bridgeport. This, if voluntary, was a great military fault, and whether voluntary or compulsory, was a great military misfortune, and was saved from being an utter disaster only by a happy fortune of war. Cooped up in Chattanooga, all the essential weakness of that point soon revealed itself. The rebels holding the mountain region on his front and flank, and cutting him off from his natural line of communications (leaving him only one round-about wagon road over which it took ten days to pass in the best weather, and which was absolutely impassable in the bad weather) had only to sit down before Chattanooga and see the pent-up Union garrison starve out. In this situation the confident assertions of Jeff Davis and the universal rebel press that the "Yankees" would be either "driven" "out of Tennessee or captured" were not altogether extravagant.

It is no longer a secret that our men were for weeks reduced to one-third rations, and that it was a matter of dispute whether or not our army would have to evacuate Chattanooga. The position of the Union force relative to the rebel investing force was that of men who held the citadel while the enemy was on the parapets (the mountain ridges facing Chattanooga) and only a wet ditch (the Tennesser river) between them.

General GRANT's brilliant series of successes—for we regard them as a connected whole—beginning with the seizure three weeks ago of Lookout Valley, and the opening of river communication with Bridgeport, continued in his operations of this week in driving the enemy from the fortified ridges fronting Chattanooga, and destined, we hope, to be concluded in BRAGG's expulsion from the entire mountain system, and in our seizure of the secondary points of rebel communications at Rome,—this brilliant series of successes, we say, has carried to its necessary logical conclusion and complement the campaign in Tennessee, while at the same time it bears with decisive weight on the complexion of operations over the whole theatre of war. If we can accept the official assurance that BURNSIDE is safe, we will be able to see in what manner LONGSTREET can get out of the trap in which he is placed. General GRANT commands his only line of retreat to form a junction with BRAGG; while to cross the great mountain system into North Carolina or Virginia, cut off, as he would be, from all communications or means of supply, is out of the question. His only remains for him to attempt to make his way up the Virginia Valley, for the purpose of effecting a junction with LEE; but this is a long and difficult route, and with the bridges as thoroughly destroyed as we know them to be, we confess we fail to see how he can hope to accomplish it.

The military prospect is, therefore, in the highest degree encouraging, and even brilliant. GRANT holds the central position and interior lines of the whole field of war, and is master of the situation. We need not say that we share to the full the general admiration excited by his late masterly movements, and we extend the feeling to the soldiers who composed of the veterans of three armies—of the men who but a few months ago were steaming the rebel tide of invasion at Gettysburgh, and thundering before their strong hold on the Mississippi.

IN WAR TIME.

POETS from CHAUCER to TENNYSON, and divines in all ages of christian civilization, have dwelt upon the *evils* of war. Its evils and horrors we do not mean to ignore or deny, but let us look at the other side, and see whether from this evil, good, great and unanticipated does not spring. This is a just philosophy, and it may proceed upon even a casual and cursory observation of things around us. We speak only of the actual and present, and do not now refer to prospective advantages to be derived from war, when peace shall have come.

In war time, dend patriotism is restored to life. In "the dull and piping times of peace" we forget our country; she seems so readily to take care of herself—and us, that we lose all real feeling of devotion. But when she is threatened, suffering, beseeching, the dying embers burst into a flame, and her altar burns with fires as pure as ever vestals nourished at Rome. Many of the so-called patriots of peace, are sordid, self-aggrandizing men. We know hundreds of thousands now in the field, who are self-sacrificing and high-toned in their patriotism.

In war time science is rapidly and variously developed; in myriad arts, in a thousand sciences. If the effete old, unpractical, classical learning is depressed, look at the truly practical, and alone useful. Take a plain example. Look at Geography. How wonderfully, as a nation, have we learned our own geography: towns, cities, rivers, mountains, passes, inlets, shores, have all been studied as never before, and with this knowledge we have gained power to avail ourselves of this unrivalled geography. When peace arrives adventure will receive a fresh impulse from our new and increasing knowledge.

In war time, too, the poets exercise their highest vocation. They make songs and ballads more powerful than laws, they hang amaranthine garlands upon the tombs of heroes; like the British bards they incite to battle and immortalize success.

In war time, more than in peace, our great resources are developed. *Iron*, a potentate before, becomes a czar; *coal* tracks the ocean with a thousand new keels, and blockades the rebel ports. Mills and manufactories are now for the first time able to vie with foreign capital, in their effort to send clothing and food to our armies. With the new money-makers whom this war is, honestly or not, enriching, luxury has to diminution; gold, and silver, and diamonds, still sell, and more largely than ever. Doubt not from the prudent person all subjects, the number and variety in the present year, probably exceeding all former years in the history of book-making.

In war time

"Charity, divinely wise,
Meek-eyed daughter of the skies"

gathers a glorious train and wanders in tenfold strength and splendor, where the sick need healing, the wounded balm, and the dying comfort and hope. Thus she verifies the aphorism that our greatest virtues are awakened and strengthened by the existence of human suffering and the commission of crime.

In war time, the great crimes of our large cities are diminished, and a nobler vent given to these idle and restless adventurers, who, in the days of peace, steal and murder in our streets, throng our prisons, and still make the felon's scaffold one of the signs of our civilization. War gives them an opportunity to lead nobler lives and die nobler deaths in the defence of their country.

And finally:—In these terrible times of war, a nation tests, learns, and feels her strength, and increases it from day to day. Who, that now knows what we have done, could have dreamed of what we were able to do, in the day of such things before the war began?

What then? Shall we continue at war forever? no; there is a prosperous time far beyond any prosperity that war can show. It is when a nation, which has borne the fierce ordeal, comes out victorious from the conflict, with all these resources developed, all these activities in healthy operation; when upon this power and glory the milder light of an honorable peace shines with steady and pure lustre. Her burdens removed; her government vindicated; her constitution a tower of strength, impregnable in all coming time against internal rebellion and external foe, she sees no limit to her prosperity, no bounds to her destiny.

If war be without its "sweet uses of adversity," the peace which it heralds, and to secure which it is waged, is a thousand fold more glorious, prosperous and happy.

RE-ENLISTMENT OF THREE YEARS' MEN.

WHILE the most strenuous efforts are being made to fill up by voluntering the new levy of 300,000 men asked for by the PRESIDENT in his last call, there is another movement quietly going on in the Army which is of even greater importance. We allude to the question of the *re-enlistment of our soldiers at the expiration of their present term of service.* A visit recently made by us to the Army of the Potomac gave us opportunities of seeing how deeply the rebel subject has on the thoughts and purposes of the Army—officers and soldiers. We can personally testify that there is throughout the Army the best possible disposition to reenlist, not only individually, but by companies, regiments and brigades. There are scores of regiments which are ready and willing to again enroll themselves *en masse* for "three years or the war," if the right policy is pursued towards them by the Government.

One of the conditions on which they insist is that they shall have a furlough of sixty days previous to the expiration of their term of service. We understand that Secretary STANTON has issued an order, which, however, we have not seen, offering regiments that propose to reënlist a furlough of *thirty days*. This, it will be seen, is but one half the time the men wish. We trust the Government will be disposed to be not only just, but generous and liberal in the matter, and meet the patriotic proposal of our soldiers in a kindred spirit. Sixty days may appear a long furlough; but if, as is confidently believed, it would

be employed by the men in recruiting their regiments up to the full number, it would certainly be time well spent. Of course judicious provisio should be made by which the Army would not suffer any serious depletion at any one time; but by a well-devised system of distribution of the furloughs between the present time and the expiration of the term of service of our three years' men, next summer, we believe the most desirable results would follow. At the present moment, indeed, the exigencies of the service, on the very eve of an advance of the Army, will not allow of any substantial furloughs at all events; but just as soon as they will, we hope to see the practical inauguration of this all-important movement.

Colonel BREWSTER, commanding the "Excelsior Brigade," has addressed a letter to the Adjutant-General of the Army, offering, on behalf of his command, to reënlist for an additional term of three years, provided they are permitted a furlough of two months and that they be allowed to reorganize as a brigade of *mounted infantry*. We see no great objection to this in the individual case of the Excelsior brigade, though it would of course be impossible to accept many of the brigades on this condition. That we want cavalry, we take is good infantry. Mounted infantry are much wanted; but Virginia does not afford the field for their operation presented by the theatre of war in the West. We trust therefore that Colonel BREWSTER will not make this a necessary condition of reënlistment.

It is not necessary to say a word of the advantage of retaining in the service the war-tried veterans who have been formed by the experience of the battle and the march during the past three years. It is no exaggeration to say that each of these men is equivalent to half-a-dozen raw recruits. We firmly believe that the moral effect on the rebels of the voluntary reënlistment of our armies as they stand to-day would be more telling than the putting on foot a new levy of three hundred thousand men. We most sincerely trust that the Government will take the fitting measures to preserve to the country the precious priceless military material, in the trained experience, skill, fire and valor of the veterans of our Army.

WE have a variety of unofficial statements in regard to the treatment bestowed by the rebel authorities upon such officers commanding colored troops as have been so unfortunate as to fall into their hands. From these it would appear that the rigorous laws for the punishment of those servile insurrections in the South have, as was threatened, been strictly enforced against these officers, if, indeed, they have not been subjected to a more summary treatment than would be warranted by any pretence of law. In an article "said to have been inspired at the War Department," it is asserted that "nothing whatever has been ascertained" of the fate of such of our officers commanding colored troops as were captured at Milliken's Bend, "Charleston, and Sabine Pass. If alive, the rebel authorities have them somewhere immured in secret dungeons, not having even pretended to bring them to public trial under their State laws. But the impression is described that they have been murdered," so no traces of them can be found. So, also, it is "clear that our colored soldiers captured by them have "shared the same fate, or been reduced to slavery, the "latter being most probable."

A similar statement appears in a private letter, received in this city from an officer at Port Hudson, and published in the *Evening Post*. From this we learn that "First-Lieutenant GEORGE B. COLEMAN, Jr., of "New York city, who was captured about two months "ago, while out on a raid, was hanged within twenty-"four hours afterwards, together with some twenty "privates (colored) who were taken with him." The evidence in such cases as this must of necessity be indirect and inferential, but it is certain that the discrimination against our officers commanding colored troops has been no meaningless threat, but a deliberate purpose to subject them to punishments sanctioned by none of the recognized rules of civilized warfare. And our Government cannot abandon these men to their fate. It is bound by every sentiment of honor to protect them to the extent of its power, if alive; and to avenge them if they have indeed fallen victims. We are glad to observe that the Secretary of War is firm in this purpose, though this may seemingly complicates the matter of exchange, we do not well see how the difficulty is to be escaped. Having once committed itself to the employment of negro troops, the Government is pledged to admit no injurious discrimination against those who assume command of them. Whatever difference may exist as to the expediency of the original measure, there can be none on this point; and the evidence is all against the rebel claim that the use of colored troops is not sanctioned by the usages of civilized warfare.

THE Army will learn with unmingled satisfaction that at length one of the legion of harpies that, by knavish contracts, have made themselves fat on its lifeblood, has met his just desert in the sentence of five years' imprisonment in the Penitentiary. Congress, last year, it may be remembered, passed a law making frauds on the Army penal, and relegating them for inquisition and punishment to the Courts Martial. The present finding, in the case of JOHN K. STETLER, who held a contract to furnish to the Subsistence Department a hundred casks of "pure prime Rio coffee," and delivered in lieu thereof an impure and adulterated article, is, we believe, the first important case in which this law has been carried out. The court-martial before which he was tried sentenced him to five years' imprisonment, and the Secretary of War, approving the finding, designated the Penitentiary at Albany, N. Y., as the place of incarceration. This, to be sure, is but a small grain in the balance as against the weight of swindling that sinks the other side down to Tophet, and comes far short of justice to kick the beam. But it is at least a beginning. It is an account opened against that vast array of fraud and corruption, perhaps unparalleled in history, whose record is found in the ponderous tomes of the Van Wyck Investigating Committee. Military history shows that all armies have suffered from this cause, but military commanders have usually found ways of limiting the evil. WELLINGTON, in the Peninsula, found hanging efficient, and NAPOLEON used every now and then to have two or three of the rascals shot —to encourage the others as he used to say: *pour encourager les autres*. Our own method is not quite as heroic as theirs: but we think the fear of five or ten years' of States Prison before their eyes will have a salutory effect on those who feel tempted to make themselves rich out of shoddy food, shoddy clothing or shoddy arms. It would have been well had the provision been made that these convicted scoundrels should, during their imprisonment, drink their own poisonous coffee, eat their own wormy hard-tack and their own rusty bacon, and shiver under their own warmthless shoddy blankets. TORQUEMADA himself could not have devised any more refined process of poetical justice.

A NUMBER of well-known citizens of New York have recently presented to General HARVEY BROWN an elegant service of plate, in testimony of their appreciation of his prompt and efficient conduct in suppressing the riot in this city during the month of July last. With the feeling of a true soldier, more accustomed to action than to speech, General BROWN declined a public presentation, declaring that he would "rather face "a dozen copperhead mobs than undergo the formality "of a public reception." The gift was accordingly sent with a complimentary letter, which is to be expressed on parchment and signed by the donors. In his reply, General BROWN says: "In accepting this "substantial and beautiful evidence of your appreciation, I feel deeply sensible that, next to your favor, "I owe this proud distinction to the devoted men of "your city with whom I have associated, and to the "brave soldiers I had the good fortune to command."

MR. B. S. OSBON, a gentleman whose experience among iron-clads eminently fits him for the discussion, is to deliver, at Niblo's Saloon, in this city, on Wednesday next, December 2d, a lecture on "OUR Iron-clad "Navy." He delivers the lecture in response to an invitation from Admirals FARRAGUT, GREGORY, and PAULDING, Commodore RADFORD, Captain WORDEN, Captain ERICSSON, and many other gentlemen interested in our iron-clad vessels. Numerous original plans and accurate models will be used to illustrate the lecture, which must prove attractive not only to our naval officers, but to all who have an interest in Naval Science.

PASSES to visit, or to have access to, or communication with, prisoners of war in the Middle Department, or to convey anything to such prisoners, have been forbidden by Major-General SCHENCK; and officers and surgeons in that department are commanded to refuse all passes or permits except those signed by Colonel HOFFMAN, Commissary General of Prisoners, at Washington, D. C., or by some person duly empowered by him. Similar orders will probably be issued by the commanders of other Departments where rebel prisoners are confined, in order to prevent the hatching of conspiracies, etc., between caged rebels and rebels at large, as at Johnson's Island and Camp Chase.

AMONG our correspondence this week will be found a lusty growl from a dissatisfied tar, that the Army is better treated than the Navy, in that it has bounties and pensions; but we are saved the trouble of answering it by an Army officer, who puts in the unanswerable complaint that the Navy is better treated than the Army, because it is allowed prize money! We leave it for our two correspondents to fight the battle out.

THERE is a rumor to the effect that the officers and crews of our iron-clad fleet are to have their pay increased one quarter, on account of the discomforts attending a life in armored vessels. Such an augmentation of pay would undoubtedly have the effect to make the service on iron-clads much more popular to the Navy.

To make room in our issue of November 14th, for some items of later news, which came to us after a small portion of the edition had been printed, we were obliged to remove an article on the first page. This will account for the discrepancy which some have observed between different copies of that issue.

THE Thirteenth Army Corps on the 13th instant embarked at Brashear City for some unknown port in Texas, by way of Berwick's Bay. It does not require much sagacity to surmise that it will turn up on the Rio Grande.

A LONG list of disabilities of officers in the Army of the Cumberland, which we received at a late hour, we are obliged to omit this week.

THE iron-clad *Dictator* is to be launched on Saturday, the 28th.

THE following dispatch was received at Washington on Thursday:

CHATTANOOGA, NOV. 25, 7 : 15 P. M.

To Major General HALLECK:

Although the battle has lasted from early dawn until dark this evening, I believe I am not premature in announcing a complete victory over BRAGG.

Lookout Mountain top, all the rifle pits in Chattanooga Valley and Missionary Ridge entire, have been carried and are now held by us.

U. S. GRANT, Major General.

ONE of our daily cotemporaries opens fire on the EMPEROR of the French, for not including the Tamaulipas coast in his blockade of the Mexican ports, disregarding in this neglect a purpose to assist the rebels in introducing supplies through Matamoras. Though it may be as charged, that "there has been no act "of any foreign government dictated by a more un-"friendly spirit toward this country," it is difficult to see how NAPOLEON was to avoid it, if he was to remove from Tampico, on the southern border of the coast, up to the mouth of the Rio Grande, there are no ports that could be blockaded. As for leaving the Rio Grande open for the passage of rebel supplies up to Matamoras, it is certainly hard to censure him for this, when we should certainly have had just cause for offence had he presumed to blockade a river, one half of which is within our own territory. That is a part of the blockading business we have taken upon ourselves; and if we cannot attend to it, it is certainly not in keeping with our present policy to call upon the French for help.

UNDER date of Friday, Nov. 27, 10 o'clock, A. M., General GRANT telegraphs as follows:—"I am just in from the front. The rout of the enemy is most complete. Abandoned wagons, caissons and occasional pieces of artillery are everywhere to be found. I think BRAGG's loss will fully reach sixty pieces of artillery. A large number of prisoners have fallen into our hands. The pursuit will continue to Red Clay in the morning, for which place I shall start in a few hours."

FIRST LIEUTENANT ROBERT T. BROWN, 6th New Hampshire Vols., is to be dismissed for drunkenness while on duty.

FOREIGN MILITARY AND NAVAL MATTERS.

THE Military Train Corps of the British Army, is gradually to be converted into a non-purchase one.

It is said that the Duke of Wellington has applied to the Horse Guards to sell his commissions and retire from the service.

NEWS received here from Constantinople states that the forts of the Dardanelles and in the Bosphorus are being strongly armed with cannon.

THERE is a report that MR. BLAKELEY, the well-known English gun inventor, is to superintend the manufacture of the new and improved guns Russia is having made.

THE Laird iron-clads have been valued by order of the English Government—*Et Tawfeek* at £100,000, and the *El Monassar* at £80,000. It is said that the Government wishes to buy them.

IT is said that Marshal RANDON has requested the Emperor to relieve him of his duties as Minister of War, and that probably he will be succeeded by Marshal NEIL, or, as some people state, by General CANROBERT.

WE have the announcement that a promise is now held out by the English Admiralty that what they so much want, a good gun, is looming in the distance. They are said to be determined to encourage the producer, come from what quarter he may.

NEW regulations have been received for the entry of apprentices to the Engineer Department of the British Navy. No lads will be entered who are less than fifteen or over sixteen years of age; and all who pass their examination will be required to attend the Dockyard School.

THE *Army and Navy Gazette* says:—"KRUPP'S guns for Russia. Intelligence has been received from the United States that the sealed pieces which content the French navy to a man, grinning out of the new iron-clad navies, we are but poorly prepared for war if these cannon fail, and we are left to the puny artillery of 68-pounder smooth-bores.

THE journal of the department of Seine et Oise (France) contains a case of humanity unusual in military annals. Colonel MARCHAL, who inhabits Chaloun, entered on his hundredth year the 27th of last month. Colonel even in the time of LOUIS XVI., the republic, the empire and the restoration. The officers of the Fifty-seventh of the line, in Garrison at Chalons, went in a body to congratulate on his birthday, to congratulate him on his excellent health. The visit was quite unexpected, and the Colonel, who is in full possession of his faculties, thanked the young comrades in affectionate terms for their civilities.

A COMMUNICATION from Vienna states that the Archduke MAXIMILIAN is to have the command-in-chief of the Austrian fleet, inspect the naval establishments at Pola, Venice and Trieste. The latter is considered as a naval visit prior to his departure for a voyage. These vessels are, it is said, to convey the Archduke MAXIMILIAN and the Archduchess CHARLOTTE and their suite to Mexico. The departure will not take place, it is thought, before the end of January or the beginning of February.

THE fact that Sir WILLIAM ARMSTRONG relies upon his new 12-pounder muzzle-loader for success in the coming competition with the breech-loader of WHITworth, is very good evidence of the high value of the breech-loading arrangements. And not only this, he apparently gives up his own especial plan of the inner tubes of cannon (which, as will be seen, breech-loading arrangement, are used in all the ARMSTRONG guns in the service), for he has given his 12-pounders steel tubes, or rather coiled barrels, which are then bored with coils at the breech. When this trial—which will be a most lengthened one—is concluded, another step in the experiments will be taken, and that step will probably three of the next caliber by WHITWORTH and six more by ARMSTRONG, as he seems still in doubt whether three guns or six are the best number to form the best bearing for sizes above 12-pounders, and will, therefore, probably have three of each.

A WAR Department Order has been received by the authorities of the royal gun factory at Enfield, in Woolwich Arsenal, England, to hasten the completion of the new 300-pounder gun-carriages under construction, as follows: "Lord Captain Paget will carry a 300-pound shell from the iron-cased cupola-ship *Royal Sovereign*, two for the gunnery ship *Excellent*, and one for experimental purposes at Shoeburyness. The two guns intended for the *Excellent* are now lying on the wharf at Woolwich ready for shipment, and are of the same calibre, 9 inch, being fitted to carry a 300-pound missile. One has been rifled and the other retains its smooth-bore. The rifled gun, on its arrival at Woolwich from Shoeburyness, will be sent to the proving rounds, bore symptoms of a separation of the coils near the muzzle. It has since undergone a most scrupulous examination by the Inspector of Ordnance, and has been pronounced safe for further use.

THE French iron-clad squadron sailed from Brest on the 27th of October, and proceeded to the island of Madeira, on their second trial trip. The speed of the squad is said to have been thoroughly successful. The *Solferino* always kept the lead, performing 14 knots an hour on the average. The *Magenta* and the *Couronne* came next, making 13 knots. The *Napoleon*, one of the best ships of the steam squadron, followed the *Couronne*. The iron-cased frigates *Invincible* and *Normandie* followed close after the *Napoleon*. The five iron-cased ships, all behaved well, as none of them steamed less than 12 knots an hour. During the trial made with sails, only the *Solferino*, although her masts are very low, accomplished 12 knots, taking the lead of all the others. After the sailing qualities of the ships were ascertained, an experiment was made with their respective armaments. It appeared that each iron-cased ship can carry sufficient coal to perform 1,400 nautical leagues.

EXPERIMENTS of an important nature have just been made at the foundry of Carlberg, in Sweden, upon the respective merits of armor-plates made in England, France and Sweden. The plates were built in each instance of iron bolted to a teak target backed with iron-plating, and supported by a massive stone pier. The two upper plates in the front were the French, and each was secured by 11 bolts. The next plate below was the largest Swedish, and this was secured by 20 bolts. Below this was a third of two sheet plates, one, Swedish and one English, each secured by 24 bolts; and the lowest plate was a long English, secured, like the Swedish, by 20 bolts. Each plate received six shots from the ordinary 68-pounder naval gun. The French and Swedish plates broke to pieces, and the English plates remained uninjured save the trifling effect of the shot. The quality of Swedish iron, and exhibited great toughness, as compared with the shot used in the English service—the core or centre of the shot was broken by a charge of double the weight of the core of the English shot.

THE test of the ARMSTRONG guns, afforded by the affairs at Kagosima, Japan, is said to have caused the British fleet to have acted very unfavorably to these guns. They say the shells flew wildly, the lead stripped, the vent-pieces flew out, the gun became hot and the gun became useless. The English military journals think these charges somewhat exaggerated, but believe in their substantial truth. They argue as good excuses the fact that the guns could not be relied upon, and they seem to have got so much out of order from the firing and damp of the first day, as to have been put out their accuracy. They also argue dangerous from the erratic flight of their projectiles. The bursting of the shells, both at the muzzle and in the guns, was a common defect, with the escape of gas at the breech, and the fracturing of the vent-pieces, previously noticed in working the Armstrongs in Captain COLES' cupola, were respected by the enemy. It is asserted in addition that the British ships had to steer close in shore and engage the batteries at short range, because the longrange guns were found useless. The "68-pounders" and the "70-pounders," we are told, "were equally deficient, or positively objectionable to all but the enemy."

THE BRITISH ARMY IN INDIA.

IN the report which has recently appeared in England from the Royal Commission appointed to enquire into the sanitary condition of the British army in the East Indies, we have valuable information on the subject of which sanitary regulations have upon the efficiency of an army. The annual death rate among the British troops throughout India, since the commencement of the century has been no less than 69 per 1000 strength; from 1890 to 1830, the average was 69 per 1000; from 1830 to 40, and from 1850 to 1856, 80. The annual rate of invaliding is estimated at 44 per 1000; and the constant sickness rate at 94 per 1000. From 1796 to 1856 inclusive, an army of 70,000 British in India has not less than 5,880 constantly on its sick list, and 3,080 on average mortality of the century) less annually by death 4,330 or nearly five regiments.

The most destructive maladies to the British soldier in India are fevers, dysentery, diarrhœa, diseases of the liver and epidemic cholera. The influence of locality is shown by the fact that the annual mortality of the British in the most healthy to 115 per 1000 in the most unhealthy stations. The effect of deficient sanitary regulations is proven by the decreasing rate of mortality from neglect as the various stations of the present generations to ensure advantages of location, drainage, cleanliness, ventilation, and the proper arrangement and ventilation of the barracks in which the men are lodged. It appears, too, in the fact that although the British troops enjoy advantages of diet and privates is estimated at 69 per 1000, the annual mortality of the officers, who are disposed under conditions more favorable to health, is estimated at only 20 per 1000 of civilians and the soldiers who are distributed over the whole country is but 20 per 1000. This last rate of mortality approximates to the highest average among the civilians, and the Commission adopt it as the standard of climatic and topographical influences. The mortality of the European under comparatively favorable sanitary circumstances. They express their confident belief that by proper attention to the sanitary condition of the barracks and hospitals the troops in India can be reduced to the rate of 20 per 1000; concluding, as they do, from a variety of considerations which we have not space to detail, that the excessive mortality is not the morbific influences of the climate, as commonly supposed, but the defective sanitary conditions under which the soldier is placed.

The report is accompanied with suggestions submitted to the Commissioners by Sir ROBERT MAIRTE, who, among other things, urges the establishment in the Indian armies of a well-supported sanitary department, separate and distinct from that for the cure of disease and wounds. Personal hygiene, which must be left to the care of regimental officers, should be the province of personal example, should he thinks, necessarily be separated from the general military hygiene—the preserver of armies. In connection with Sir ROBERT'S suggestions, the Commissioners recommend the appointment of commissioners of health, one at each seat of government, representing the various elements—civil, military, engineering, sanitary and medical, on the operation of which depends the solution of many health questions. The functions of these commissioners to be chiefly executive and advisory in all questions relating to the selection and buying out of stations, proper construction of barracks, hospitals and other buildings, drainage, water supply, cleansing and purification of stations, cantonments, cities and towns, and the prevention of epidemic disease.

THE "PRINCE CONSORT" IN A GALE.

WE alluded last week very briefly to the unfortunate experiences of the *Prince Consort* iron-clad, which recently bound to watch the rebel rams in the LAIRDS' Yard at Birkenhead. We have, at length, a particular account of the terrible weather that the first report of the disaster of the vessel. The *Prince Consort*, which is, it will be remembered, an iron-clad screw steamship, carrying 26 guns, left Plymouth Sound on the 18th inst. On the following day the weather, which had been fine, suddenly changed, and the wind sprung up from the south in a gale. The wind increased in force in the gale than she proved herself a very poor sea-going ship—she labored heavily, tearing herself to pieces. Things became so bad that it was found to be unsafe to attempt to make Holyhead, although it was then but a dozen miles distant, and the ship was put head to sea to keep her off the land. The bulwarks, boats and canvas were with much difficulty, taken off. To add to the difficulties of the situation, the chief engineer reported the water 18 inches and 2 inches in the ship, and soon after twelve the water was within six inches of the fires, and in consequence of the water in the ash-pits, the steam had ceased with all the boilers. The depth of water in the hold now exceeded seven feet. All the pumps in the ship were rigged and set to work, but although they continuously worked for ten hours, throwing out two hundred tons of water per hour, the water in the vessel was not steadily reduced. During this time the vessel was like a ball-ship rock, the officers and men on her decks—upper, main, and lower—were up to the knees in water, and apparently the seas would make a clean sweep over all. All the ship's head gear was washed away; the cutter and gig were blown into the water, and the *Prince Consort* was reported—with the utmost strain on the pumps, it was as much as ever the ship could be kept afloat. At one time the water in the hold reached to within nearly six feet of the fires, and but for the fact that the chances are the *Prince Consort* would have come to a total wreck. Under the circumstances it has been impossible to have made sail on her in the face of the gale, and her storm sails had blown away. Soon after twelve on the night of the 20th the engines, fortunately for the great comfort of every one on board, as it showed that shelter was near. At 11 p.m. Kingston lights were in sight, and at seven 12 and 1 the ship was brought to in anchor off Howth. The *Prince Consort* is the first of her class to experience a heavy gale, and from the above narrative it will be seen that she has not proved herself to be a first class vessel in the want of buoyancy. She was too much by the head, and her bows were too low, and from the phrase she had no life in her, and did not rise to the sea. The consequence of this was that the water on the lower decks was constantly washing over the fires, and "green seas" after "green sea," and from her labouring and straining her ports leaked like sieves. The opinion of the officers and men on board was that the ship was a failure. We have little worse in a gale than did the *Prince Consort*, and they all hope never to be sent to sea again in an iron-clad built on the model of this vessel, a report of this vessel, published in the London *Times*, written by a prominent ship-builder, says that the *Prince Consort* is a failure, and that the *Monarch* is bold by the fact that she was so strained by the heavy working to which she was exposed in the rough seas of the Channel, that her iron plates and rivets have all but, if not been made to be elastic. In this manner the water found its way into the ship in vast quantities, which, combined with the water on the decks, rendered it impossible to keep the state of matters which came near resulting in her foundering, and the loss of officers and crew.

Thus, both the *Royal Oak* and the *Prince Consort* are now laid up; the one having its iron plates honeycombed by the rivets having been strained by the heavy working of her bottom; and the other with beams thoroughly sprung and leaky. We must give up all hopes of seeing either of them on this side of the Atlantic.

GENERALS FROM PRIVATES.

GENERAL AUDEBRAU was the son of a green grocer, who entered the Neapolitan service early in life, and at thirty years of age was still a private. He was compelled, on account of being married to enter the commissariat of the Neapolitan territory. At thirty-five he became a volunteer in the republican army of the south, and rose from grade to grade till, in 1799, he was made a major-general.

BERNADOTTE, the most fortunate of NAPOLEON'S generals, was the son of an attorney in moderate circumstances, and intended as a matter of course for succeeding to his father. In 1790, he was only sergeant, and in three years afterwards, 1793, he was a general. In 1794 he commanded a corps of very humble parents, and in 1791 entered as a private in the Constitutional Guard of Louis XVI., and in 1804, was made a marshal and created Prince of Ponte Corvo. CUS was born of parents in moderate circumstances, and was intended for a painter. A short time previous to the breaking out of the revolution, he was in the garrison of Lille as a private in the regiment of Flanders and crew.

Thus, both the *Royal Oak* and the *Prince Consort* are now laid up; the one having its iron plates honeycombed by the rivets having been strained by the heavy working of her bottom; and the other with beams thoroughly sprung and leaky. We must give up all hopes of seeing either of them on this side of the Atlantic.

GENERALS FROM PRIVATES.

GENERAL AUDEBRAU was the son of a green grocer, who entered the Neapolitan service early in life, and at thirty years of age was still a private. He was compelled, on account of being married to enter the commissariat of the Neapolitan territory. At thirty-five he became a volunteer in the republican army of the south, and rose from grade to grade till, in 1799, he was made a major-general.

BERNADOTTE, the most fortunate of NAPOLEON'S generals, was the son of an attorney in moderate circumstances, and intended as a matter of course for succeeding to his father. In 1790, he was only sergeant, and in three years afterwards, 1793, he was a general. In 1794 he commanded a corps of very humble parents, and in 1791 entered as a private in the Constitutional Guard of Louis XVI., and in 1804, was made a marshal and created Prince of Ponte Corvo. CUS was born of parents in moderate circumstances, and was intended for a painter. A short time previous to the breaking out of the revolution, he was in the garrison of Lille as a private in the regiment of Flanders and entered as a private in the army. Marshal LANNES was the son of a poor mechanic, and was himself intended for a similar course of life; but, when about being bound apprentice to some humble calling, he absconded, and enlisted as a private. This was about the breaking out of the revolution, and in 1798 he had attained the rank of chief of brigade, and in 1796 was made a colonel. Marshal LEFEBVRE was born of humble parents. At the age of eighteen he entered as private in the French; in 1788 was made sergeant, and in 1792 had a captain of light infantry. In 1793 became an adjutant-general, and in 1804 attained the dignity of marshal of the empire.

Marshal MASENA was left an orphan in infancy, and his education was a good deal neglected. At the age of seven he entered the army as a private. He soon was made corporal, and in a few years a sergeant; and in 1804 was made marshal of France. Marshal MASSEY enlisted as a private when sixteen, and soon became sub-lieutenant of grenadiers. In 1794 he was chief of staff to General SARTOUAN: in 1796 was appointed general of brigade, and was afterwards minister of war to LOUIS PHILIPPE. He was born of humble parents.

The above are a few of numerous cases where, in the French army, privates have risen to the highest distinction.

THE SOUTHERN ARTILLERY.

We last week gave a Southern view of the rebel cavalry: the following original theory in regard to the rebel artillery is also from a Southern source—the *Daily Rebel*, of Marietta, late of Chattanooga, Georgia. It is contained in its issue of November 11th:

Time and experience have demonstrated that the Confederate armies are overburdened with artillery. This is especially so in many of the active campaigns attempted in the West. No longer is artillery the arm which is to be monopolized by this branch of the service. We are a partial convert to the doctrine of NAPOLEON, that "confidence rides with the bullet." We are at the same time incline to the belief that too many big guns are a greater disadvantage to us than no guns at all. We should like to meet one twenty-six-inch rifle and three—regardless of the prescribed rules of war in the books. With our enemy, artillery may be, by far, the most effective arm of the service in their military service. With us it is not. The South must gain her liberty, as she so gallantly began the work at the first battle of Manassas—by the bayonet. The rifle and the sabre cold steel and the impetuous dash of her chivalrous sons. The North, for its defence against invasion, has erected its forts and artillery posts with telescopic rifles and nine-mile cannon. "Time," says our Charleston contemporary, *the Mercury*, "is the friend of the South in all things, patience and stillness! Activity on our part is their oppression; celerity and dash are fatal to it. Inferior in ordnance, with few gunboats, we have one essential thing inferior in that kind of war. It is clearly our policy, whenever it is practicable, to fight *infantry* fights and cavalry fights in the open field. We have the men for such fights, and guns are put into fighting condition, and to give them as little time as possible for preparation. We do not want works. Our large armies have no need of them. We should not permit them to have works either, if capable of preventing it. Our policy is movement and celerity. Impetuosity can anticipate and overmatch these ordnance preparations—this artillery war."

Exactly! We should fight infantry fights and cavalry fights in the open field. We must discard the spade, and the large guns at the same time. *In artillery emergencies, notwithstanding the great efficiency of our artillerists we are generally outnumbered.* Not so, with the bayonet at close quarters. We can then meet the enemy on equal terms, and the impetuous application of cold steel on our part most frequently leaves us masters of the field.

The artillery is a very expensive department of our army. The outlay for horses, to supply the number of forage required to sustain them, the building of guns and carriages, the harness, and the hauling of the whole, is enormous, and up enormously, while the amount of ammunition wasted upon the desert air is almost incalculable. If we go on increasing our artillery corps, our numerical successes will end literally in smoke. If the force required to man half the field batteries in the Army of Tennessee were converted into infantry, it would materially increase our strength in the field, and victory will often perch upon the standards of the South, when they are carried by the gallant bands formed of the men who charge upon the enemy's line—whether they be drawn in the open field, or behind earthworks six feet high. The Southern forces are more in their fighting qualities, from their education and their opportunities, if from nothing else. With the rifle and bayonet—the horse and sabre, they are better fighters than their northern foes, even with less discipline. In equal numbers they can generally defeat them. With their more highly educated, the North has superior facilities for procuring and making ordnance. With earthworks mounting numerous guns, or with decks of distant gunboats, they can, by a numerous blaze of artillery, almost remains for us to bring them to "short taw." Let us increase our infantry by reducing our artillery, and keep the Yankees in hot fight—cannot have time even to get their guns in range, much less to encounce themselves behind barricades of earth.

THE EXCHANGE OF PRISONERS.—The following letter was addressed by the Solicitor of the War Department to a gentleman in Kentucky in reply to some inquiries for information as to the causes of the cessation in the exchange of prisoners:

WAR DEPARTMENT,
Washington City, Nov. 20, 1863.

DEAR SIR: Your letter of the 17th has been received, in which you inquire whether any documents are now accessible, or will be likely soon to be published by our Government relating to the cessation of exchanges. In reply to the first I remark that the subject excites a deep interest in consequence of the sufferings of our men in the prisons.

The correspondence published in the Richmond papers does not, it is thought, present the matter in its true light. In a few days the entire correspondence will be made public here by authority.

There are several serious difficulties in the way of contenting an exchange of prisoners: one is the *last fifth* of the enemy is putting into active service many thousands of paroled prisoners, who are in our prisons and elsewhere, without releasing any of our soldiers held by them. But another difficulty of still graver importance is the *pertinacity refusal by the enemy to exchange negro soldiers and their white officers upon any terms whatever.* It is well known that they have threatened to sell colored captured soldiers into slavery, and to keep their white officers.

The Government demands that all officers and soldiers should be fairly exchanged, otherwise no more prisoners of war will be given up. The faith of the Government is pledged to these officers and troops that they shall be protected, and it cannot recede from its word. No savage cruelty of slave-masters a single officer or soldier who has been called on to defend the flag of his country and thus exposed to the hazards of war.

It has been suggested that exchanges might go on until all except the colored troops and their white officers have been exchanged, but that we allowed the rebels would not only be relieved of the burden of maintaining our troops, but they would have in their hands a powerful weapon to use or over the very persons whom we are solemnly bound to rescue, and upon whom they could then, without fear of retaliation, wreak their execrable the inhuman cruelties they have so basely threatened.

The PRESIDENT has ordered that the stern law of retaliation shall without hesitation be enforced, to avenge the death of the first Union soldier of whatever color whom the enemy shall murder in cold blood after the delivery. All other questions between us may be postponed for future settlement, but the fair exchange of colored soldiers and of their white officers can be insisted on by the Government before another rebel soldier or officer will be exchanged.

The sufferings of our men in Richmond are the subject of deep regret with the Government, and there has been no want of effort to afford all possible relief.

Very truly yours,
WILLIAM WHITING.

NAVY GAZETTE.

REGULAR NAVAL SERVICE.

ORDERED.

Assistant Surgeon James H. Gardner, to the School Ship *Savannah*.
Assistant Surgeon James M. Flint, to the Mississippi Squadron.
Assistant Surgeon William Commiskey, to the Receiving Ship at Key West.
Captain Pitch W. Taylor, to the Receiving Ship at Boston.
Third Assistant Engineer George R. Power, to examination.
Lieutenant Commander Edward Terry, to the Niagara.
Lieutenant Commander Allen Huston, to command the *Marcellus*.
First Assistant Engineer Francis J. Loring, to special duty at New York.

PROMOTED.

Midshipman Richard P. Leary, to the grade of Acting Ensign and ordered to the *Canandaigua*.
Second Assistant Engineer Charles E. Valls, Lewis J. Allen, and Thomas M. Dalchert, to the grade of First Assistant Engineers.
Acting Third Assistant Engineers Charles Goodrich, Theodore Cooper, James H. Perry, Albert K. Fulton and Edmund Lincoln, to the grade of Second Assistant Engineers.

DETACHED.

Assistant Surgeon Thomas Antisell, from the School Ship Sawyer, and ordered to the West Gulf Blockading Squadron.
Assistant Surgeon Edward Shippen, to the Mississippi Squadron and awaiting orders.
Chaplain Charles A. Davis, from the Washington Navy Yard and ordered to the *Minnesota*.
Assistant Surgeon Wm. H. Salter, from the *Minnesota* and awaiting orders.
First Assistant Engineer B. E. Chassaing, from the *Brooklyn* and ordered to special duty at Providence, R. I.
Second Assistant Engineer Wm. H. Brown, from special duty at Providence, R. I., and ordered to the *Sara*.
Third Assistant Engineer Wm. Hoey, from the *Canonicus* (sick) and awaiting orders.
Acting Ensign John Dove, from the Receiving Ship at Baltimore and ordered to the North Atlantic Blockading Squadron.
Commander Charles H. Baldwin, from special duty at Cairo, Illinois, and awaiting orders.
Assistant Surgeon George A. Lyon, from the *Tuscarora* and ordered North.
Third Assistant Engineer George W. Beard, from the *Cimarron* (sick) and awaiting orders.
Lieutenant Commander Thomas H. Patterson, from the command of the *Marblehead* and ordered to command the *Tuscarora*.
Lieutenant Commander John S. Barnes, from the command of the *Niagara* and ordered to the command of the *Marblehead*.
Surgeon Joseph W. Shively, from the Naval Asylum at Philadelphia and ordered to the Naval Station at Cairo, Illinois.
Chief Engineer James A. Harrison, from the *Brooklyn* and awaiting orders.

ORDERS REVOKED.

Commander Fabius Stanley's orders to the North Atlantic Blockading Squadron, and ordered to ordnance duty in the Mississippi Squadron.

VOLUNTEER NAVAL SERVICE.

ORDERED.

Acting Assistant Paymaster C. H. Huntington, to the *Ottawa*.
Acting Ensign C. M. Twining, to the *Lehigh*.
Acting Ensign Edward Hall and Richard Wilkinson, to the *Tuscarora*.
Acting Ensign W. H. McCormick, to the *Ottawa*.
Acting Ensign C. F. Hodgkins, to the *Wissahickon*.
Acting Ensign Henry C. Hall and Lieutenant S. B. Dayton, to the *Shamrock*.
Acting Ensign Warren Porter, to the *Mahaska*.
Acting Ensign J. P. Gallagher, to the *Florida*.
Acting Ensign J. Tuttle, to the *Potomac*.
Acting Ensign E. Tuttle, to the *Potomac*.
Acting Volunteer Lieutenant Benjamin Loring, to the Mississippi Squadron.
Acting Master's Mate Albert H. Fisher, to the *Bazer*.
Acting Master's Mate Wm. Hall, to the *Rhode Island*.
Acting Master's Mate Oliver L. Brook, to the *Housatonic*.
Acting Master's Mate Wm. H. Hall, to the *Rhode Island*.
Acting Master's Mate James C. Grove, to the *Wabash*.
Acting Master's Mate Joseph Wilson, to special duty at Providence, R. I.
Acting Ensign Richard Dagnett, to the *Kensington*.
Acting Master Robert T. Wright, to the *Bridge*.

Acting Assistant Surgeon George R. Mann, from the *Wissahickon* and ordered North.
Acting Assistant Paymaster C. A. Noyes, from the *Ottawa* and awaiting orders.
Acting Chief Engineer J. Q. A. Zeigler, from the *Florida* and awaiting orders.
Acting Volunteer Lieutenant Charles F. W. Behm, from the *Sassacus* and awaiting orders.
Acting Assistant Surgeon George S. Fleo, from the Washington Navy Yard and ordered to the *Wissahickon*.
Acting Third Assistant Engineer Thomas Coyle, from the *Poppy* and ordered to the *Sassacus*.
Acting Master's Mate William F. Horton, from the *Wabash* and ordered North.
Acting Master's Mate John B. Mitchell, from the *Iroquois* and ordered to the *Adirondack*.
Acting Master's Mate W. L. Hailowell, from the *Shackbee* and ordered to the *Dawn*.
Acting Master's Mate Joseph Gregory, from the *Dawn*.
Acting Master's Mate Joseph Nebah.
Acting Ensign Henry W. Wilson, from the *Montgomery* and granted thirty days' leave of absence.
Acting Assistant Surgeon George G. Webber, from the *North Carolina* and ordered to the *Kensington*.
Acting Assistant Surgeon George D. Harris, from the *Privateer* and ordered to the *Augusta*.
Acting Ensign J. C. Hamlin, from the *Crusader* and ordered to command the *Senaca*.
Acting Ensign Henry Taylor, from the *Tulip* and ordered to the *Crusader*.
Acting Second Assistant Engineer Samuel Bidson, from the *Galena* and ordered to the *Lehigh*.
Acting Second Assistant Engineer Chas. W. Dolan, from the Picksburgh and ordered to command the *Governor Buckingham*.
Acting Master's Mate Robert Anderson, from the Pascagoula and ordered to the Appraisers.
Acting Third Assistant Engineer Hiram W. McCulley, from the *Western World*.
Acting Second Assistant Engineer Charles Sinclair, from the Monticello and ordered to the Commonwealth.
Acting Third Assistant Engineer C. E. Gould, from the command of the *Henderson* and ordered North.
Acting Assistant Surgeon George H. Marvin, from the *Exchange* and granted permission to return home.
Acting Ensign Henry Taylor, from the *Tulip* and ordered to the *Crusader*.
Acting Master Nathaniel S. Morgan, from the *Relief* and granted thirty days' leave of absence.
Acting Ensign Jacob M. Eastley, from the *Galena* and ordered to the *Lehigh*.
Acting Second Assistant Engineer C. A. Martin, from the *Potomac* and ordered to the Mississippi Squadron.

APPOINTED.

D. Y. Bostwick, Acting Assistant Paymaster.
Thomas Wright and James S. Walton, Acting Masters and ordered to the Mississippi Squadron.
Henry C. Wright and James J. Ashmen, Acting Second Assistant Engineers and ordered to the Mississippi Squadron.
Charles Gervans and Thomas B. Jefferson, Acting Third Assistant Engineers and ordered to the Mississippi Squadron.
William D. Ashe, Acting First Assistant Engineer.
John J. Read, Acting Second Assistant Engineer.
Thomas Dempsey, Charles Hendrickson, Thomas Dempsey, Charles Minnerley and Hugh S. Short, Acting Second Assistant Engineers.
Henry W. Smith, Acting Assistant Surgeon and ordered to the *North Carolina*.

PROMOTED.

Acting Ensign Henry Renny, of the *Iroquois*, to the grade of Acting Master in the Mississippi Squadron, vice Hamilton, killed in action.
Acting Ensign Charles A. Hamlin, to the grade of Acting Master and ordered to the *Iroquois*.
Act ng Ensign Charles F. Langley, to the grade of Acting Master and ordered to report to Commander Commodore Perry.
Acting Master William R. Cressey, of the *Gertrude*, to Acting Volunteer Lieutenant, and ordered to the Mississippi Squadron in having captured the English Blockade-runner *Warrior*.

DETACHED.

Acting Ensign Adams Parker, Acting Second Assistant Engineer John B. Dorgan and ordered to the Mississippi Squadron.

RESIGNED.

Acting Assistant Surgeon Alfred Weeks.

APPOINTMENTS REVOKED.

The appointments of Acting Masters have been revoked:—
Acting Assistant Surgeon E. D. Winslow, of the *Sprowkell*.
Acting Third Assistant Engineers Thomas Lee, Acting Ensign James W. Guy; Acting Ensign G. B. Armstrong, of the *Fort Jackson*.
Acting Ensign Edward Hall, of the *Florida*, and Acting Ensign Hedges has been revoked, and he is granted thirty days' leave of absence to report to Boston.

APPOINTMENTS CONFIRMED.

The appointments of Acting Masters have been confirmed:—
Acting Ensigns Nicholas Pratt, William Colby, Charles H. Pierce, A. J. Parsons, Wm. H. Hall and Wilbur F. Mellen.
Acting Master's Mate Thomas Fisher.
Acting Ensigns Edward Hall, Richard Stone, and ordered to the Mississippi Squadron.
Acting Third Assistant Engineers George L. Mortimer and George W. Gough, and ordered to the Mississippi Squadron.

DEATH OF AN ADMIRAL.

Has been granted to the following officers:—Acting Assistant Paymaster Edward D. Hayden, July 29, hospital, Memphis. Assistant Paymaster Edward D. Hayden, thirty days; Acting Assistant Engineer Thomas Lee, thirty days; Acting Third Assistant Engineer J. B. McKenzie, of the *Commodore Jones*, one week; Acting Assistant Surgeon Alfred Weeks, thirty days; Acting Volunteer Lieutenant W. H. Kemiston, twenty days; Acting Volunteer Lieutenant A. Ayres, thirty days; Acting Assistant Surgeon Matthew Kellock, two weeks; Acting Second Assistant Engineer C. W. Reynolds, thirty days.

DEATHS

Reported to the Navy Department for the Week ending November 28, 1863.

John Heenan, ordinary seaman, inflammation of lungs, Oct. 27, U. S. steamer *Monona*.
Thomas Burns, landsman, gunshot, Nov. 2, U. S. steamer *Pontoosuc*.
Henry Norris, landsman, gunshot, Nov. 2, U. S. steamer *Pontoosuc*.
George H. Lounton, landsman, hemoptysis, Oct. 31, U. S. steamer *Pontoosuc*.
Frederick Lewis, landsman, July 21, hospital, Memphis.
John Carver, seaman, remittent fever, Aug. 5, hospital, Memphis.
Robert Walker, seaman, remittent fever, Aug. 13, hospital, Memphis.
Robert Walker, seaman, intermittent fever, Aug. 17, hospital, Memphis.
George Brown, seaman, remittent fever, Aug. 19, hospital, Memphis.
Daniel Driscoll, seaman, remittent fever, Aug. 21, hospital, Memphis.
Charles Clinton, seaman, chronic diarrhœa, Aug. 21, hospital, Memphis.
James S. Collins, first-class fireman, chronic diarrhœa, Sept. 3, hospital, Memphis.
Thomas Lafferty, Third Asst. Engineer, yellow fever, Oct. 20, New Orleans.
Andrew Fagan, marine, consumption, Oct. 18, U. S. steamer *Fernandina*.
D. Anderson, contraband, consumption, Oct. 22, Mississippi Squadron.
Charles Marvey, first-class boy, congestive fever, Oct. 12, Mississippi Squadron.
Joseph McGregor, first-class fireman, consumption, hospital, New York.
Thomas Tillman, landsman, pneumonia, hospital, New York.
Richard Martin, landsman, July 4, hospital, Memphis, Miss.
Thomas Smith, ordinary seaman, Sept. 8th, Ohio, fracture skull, April 29, Mississippi Squadron.
John Bauer, seaman, drowned, May 22, Mississippi Squadron.
James Gleary, quarter gunner, drowned, June 1, Miss. Squadron.
Thomas Cummings, seaman, drowned, June 10, Miss. Squadron.

Henry N. Tanner, Act. Asst. Paymaster, cerebritis, July 1, Mississippi Squadron.
Philip Rowles, landsman, congestive fever, July 6, Miss. Squadron.
James Bully, first-class boy, drowned, July 8, Miss. Squadron.
W. H. Brownell, landsman, drowned, July 8, Miss. Squadron.
Frank Barlow, contraband, dysentery, July 17, Miss. Squadron.
Patrick Gavin, seaman, remittent fever, July 21, Miss. Squadron.
Levi Skidmon, first-class boy, pneumonia, July 14, Miss. Squadron.
Richard Burke, contraband, remittent fever, July 22, Miss. Squadron.
Henry McCoy, contraband, chronic diarrhœa, Aug. 24, Miss. Squadron.
Charles Bates, boy, typhoid fever, Sept. 1, Miss. Squadron.
Robert Brock, first-class boy, chronic diarrhœa, Sept. 2, Mississippi Squadron.
Richard Ellis, Acting Ensign, remittent fever, Sept. 8, Mississippi Squadron.
Matthew Monagan, landsman, typhoid fever, Sept. 7, Miss. Squadron.
Wilbur Ward, boy, remittent fever, Sept. 6, Miss. Squadron.

Thomas Seymore, landsman, remittent fever, Sept. 8, Miss. Squadron.

Humphrey Tenney, landsman, congestive fever, Sept. 11, Miss. Squadron.

John C. Smith, seaman, erysipelas, Sept. 13, Miss. Squadron.

George Mahon, first-class boy, dysentery, Sept. 17, Mis. Squadron.

James Hill, landsman, chronic diarrhœa, Sept. 19, Miss. Squadron.

Aaron H. Hopkins, landsman, anæmia, Sept. 22, Miss. Squadron.

John Harris, landsman, remittent fever, Sept. 25, Miss. Squadron.

Erwin Parker, landsman, chronic diarrhœa, Sept. 26, Miss. Squadron.

Thomas Bryant, ordinary seaman, remittent fever, Sept. 27, Miss. Squadron.

Manuel Wesson, contraband, tetanus, Sept. 27, Miss. Squadron.

James Carey, quarter gunner, paralysis, Oct. 2, Miss. Squadron.

Lloyd Richardson, boy, first-class, typhoid fever, Oct. 3, Miss. Squadron.

Lewis McDaniel, doctor, diarrhœa, Oct. 4, Miss. Squadron.

Joseph Hammond, ordinary seaman, dysentery, Oct. 6, Miss. Squadron.

Dorothea Dix, Acting Master's Mate, dysentery, Oct. 10, Mississippi Squadron.

John Phillips, landsman, remittent fever, memoranda, Oct. 12, Miss. Squadron.

John Caswell, landsman, remittent fever, Oct. 22, Miss. Squadron.

Albert C. Smith, Act. Assist. Engineer, Sept. 1, Pacific Squadron.

Samuel Kay, landsman, dysentery, Sept. 2, Pacific Squadron.

Charles Barlow, surgeon's steward, typhoid fever, Oct. 28, steamer *Antonica*.

George Schway, landsman, remittent fever, Nov. 2, hospital, Memphis.

Daniel Mac, contraband, consumption, Nov. 3, hospital, Memphis.

Israel Jones, contraband, remittent fever, Nov. 9, hospital, Memphis.

James Whittaker, contraband, remittent fever, Nov. 10, hospital, Memphis.

David Williams, captain, remittent fever, Nov. 16, hospital, Memphis.

George Mallory, first-class boy, consumption, Oct. 11, hospital, Quincy.

Charles A. Field, acting gunner, drowned, Nov. 5, Mississippi River.

NAVY YARDS AND NAVAL STATIONS.

BROOKLYN NAVY YARD.

There is little change to report in other navy yards. The arrival of the *Pulaski* during the week with the prize steamer *Bonshee* in tow, is one of the most important events. She ran into Wilmington at one o'clock on Sunday morning, the 15th inst., in a heavy gale, with a full cargo. While running in she was chased by one blockader in front of her, one abeam and one astern, all firing rapidly. One of them got within thirty yards of her and hailed her to stop, but the captain of the *Bonshee* defied them to catch him, and got his vessel into port safe, with the exception of one shot in the mainmast hold, which she said to be equal to *a few days afterwards*, and had been to Nassau and was again bound to Wilmington when captured. The steamer is a new vessel, and is said to be the fastest boat in the *Margaret and Jessie*, now lying at the Atlantic docks.

According to information in possession of the Navy Department the *Bonshee* sailed on the 7th inst. for Nassau, where she took in coal, and launched in the latter part of November, 1862. She is a paddle-wheel steamer, and called a steel boat, the plates used in her construction being of that description, three quarter of an inch in thickness which are said to be equal to iron plates an inch thick. She is 220 feet long, 29 feet broad, and 12 feet deep. Her bottom is flat, and her hold is divided into four water-tight compartments. She is of great speed oscillating, of 120 horse-power, and so constructed as to be under the decks. When fully loaded she draws only eight feet of water.

BOSTON NAVY YARD.

The troubles with the workmen are not yet over. The fact that eighteen of the promoters of the late strike have been dismissed gives great offence to the other workmen, and they are discussing the whole subject, and have a committee to circulate a petition, requesting the Secretary of the Navy to reinstate these men, and it is reported that they have obtained about 1000 signatures, and expect to double the number.

Divers are at work laying the ways preparatory to the launching of the iron-clad *Monadnock*. A change has been made in the arrangement of screw sloop *Hartford*, all her pivot guns, except the for ward gun, being replaced by broadsides. Screw steamer *Shamokin*, *Hudson* will be ready to sail in a few days. Nearly all the machinery of the screw steamer *Sioux* has been placed on board.

Sloop *Marion*, 3, sailed on the 19th inst. for Key West to receive her place as an instruction-ship. Screw steamer *Flag*, 9, Acting Master Commanding Caleb A. Curtis, from the Brooklyn Yard on Monday, arrived on the 16th. The prize steamer *R. E. Lee* arrived on the 21st.

PHILADELPHIA NAVY YARD.

Improvements at Navy Yard are now extensively being made. The old buildings which were destroyed by fire during the Fall have been entirely repaired, and are now in use again. The new buildings are being built on the main avenue in a very substantial manner. It is the intention of the officers of the yard to have them used as storage quarters for the purposes of the yard, and are of brick, three stories high, with slate roofs, which are being put on this week. They are one hundred and fifty feet front and fifty deep. On the first floor four rooms are arranged, each being fifty feet square. The upper stories will all be connected with elevators, and will form three large apartments, each one hundred and fifty feet square.

WASHINGTON NAVY YARD.

There is so much in the story derived by scientific reporters to Washington of trial trips, that it is the case at the Navy Yard.

Navy Yard. There was no defect in her engines, and no disaster, which cannot occur on a trial trip, to the inexperience of testing into the vessel the water from the boilers, which had been carefully filled for the purpose of discovering leaks, brought her down so much that water began to at the junction of the main deck and the keep of the vessel. The ordinary fresh pump being out of order, the fire engine of the yard was sent to the vessel to do its work. Out of this a story of a conspiracy was manufactured by the press.

Experiments have been made with superheated steam on board the *Saluda*, which has been lying at the wharf for nearly six months past. She will sail for New York in the course of a few days.

The strike in the carpenter shop has been settled. A new set of rules has been established at the old prices—\$2 per day.

A tug-boat has arrived at this Navy Yard, bringing a torpedo of two sections, containing about 40 pounds of powder, and provided with a friction time fuse and percussion. It was found floating down James River. The the canisters are new, and owing to the peculiar construction of the machine, it was doubtless intended to accomplish its work by striking against one of our vessels.

BALTIMORE NAVAL STATION.

There are at present repairing in this port the following named vessels:—*Steamers Victoria, Hendrick, Commodore Perry, Circe, Shockoken, Iroquois, Ariel, Winona, Mackinaw* (new double-ender), and *Crusader*.

VARIOUS NAVAL MATTERS.

The great ram *Missouri*, built at Shreveport, La., is a failure. She cost the rebel government half a million of dollars.

A large and powerful iron-clad steamer, to be named the *Puritan*, is underway, to be built at the Portsmouth Yard immediately.

The blockade-running steamers *Ella Morris*, *Stanhope*, *Spray*, *Alice*, *Anderson*, *Rhoda*, *Beauregard*, *Automedon*, *Dispatch* and *Salvor*, have arrived at Wilmington.

United States gunboat *Nansemond* arrived on the 21st at Fortress Monroe from off Wilmington, with the officers of the steamer *Rio*, which was captured on the 11th inst.

A Paris telegram has been printed in the Underwriter's room at Liverpool to the following effect: "Don't ship anything to Matamoras—Juarez has fled."

French gunboat *Narval* has arrived at New York pilot from Havana. She reports five gun-boats, and one steamer and ten men. A portion of the Russian fleet has left for Fortress Monroe.

The steamer *Peterhoff*, from Liverpool, for Matamoras, via Portland and Bath, &c., has been purchased by the Government, and is ordered to the Eastern Navy Yard.

The old iron-clad single ship *Ironsides*, which was four or five years ago taken to pieces and reconstructed on a new model, and is now upon the docks at Kittery, Me., is being put in order for sea.

Side-wheel steamer *Sagamore*, 5, Lieutenant-Commander commanding William Rogers, which arrived at Boston on the 14th of September, sailed thence on the 20th of October.

The steamer *Ella*, from Key West, arrived here at Aspinwall, on the 28th ult., for \$1,720. She was bought by Mr. W. S. Johnson, for her account and agency, and Captain David Wilson, of the steamer *Down Queen*.

Screw steamer *Genesee*, 8, is again at New Orleans, after a cruise of three months in Mississippi Sound and the Gulf. She is in need of repairs. The steamer *Sagamore* left Mobile Bay on the second instant—364 men and shell having been fired from it since the commencement of the attack.

We have reports of the capture of the American ships John Wolf and *Mark Hooker* by the Confederate steamer *Georgia*, now at Boulogne. A Liverpool paper says that the *Georgia* had, shortly before arriving at Boulogne, captured the *Mark Hooker*, as that ship is the above we only a title of what may be expected soon to follow.

The Mersey Docks and Harbour Board have issued a return of the trade between Liverpool and the Confederate States in the year 1863, from which it appears that the exports and imports were most unimportant to £156,749. The total number of vessels cleared inward from Confederate ports was 91, and outward 93, against 1,000 and 1,200 for the largest shipments were to New Orleans.

A new and dreadful engine of destruction is the "Lloyd's Release Association," established for the capture of the steamer *Sir William Peel* and her consort *The Queen of the Isles*. It is in connection with Lord Lyons, and will afterwards go to Matamoras, and thence to New Orleans, where it will be under the protection of the French court to be held there.

A Cairo correspondent, who has visited the entire Mississippi squadron, says that the whole number of smoke-stacks in commission are now employed in the Navy, and that many below Cairo are to be employed as coal-barges. Twenty each, who are employed as coal-barges, have been converted into tugs, and are now in use by the army to tow their barges; but when once learned they make efficient steamers, and handle well in the strong current.

The Edinburgh *Scotsman* says:—"During the last ten days two very fast and unarmed vessels have been launched from the yard of Messrs. Scott & Co., Greenock, in order to be employed as blockade runners. One is called the *Advance*, 200 feet long, with engines of 250 horse-power, and the *Prompt*, 164 tons, lately the *Fergus*. Another steamer built by Messrs. Scott & Co. is also reported to be intended to have her compasses adjusted before following the other two; she is named the *Lee*."

A Queenstown correspondent of the London *Daily Express* says that, "notwithstanding the vigilance of the blockading squadrons, steamers seem to be on the increase. Queenstown is seldom without a vessel of this class entering or departing from there, and two are now chored there. One of them, which had to put in during the gale of Friday, is of extraordinary build, and is said to be a match for a Monday night, is very long, and fitted with a double screw of superior construction. She is also distinguished by their long, low black, rakish-looking two-funnelled hulls, and by an ostentatious display of the British flag. The other vessel is a paddle-wheel boat, the other to Nassau. By all accounts the trade is very profitable, as in case of capture, the captain and crew have to be taken to a port, and in case of success, the immense profit yielded can well afford the extraordinary premium allowed."

The arrival of the *Vanderbilt* at the Cape seems to have been the signal for the departure of numerous vessels from that quarter. The *Georgia* made all at once; the Russians, when last spoken of, was beginning to coal, and the Confederate steamer at Algoa seems to have as speedily stood to the eastward. The real steamer the Vanderbilt, after a very short stay, sailed again on September 26, was chased by the Alabama; but on British colors being hoisted, the privateer stood away. The *Vanderbilt* is now en route for Chinese waters. The *Georgia* has arrived at Cherbourg for coal and supplies. The natural gun-boat *Florida* is reported to be coaling from the *Florida*, intending erasing again in the Atlantic. The Navy Department has received information that the *Florida* has been ordered west in October, which says she left, early in the month, Cape Frio for Bahia, and that she was to be followed by a Dutch vessel in a limited condition; to save the lives of 10 persons on board, the *Vanderbilt* has towed the *Florida* into Bahia, and left for the Cape, thus leaving four days. At last accounts she was at the Island of Mauritius, and the Alabama was in the Bay of Bengal.

ARMY GAZETTE.

MAJOR-GENERAL THOMAS' CONGRATULATORY ORDER.

HEADQUARTERS DEPARTMENT OF THE CUMBERLAND, }
CHATTANOOGA, TENN., November 7, 1863.

General Order No. 252.

The recent successful movement, by a detachment of a new and short line of communication with Bridgeport, and the possession of the Tennessee River, were of so brilliant a character as to deserve special notice.

The skill and cool judgment of the officers who conducted the expedition under Brigadier-General Wm. F. Smith, Chief Engineer, consisting of Brigadier-General Hazen, Colonel Long and Major Reed, the best parties under Colonel Stanley, 13th Ohio Vols., and the gallantry of Lieutenant-Colonel Wagner, 58th Indiana Vols., engaged in effecting a permanent lodgement on the south side of the river, at *Brown's Ferry*, deserve high praise.

The column under Major-General Hooker, which took possession of Lookout Valley, and the movement of Major-General Howard, with great credit for their brilliant success in driving the enemy from every position which covered the line. The gallantry made by the troops of General Howard, up a steep and difficult hill, over two miles long, in the face of determined fire, which drove the enemy from his barricades on the top, and the repulse, by General Geary's command, of a most determined attack attempted to surprise him, will rank among the most distinguished feats of arms of this war.

By command of Major-General THOMAS.

W. G. GOSDARD, A. A. G.

DISPATCH FROM MAJOR-GENERAL THOMAS.

CHATTANOOGA, November 24, 12 o'clock M.

Yesterday, at half-past 12 o'clock, General Grange's and General Sheridan's commands, Fourth Corps and Cavalry, were advanced directly in front of our fortifications, drove in the enemy's pickets, and carried his first line of rifle-pits between Chattanooga and Citico Creek.

We captured nine commissioned officers and about one hundred enlisted men.

Our loss is about one hundred and eleven.

To-day General Hooker, in command of General Geary's division, Twentieth Corps, advanced from Lookout Valley, carried the enemy's intrenchments on the Fourteenth corps, carried the south slope of Lookout Mountain, took possession of the enemy's camps, and captured 49 rifled cannon; killed and wounded not reported.

Palmer's corps, continuous fighting from 12 o'clock until after night, but our troops gallantly repulsed every attempt to take its position.

General Sherman crossed the Tennessee River before daylight this morning at the mouth of the South Chickamauga, with three divisions of the Fifteenth corps and one division of the Fourteenth corps, and carried the northern extremity of Missionary Ridge.

Our success so far has been complete, and the behaviour of the troops admirable.

GEORGE H. THOMAS, Major-General.

MAJOR-GENERAL SCHENCK RELIEVED.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, November 16.

General Orders No. 280.

1. By direction of the President of the United States, Major-General Schenck is relieved from the command of the Middle Department and Army of the Ohio. On being relieved he will repair to Washington and report by letter to the Adjutant-General of the army.

2. The troops serving within the limits of the State of Kentucky, south of the Tennessee river, and such part of the State of Tennessee as may be under the command of Major-General Burnside.

By order of the Secretary of War.

E. D. TOWNSEND, Asst. Adjt. Gen.

DISPATCH FROM MAJOR-GENERAL GRANT.

CHATTANOOGA, November 24—6 P. M.

Major-General H. W. HALLECK, Commander-in-Chief, Washington:

The following dispatch has been received from General Thomas, dated the end of Missionary Ridge, and his right is now at the tunnel, and has left no force in front of Orchard Knob. Looking from the top, I can see the colors of the mountain, and now hold the centre slope and top of Missionary Ridge. I cannot yet tell the amount of artillery that is now in our hands.

General Hooker reports two thousand prisoners taken, besides which a small number have fallen into our hands from Missionary Ridge.

U. S. GRANT, Major-General.

NOTICE TO DELINQUENTS.

The following officers having been reported at the Headquarters of the Army for the absences hereinafter specified are hereby required to make their appearance before the Retiring Board now in session, at Washington, within fifteen (15) days from Nov. 23, 1863, they appear before the Military Commission now in session at Washington, of which Major-General Ricketts, U. S. Volunteers, is President, and make satisfactory defence to the charges against them, viz.:

Absence without proper Authority.

Captain William D. Reitzel, 26 Pennsylvania Reserves.
Captain Theodore Wiegand, 97 Pa. Vols. Nov. 30, 1862.
Surgeon F. A. Quinan, 109th Pennsylvania Volunteers.

Conduct unbecoming an officer and a gentleman, breach of arrest, absence without leave.

Captain George A. Yerger, 95th Pennsylvania Volunteers.

Failing to report at Seminary Hospital, Georgetown, D. C., as ordered, and absence without leave.

Captain R. McConnell, 105th New York Volunteers.
Captain H. B. Hall, 105th New York Volunteers.
Assistant Surgeon J. C. Ferguson 7th Ohio Volunteers.
Captain W. H. Gould, 1st New Jersey Cavalry.
Captain G. R. Cadwallader, A. Q. M., United States Volunteers.
Captain W. H. Gould, 1st New Jersey Cavalry.
Captain J. L. Paine, Signal Corps.

ORDERED FOR DISMISSAL.

The following officer having been reported at the headquarters of the army for the absences hereinafter specified, and having neither appeared before the Retiring Board now in session at Washington, or left to recommended for dismissal from the service of the United States unless within fifteen (15) days from Nov. 23, 1863, they appear before the Military Commission, in session in Washington, of which Brigadier-General Ricketts, U. S. Volunteers, is President, and make satisfactory defence to the charge against him—

Failing to report at Annapolis, Md., as ordered.

Captain George H. Hall, 1st New Jersey Battalion of Cavalry.

EXEMPT FROM DISMISSAL.

The following named officers, charged with offences, and heretofore published, are exempted from dismissal on account of wounds received in battle, satisfactory defence having been made in their respective cases:

Captain Joel W. Cilli, Company B, 12th New Jersey Volunteers.
Captain Frank Wilson, Company K, 12th New Jersey Volunteers.
Surgeon James Bryan, United States Volunteers.
Captain William Hamilton, United States Colored Infantry.
Second Lieutenant John H. Kane, 5th United States Cavalry.

SENTENCES BY COURT MARTIAL.

Captain Frederick Speidel, 5th U. S. Infantry, to be cashiered, for having borrowed from a company of cavalry, then in service, six or more dollars, by the pretence that he wished to enable his company to be mustered into service.

Captain Benjamin Wallace, U. S. 8th Indiana Vols., to be dismissed the service of the United States, for deserting his command in the face of the enemy, and neglect of duty.

Second Lieutenant F. B. Somers, 13th Ohio Vol. Sharpshooters, found guilty of abandoning his command in battle, and absence without criminal intent.

Second Lieutenant Benjamin F. Bailey, Co. D, 2d Michigan Volunteers, to forfeit two months pay and to be reprimanded in general orders, for allowing his command to plunder and pillage.

Captain H. J. Lanham, Assistant-Quartermaster U. S. V., to be cashiered for drunkenness and neglect of duty.

Captain Ferdinand Levy, Independent Battalion N. Y. V., to be cashiered for drunkenness, neglect of duty, and conduct unbecoming of and neglect of duty.

First Lieutenant Robert T. Brown, 6th N. H. Volunteers, to be dismissed for drunkenness while on duty.

Colonel G. W. Mindil, 6th Ohio Vols., for drunkenness on duty, and conduct prejudicial to good order and military discipline, to be cashiered.

MEDICAL DEPARTMENT.

ORDERED.

Surgeon Charles H. Lord, U. S. A., now awaiting orders in Washington, D. C., has been ordered to relieve Surgeon Ebenezer Swift, U. S. A., of the charge of Harewood U. S. General Hospital, near Washington. General McDowell is President, now in service at Wilmington, Del.

Surgeon Swift, when relieved, to proceed without delay to the headquarters Department of the Ohio, and report by letter to Surgeon Henry S. Kneedler, Medical Director of that Department. The latter, when relieved, to repair to Washington, and report to the Surgeon-General, U. S. A., by letter.

Assistant-Surgeon Roberts Bartholow, U. S. A., now on duty in the Invalid Hospital, Washington, D. C., has been ordered to report in person to the Commanding General, Army of the Cumberland, Chattanooga, Tenn., for duty.

Assistant-Surgeon W. D. Wolverton, U. S. A., now on duty at Fort Pickens, Florida, has been ordered to report in person to Major-U. S. A., at that place, to repair to Hilton Head, S. C., and report for duty to the Commanding General, Department of the South.

DISCHARGED.

Surgeon James H. Thompson, 7th Ohio Vols. He having accepted an appointment as Assistant-Surgeon of Volunteers.

CASUALTIES.

Assistant-Surgeon Wm. T. Martin, for desertion.

MISCELLANEOUS.

So much of special orders No. 10, Headquarters Independent Battalion, Ohio Vols., dated Fort Lyndale, February 3, 1863, as relieves Surgeon Daniel Drake, U. S. Volunteers, from duty with that corps, is revoked, and directed him to report without delay to the Colonel of the Regiment, for duty in the field with the Army of the Ohio.

By command of Major-General Burnside.

So much of special orders No. 168, September 4, 1863, from the War Department, U. S. Adjutant-General's Office, directing Assistant-Surgeon Wilcomb Vale, on account of physical disability and sickness with his family, have been published to enable the charge of absence without leave, he having shown that he was acting on proper authority.

Captain Wm. Ludlow, Chief Engineer

UNITED STATES

ARMY AND NAVY JOURNAL;

A WEEKLY NEWSPAPER, DEVOTED TO THE INTERESTS OF THE ARMY AND NAVY, AND TO THE DISSEMINATION OF CORRECT MILITARY INFORMATION.

THE ARMY AND NAVY JOURNAL is established in the interests of no party; it will be conducted by no clique. Its independence will be absolute. Avoiding all personal and political bias, it will endeavor to be directed solely by principle. It will support such measures as tend to the elevation of the public service and the improvement of the Regular Army. It desires to impress military criticism by competent authorities, to the dignified chastisement of neglect combining within the scope of its observation, and to a full and reliable record of all subjects of interest to those in any way connected with military or naval affairs or interested in the use of the Regular Army. The Science of Engineering, which now has so intimate an association with warlike operations, will receive adequate attention in this connection, and the interests of our Commercial Marine will also have a prominent place. Among other matters the columns of the JOURNAL will contain from week to week:

A summary, in short, of whatever occurs in all parts of the world of value to our Army and Navy. No effort will be spared to make the JOURNAL complete to all its parts, and communications may rely with best within its province are at all times invited from those interested in the Act of War. It shall be the aim of the Proprietor to make it not only a complete Military and Naval gazette, but also a journal of well established, reliable, freely journalistic character, which shall be worthy the friends of those connected with the public service and by the generous support of the intelligent public.

The importance which Military and Naval affairs have assumed in the United States imperatively demands that they should have the services of an able and representative, which, by its ability, either impartially in the discussion of subjects coming under its notice, its official recognition and thorough devotion to the National Union, shall command the ear of the public and to the Army and Navy, and become a necessity in every tent, barrack, hospital and ward-room. The JOURNAL is established in obedience to such a demand, and it starts in the progress of the proprietor to make a paper which our soldiers and sailors will be proud to recognize as their organ, and which shall be successful in completeness and fidelity by any of the class. Such a paper, it is believed, can be made to succeed, even upon the small scale of the most moderate notions on Military and Naval affairs in the country, and to such official and private support as once as will secure to the JOURNAL early and complete patronage and publicity, setting, &c.

From the numerous expressions of approval the ARMY AND NAVY JOURNAL has received it is the Army we select the following:

From Major-General GEORGE G. MEADE.

PHILADELPHIA, PA., September 16th, 1868.

W. C. CONNER, ESQ., 102 Broadway:

DEAR SIR—Your letter announcing the appearance of the ARMY AND NAVY JOURNAL, and have myself with subscription the evidence they bear of the presence of ability and tact to conduct it. It affords me sincere pleasure to add my contribution to its maintenance, and I heartily wish it success.

Very respectfully, your obedient servant,

GEO. G. MEADE, Major-General Commanding.

From Maj.-Gen. D. N. COUCH, *Proprietor of Susquehanna.*

"It would seem that the time had arrived for such a paper, and I trust it will meet with such success as to secure the very best talent, military and naval, in the Republic, to work of the title—one that shall be a standard—has been chosen by the best writers on the subject of Military Science."

From Major-General W. H. FRENCH, *Commanding 3d Army Corps.*

"I say that the ARMY AND NAVY JOURNAL is competent to fill with credit the position it has assumed as the representative military establishment, is what I really think."

From Major-General JOSEPH K. MANSFIELD, *Inspector-General 3d Army Corps.*

"It will afford me much pleasure to recommend the ARMY AND NAVY JOURNAL to officers in my portion of the Army, and I feel that they will be superior to any publication which in its destiny is in such hands."

From Major-General JAMES S. NEGLEY, *Second Division 14th Army Corps.*

"You possess my personal and official interest in your enterprise. Whatever contributes to the efficiency or success of the Army and Navy benefits the country."

From Brig. Gl. CUSTER, *University of Pennsylvania.*

"A good paper of this kind has long been needed, and the former effort within my knowledge has been a failure; but with your experience in the publication of a paper of the same name before the war, and your present ability and energy, success, scientific, new, and yet practical—light and not heavy—and above all, reliable—the ARMY AND NAVY JOURNAL ought to have an enthusiastic and your own military experience will give your paper a tone and character which will make it the favorite of the service."

Of the numerous notices of the newspaper press, we have room only for the following:

The ARMY AND NAVY JOURNAL is an honor to itself and to the service, both regular and volunteer. It received its initiative from the experience of our most able commanders and military officers, who spoke from their knowledge of the want of a publication of the character which it is to establish. Established in the midst of the war, it was welcomed by every officer in the Navy, as well as by our Army officers, and by the intelligent portion of civilians. Now, within the general public, who now take such a deep interest in the affairs of the Army and Navy, and who are the highest value to the JOURNAL as a medium of news and communications of military science. Army and Navy officers, and previously the Army and Navy Naval reviews, should subscribe to Capt. W. C. Conner, lately of Major-General Custer's staff, 102 Broadway, New York, and send him the names of subscribers.—*Boston Post.*

From the New York Correspondent of the Boston Post.

(NOVEMBER).

The new ARMY AND NAVY JOURNAL has proved a success from the start. Handsomely printed, full of variety, well edited, and with a corps of writers who are masters of the subjects of which they write, it has already established for itself an honorable standard to which every respectable journal, thousands, and the paper itself will be worthy of the highest degree of prosperity equal to its great deserts. Among its contributors are many of our highest military officers, and its literary department also adds much to the honors of which it is the source. Every officer in the service, and every one within reach of the service, should subscribe for it, and the general reader will find his long been felt. Civilians who visit the war ships, and who are interested in the naval service, and on the land—as well as persons of military tastes—can find entertainment in it. It is the only publication of the information in its particular field.

The terms of the paper are FIVE DOLLARS a year—PAYABLE IN ADVANCE. It is published in a large-sized quarto sheet of 16 pages, convenient for binding, and printed in the best manner on fine book paper. The work will form a yearly volume of over 800 pages, filled with information of indispensable importance to every officer of the military establishments of the government in its profession, as well as to every man desirous of taking an intelligent view of the country's preparedness to meet a foreign foe. Subscriptions and communications should be addressed to the UNITED STATES ARMY AND NAVY JOURNAL New York.

UNITED STATES EXCISE NOTICE.

Notice is hereby given to all persons engaging or doing business in the

THIRTY-SECOND ASSESSMENT DISTRICT,

composed of the

FIRST, SECOND AND FOURTH WARDS

of the

CITY OF NEW YORK,

that the

ASSESSMENT ROLLS

will, in accordance with the provisions of Section 12 of the

ACT TO PROVIDE INTERNAL REVENUE, &c.,

BE OPEN FOR EXAMINATION

AT THIS OFFICE,

FROM 9 A.M. TILL 3 P.M.,

FOR FIFTEEN DAYS

from the date hereof, and remain open until, and thereafter, the

FIVE DAYS NEXT ENSUING

APPEALS WILL BE RECEIVED AND DETERMINED

by me at this office daily, from 10 A.M. to 3 P.M., relative to any

ERRONEOUS OR EXCESSIVE VALUATIONS.

ALL APPEALS MUST BE IN WRITING

and specify the particular sum, matter or thing requesting which shall be reduced, and in what manner assessed, the change from Europe—Germany or Italy—must be given.

As it is well known that the Secretary of the Treasury has made and will make assurances in the future on unpaid internal revenues, and in the issue of interest-bearing Legal Tender Treasury Notes, it is nearly certain that it will not be necessary for him, for a long time to come, to issue Bonds permanent as to the interest and principal of which are payable in Coin.

Those assurances must tend to the prompt conclusion that the time for the payment of the Five-Twenties will be paid at a handsome premium, as was the result with the Six Per Cent. Bonds of 1861 and 1862, and could no longer be subscribed for at par.

This is a

SIX PER CENT. LOAN.

the interest and principal being payable in coin, the holding about 3 cent. per annum more than the present premium on gold.

It is called "Five-Twenty," from the fact that while the Government has the right to redeem it at par, at any time after five years, the Government has the right to pay them off in part or whole, at any time after twenty.

The interest is paid half yearly, on the first days of November and May.

Subscribers can have Coupon Bonds, which are payable to bearer, and known as "Registered Bonds," which, or Registered Bonds of similar denominations to Coupon Bonds, can be had.

These "Five Twenties" cannot be taxed by States, Cities or Municipalities, and are exempt from taxation, being only one and a half per cent. on the amount of Income, which is paid annually by the Government.

Duties on Imports, Income from all other investments, and on Stamps, are collected by the Government, to pay from them the interest on the loans.

Banks and Bankers throughout the country will continue to dispose of the Bonds, and all orders by mail or otherwise, properly attended to.

The Treasury Department having perfected arrangements for the prompt delivery of Bonds, subscribers will be supplied with them at the counter of any subscribing or within reach days. This arrangement will be greatly facilitated by the prompt remittance of the money, and will greatly increase the

JAY COOKE,

No. 114 SOUTH THIRD STREET,

PHILADELPHIA.

SALE OF LANDS

FOR

UNPAID DIRECT TAXES IN INSURRECTIONARY DISTRICTS

IN THE

STATE OF SOUTH CAROLINA.

Notice is hereby given that the several Tracts or Lots of Land situated in the State of South Carolina, hereinafter described, have become forfeited to the United States, by reason of the non-payment of the direct taxes charged thereon, under the act entitled, "An act to provide increased revenue from imports, to pay interest on the public debt, and for other purposes," approved June 5, 1861, and have not redeemed. "An act for the collection of direct taxes in insurrectionary districts within the United States, and for other purposes," approved June 7, 1862, and that the same will be sold at public auction, on TUESDAY, December 1, 1863, at 9 o'clock P. M. of that day, at the Custom-House in Beaufort, S. C., by A. D. SMITH, Hilton Head, U. S. Lucky's Parish, Beaufort District, and State aforesaid, unless the sum or sums due for taxes assessed from day to day until all of said Lots and Parcels of Land are duly paid.

The following is a description of said Tracts forfeited, the number of acres in each, the valuation thereof, and the amount of the direct and tax and penalty charged upon each and said Lots or Land respectively:

HILTON HEAD Island, St. Luke's Parish, Beaufort District, South Carolina.

No. 1.—"*The Point*," including "Del's Island," said to be, or to have been owned by Wm. Elliott; bounded on north and westerly by Broad Creek, easterly and south by Fish Island, southwest by Seabrook, and northwest by Port Royal.

No. 2.—"*Iron Lands*," owner or owners unknown, bounded northerly by "Fish Island," easterly by Town, "Cherry Hill," "Marshland," "Honey Horn," Atlantic Ocean, southerly, and by Seabrook.

No. 3.—"*Fish Hill*," said to be, or to have been owned by Robert Fripp; bounded northerly by Broad River, southwest by Cooper's Point and Spanish Hill, southwest by Spanish Hill, and easterly by "the Point."

No. 4.—"*Cooper Point*" and "*Springfield*," said to be, or to have been owned by Wm. Popet; bounded northeast by Broad River, southeast by Fish Hill, Drum, southwest by Gum Lawn, and northwest by Fish Hill.

No. 5.—"*Gum Lawn*," said to be, or to have been owned by Richard Fripp, Sr.; bounded northeast by Springfield and Fish Hill, northwest by Pine Lands, southwest by Cooper's and Matthew's Land, and southeast by Town, "Cherry Hill," "Marshland," and Atlantic Ocean.

No. 6.—"*Matthew's Land*," sometimes called "Matthew's Point," said to be, or to have been owned by Robert Fripp; bounded northeast by Gum Lawn, southeast by Cooper's Point, southwest by Pine Lands and Cingle, northwest by Cherry Hill.

No. 7.—"*Cherry Hill*," said to be, or to have been owned by Wm. Pope; bounded northeast by Gum Lawn, southeast by Matthew's Land, Pine Lands, and Cingle, southwest by Cherry Hill.

No. 8.—"*Marshland and Cingle*," said to be, or to have been owned by Wm. Pope; bounded northeast by Cherry Hill and Matthew's Land, sometimes called "Matthew's Point," southeast by Gum Lawn, southwest by Pine Lands, and southwest by Gard's Land, and northwest by Pine Lands.

No. 9.—"*Gardner*," said to be, or to have been owned by Henry; bounded northeast by Broad Creek, southeast by Broad Creek, southwest by Otter Hole, and northwest by Broad Creek.

No. 10.—"*Lemington*," said to be, or to have been owned by Joseph Sayle, and sometimes by Chaplin, southeast by the Atlantic Ocean, southwest by Pine, and northwest by Broad Creek.

No. 11.—"*Hill*," said to be, or to have been owned by Bryan; bounded northeast by Hill, Pine, southeast by Pine, southwest by Pine, northwest by Pine, Point, and northwest by Broad Creek.

No. 12.—"*Pine Lands*," said to be, or to have been owned by Wm. Pope; bounded northeast by Broad Creek, southeast by Gard's Land, Marshland and Cingle, southwest by Matthew's Land, Cherry Hill, and northwest by Gum Lawn.

No. 13.—"*Marshland and Cingle*," said to be, or to have been owned by Wm. Pope; bounded northeast by Cherry Hill and Matthew's Land, sometimes called "Matthew's Point," southeast by Gum Lawn, southwest by Pine Lands, and southwest by Gard's Land, and northwest by Pine Lands.

No. 14.—"*Gardner*," said to be, or to have been owned by Henry; bounded northeast by Broad Creek, southeast by Broad Creek, southwest by Otter Hole, and northwest by Broad Creek.

No. 15.—"*Lemington*," said to be, or to have been owned by Joseph Sayle, and sometimes by Chaplin, southeast by the Atlantic Ocean, southwest by Pine, and northwest by Broad Creek.

No. 16.—"*Hill*," said to be, or to have been owned by Bryan; bounded northeast by Hill, Pine, southeast by Pine, southwest by Pine, northwest by Pine, Point, and northwest by Broad Creek.

No. 17.—"*Pine Lands*," said to be, or to have been owned by Wm. Pope; bounded northeast by Broad Creek, southeast by Gard's Land, Marshland and Cingle, southwest by Matthew's Land, Cherry Hill, and northwest by Gum Lawn.

No. 18.—"*Marshland and Cingle*," said to be, or to have been owned by Wm. Pope; bounded northeast by Cherry Hill and Matthew's Land, sometimes called "Matthew's Point," southeast by Gum Lawn, southwest by Pine Lands, and southwest by Gard's Land, and northwest by Pine Lands.

No. 19.—"*Jenkins*," said to be, or to have been owned by Jenkins; bounded northeast by Broad Creek, southeast by Broad Creek, southwest by Otter Hole, and northwest by Broad Creek.

No. 20.—"*Lemington*," said to be, or to have been owned by Joseph Sayle, and sometimes by Chaplin, southeast by the Atlantic Ocean, southwest by Pine, and northwest by Broad Creek.

No. 21.—"*Hill*," said to be, or to have been owned by Bryan; bounded northeast by Hill, Pine, southeast by Pine, southwest by Pine, northwest by Pine, Point, and northwest by Broad Creek.

No. 22.—"*Pine Lands*," said to be, or to have been owned by Wm. Pope; bounded northeast by Broad Creek, southeast by Gard's Land, Marshland and Cingle, southwest by Matthew's Land, Cherry Hill, and northwest by Gum Lawn.

No. 23.—"*Seabrook*," including lands formerly owned by Wallace, Talbird, Byrd and Garnet, said to be, or to have been owned by Seabrook; bounded northeast and northwest by Skull Creek, northeast by "the Point," southeast by Fish Hill, and southwest by Cotton Hope and Money Horn.

No. 24.—"*Pinckney Island*," St. Luke's Parish, Beaufort District, South Carolina; bounded west and northwest by Mackey's Creek, northeast by Broad River, southeast by Skull Creek.

A. D. SMITH,
W. P. WILLCOX,
WM. HENRY BRISBANE,
Direct Tax Commissioners,
For the District of South Carolina.
Port Royal, October 1, 1863.

SALE OF REAL ESTATE IN THE

(TOWN OF BEAUFORT, SOUTH CAROLINA.

Under the fourteenth and fifteenth articles of Treaties of the United States, issued of the date of September 11th, 1803, in pursuance of the 11th section of an act entitled "An Act for the Collection of Direct Taxes in Insurrectionary districts within the United States, and for other purposes," approved June 7, 1862, and an act amendatory of the last, approved February 6th, 1863, we Abraham D. Smith, William H. Working, and William Henry Brisbane, Direct Tax Commissioners for the District of South Carolina, do hereby declare and give notice that upon a public sale will be held at the office of the Commissioners aforesaid, in the town of Beaufort, State of South Carolina, on Monday, the 16th day of January, A. D. 1864, at 12 o'clock M. of that day, the following described Lots, Tracts or Parcels of Land, those constituting the town of Beaufort aforesaid, as laid out by the Commissioners by act, Block One, 1st Block One Hundred and Thirty-seven (137) inclusive according to a plat or map now on record in this county, 1863, duly established and authenticated, by said Commissioners, and recorded in Valuables Book "A" and Commissioner.

The following Lots, lots, and parts of lots are excepted and reserved from said sale, to wit: Lot B in Block 1; Lots 15 and 16; Lot A in Block 2; Lots 1 and 32; Lot B in Block 32; Lot A in Block 34; Lot B in Block 35; Lots D and F in Block 36; Lots D in Block 44; Lot C in Block 47; Lot D in Block 48; Lot A in Block 49; Lot B in Block 50; Lot A in Block 57; Lots A and C in Block 69; Lot B in Block 70; Lots A and B in Block 71; Lots A and C in Block 72; Lots A and F in Block 87; Lots A, B, C and D in Block 88; Lots A, B, C and D in Block 89; Lots A, B, C and D in Block 90; Lots 13, 14, 15, 16, 17, 18, 19 and 20, and said first, and also, all lots, parts of lots, and buildings thereon occupied, and constantly and regularly used to the close of said sale, as military and naval hospitals, or for the purposes of quarters, offices, or commissaries, or Commissary, and Ordnance Departments, or Quartermaster's Police purposes.

Said sale shall not be kept open longer than fifty days from the commencement of the same.

The Commissioners reserve a single bid enough of said Lots offered for sale to publicly prevent a sacrifice by their authority, of such sum as the they deem sufficient to pay the taxes and the sale aforesaid, and thereof. And any of the said lots, parts of lots, and buildings thereon not bid to or sold at the time and appointed value will be withdrawn from sale.

Given under our hands at Beaufort, South Carolina, this second day of November, 1863.

A. D. SMITH,
W. P. WILLCOX,

UNITED STATES INTERNAL REVENUE.

Fifth Collection District State of New York,
No. 115 Nassau street, in the City of New York.

Pursuant to the provisions of an act entitled "An act to provide internal revenue to support the Government, to pay interest on the public debt, &c.," approved July 1, 1862, notice is hereby given to all persons liable to pay Income Tax assessed within the Fifth Collection District of the State of New York, that the Assessment of said Income Tax is completed, and the Assessor thereof his annual collection list for the year ending April 30, 1863, and that the same has been passed by said Assessor have become due and payable. And that said Income Tax must be paid to me at the same at his office, No. 501 Broadway, in the City of New York, on or before the

FIFTEENTH DAY OF DECEMBER, 1863,

sixteenth day of December, A. D. 1863, between the hours of 9 o'clock A. M. and 3 o'clock P. M. of said day, and that all persons who shall neglect to pay the duties hereby assessed and charged upon them by the said Collector within the period of time above specified will be subject to a penalty of ten per centum added upon the amounts thereof.

Dated at No. 115 Nassau street, this 1st day of November, 1863.

JOSEPH HOXIE,
Collector Fifth District, State of New York.

PENNSYLVANIA MILITARY ACADEMY, AT WEST CHESTER,—PRESIDENT

ELIASON COPE, LL.D. Chartered by the Pennsylvania Legislature, with the following Board of Trustees:

CLASS NO.

For making and repairing the following articles, viz:

Watch coats, sergeants', corporals', musicians' and privates' uniform and fatigue coats, woolen and linen pantaloons, jackets, frocks, shirts, drawers, flannels, and red and blue jackets for boys.

The above-named articles must conform in all respects to the sealed standard patterns in the office of the Quartermaster of the Corps, Philadelphia, Penna., Washington, D. C., Assistant Quartermaster's Office at Boston, Mass., Assistant Quartermaster's Office, and at the Marine Stations, Brooklyn, New York, and Boston, Massachusetts, where they can be examined.

And whenever the articles named above, or any of them, are required to be made up in part or fully conformable to samples, they will be rejected, and the contract for the same annulled, unless the articles so made conform thereto, or the Quartermaster will supply the delinquency at the expense of the contractor.

Proposals will be made for any one or more articles of the whole quantity which may from time to time be required, specifying the price of each article, the amount of account rendered after first order until the second order, and after second order until third order is filled, and so on until the whole quantity is delivered.

Each proposal must be accompanied by the following

Form of Guarantee.

The undersigned, and ——— residents in the State of ——— hereby guarantee that ——— in case the bid of ——— for supplies, as above described, be accepted, he or they will enter into a bond with the Receipt of the contract at the Post-office named, execute the contract within the time and in the manner therein specified.

Proposals must be addressed to publish the above in full and the paper containing the first insertion to the undersigned.

The bidder's place of residence or name including establishment, must be specially stated in the proposal.

Proposals to be endorsed on the envelope "Proposals for supplies for Marine Corps for 1864," and addressed to

Major WM. B. BLACK,
Quartermaster M. C., Washington.

ELECTION NOTICE.

PURSUANT TO THE
PROVISIONS OF THE LAWS
OF THIS STATE.

PUBLIC NOTICE is hereby given, by the COMMON COUNCIL of the CITY of NEW YORK, that an ELECTION will be held in the several ELECTION DISTRICTS of the various Wards of said City on the

FIRST TUESDAY of DECEMBER next, (being the FIRST DAY of DECEMBER, 1863.)

The Polls will be held at the places which have been designated by the Common Council as the places at which Elections shall be held in said Districts during the present year, and the polls will be opened at sunrise, and remain open until sunset, when they will be finally closed.

The officers to be voted for at such election, are the following:

A Mayor, in the place of George Opdyke.

A Civil Justice, for the First District, comprising the 1st, 2d, 3d and 4th Wards.

A Police Justice, for the First District, comprising the 1st, 2d, 3d and 4th Wards.

A Civil Justice, for the Second District, comprising the 6th, 8th and 14th Wards.

A Civil Justice, for the Third District, comprising the 5th and 9th Wards.

A Police Justice, for the Third District, comprising the 5th and 9th Wards.

A Civil Justice, for the Fourth District, comprising the 10th, 16th, 21st and 17th Wards.

A Police Justice, for the Fourth District, comprising the 16th, 18th and 17th Wards.

A Civil Justice, for the Fifth District, comprising the 7th, 11th and 13th Wards.

A Police Justice for the Fifth District comprising the 7th, 11th and 13th Wards.

A Civil Justice for the Sixth District, comprising the 19th and 20th Wards.

A Police Justice for the Sixth District, comprising the 19th and 20th Wards.

A Civil Justice for the Seventh District, comprising the 12th, 15th and 22d Wards.

A Police Justice, for the Seventh District, comprising the 12th, 15th and 22d Wards.

A Police Justice, for the Eighth District, comprising the 16th and 23d Wards.

An Alderman in each of the Aldermanic Districts having an even numerical designation, viz.: 2d, 4th, 6th, 8th, 10th, 12th, 14th and 16th.

Six Councilmen in each Senatorial District.

One Commissioner of Common Schools, for each Ward.

One Inspector of Common Schools, for each Ward.

Two Trustees of Common Schools, for each Ward.

By order of the Common Council,

D. T. VALENTINE,
Clerk.

THE MILITARY SITUATION.

TWO campaigns by the two great armies of the East and the West have, since the date of our last issue, come to a close. General GRANT has ended his superb offensive movement by the complete expulsion of the army of BRAGG from his front; and by the sharp pursuit of the rebels, converted their retreat into an utter rout. The Army of the Potomac has made another of its incomprehensible promenades, and has drawn back with a view of going into winter quarters.

After the carrying of the main rebel position on Mission Ridge, on Monday the 23rd, the pursuit was promptly continued, to Ringgold, where BRAGG attempted to make a stand with his broken and demoralized battalions. The Union advance having come up with the rebels at this point, they were dislodged from their position and retreated in disorder beyond Dalton, Ga. The pursuit, which was continued during Thursday and Friday, in several lines, and wherever the enemy was to be found, stands out as the first example we have had during the war of a vigorous following-up of the enemy, and the conversion of a defeat into a rout. All the characteristics of utter demoralization, as marked as ever to be met with in military history, were displayed by the rebels on the run before the Union pursuers. Writes an eye-witness: "Whenever "we reach portions of the rebel army in arms, they "instantly throw them down and scatter like frighten-"ed sheep, leaving all their straggglers near by, their "large number of discontented who desire to be taken "in, and their wounded in our hands. They also, in "the same manner, abandon their artillery, ammuni-"tion and transportation wagons, caissons, knapsacks, "and everything that can possibly impede their "flight." Of course it was impossible to continue the pursuit any great length of time, as the rebels destroyed all bridges, etc. in their rear. Accordingly, on Saturday, General GRANT's forces were drawn in for the purpose of taking up the new position gained.

No authentic estimate of the losses in the series of engagements has yet been made. Prisoners still come, and the number already foots up seven thousand. Fifty pieces of artillery, and seven thousand stand of arms have also been taken. Our total casualties, it is estimated, will not exceed four thousand.

The tone of the rebel press is very bitter and gloomy with reference to the disaster in Tennessee, and the demand for the removal of BRAGG rises to a universal clamor. He is charged with utter incompetency. The *Enquirer* says that "the country looked for "defeat and expected disaster;" and the *Examiner* declares that BRAGG "is maintained in his important "position by Mr. DAVIS against the judgment and "protest of both army and country;" that "neither "troops nor officers have confidence in him," and that "he has lost battle after battle by a faulty "arrangement of his troops and want of military "talent."

The latest intelligence from Chattanooga is of a nature to intimate that General GRANT has hardly yet closed the campaign. All military intelligence from that point was put under the ban. BRAGG is reported to have been reinforced by JOE JOHNSTON's force. Considerable obscurity still continues to shroud the movements of the column under LONGSTREET lately besieging Knoxville. It is understood that General BRAGG, on the 26th, sent him an order to fall back and form a junction with his (BRAGG's force); but all the indications go to show that the exigencies of the situation, exposing him to destruction or capture by GRANT should he attempt to do so, have compelled him to head in the other direction, and that he is now seeking, by a march up the valley of Virginia, to reach the army of General LEE. A vigorous pursuit has been instituted. All the forces at Cumberland Gap left that point on the 30th inst., under the direction of General FOSTER, with the view, if possible, to intercept LONGSTREET; and General BURNSIDE is closely pushing the enemy's rear. Reinforcements under General GORDON GRANGER had been forwarded to General BURNSIDE, and are supposed to have reached him by this time. LONGSTREET has a march of one hundred and thirty miles before he can be supplied by rail.

The Army of the Potomac, which set out a week ago with high hopes of a vigorous campaign, has returned to the place whence it went without delivering battle to the enemy. The crossing of the Rapidan having been effected on Thursday week, the Army was thrown forward, and found the enemy encamped on the left bank of Mine Run. This proved to be an exceedingly strong position, being covered in front by an impassable marsh, and further protected artificially by earth works, rifle-pits and shattis. During Saturday and Sunday General MEADE and his Corps Commanders were engaged in devising means to oust the enemy from his position. It had been demonstrated that he was too strongly posted to warrant a direct assault on his works, even if the assailants should outnumber him two to one. It was finally determined that General WARREN should attack and turn the enemy's right wing at three o'clock in the afternoon. The fifth and sixth corps, under SYKES and SEDGWICK, were, at the same time, to attack his left, while the third and first corps were to make a demonstration upon his centre. The reserves of artillery had all been brought forward, and positioned ready for action; but, for some reason, General WARREN failed to connect, and night slipped in upon us, all drawn up in line of battle. That night a change was made in the programme. General WARREN did not deem his force adequate to the task of turning the enemy's right, so he was still further reinforced by two divisions of the third corps, under Generals CARR and PRINCE, while BURNEY, with his division of the same corps, was to support the artillery.

Eight o'clock of Monday morning was then set as the hour at which the attack should be made. Accordingly at that hour vigorous artillery firing was commenced, and after continuing for an hour, it was silenced by orders from headquarters. No further operations were attempted, and, on Tuesday, the Army withdrew and repassed the Rapidan by Germania and Culpepper Fords, and resumed its old front on the line of the Orange and Alexandria Railroad. No adequate reason is assigned for this conduct, which is, to us, quite incomprehensible; and this last campaign is certainly the most fruitless that has yet been undertaken. Our losses are sixty killed and five hundred and forty wounded and missing.

With reference to Charleston, there appears to be every indication that operations are ended, and it is in vain any longer to indulge in the delusion of a speedy attack. General GILLMORE, in reducing the works on Morris Island and battering down Fort Sumter, has done all that could possibly be expected of him. This being done, it remained for the iron-clads to enter the harbor and assail the interior defences. We confess we have ceased to hope that this will be even attempted. In saying this we have no intention of fixing any blame on Admiral DAHLGREN, for he knows better than we the instruments with which he has to work: we simply announce the fact, and state it as our opinion that nothing further will be done before Charleston.

THE FAMOUS TRIANGLE.

All the world has heard much of the famous Quadrilateral in Northern Italy, in which "the elbows of the "Mincio" played so important a part. Ever since the days of Transpadine and Cispadine Gaul, it has dis played most magical geometric qualities, refusing to come under the rules and axioms which EUCLID and LEGENDRE lay down for such figures. Nature made its sides and diagonals when it "clove the earth with "rivers;" and new generations of soldiers guard it according to Nature's organic laws.

But, in that country of tumbling ridges and serpentine streams around Chattanooga, is a famous triangle, made, indeed, by art, but its lines and angles based upon nature. We refer to the railroad triangle, of which a point just in front of Chattanooga is at one angle, and Cleveland and Dalton occupy the other two. The country is broken up in all directions by the East and West Chickamauga Creeks, and the more northern tributaries of the Tennessee; by Lookout Mountain, Missionary Ridge, Tunnel Hill, and numerous other colossal *tumuli*, and so these railroads mark the principal routes of communication, especially for large armies. The East Tennessee and Virginia Railroad passes from Chattanooga to Cleveland, the East Tennessee and Georgia from Chattanooga to Dalton, while the distance from Dalton to Cleveland, completing the triangle, is traversed by the Western and Atlantic. Supposing the rebel depôt of supplies to be further south at Atlanta, Dalton and Cleveland have both been very important *entrepôts*, and moreover gave to the rebels a still uninterrupted communication from BRAGG to LONGSTREET, who had invested BURNSIDE. LONGSTREET drew his supplies directly from Cleveland, and thus the railroad from that to Dalton was a capital base of battle operations against Chattanooga. As nothing is stronger than its weakest point, if our army pierces this battle line at any point, the whole must fall; Dalton and Cleveland, now inter-isolated, must be abandoned; the rebel armies of BRAGG and LONGSTREET, and, of course, of LEE, are separated from each other, except by difficult, tedious circuitous routes, and the rebellion is fairly cut to two. Its back-bone, we believe, was broken some time since; this process will sever the integuments, by which it still hangs together, and then, unless it be endowed with polypus vitality, it must soon die.

When BRAGG abandons Dalton, he cannot stop short of Atlanta, where three railroads unite to form by their junction, so to speak, the Western and Atlantic Railroad. This is a most important point indeed, but if he had not "grasp" enough to defend the redoubtable and famous triangle, even "a little more" will not save Atlanta; and after that comes "the jumping off "place."

MILITARY PROPRIETIES AND AMENITIES.

Military life has its habits and customs, its *convenance*, to use an expressive French word, without which it would degenerate into an unmitigated despotism. These softening features, in a necessarily stern code, throw over military life an influence acknowledged by some of the best judges of manners among civilians. Chesterfield, in one of his celebrated letters to his son, speaks of the camp as the best school for the acquirement of courtesy of bearing, placing it, in this respect, before the Court; and Byron, in speaking of certain characteristic features, which he terms "the *salt* of society and the seasoning of composition," says "If I were asked to define what this quintessence is, I "should say that it is only to be defined by *examples*—of "those who have it, and those who have it not. In *life*, I "should say that most *military* men have it." It is to be regretted that what adds so great a charm to daily social intercourse among military men could not take a deeper hold, and control the unfortunate bickerings and the mischievous consequences to which they sometimes give rise, growing out of individual ambition and personal rivalries. These troubles are to be met with in the military services of all nations; and yet a few examples might be cited of their detrimental effects upon the public interests. Even the overshadowing influence of Napoleon was not able to keep them under among his own marshals, who, as in the case of Murat and Ney before Ulm, sometimes hazarded the most serious consequences to the success of the campaign, and sometimes—like Bernadotte at the battle of Auerstadt, who shamefully laid open to defeat and ruin the corps of a man, Marshal Davoust, for whom he had a personal hatred—exposed the army itself to great disaster, to gratify personal malice.

Though with a greater stake at issue than was ever before played for by armies, not calling for the merging of every private interest of the man in that of the patriot, we have not altogether escaped the consequences of this evil. Personal ambition and rivalry are so inherent in human nature, that nothing short of a miracle could keep a man up on the level in every calling of civil life, it would be even wonderful that the soldier, with the keen susceptibilities of personal ambition and professional reputation, should not exhibit it in even a greater degree than men of any other class. There is, however, this distinction to be made, and it should address itself seriously to every officer's conscience. It is this, that whereas professional rivalries in civil life but seldom affect any interests other than those of the parties engaged in them, those among officers having high command, if pushed beyond certain limits, become deeply involve great public interests, as in the example of Bernadotte and Davoust.

The officer may not only be called upon to suppress the exhibitions of personal rivalries, but, for the good of the service, to descend from a higher to a relatively lower position of command. This, perhaps, is the most trying ordeal as the soldier is ever called upon to make, and therefore should never be exacted by those in supreme command, unless some great exigency demands it. The power to exact this sacrifice must necessarily exist in the military head of every State, for the safety of the State itself. In our own, Congress, by a formal act, has given to the President the power to assign to the command of any army one among several officers of the same grade. One of the most recent foreign examples, where this sacrifice was gracefully made, is that of General Canrobert before Sebastopol, who not only yielded the chief command to General Pelissier, but volunteered to take a command under him. The duty of an officer in like case, though a hard one, cannot be mistaken. Private feelings and private interest must give way to those of the public, and of the last the head of the State, who is alone responsible for them, is the judge. The duty of the officer is to submit, and as a patriot, to submit gracefully. It is not only good morality, but good taste and good policy to do so. An officer who under such circumstances removes himself aggrieved, cannot make a more false and nearly always a more irretrievable step than, as sometimes has happened, to make the public a party to his grievances. A few heated partisans may do this way, but nothing can support but the large thinking portion of the community will place the question upon its true merits—an option to be made between the interests of the public and of the individual; and, unless they believe the head of the State utterly dishonest, however their sympathies may be enlisted on the side of the aggrieved, they will ultimately give their support where the responsibility for the public welfare rests.

While, however, the one party is called upon to make such sacrifices, there is no less an obligation on the other, where no military dereliction is charged, to do every thing that can spare the officer's feelings. Napoleon I. was always very careful on this point, and never failed to soften, always by kind words, and frequently by kind acts, blows of this nature. In the campaign against Austria in 1805, requiring a General of great energy and activity to command in Northern Italy, he selected Masséna, passing over Marshal Jourdan. The latter, feeling wounded at this preference, wrote a letter of complaint, to which Napoleon immediately replied as follows:—

"My Cousin—I have received your letter of September 25. It has caused me great pain. It is impossible for me to be better satisfied than I am with your conduct, or to have a higher opinion of your talents. If I have sent Masséna into Italy, it was because I was forced to yield to my convictions, that, in conducting a campaign where "there were so many chances and fatrom the chief of Government, a man of more robust health than you possess, and "who was thoroughly acquainted with the localities, was "necessary there; for events were crowding so fast around us "that it became a necessity to silence all private considera-"tions, and to send into Italy the man best acquainted with "Italy."

"My Dear Marshal—I can fully enter into your feeling of mortification. I feel that I have done you a real injury; but be persuaded that it was in spite of myself, and that circumstances been less urgent, as I flattered myself they would have been, you would have had this writ ten before you to complete the study of the localities; and my confidence in your talents and in your long experience in war would have entirely set my mind at rest.

"But you are acquainted with the theatre of operations on the Rhine; you have met with successes there. In fifteen or twenty days events will call for new combinations, and "I shall then be able to place you on the scene with which "you are best acquainted, and upon which you can display "your zeal.

"I trust by your answer to this that I shall learn that you are satisfied with this explanation, and especially that you "have no doubts of my feelings towards you.

"Napoleon."

No one knew better than Napoleon the soldier's heart, and his management of men, under the circumstances cited, soldom, if ever, failed to secure the zealous support of persons holding high responsible powers. He never failed to respond promptly in all cases of wounded feelings or grievance. To Marshal Lannes, whose corps, composed of infantry, was not noticed in orders, through some inadvertence, for the surrender of Ulm, on the 20th October, 1806, but the merit given entirely to Murat's corps of cavalry, he replied, when his attention was called to it: "There is glory enough for "all. Your turn will come some day to have a bulletin entirely to yourself."—words presenting a singular coincidence with those of two months after to Parthy, who when urged to notice the conduct of an officer that had not been what it ought to have been, said: "Never mind it, "there is glory enough for all." Nelson, who when a captain, upon not being noticed for important services, said: "Never mind, some day I will have a gazette of my own."

SYSTEMS OF FORTIFICATION.

THE FRENCH SYSTEM.

Many of our readers, interested in the art of fortification, have doubtless been greatly confused, not only by the technical terms employed, but also by the constant allusions to various *rational systems*, with not simply specific, but generic differences. Thus we hear of the French system, the Prussian, the Austrian, the Italian, the Swiss, and with as little technicality as possible, to point out these differences, and to give a general idea of the principal systems. And first of the French system, or what is commonly called the *bastioned front*. We need go no further back for our information than to the days of Vauban, which, although modified and greatly improved, has preserved the same essential outline to our own day. Vauban himself was the greatest military engineer known to history. An ornament of the Court of Louis XIV., he did more to give lustre to the reign of Louis XV., and to the whole of the other Courts, and so developed the art of fortification, that his successors have attempted rather to improve than to change his plan.

His bastioned front, described upon any rules of various polygons, consists essentially of two lunettes, united by a curtain, the faces of the lunettes being swept by the fire of the opposite flanks. In front of the curtain he placed a *demilune*, which was a small redan to protect the retired parts, and the faces of which were protected in turn by the faces of the bastions. He also made the *corps de la place* in front of the ditch, to the salient re-enterings of which he formed places of arms for the gathering of troops, called severally the salient and re-entering places of arms. In his second and third systems he made various improvements; but these remained the same in principle. The defect of all his systems are now manifest. The salient angles of his bastions were too small and the bastions themselves too contracted, not offering sufficient space for the manœuvres of troops and artillery. His demilune was entirely too small, and was an inconsiderable obstacle to the enemy; the prolongations of its faces did not strike the faces of the bastions, but left a portion of the flanks exposed. The relief of his scarp wall of masonry was so high that a large portion was exposed to a fire from the enemy's batteries. In addition to these faults, he had no interior works to defend the bastion, the demilune and the re-entering place of arms. His plan was excellent, but was capable of receiving far greater strength. Although he made some improvements in these respects, in his second and third system, it remained for the theories of Scheele and the practice of Cormontaigne to correct his errors, in a thoroughly digested system of modern defence. It has been said that Cormontaigne has received praises which were due to Scheele. We shall not stop to consider the modicum of praise due to each, but merely point out their improvements. They greatly enlarged the bastions, giving to the flanks, gives a greater space within, and in this space they placed interior redoubts, or the *enceinte of the bastion*, with *coupures*, so that after the enemy had captured the bastion, he was still exposed to the fire of the cavalier. Likewise in the demilune, which had also been enlarged, they placed a redoubt for the same purpose. The vacant space left by Vauban in the re-entering place of arms was also filled with a strong redoubt. The arrangement was such that the command of the succession works is greater as you proceed inward from the place, so that, the re-entering place of arms is commanded by its redoubt, which in turn is commanded by the bastion. The bastion is commanded also by its cavalier. The enemy, taking these one after the other, is constantly under a commanding fire until the last is taken.

Thus, with modifications of relief, is the *trace* of the modern French system: although the ever-active French engineers are constantly proposing some new feature of strength or *ficeux*. Such is the case-mated battery proposed by Marmo; and although the two faces of each lunette cover the parapet on the re-entering plain. Such is Chasselour's plan for keeping the enemy at a distance by means of strong outworks, allowing fine large intervals for sorties in heavy bodies. Of the same simply modifying nature are the detached or independent works of Choumara, placing them in the ditch, rather than being one side of it, and the *place* in the ditch; and other similar and intricate details of arrangement. As an additional illustration, we may cite Noizet's traverse, closing the ditch of the demilune, and connecting it with the re-entering place of arms.

To go back in the order of time, it might seem that we had neglected to mention the great names of Carnot and Montalembert; but, so essentially do their systems differ from the bastioned front called the French system, that they must be considered as independent of it. Carnot's is the bastion system, that no place is impregnable; that the art of attack is and must always remain superior to that of defence; and that, given proper proportions of besiegers and besieged, the fall of a stronghold is only a question of time, and of the sacrifice of life. Montalembert's was by no mere means to protract the siege. To this, as a postulate of all permanent fortifications, Montalembert dissented, and in 1776 he published his work on "Perpendicular Fortifications," or the art of defence rendered superior to the attack of fierce." The duty of his views were adopted by the Russo-Swedish and German engineers, and although as a people we have generally adhered to the system of Vauban, it must not be supposed that the question is settled. Europe is divided, and although national prejudice has something to do with the division, there is much to be said in favor of both systems. The strong system of Montalembert and the modern improvements upon it. To this we shall recur in another paper.

HISTORY OF THE ARMSTRONG GUNS.

The report of the Select Committee of the House of Commons, appointed to inquire into the expenditure incurred by the British Government since the beginning of 1858 in various kinds of improved ordnance, and also the trials relating thereto, was printed last July. It is a volume of 600 pages, containing 6,000 questions and answers, with numerous reports and diagrams relating to the construction, manufacture, properties, and cost of guns and projectiles, as well as reports of experiments and the history of the armstrong trunnionless breech-loading system. Indeed, a valuable contribution to the science of gunnery, to condense from it the history of the introduction of the guns of Sir William Armstrong into the British service. As almost the whole of the expenditure inquired into was incurred upon the system, the Committee very naturally devote their report with a history of them. Mr. Armstrong first appeared upon the scene of his celebrity, in December, 1854, when he had an interview with the Duke of Newcastle, and obtained from him an order for a gun for trial. The first gun was a 3-pounder, was delivered in July, 1855. The Ordnance Select Committee made experiments and a report, which, though qualified, was, in the main, favorable to the gun, and desired further experiments. The gun was re-bored up to a 4-pounder, and in December, 1856, was tried near Newcastle in the presence of Colonel Earnest Wilmot, who reported "that at 1,500 and 2,000 yards the gun had made remarkably good practice." In January, 1857, a second gun was ordered, an 18-pounder, and reported ready on March 17th; but the trial was delayed, owing to Mr. Armstrong's absence on the Continent, until 29th January, 1858, when

experiments were made with it in competition with a service 9-pounder gun. On 8th February, 1858, the Ordnance Select Committee reported it to be highly satisfactory. On 26th February, 1858, two 18-pounders, and on the 13th April, 1858, one 12-pounder and 600 projectiles for the 18-pounder, were ordered for further experiments. On September, 1858, the "Special Committee on Rifled Ordnance" reported to the effect that it was not expedient to incur the expense of trying further experiments with any guns but those of Messrs. Warrwarne and Armstrong.

Between December, 1858, and January, 1859, experiments were made by this Committee, with the Armstrong guns in competition. Armstrong gun fired 49 rounds of solid shot, common shells, and case-shot, and the Whitworth only 9 rounds of solid shot and shell, without bursting charges, the Warrwarne gun having received notice that their shells would form part of the programme.

In January, 1859, from the result of these experiments, the Select Committee "Report" was drawn up against the Whitworth and in favor of the Armstrong system, and recommended the latter to be adopted for the field guns of the service. On 18th December, 1858, Lord Dunkellin in a letter to General Peel, said that "he should rather decline the expedient, in the present state of the public exchequer, of pressing for the supply of a large number of guns." He suggested that the "first order should be confined to 6-pounders, and that the manufacture of heavy guns should be deferred till they had been more tested." This prudent recommendation was disregarded.

The 15th January, 1859, Mr. Armstrong assigned his interest in all patents for, and improvements in, the manufacture of guns to the Elswick Company. The Secretary of State refused to submit these patents to the Committee, as Act of Parliament having been passed to keep the specification secret. Previously to these arrangements, a letter was given to Mr. Armstrong, "that he should not be a loser by the expenditure of £12,000 on a plan sufficient to enable him to turn out 100 guns per week." On 1st February, 1859, Sir W. Armstrong was appointed Engineer of Rifled Ordnance, with a salary of £2,000 per annum, and at the same time received the honor of knighthood. In September, 1859, a Committee formed to decide upon the "best rifles for service," reported in favor of the Armstrong for the naval service of Sir W. Armstrong's 40-pounder, and also recommended that the 6-pounder, 12-pounders, 100-pounders, and 150 Chaplin guns be tried in lieu of Sir William Armstrong's construction."

After a short interval, then the report of this "Naval Gun Committee," the Ordnance Select Committee reported in favor of "the adoption, for Her Majesty's service, of all the guns up to the 150-pounder of Mr. Chaplin's construction." Report several of the large guns were introduced into the service by order of the Secretary of State without waiting for the report of the Ordnance Select Committee." In October, 1859, the guarantee to the Elswick Company, formed in 1859, was increased to £85,000, and Government undertook to keep the Company in full work. On 8th November, 1859, Sir W. Armstrong became Superintendent of the Royal Gun Factories with £2,000 per annum, with control of the situation. Thus Armstrong gained the field to the exclusion of all competitors, and it was not until lately that there were any competitors in the field with means for high position. But now there is beginning to be displayed by the Government a disposition to encourage other manufacturers, and the public confidence in Armstrong and his guns is much shaken.

CORRESPONDENCE.

A CHAPLAIN'S COMPLAINT.

To the Editor of the Army and Navy Journal:

Sir,—Let me say in advance that a Chaplain is a commissioned officer in the U. S. service, and as such, according to his commission, is to be governed by the same rules and is entitled to the same treatment in every particular as the other officers in the same circumstances. Formerly his rank and pay were the same as a captain of cavalry; but since the opening of this war, his rank has been taken away and his pay considerably reduced, neither of which would we make a grumbling matter.

Congress passed an act, approved July 17th, 1862, in the 8th section of which it is declared—"That hereafter the 'compensation' of Chaplains in the military service of volunteer service or army hospitals shall be one hundred dollars per month and two rations a day, while on duty." The question arises, What rations are they entitled to when not on duty?

Any one well skilled in the use of his vernacular language and sound in his logic, knows very well that the above sentence does not necessarily mean that there shall be no *consecutive* days on duty. It does not mean no more than that the two daily rations shall be withheld. And, as we have been sensibly informed, this is just what the framer of the law intended it to be. It is evident that the same manuscript copy had a comma after the word "month," separating the words "one hundred dollars per month" from the words "two rations a day while on duty," and another bungling to declare that when the chaplain was absent he should still receive his two rations per day, and that he never would he thereby be a privileged character, since, at the time the act was passed, all other officers were entitled to full pay and allowances when absent on leave.

But according to the decision of the Solicitor of the War Department, a Chaplain, when absent on leave, shall receive anything at all but his two rations per day. Because may be—he may go home to visit the soldiers' families, to accompany the remains of a deceased soldier home, to visit a dying wife or child, or to be cured of wounds or some disease caused by excessive labors—it makes no difference how urgent the case, the Solicitor says the Chaplain is entitled to no pay at all.

Take the following case:—A threatening disease had been brought on by earnest Christian efforts on behalf of his regiment, so that the Surgeon advised and ordered the Chaplain to go to New York for necessary treatment. He reluctantly consented, obtained leave to go, had his time extended, was at great expense, returned at the end of two months, is now laboring in his regiment, and has received one cent of pay for that time; and yet the Adjutant of the same regiment was off from duty three months in the hospital and absent on sick leave for the same time, and received his regular monthly allowances for the whole five months. The Adjutant receives *all*, the Chaplain *nothing at all*.

But what makes the grievance more intolerable, is that the decision of the Solicitor is manifestly wrong. For in the same section from which we have quoted, it is said "That all Chaplains in the U. S. service shall be subject to "such rules in relation to leave of absence from duty as are or prescribed for commissioned officers in the U. S. Army."

Is there, then, any law prescribing what officers shall lose when absent on leave? If there be such a law, since the Chaplain is an officer, he must be governed by provisions of that law. Since, under the old law, which allowed officers full pay when absent on leave, the temptation to neglect the public service might be great, an act was passed, approved March 3d, 1863, "That any officer absent from duty with leave, except in case of sickness or wounds, shall forfeit one-third of the pay and allowances prescribed by law, and no more." Here is a plainly recorded act of Congress, giving to commissioned officers leave to go home, except sick or wounded, in which case he loses nothing; and since the Chaplain is a commissioned officer, no principle of interpretation can exclude him from the class contemplated in the act.

But this is not all. Every officer, on leaving his regiment and returning to it, is mentioned by name in the daily regimental reports, and the date of his leaving and returning is recorded on the muster rolls, so that the time of his absence is easily ascertained. Before receiving his pay he signs the rolls, and thereby certifies that he has been on duty for the time he claims pay, that no various reports, and the officer's signature, are deemed sufficient evidence in the case of every officer in the service. But when the Chaplain out to be distrusted, for in his case the Colonel is required to sign a certificate, recorded, in some instances, in the pay book, that he has been on duty for the time for which he draws pay. The integrity and honor of every other officer are not doubted; but the man who has proved himself as a recorded friend of the soldier is not to be believed—his signature is not worth the ink that engrossed it.

None but those who have had the experience could, can become Chaplains in the army, yet these men are not treated with common decency; their honor is suspected, and hence must be regarded as of little consequence.

Thus have I endeavored to present plainly and faithfully to the public the treatment rendered to Chaplains in our army. It is very unfortunate that Chaplains must be treated as officers or our army will be deprived of them; for, as things now are, some are thinking of returning home, where they can be received as a part of our common humanity. CHAPLAIN.

VOLUNTEER AND REGULAR NAVY OFFICERS.

To the Editor of the Army and Navy Journal:

Sir:—An article which appeared in your journal of October 24th, under the head of "Volunteers," served a statement made by a former correspondent in regard to the promotion of Volunteer Naval Officers, in which statement I "utter" *doubt* as to the "truth of the correspondency." Not instead of offering arguments and testimony to substantiate the charge, he digresses into a very partial panegyric of the superior training and abilities of Regular Officers.

It has long been desirable to make known to the friends of Volunteer Naval Officers the many disadvantages under which the latter labor. In the matter of promotion to the volunteer is animated, which is a great incentive to meritorious conduct and gallantry in action. It is a fact that while acting masters in the Navy are often honored with a command; yet this is not promotion, as the rank and pay continue the same, notwithstanding the increase of care and responsibility.

It is difficult to conjecture why such a broad distinction should be made between the two departments of the service, for certainly the theoretical knowledge and duties taught at the West Point Academy are not less complicated than those of the Navy Academy at Newport.

"Justice" wildly disclaiming any intention to detract from the merits of the Volunteer Navy, makes a statement, which is "utterly incredible," in regard to the number of officers who have by distinguished service and gallantry in battle won claims to promotion. And a great many others have failed to do this for the sake of the favor of the regulars over the volunteers in the ratio of five to one; the record of promotions in the regular service will prove to the contrary, and the pages of history not yet written will reiterate the same.

If the volunteer is somewhat in favor of the regulars, let us not ignore the fact that their positions, in every grade, taking precedence of volunteers, has given them brilliant opportunities for distinguished service, not enjoyed by the latter.

A large number of the volunteer officers who have entered the service *here* been "trained to thought and "command," and easily acquire the requisite discipline; and have not been "drilled" "disciplined" "compelled" by the prostration of commerce to enter the service, but, on the contrary, have made pecuniary sacrifices in order to serve their country in these perilous times.

Now, Mr. Editor, let me answer the plain question propounded by "Justice" to another. Which is deserving the greater credit, he who is carefully and thoroughly educated and maintained from boyhood to old age at a large pecuniary expense by the government, and who in duty is to fight the enemies of his country—or the gallant ship master who answers to the call of his country in her time of need, relinquishes his command and roving freedom, and submits to the iron rule of naval discipline, bringing with him coolness, experience, judgment and seamanship gained by years of service harder and more arduous than that of the navy —which, I ask, deserves the most credit for their services in the emergency?

Not wishing to occupy a large space in your valuable journal, I will only say that the object of this article is to display the true position of Volunteer Regular Navy officers, but merely an answer to "Justice" in defence of volunteers. All honor to the noble heroes who have fallen never to rise again; immortalized in history, but mourned by their kindred and country. All honor to the living, brave and gallant officers, our Farragut, Dupont, Goldsborough, Rowan, Dahlgren, Wainwright, Bailey, Rodgers, Porter, Morris, Davis, and others, who have stood by our flag through terrible conflicts, who are ever ready to meet the enemy, and whose lives are a guarantee of the invincibility of our navy. Impartiality.

U. S. S. Stars and Stripes,
Sr. Marks Bay, Fla., Oct. 30th.

FAST STEAMERS.

To the Editor of the Army and Navy Journal:

Sir:—As the leading merchants and bankers of New York have recently addressed Secretary Welles regarding the depredations of the *Alabama* and other rebel cruisers, the present seems a suitable time for again calling public attention to what I believe to be the only means of preserving our ocean commerce from annihilation.

First. The proper class of vessels has not been employed by our Government. You have said very truly that the only fast steamer sent out in pursuit of the rebels has been the *Tuscarora*, and you are aware that she has a low-pressure engine, and is, therefore, not fit to go into an engagement. Those who now build ships and engines for the Government do not seem capable of building steamers which are able to attain a speed of more than 16 knots an hour, and, as you say, there they have built a ship comparatively high speed must carry so much coal in order to go on a long cruise, that they cannot carry heavy guns. The Navy Department now pays for steaming hours 7 tons of coal per hour for every horse-power produced, while private citizen engineers are now guaranteeing a horse-power for every 21 lbs. of coal consumed per hour. This saving, effected by the latter, one continue much longer at sea than vessels built on the plan now adopted by the Navy Department.

Now, as an American citizen, I have a proposition to make to the merchants of New York and Insurance Companies, for whose benefit the parties on whom the loss falls heaviest.

A gentleman in this city stands ready to have the engineering profession in New York has offered to furnish the plan for the machinery of a vessel to make 16 knots per hour, and that in coal for the whole voyage. This is not necessary to wait until a ship is built. One of our good navy ships, with the machinery altered, will perform all I have proposed; and, as a private citizen, I am willing to give an order on board of any vessel of this description fitted out for the capture of the *Alabama* or other rebel pirates. Another friend of mine has offered to furnish the plan for a ship under consideration for more than a year. I have not the honor of knowing him, but I am find all the engineers, and picked men necessary in 48 hours.

A vessel capable of outsailing and outlighting the *Alabama* can be fitted out in this port as soon as less than three months and such a vessel, with the class of men who would volunteer on the expedition, would soon clear the seas of Jeff. Davis' fleet of Paul Jones' Bush's pirates. The Secretary of the Navy says he "hopes to be able to have a larger force to "pursue the pirates." But it seems to me that what is wanted is not more but *speedier* vessels.

If the merchants who signed the letter to Secretary Welles would only bring the facts before the proper Department from that embarrassment which, they say, it may not "be prudent" or practicable to explain to the public," they are bound to satisfy the public that they have done their utmost to do anything towards carrying into effect such a plan as that which I have suggested.

Late Engineer U. S. N.

New York, Nov. 22, 1863.

THE FORT SUMTER FLAG.

To the Editor of the Army and Navy Journal.

Sir:—In your issue of November 28th, a correspondent, "C," writes that the Fort Sumter Flag was cut up and distributed among the officers.

I have in my possession a well-worn piece of bunting, which was presented to me with the following letter:—

"This is a piece of the original Fort Sumter Flag, flying at the time of the bombardment, in April, 1861. It was presented by Lieut. Colonel Anderson to Major-General Sickles, who carried it through the Peninsular Campaign, and at the Battles of Antietam and South Mountain to his headquarters flag. On his leg, at the latter battle, he received a shot followed by a friend of mine, from whom I procured the piece."

Perhaps this is from flag No. 2, to which your correspondent refers. H.

Washington, D.C., December 1st, 1863.

ACTING ASSISTANT SURGEONS IN THE NAVY.

To the Editor of the Army and Navy Journal:

Sir:—Believing that the Army and Navy Journal to be an important advocate of the interests of both the volunteer and regular services, and that it takes a deep interest in all that pertains to the welfare and advancement of our gallant Navy, the writer, in behalf of the Acting Assistant Surgeons of the volunteer corps, would call its Editor's attention to the unjust and unequal discovers a most crying injustice; to wit, the fact that they are utterly and altogether ignored by the Government and promulgated. The physician who left his private practice and tendered his services to the Government at the commencement of the present rebellion, and who has since, in all and in the season and to an equal degree with his associates of the regular line, who has devoted himself with the same zeal and energy to the preservation of the health of his men and the good condition of the ship to which he may be attached, can hope for no other reward for his services than that afforded him by the contemplation of his having done all that he could for his country when she most needed his aid. Why should this be so? Why have *acting* Assistant Surgeons in the United States Navy no right or title to that modicum of promotion which the Surgeon's Mate's or an acting Ensign's Commission Engineer applies for and receives? Are these officers unfit for the position, or unworthy such promotion? If so,

they should be dismissed in a body; if not, they should enjoy the same privileges conferred upon their confreres of the regular line. It is full time that this fact of their being ineligible to any promotion whatever beyond the appointment under which they nominally take rank in the service should be properly brought to the notice of Congress; and that they be granted some slight testimony of their country's appreciation, by being promoted, after three years' service, at least one grade. The age of most of these gentlemen precludes their appearing before the Medical Examining Board, were they otherwise desirous of remaining in the service in the Navy. Are they therefore to be debarred all advancement in rank and pay?

War makes quick promotion, and it is to be doubted whether there are any who wear Assistant Surgeons in the regular Navy who did the rebellion the honor to be volunteer corps who are not now Surgeons with the rank of Lieutenant-Commander. We know there are Acting Assistant Surgeons in the Navy who entered the service soon after the first rebellion orders were heard at Sumter, who are now, and will remain, holding Assistant Surgeons' berths when Rear-ads Congress reveal upon the Navy Department to confer upon two or three years' service, at least one grade of promotion.

MEDICO.

THE DEPARTMENT OF MISSOURI.

To the Editor of the Army and Navy Journal.

SIR,—There is the most difficult of departments to govern. The commanding General must be somewhat of a politician, in order to watch the movements of the political parties in the State; several delegations have been sent to Washington to urge the removal of General Schofield. As yet they have not found much favor with the President, and as General Schofield has not been confirmed a Major-General, they hope to defeat him in the Senate and thus secure his removal. But he has a strong friend there also with his enemies by the issuing of General Order No. 135, which calls for the enlisting, and drafting of men for the Provost-Marshal-General, of all negroes in the State whether slave or free. Those that are slaves and belong to loyal men are to be paid a value of three hundred dollars to the owner, who must take the oath of allegiance. Those whose masters are disloyal are taken and considered as free men. A board is now in session whose military duties as command these colored troops, and quite a number have been examined and are now awaiting the orders from the War Office. Already has the ball begun and in a short time we expect to have 6,000 men enlisted and ready for the field. Gen. Schofield thinks that he can raise 20,000 of the negroes in his county. The system of Provost-Marshals in this department is in excellent working order.

The department is divided into four districts under the command of a District Provost-Marshal, who is a staff officer of the district commander. Under these military districts are subdivided, and Assistant Provost-Marshals are appointed, with headquarters at the largest military post. All are under the immediate control of Colonel James O. Broadhead, Provost-Marshal-General.

Assistant Provost-Marshals make their reports to the District Provost-Marshal, and they to the Provost-Marshal-General, on the 15th and 30th of each month. It is the duty of the assistants to arrest spies and disloyal men; and as the state is martial law in many instances they have to act so cases that usually come under the jurisdiction of civil courts.

A great many men violate their oath and forfeit their bonds; the evidence is taken and forwarded to the Provost-Marshal-General, who sues the bonds for the U. S. Military Commission for trial, they collecting the money from the securities. Bonds have been taken by the Provost-Marshal-General's office to the amount of millions of dollars. A great many have been forfeited; only about $100,000 having been collected as yet. But efforts are now being made to collect all the forfeited bonds. This money goes to pay the expenses of the Provost-Marshal department.

There are now confined in the military prisons of this city about 500 rebels, of whom 200 are prisoners of war, and are held for exchange. The balance are bad and dangerous men, the public safety and the good of the service demanding that they should be held in confinement. P.

St. Louis, Mo., Nov. 28, 1863.

MILITARY EDUCATION.

A CORRESPONDENT requests an expression of our views upon the following points:—

"As non-commissioned officers and privates of the French army are eligible to admission to the great Polytechnic School of Paris, provided they are not over twenty-five years of age, have served not less than two years in the army, and are recommended to pass the necessary previous examination, would it not be well for us to imitate the example of the French in the management of the West Point Academy?

Ought not the number of cadets to be, at least, quadrupled, in order to meet the increased demand for men educated as civil and military engineers?

Would it not be well to throw open the institution to all qualified young men who are willing to pay for their education there? (See the republication of Mr. Senator Wilson's speech, made in the article on the Royal Military College of Sandhurst, in *United Service Magazine* for March, 1863.)

Why should not the names of the West Point cadets (with the deaths, resignations and dismissions among them), be put in the *Army Register*, as those of the acting midshipmen in the Navy Register?

Would it not be well to bulletin the number of the Congressional district from which any or individual cadet comes, so that intending applicants may be enabled to judge of the probability of a vacancy occurring during the term of their eligibility?

These enquiries open the whole subject of Military Education, to the discussion of which we have already devoted some space. As we have before stated, a move has been made in the right direction in the selection, by the President, of forty young men from the volunteer force to fill the vacancies in the Military Academy occasioned by the resignation of Southern cadets. We hope it has established a precedent which will be extensively followed in the future. We certainly need in the appointments to the West Point Academy some change from the system of favoritism which, at first founded on custom, was at length established by law. No better plan occurs to us than the one of competitive examinations, which we proposed in our number for November 14th. The number of cadets at West Point might be increased with advantage; but to meet the entire difficulty we should establish, as in France, Austria, Prussia, and Russia, special schools for the Staff Corps, and for Artillery and Engineering, in addition to the elementary schools for cadets. It would be neither advisable nor possible to adopt our correspondent's suggestion to throw open our Military Academy to all who are willing to pay for instruction. It is not in the province of our Government to undertake to keep a private school, though it is proper that it should furnish facilities for the instruction for a fee for those who enlist in the service as the Academy. The other suggestions contained in the above we let pass for what they are worth, only expressing our hope that this important subject of military education will receive the attention which it needs and deserves.

MODERN NAVAL ARCHITECTURE.

We referred some weeks ago to Admiral Paris' late work on Contemporary Naval Architecture, and briefly indicated some of the points which were made in it. We will now give the substance of the more interesting portions of the book, without stopping to criticise the positions taken.

The number and class of ships for the French Navy, in which very few changes had been introduced between the years 1815 and 1836, was, at the latter date, modified by the employment of steam. The first vessels so propelled were some engaged in the conveyance of the mails which occurred in that year. The engines were of a low power, and the vessels seldom exceeded a speed of eight knots an hour. In 1835 engines of 450 horse power were fitted to vessels, which were used as auxiliary to the regular men-of-war, by an increase of tonnage. In 1837 the France began to be built to construct her large engine manufactories, and the foundation of her steam navy was firmly established. Paddle-wheel steamers were used up to 1846, when they were superseded by steam propellers, in which the motive power of the engines was placed under the stern of the ship's shaft. The *Napoleon*, a small vessel designed for the postal service, was the first in which the propeller was fitted. In the following year the screw was fitted to the largest vessel then in existence, the *Great Britain*, and shortly afterwards it was tried in the *Archimede* and the *Pomone*. The *Pomone* was a French frigate, but in neither vessel was the speed attained by means of steam alone much beyond seven knots an hour. The adaptation of the screw to the guard-ships *Hercheim*, *Hogue* and *Semapeed* was not attended with any very striking results. Better successes were attained with the *Charlemagne*, an old 90-gun ship. By altering her stern, and reducing her capacity for stowing provisions and water one-half, she was enabled to retain the whole of her armament and ends, and to attain a speed of six knots an hour. Her engines were nominally of 400 horse power, and were built by Barnes at Ciotat. The success of this experiment showed the feasibility of adapting the screw to the sailing vessels already in existence, as well as to those about to be built. Frigates and corvettes were placed in all vessels carrying 100 guns, such as the *Tourville*, *Flevrus* and *Duquesne*, in France, and in England the *Agamemnon*, *St. Jean d'Acre*, and other 100-gun ships. To balance the superiority of England in regard to the number and armament of ships, France had to contend with the inferiority position of swift vessels of war. The *Napoleon* was built on a new model. She was longer than previous ships, and gained tonnage thereby sufficient to enable her to be fitted with engines of 900 horse-power, which gave her the then remarkable speed of twelve knots an hour. This was a great and successful advance in French naval architecture, and the advantage was followed up by the construction of the *Arcole*, the *Imperial*, the *Redoubtable*, and the *Algésiras*. England forthwith set to work altering her vessels in the ships, by lengthening the engine-rooms, as in the case of the *Arrogant*. She also built new vessels, like the *Orlando* and *Renown*, with 1000 horse-power engines, carrying 40 guns. The necessity of constructing ships to be partly propelled by coal, was all along felt, it being considered impossible for a line-of-war to carry sufficient fuel for transport, sufficient coal for long voyages. The Russian war followed to demonstrate the weakness of wooden vessels in an attack upon fortifications. Sebastopol did more damage to the squadrons that attacked her, than they were able to inflict.

Experiments had already been made—in 1835–6, at Gâves—to ascertain the effect of shells upon wood, and eight years after, sheets of iron were similarly tested. It was found that it required twelve sheets of iron, twelve millimetres in thickness, to stop a 60-lb. ball fired from a distance of about thirty-six feet.

In 1854, the first floating batteries were built by the Emperor, and in the attack on Kinburn, where the guns of the fort were soon silenced without material damage to the batteries, it was thoroughly demonstrated that such vessels must make an important change in naval architecture. It was immediately determined in France to follow up the success at Kinburn by the construction of larger vessels than those used in that attack. M. Dupuy de Lome undertook the work. The plan of the *Napoleon* was drawn, and by reducing the weight of the guns, &c., and the total weight of the crew from 913 to 550, and making a corresponding diminution in provisions and stores, the weight of the plates to be used in covering the vessel was to be saved. The resources of the French navy not permitting the use of iron for building the hull of the vessel, wood was employed. The *Gloire* was thus built.

The English followed cautiously in the footsteps of the Emperor, and it was not until after the *Gloire* had been many months afloat that the *Warrior* was undertaken by Sir John Parkington, from designs of Mr. Isaac Watts, who was at the time Chief Constructor of the Royal Navy. She was covered only on her sides, with plates four and a half inches in thickness, a portion of her bow and stern being left unprotected; was 380 feet long, 58 feet breadth of beam, drew 29 feet of water aft, and 26 feet forward. Her engines were nominally of 1250 horse-power, but indicated a much greater power at her trial. The *Gloire* was 250 feet long, 52 feet width of beam, drew 27 feet of water aft, and was covered with 4½ inch plates on her sides. Her engines were of a nominal power of 900 horses; she carried 36 guns, throwing a ball of 50 pounds French; and attained a speed of twelve knots an hour. The *Warrior* carried originally two 100-pounder Armstrongs and four 40-pounder Armstrongs on her upper deck, and 26 100-pounder Armstrongs for field service and boat guns. On her main deck she carries thirty-six solid 68-pounders of 95 cwt.; it being the decided opinion of many experienced naval officers, that at close quarters these guns would be more efficient than the Armstrong 100-pounders. The 100-pounder Armstrongs were substituted for eight of her 68-pounders situated fore and aft out of the line of her armor-plating, and at the same time it was decided that the new naval 70-pounder Armstrong should be substituted for the 40-pounders. The *Warrior* attained a speed of 14½ knots. The British Admiralty followed the *Warrior* with other vessels only partially armored. This Admiral Paris regards as an error and is confident that a completely-armored ship could soon disable vessels of the *Warrior* class. And it undoubtedly could do so.

Admiral Paris is decidedly of opinion that wood ought not to be employed in the construction of floating batteries. Of little use except for the defence of the coast, they are hauled-up and gradually decay; whereas, if they were built entirely of iron, they would be of much greater value and last for an indefinite period. Admiral Paris proposed this in 1855, thinking it wiser to spend something yearly in increasing the number of these vessels, than in repairing those in which wood formed the framework, which would be certain ultimately to decay, and have to be replaced by others at a considerable cost.

The first cupola ship introduced into the English navy was the *Royal Sovereign*, which in 1862 was altered in accordance with the idea of Captain Coles, who claims to have had the original suggestion. The Admiralty in 1855, seven years before. The *Royal Sovereign* was not about until after the *Monitor* had demonstrated her superiority to the *Merrimac*. She has a plating 8½ inches in thickness, and four towers.

Though no models of vessels were sent to the International Exhibition from the United States, Admiral Paris gives beautifully-executed plates of several of our iron-clads. But he cannot acknowledge their superiority to the French. Of the probable results of the contest between iron-plates and guns, he says:—

"Though we can say nothing positive as yet, seeing the experiments made one day reverse the results obtained on the preceding, it is permitted to foresee that the struggle between armor and projectile will be a long one. The more terrible the guns the greater the difficulties to be met. Every increase in the weight of the ball, and in the velocity given it by increasing the thickness of the plates; and if it is found to be difficult to construct vessels which will carry the great weight of armor, what will it be when we have to clothe it in armor of 24 inches, as will be the case when the ship has to carry such a weight? Certainly not by lengthening her, since that would only be to present more surface to the enemy's projectiles, and to render her more unwieldy; her entrance into many ports will be rendered impossible, and her draught of water will have to be increased in the same proportion. Besides, the ship herself will be so little beyond that she will not rise to the waves sufficiently to prevent the sea from filling her up with water. Such considerations show that the power of guns will, therefore, so greatly increase the difficulty of constructing vessels of war, that the ship herself will be doubtful whether really invulnerable vessels will not have to be confined to purposes of defence. There is this to be said—guns, terrible in experiments, will be less formidable in actual use, as is the case with most inventions of the same nature. Not only that is it very doubtful if monster cannon could be worked on the deck of a moving vessel, or in the difficult navigation of channels. Experiments at the American guns were slightly more than fifty-nine thousand pounds. Nevertheless, the English have already begun to imitate and thus carry out to the consequences suggested. All we can say at present is, that if the power of guns present obstacles to the increase of the defensive power of our ships, it does so likewise to monster guns."

In fact, the whole book shows very clearly the opinion

* L'Art Naval a l'Exposition Universelle de Londres de 1862; par M. le Comte. Admiral Paris. Paris: A. Bertrand.

† College's United Service Magazine. London. November, 1863.

ite author, that the new naval architecture is yet in its infancy, and that what has been done thus far is but experiment.

AN ENGLISHMAN AMONG THE REBELS.

A book lately published in England, entitled "Battle-Fields of the South," by "an English Combatant," who fought and writes on the rebel side of our civil war, does not deserve attention for its literary merit, nor is its abundance of the "I" and "me" a reply or a defence against censure. What he says in describing the arrogance of the "Yankee" character, is very true when applied to the "English Combatant" and his book:—"Any one who disputes his ideas is a fool;" it would be a waste of time and words, also, to try to pass it by with a few extracts of interest to our readers. Of the "infant navy" of the Southern States, he observes:—

"The splendid appearance, quickness, cleanliness, neatness, and discipline of the Federal ships-of-war struck me with the most unpleasant sensations of the officers, many of whom were mere boys. The old ships of the line, and even the 'fast' in appearance, their quick pre and recent services well betokened; but there was a 'something' in their efficient, trim manner of working, and blue of the telescope which impressed me with a strong idea that the greater part were 'service' and used their gold lace and white gloves more to political and family influence than 'service' or sound qualification. The navy trip has inspired me with respect for blue and lace—mostly foreign born, from the merchant navy; and, strange as they all were in the naval line, midshipmen quoted at Norfolk reminded me much of what I had seen of the British navy in American waters—pleasure-boating fellows, more than men who meant to fight at any odds."

Of Confederate officers the work abounds in sketches. He thus refers to Bishop-General POLK:—

"Polk is a capable and industrious Commander, accessible to all times by night and hour. Thoroughly disciplined, and a strict observer. He seems to have the army in former times and enter the Episcopal Church. He never brings a sermon to bear upon his soldiers, but surely does not detract from his repute as a gentleman, a Christian, and a soldier, to say that he enlarged the field of his labors in the especial cult of the Kreentive, who demanded the services of all talented men in behalf of the common cause. . . . He is a gentleman, and he is now an excellent and accomplished Major-General, and possesses the entire confidence of his troops, and will do his name or terse honor bien."

Of the late STONEWALL JACKSON he says:—

"His movements are sudden and unaccountable; his Staff don't succeed to keep up with him, and frequently ride into the enemy's lines going about in all sorts of holes and corners, at all times of night and day. His sympathy with common soldiers is such that he is right and utter into conversation with sentinels, and rids off through the darkness with a single orderly, leaving his Staff to come up as the officers. The consequence is that the officers are scared, and the men love him."

He says of the late ALBERT SIDNEY JOHNSTON:—

"He was in California when the Secret seceded; and although Lincoln's splendid military strategy, by which he secured the Pacific coast, was easily regularly through the Southwestern territories in disguise, received safely at Washington, and appointed to the command of the Pacific Division of the West. President Davis, in answer to those who said Johnston was 'too weak a man for the place,' replied, 'I want a man who can run among us!' Such praise, from such a man, speaks volumes for Johnston's true merit. He is a thorough soldier, and has seen much service in military circles. His early death was a great blow to the South. It is said to be a fact that upon the receipt of the intelligence that, nothing to be fried, for their exception is not required to eliminate the men; and that no other officer was to be found to fill his place."

The following is an instance of Southern discipline:—

"One instance I may mention, to show the spirit of these about to fight for the liberties of our rebel country. A certain Kentucky officer having donned his grey uniform and gilded shoulder-straps, began to practise with his men, and found that they were by no means little half-naturally on all occasions. This unfortunate fellow discovered that his men were not to be managed in the same way as he had been used to handle their dry thoroughly and expeditiously, he seized upon every opportunity to exercise his authority and prerogative. He was irregularly fined for the slightest misdemeanor, his dignity cost the weapon aside, and slapped one across the shoulders; when, in an instant, the tall Virginian, with a fierce look, dashed his musket to the ground, and, snatching off his coat, rushed like a fury at his enemy. The company, the officer, but tumbled over each other in their haste to quickly wiped his knife, remained his place in the ranks, and deportment proved that he had learned a lesson which he would not forget—or, at all events, did not—attempt to exercise any jurisdiction in that, or another case; they were reckoned officers of self-defence, or 'know.'"

IMPROVEMENT IN CAVALRY ACCOUTREMENTS.

It is singular that while such improvement has been making in the arms used in our service, we have had no corresponding improvement in accoutrements. Our cavalry still cling to the accoutrements which were in vogue when their only weapons were a single-barreled horse-pistol and a musketoon; and in the infantry we find the cartridge-box with its pocket for flints, and of the same style, and worn in the same manner as at the Revolution. This seems the more strange when we remember how large a proportion of our cavalry soldiers especially, are disabled by diseases directly or indirectly traceable to the physical discomforts and fatigues to which they are subjected through imperfections in their accoutrements, which have been patiently accepted as without remedy. The weakest part of the body of a dragoon where pressure can least be borne, is across the small of the back and over the abdomen. Yet it is precisely here that the cavalry soldier is compelled to bear the entire weight of his arms, ammunition and accoutrements. If he seek to remedy the evil by removing the sabre that drags so heavily at his side and hang it upon his saddle, his horse flying down way ruin it, and he cannot well relieve himself of its strain by holding it between his leg and the saddle, as is the Mexican way. The sabre-belt is too small and too, to suffer him to adopt the Californis style of wearing his "Colt" in its leg, and it will not do to part with the cumbersome cartridge-box to strap it to his saddle, lest in the hurry of dismounting to fight on foot he leave it behind him. So, according to rule, he is compelled to bear the weight of his entire armor upon the single belt which spans his waist, and at which his sabre, flying about with the motion of his horse, trotting or galloping, tugs with successive jerks that threaten to disembowel him. Then the belt must be sung fitting to support the ten or twelve pounds weight of accoutrements, and thus the evils of tight-lacing are added to the other discomforts to which he is subjected. Rupture, hemorrhoids, weak back and diarrhœa, the diseases current among the cavalry, are in a large degree attributable to this cause.

An attempt has been made to remedy this evil by the invention of an entirely new style of accoutrements, for which we are indebted to Colonel MANN, of the 7th Michigan Cavalry, whose improvement has received the favorable consideration of our Ordnance Department, and an order for them is being filled at the factory mentioned in this city. By this invention the carbine-box, pistol-box, and cartouch of the cavalry are reduced to one convenient box, holding more than double the ammunition of the three old boxes; and the trudge-box of the infantry is made lighter and more convenient. Flaps and belts are the superfluous parts. A still important improvement has been made by Colonel MANN in the manner of adjusting the accoutrements, by which the weight now borne at the waist is transferred to the shoulders, by means of two broad belts or straps passing from the upper many corner of the cartridge-box, worn in front, over the shoulders, crossing on the back, one looping through the ring over the short sabre strap, now used for the sabre shoulder belt, (which is dispensed with), the other looping through a similar ring which is provided near the pistol-box on the shoulder of the pistol-belt in the belt. These straps are adjustable to men of different sizes.

By this arrangement the ammunition, from its position in front, counterbalances the weight of the sabre and pistol, and this is thus transferred to the back of the shoulders, where great weight may be carried with ease. The pistol belt may be perfectly loose, as no weight is sustained by it. For infantry, the colonel has in connection with those straps, a convenient attachment for knapsack, counterbalancing the weight of it on the ammunition in front, thus preventing it slipping down from its proper place and getting the front of the carve and shoulder as it is now apt to do.

This invention is well worth the attention of army officers, and we hope it will be subjected to a thorough test of its merits. Besides the advantages in a sanitary point of view, it will enable our cavalry to carry a larger amount of ammunition to meet the requirements of the fast-shooting rifles or carbines and pistols, with which they are now so generally armed. With weapons that can be fired from half-a-dozen to a dozen times a minute, the present cartridge-boxes that will carry but twenty, or, at the most, forty rounds, and even this adds too heavy a weight to a belt already burdened with sabre and pistol.

MILITARY INSTRUCTION.

The present war has made that practicable which was frowned upon as useless and unprofitable in the times of peace. Not only so; elementary instruction in the military art is regarded by very many of those who control public education as necessary to the completion of even a common education. And, as a consequence, a good amount of that fact in each case, in many of our colleges and higher schools organizations have been perfected, and constant drills and studies are rendering our young men fit to take an intelligent part in the stormy drama of this civil war, and in such grades as it may be their choice to prefer to or when more entirely military schools, some suggestions of a partial and valuable source may not be amiss to those who do not know exactly how to institute such instruction. We speak from an observation of the seminaries in which this has been successfully accomplished, and in which the best results have been obtained.

In the larger colleges, numbering hundreds of students, let the students be formed into a battalion of four companies, with their own officers—regulars and lieutenants from the army—and select from the junior; corporals from the sophomores; the freshmen to be in training, and their examination exited to become non-commissioned officers as soon as they rise a year. In smaller institutions, a company formation would be the best, and under a similar system.

Let a simple uniform should be either adopted as the general dress of the institution, or provided by each student to be worn when on duty. Muskets for provisional use, to be turned in when required, will generally be provided by the municipal authorities. After being well grounded in the infantry drill, and especially in skirmishing and target practice in good weather, the instruction may be extended to artillery; in almost every locality the use of a light battery can be had, and the students thoroughly instructed in the duties of cannoniers, coming into action, changing wheels, dismounting the piece, carriage, limber, &c. The sword exercise may very easily be learned with a few wooden sabres and masks; and all this manual exercise will only take the place of the ordinary gymnastics of young men. It is no more costly and far more interesting than cricket, base ball, &c., &c.

With this practical drill, a few of the best text books should be taught in the recitation room. Of them all the most important is MAHAN's treatise on "Field Fortifications," which has done more service in the present war than any book existing. Add to these easy lectures on the great divisions of the art of war, illustrated by diagrams, based principally by the models as KIMBER's *papier-mâché* fronts of fortification—VAUBAN's, the modern system and the square redoubt, of which a college professor, not educated as a soldier, has said: "I could lecture on one of them for hours."

If it be objected by any that such a course occupies time taken from more elementary, more important studies, we answer, first, that they are an excellent substitute for the unprofitable exercise of classical instruction in most of our schools, and that the pecuniary profits combine useful exercise with useful learning. Further than this, they give direct value and application to the mathematical instruction, take away lethargness from the students, give them a more manly tone, greater subordination to authority, and more regularity in all school studies. But the most important thus all these, such instruction fits young men in time of necessity to instruct others. In the recent invasion of Pennsylvania, students thus taught in the University of Philadelphia were promoted in the hastily-organized militia, and found their instruction of the greatest benefit. It is an easy thing, and we hope will become universal.

CASUALTIES IN THE ARMY OF THE POTOMAC.

The following casualties among officers during the late operations of the Army of the Potomac, are reported:—

KILLED.—Lieutenant-Colonel Theodore Hesser, 2nd Pennsylvania; Lieutenant-Colonel Joseph H. Barnes, 108th New York; Captain C. F. Ketcham, Co. 1, First New Jersey; Captain McDonough, 1st Excelsior; Captain Hamilton, 1st Maine; Lieut. Wm. Hall, 2nd Pennsylvania.

WOUNDED.—Brig. General Thomas F. Meagher, Co. 1, 69th Pennsylvania; Brig. General Wm. Hays, Co. B, 4th Co. Va. Light; Captain C. M. Attwood, Co. K, 40th N. Y.; Captain J. W. Hutchinson, Co. A, 1st Pennsylvania Cavalry; Captain Wm. Fox, 2nd Regt.; Captain C. G. Fisher, Co. A, 139th Pa. army; Lieutenant Harry Hall, Co. A, 1st Maine; Lieut. Lauterbach, 1st Pennsylvania, Co. G; 1st Massachusetts, sickly; Captain Jacob Faubiver, Co. G, 39th New York; Captain Wm. Hall, 2nd Pennsylvania; Captain Fisher, First Lieutenant O. N. Richmond, Co. F, 14th Indiana; First Lieutenant Wm. Hall, 2nd Pa.; Lieut. Col. Wm. Brown, 14th Indiana; Lieut. Daniels, Co. D, 6th Md., army; Lieutenant Charles Keiser, Co. D, 14th Indiana; Lieut. Col. Wm. Brown, 14th Ind.; Lieut. Reginald Wm. Stebbins, 155th N. Y., shoulder, severe; Lieutenant Mickleton, 155th N. Y., shoulder, severe; Lieut. Col. Wm. Brown, 14th Ind.; Capt. Pa., head; Adjutant Dwight, Co. D, 2d Pa., thigh, slight; First Lieutenant Wm. Hall, Co. A, 2d Pa., thigh, slight; Lieutenant Colonel Griffin L. Ellwood, 16th Mass., hand; Lieutenant-Colonel Wm. Brown, 14th Ind., army; Lieut. Col. Wm. Brown, 14th Ind., foot, head, scalp wound; Lieutenant J. W. Chaney, 40th N. Y., thigh; Lieut. Col. Wm. Brown, 14th Ind., army; Lieutenant Col. Wm. Hughes, 7th N. J., both thighs; Lieutenant M. T. Tupper, Co. E, 39th N. Y., wrist, slight; Lieutenant Colonel Wm. Brown, 14th Indiana, army; Lieutenant Colonel Wm. Brown, 14th Ind., army; Lieutenant David Hazleton, Co. L, 1st Pennsylvania, sickly; Captain A. H. Nickson, 5th Co. Md., shoulder, slight; Adjutant Norman Ash, 1st Excelsior, shoulder, slight; Lieut. Col. Wm. Brown, 14th N. Y., arm; Lieutenant Horatio Springer, Co. C, Excelsior, thigh.

CASUALTIES IN MAJOR-GENERAL GRANT'S ARMY.

The following is as complete a list as we are able to get of the casualties among officers in the Army of Major-General GRANT during the late engagements in Tennessee:—

Colonel Phelps, 25th Ohio, commanding brigade, Sheridan's division; Colonel Langdon, 24th Wisconsin; Colonel Wangelin, 21st New York; Major Elliott, 36th Illinois; Major Mudge, 23d Indiana; Major Hotchkiss, 89th Ohio; Major Ellis, 6th Iowa; Major Hall, 15th Wisconsin; Major Hall, 24th Wisconsin

THE VICTORY IN TENNESSEE.

GENERAL MEIGS' DISPATCH.

The following dispatch of Quartermaster-General Meigs is a clear and concise account, by a military observer, of the battle near Chattanooga: and though it has been already extensively published, we give it as a valuable historical document:—

HEADQUARTERS, CHATTANOOGA, Nov. 26, 1863.

Hon. EDWIN M. STANTON, Secretary of War:

SIR:—On the 23d instant, at 11 A. M., General GRANT ordered a demonstration against Missionary Ridge, to develop the force of the enemy. The troops marched out, formed in the form of battle, as if on parade. The rebels watched the formation and movement of the force, their picket lines and rifle-pits, and from the summits of Mission Ridge, five hundred feet above us, and thought it was a regular war, and all seeing, so openly and deliberately, as regular, was it all done.

The line advanced, preceded by skirmishers, and at 2 o'clock p. m. carried our picket lines and opened a rattling volley upon the rebel pickets, who replied and run into their advanced line of rifle-pits. After them went our skirmishers, who ran, as I think, along the centre of the line of 25,000 troops which General THOMAS had so quietly disposed, until we opened fire. Prisoners assert that they thought the whole movement was a review and general drill, and that it was too late to send to their camps for reinforcements, and that they were overwhelmed by force of numbers. It was a surprise in open daylight.

At 4 P. M. the important advanced position of Orchard Knob and the lines right and left were in our possession, and arrangements were ordered for holding them during the night. By the 24th, at early dawn, General THOMAS had 9,000 men across the Tennessee, and established on its south bank, and commenced the construction of a bridge of pontoon boats, from Chattanooga. The rebel steamer *Dunbar* was required at the right moment, and rendered effective aid in throwing the pontoon bridge and bringing men. By night-fall, General THOMAS had seized the extremity of Missionary Ridge nearest the river, and was entrenching himself. General HOOKER, with 12,000 men, opposed communication with him from Chattanooga, on the south side of the river. Skirmishing and cannonading continued all day in the left and centre. General HOOKER scaled the slopes of Lookout Mountain, and from the valley of Lookout Creek drove the rebels from point to point. He captured some two thousand prisoners, and established himself high up on the mountain side, in full view of Chattanooga, and of the blockade, and began to construct as ordered from Bridgeport to Chattanooga. They had run only to Kelly's Ferry, whence the road to Chattanooga is macadamized, and twice across the Tennessee on pontoon bridges brought up our supplies.

All night the line of Missionary Ridge on the extreme left and the side of Lookout Mountain, on the extreme right, blazed with the campfires of loyal troops. The day had been one of success and victory, and the words of General HOOKER's battle was fought above the clouds, which concealed him from our view, but from which his musketry was heard. At eight o'clock on the morning of the 25th, "the battle's done," shone upon the beautiful scene, until 11 A. M., when rattling reports of musketry and guns showed that picket skirmishing was going on. Then it ceased. A brigade, sent from Chattanooga, crossed the pontoon bridge, and opened communication with the centre. General GRANT's headquarters during the afternoon of the 23d and the day of the 24th, were in WOOD's redoubt; every step in the course of the day, as the troops of the advanced line, visiting the headquarters of the several commanders in Chattanooga Valley.

At daylight on the 25th the Stars and Stripes were desried on the peak of Lookout. The rebels had evacuated the mountain, or Hooker's troops would have found them, and striking Mission Ridge at the Rossville Gap, to sweep on both sides and on its summit.

The rebel force was seen as soon as it was light enough, streaming regiments and brigades along the narrow summit of Missionary Ridge, to concentrate their fire upon those whom SHERMAN, or marching for the railroad, and raising the siege. They had evacuated the Valley of Chattanooga —would they abandon that of Missionary?

The twenty-pounders and four and a quarter-inch rifles of WOOD's redoubt opened on Mission Ridge, Orchard Knob and intermediate hills, at 9 o'clock, with shell and Parrotts answered, and the cannonade thus commenced continued all day. The chief command included Orchard Knob to Missionary Ridge, and from Missionary Ridge to Orchard Knob, and from WOOD's redoubt over the heads of General GEORGE THOMAS and General GRANT, who were with us in this favorable position, from whence the whole battle could be seen as in an amphitheatre. The headquarters were under a tent fly all day long.

Cannonading and musketry were heard from General SHERMAN and General HOOKER, and the Rebel Army corps to join him. General THOMAS' men and skirmishers who drove in the rebel pickets, and chased them into their intrenchments, and at the foot of Missionary Ridge commenced an assault against GRANT's right, intrenched on a high knoll next to that, on which SHERMAN himself lay fortified. The assault was gallantly made. SHERMAN reached the edge of the crest, and held his ground for (it seemed to me) an hour, but was bloodily repulsed by reserves.

SHERMAN was defeated, and a strong line of skirmishers, followed by a deploy line of battle, some two miles in length, in front of Orchard Knob, where the chief headquarters on Orchard Knob, the line moved rapidly and orderly forward. The rebel pickets discharged their musketry and ran into their rifle-pits, from which they opened on their backs. The line of battle was not far behind, and we saw the grey rebels swarm out of the ledge line of rifle-pits, in numbers which surprised us, and over the base of the hill. A few turned and fired their pieces, but the greater number quitted into the many roads which wound irregularly up it steep face, and went on their top. Some regiments pressed on and swarmed up the steep sides of the ridge, and there was a color on the crest of nearly all the lines. The attempt appeared most dangerous, but the advance was supported, and the whole line was ordered to storm the heights, upon which not less than forty pieces of artillery, and no one knew how many muskets, stood ready to slaughter the assailants. With cheers answering to cheers, the men seemed unequal. They gathered to the point least difficult of ascent, and the line was broken. Color after color was planted on the summit, while musket and cannon vomited their thunder upon them. A wild shout of victory arose when Hardee exploded a rebel caisson on the summit, and the gun was seen galloping to the right, its driver lashing the horses. A party of our soldiers intercepted them, and the gun was captured with cheers.

A fierce musketry fight broke out to the left, where, between Thomas and Sherman, the crest of the ridge was still occupied by the rebels. Bragg left the house in which he had held his headquarters, and one of the forts on the summit, and fled to the right side of him. General GRANT proceeded to the summit, and then did we only know the height. Some of the regiments had gone up into a position. Artillerists were sent for to work the guns. Caissons were searched for ammunition. The rebel log breastworks were torn by parties carried to the other side of the ridge, and used in forming barricades across. A strong line of infantry was formed in the rear of BRAGG's line, which was pressed by the enemy from the rebels to the left, and a secure lodgment was soon effected. The other assaulting line of the centre pressed on, storming and taking the rebels threw down their arms and fled. HOOKER coming in favorable position, swept the right of the ridge and captured many guns and men.

BRAGG's remaining troops left early in the night, and the battle of Chattanooga, after days of manoeuvring and fighting, was ended. The enemy's line of defence in the centre is broken. SHERMAN is relieved from danger in East Tennessee, Kentucky and Virginia are secured, and the rebels in the southern states threatened in the rear, and another victory is added to the chapter of "Unconditional Surrender GRANT."

To-night the estimate of captures is several thousands of prisoners and thirty pieces of artillery. Our loss for so severe a victory is small.

BRAGG is firing the railroad as he retreats towards Dalton. SHERMAN is in hot pursuit.

To-day I saw the battle-field, which extends for six miles along the Mission Ridge and for several miles on Lookout Mountain. Perhaps the most interesting to my readers is where BURNSIDE

warfare, and in the next place the certain misery which it entails on the country which practises it; and its inefficacy, as a general rule, to conquer or expel an enemy, however much it may annoy him.

ARMY AND NAVY PERSONAL.

MAJOR-GENERAL Foster arrived at Cumberland Gap, on the 30th inst., en route to Knoxville.

A SILVER sword has been presented to General A. P. Howe, of the 3d Rhode Island, with corps.

CAPTAIN Dennis, formerly of General King's staff, has been assigned to duty at the headquarters of the defences north of the Rappahannock.

CAPTAIN Skipper, A.A.G., has been ordered to report for duty as Acting Assistant Inspector-General, to General Abercrombie, Commanding Division, Culpeper, Va.

CAPTAIN Joshua Norton, A.Q.M., has been ordered to Chattanooga,—the Quartermaster-General having need for several more officers of experience in the Western Army.

FIRST Lieutenant M. F. Watson, 5th U. S. Artillery, who lost a leg at Gettysburgh, has been assigned to duty at West Point, where he was graduated only a few years ago.

COLONEL Alexander Cummings, of Pennsylvania, has been ordered by the Secretary of War to Arkansas, to assist in raising colored troops in that State.

FIRST Lieutenant Symmes Gardner, 18th U. S. Infantry, and Frank A. Texas, an officer of the 173th N. Y. volunteers, have been designated Provost Marshals of Memphis.

NEWTON Pettelds, of the First Rhode Island Cavalry, has been appointed Second Lieutenant in the Third Cavalry of that State.

LIEUTENANT W. G. Fitch, 2d U. S. Infantry, lately placed on the retired list, has been ordered to New Haven, Ct., to report to Brigadier-General Hunt, commanding Draft Rendezvous.

SURGEON-GENERAL M. M. Feener, of the 8th Michigan, for some time back attached to the flagship of the South Atlantic Blockading Squadron, has resigned his resignation, and been appointed Assistant Surgeon in the navy.

A PRIVATE dispatch received in Chicago from General Grant, in reply to a message of sympathy, states that the General Smith who is among the wounded near Chattanooga, is Giles A., and not John E. Smith, as first reported.

CAPTAIN George F. Price, A.Q.M., to Major-General Hancock, having recovered from the typhoid fever, has reported to Major-General Warren for duty. Captain Parker is still suffering from a wound received at Fredericksburgh a year ago.

MAJOR W. H. Weller, 2d Wisconsin Cavalry, has been dismissed from the service of the United States, on charges of unlawfully stripping the chevrons from a corporal, and of abstracting and applying to his use wines and whiskies belonging to the sick.

MAJOR Jeffries, Provost Marshal General of Maryland and Delaware, Major Thomas, Provost Marshal of Buffalo, and Major Dodge, Provost Marshal of Rochester, New York, have been appointed Lieutenant-Colonels in the Invalid Corps. Majors Stratton and Gaston, of the 52d New York and 103d Pennsylvania, are also transferred.

THE Secretary of War was serenaded at his home in Steubenville, Ohio, on the 27th. A large crowd of citizens, accompanied by the Logan Band, marched to his residence about nine o'clock in the evening, and after the music the Secretary made his appearance, and, although suffering from a severe cold, made a spirited address to his friends.

IT is stated that Colonel DeTrobriand, of the 55th New York, will be mustered out of the service of the United States at his own request, in order to determine a question of rank between him and certain officers of the legislature, recently still in the service. It is understood that Colonel DeTrobriand will at once return to the army as a commissioned brigadier-general.

THE Governor of Massachusetts has appointed James Sturgis, Esq., of Roxbury, an Assistant Adjutant General, with the rank of Major, to succeed Major Hallowell, who is to proceed to Morris Island, S. C., and pay the enlisted men of the 54th and 55th Regiments Massachusetts Volunteers, (colored,) as provided in an act of the legislature, to make up the deficiencies in the monthly pay of said regiments.

THE proceedings in the Belger Court-martial have been disapproved by the Secretary of War, and, by order of the President, he is dishonorably dismissed from the service of the United States. According to the proceedings of the Court, the Secretary of War says: "The facts found by the Court show that a large amount of public business was transacted with A. B. Belger & Co., in which he allowed those rates far above the ruling cash prices of the markets; that those transactions extended through a whole year; that Col. Belger did not apply to the War Department for relief from his supposed embarrassing situation; that he made no effort to secure the public interest by notifying parties; that Government lost by his transactions at least $100,000; that the record of the trial shows no palliation, or justification, or excuse for such conduct. Whereupon, by order of the President, he is dishonorably dismissed the United States service."

ITEMS AND INCIDENTS.

WHILE General Grant's loss of guns has been very trivial, he has captured within the past seven months *four hundred and twelve* rebel cannon, namely: fifty-two on his advance to Vicksburgh, three hundred at that place, and sixty before Chattanooga. Among the latter was the famous Leonis Battery, captured by the rebels at Chickamauga.

THE Secretary of War has issued a General Order, under date of November 23d, by which he fixes the maximum prices of provisions and necessaries, it is ordered that the heads of the respective Bureaus of the War Department make inquiry and report to the Department a just and reasonable rate of advanced wages that should be paid by the Government at the present time.

THE only manufactory in the United States exclusively devoted to the manufacture of army bootees by machinery is at Derry, N. H. With 14 machines this establishment can turn out 2000 pairs in ten hours, which is 200 pairs an hour, or over three pairs per minute. To make 200 pairs per day requires about 220 hands.

THE rebel financier trumbs the Richmond editors about as much as Bragg's recent dismissal of them. The *Examiner* says it regards "the slow depreciation of Federal currency as one of the most important results of the present extraordinary war;" and adds: "But it is not to be denied that the Federal Secretary of the Treasury has conducted the finances of the Government with consummate ability."

THE Richmond *Examiner* of November 24th, says:—"Five bulls advertised, and four one hundred and twenty-five dollars bring a hundred and forty-five dollars! What is the suffering for the necessaries of life? Does not all go 'merry as a marriage bell?' If the skeleton comes in, put a bell ticket at his elbow. If the ghost of the lamented Banquo in costume upon its back of bony links, and send the grim guest into the hall room to the sound of cotillon music."

THE inventor of the "Coffin Gun Rifle," Mr. Levi B. Short, died suddenly in Philadelphia on Thursday afternoon, November 26th. Since the outbreak of the rebellion Mr. Short had been actively engaged in perfecting his destructive weapon of war, and in his endeavors to get it into operation at the earliest day. That might be more effective, Mr. Short superintended and subsequently made some improvements in the article.

A FEW days after the battle of November 16th, he addressed a complimentary letter to Major-General Meade, acknowledging the receipt, through Brigadier-General Benham, of a sword, which had been taken from a rebel in the recent assault on the enemy's intrenched position at Rappahannock Station, by the storming party led by the gallant General Bidwell. This letter, which came by him to the officers and men engaged in these operations of the army, which reflect such high credit upon the skill which planned, and the bravery which executed the movement.

THERE is in course of preparation for publication a large description of the National Cemetery at Gettysburgh, accompanied by a map showing the grounds, some of which the correspondence relating to the dedication of the Cemetery by the Hon. Edward Everett on the 19th, the Prayer, the Oration of Hon. Edward Everett, and the Address by himself for publication in this form, the Dedicatory Remarks of President Lincoln, and the Consecration Prayer by the Dirge. The copy-right of the book or pamphlet will be secured, and the net proceeds realized from the sale of the publication will go to the Fund for the erection of a monument to the memory of the brave soldiers whose remains are deposited in this hallowed ground.

MR. Hamilton, of Louisville *Journal*, gives General Gantt, who has come over to the Union cause, the following character:—"We first knew Mr. Gantt as a poet. Although his profession is the law, he has written poetical productions many years ago from Arkadelphia, Arkansas. He was elected to Congress from that Congressional district in that State, and, up to the breaking out of the rebellion, he was a Union man. He soon afterwards went into the rebellion, and is now a Major-General in the rebel service—we trust he will be captured. He has seen and heard a great deal on both sides, and has some enough to understand and appreciate what is going on. He is a fine intellectual, able, and brave man, with just protension to some genius. He is now within the Federal lines in Arkansas."

BY direction of Major-General Foster, commanding the Department, the several newspapers published in Memphis are warned that they must cease the publication of reports and rumors relating to the movements or armament of troops within the department. No discussion of the policy or measures of the government, military or civil, and the editorial or publication of newspapers will be held accountable for the character of extracts published from Northern papers, and neither editors or correspondents have the right or the ability to give publicity to what is observed, or to withhold it where unobserved. No order of the Major-General commanding department will be published unless accompanied with an order for publication from the War Department.

A CORRESPONDENT on Morris Island writes:—"As there is no manual laid down for the three-hundred-pounder Parrott, and I imagine that a few words on the firings and 'from battery.' Implements, no two in the same place and no one in its proper place. The detachment gives the command 'Load!' 'Load!' 'Load!' The command the gunner says, 'some of you fellers bring a shell,' and 'John bring a cartridge.' Some fellers have to scramble to discover and bring a shell. Gunner says 'Stick in that powder.' 'Now, boys, hold on till I get out a fuse.' 'Stick it in.' All ready to fire, gunner gets the shell to the muzzle—then Gunner says, 'Swab her out.' She is swabbed out. 'Now heave and haul, and in it goes.' It goes in accordingly. 'Now, run her out.' 'Is she all right?' 'Now, run her in.' She is run in. 'Screw down the recoil bands.' They are screwed down. Gunner aims. 'Blow your nose!' 'All right!' 'Where's that primer?' 'Now get out of the way everybody.' All go to windward, and No. 1 sings out, 'Fire her through!' and he hits if the gun bursts. Gunner says, 'Blaze away!' She blazes away. Remark of the gunner on returning to quarters: 'How are you Simkins?' Repeat."

A FIELD DESK.—We have lately seen the plan of a very ingenious field desk for brigade headquarters, devised by Lieutenant E. B. VAN WINKLE, late of Brigadier-General E. L. VIELE's staff. It is the result of personal experience with the field desks in ordinary use in our Army, and is designed to remedy their defects and increase their advantages. In a chest 42x30 by 24 inches are included two desks, with a flap for every side of the alphabet, and four in addition; drawers for a month's supply of stationery and ends and retained corners, places for a fixed inkstands for red and black ink, so constructed as to secure them from losing their ink in moving; racks for record books and blanks of reference; also four desks and stand for the desks; and two tables, one of which is capable of containing six months' supply of blanks. All these are so arranged as to be packed in the small space named, forming a chest which is portable and just the width of an army wagon.

THE NEW BRITISH CARBINE.—The British government have recently adopted a new breech-loading rifled carbine, which has the following peculiarities: The barrel is twenty-four inches in length, and the bullet, a cone-shaped one, a half inches—and weighs altogether a trifle under six pounds. It has an effective range of over two thousand yards, is sighted for twelve hundred yards, and with sixteen hundred yards the best very nearly one mile, or about sixteen hundred yards. The base of this weapon is the same as the Enfield rifle musket, but a smaller bullet, conical, and weighing about an ounce. The contrivance for loading and then closing the breech is one that sends a cartridge into the rear part of the barrel about the third of an inch. The ball precludes naked from one end of the cartridge, and is forced entirely fills the bore and grooves, thus preventing windage. It is a handy little fire it is take fire.

BY a simple and ingenious contrivance in the cartridge the gun lubricates and cleans itself, and does not become the worse for, even after firing thousands of times. At the lower or base end of the cartridge is a wad, cut out of heavy woolen felting, at least a quarter of an inch thick. This is saturated with grease, lard or tallow. The powder is between this wad and the bullet, and after the discharge the wad remains in the gun. Of course the wad goes out before the bullet leaves the gun, and is consumed by the flame, and therefore is not thought to be much worth. It consists in first coating the halls of iron steamers with one or more coatses of red lead paint, then with a coating composed of a mixture of tar and pitch, and then with a coating of felt, and then are laid upon it preforated sheets of copper, which are then cemented to the adhesive coating.

WE find in the London papers several notes to the effect that Admiral DAHLGREN has at last found a way to clear the barrels of guns after firing. Remarks:—He first breeches one end of the monitor and clears it, and then breaching the other end cleans that also.

TOUCHSTONE AND STRAIGHTON OF BESSEMER STEEL.—The enormous importance of this metal is proved by the use to some interesting experiments recently made. Steel bars of ten inches square and two feet six inches in length, were placed edgeways in a furnace, and kept at a white heat forty-five degrees; and some round bars two inches diameter, were heat cold under the hammer into the form of an oval, and then annealed. The annealing of the bolt and measuring five inches more than the inside. The steel and iron boiler plates, when cold, and with their ends cut off their own cold, afforded ample evidence, too, of the extreme tenacity and toughness of the metal; while the clean, even surface of rod-iron, and of malleable iron ordinary, were all medical examples of the perfect freedom from cracks, flaws, or hard veins. The tensile strength of this metal is not less remarkable. Quite recently a square bar, one inch by a half, bore a strain varying from one hundred and fifty thousand pounds to one hundred and sixty thousand pounds on the square inch. Four samples of iron boiler plate, similarly tested, bore from sixty-eight thousand to seventy-three thousand pounds.

As with steel, so with the Bessemer iron. The great toughness of the latter was proved by the bending of a cold bar of bessemer iron round a hammer head and into a close fold, without the smallest perceptible rupture of the metal at any part; and the bar was thus extended on one outside of the bend from twelve to sixteen and three-fourths inches, and was pressed on the inside from twelve to eight and a half inches in thickness, without a difference in length of nine and one-half inches, between what, before bending, were the two parallel sides of a bar three inches square. Bars of the iron stood the test of four strands of round iron, one and a half inches in diameter, was, while cold, so closely twisted as to cause the strands at the point of contact to become permanently indented into each other.

COLD-ROLLED AND HOT-ROLLED IRON.—The London *Engineer* publishes the second account of Prof. Fairbairn's experiments upon the tensile strength of bars of wrought iron, rolled cold or hot. The first experiment was on a bar of iron, which, in its condition—black—it had at 8 it received from the manufacturer, and familiar to all.

The diameter of the piece experimented upon was 1.97 inches; its area, 3.04 square inches. The laying on of a weight of 46,426 pounds produced an elongation on a length of ten inches to the extent of 1.30 inch; and the laying on of 66,346 pounds produced an elongation of 2.00, with a breaking weight of 58,523 pounds per square inch. The diameter at the point of fracture was 1.68 inches. This was 0.88 inch. The second experiment was on a bar similar to the preceding, but rolled cold. Diameter, 1.96 inch; area, 3.04 square inch. With a weight of 64,555 pounds laid on it, it elongated rapidly, and the breaking weight was per square inch, 31,812 pounds. The third experiment was also on a bar of iron rolled cold, with a diameter and area similar to the foregoing. The elongation of a length of ten inches was, in inches, 0.6, when a weight of 62,343 pounds was laid on.

THE Quartermaster-General has directed that the wages of mechanics, teamsters and laborers in the Department of Washington shall be $2.50 per day, the order to take effect from the 1st of December.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all promotions, changes of station, etc., of the movements of vessels, of casualties among officers, and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to any questions addressed to him by subscribers.

From gentlemen in the medical service we shall be glad to receive communications on matters of professional interest, and reports of monthly sanitary returns and most forms of statement.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or FOUR DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers will in all cases please state their post-office, and also their nearest railroad station at the date.

Subscribers ordering the address of their paper to be changed, should be careful to give the previous address.

The Editor does not hold himself responsible for individual opinions of the writers in communications addressed to him.

The publication of THE JOURNAL is newly once a year, payable quarterly in advance, at the office above mentioned.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

ANSWERS TO CORRESPONDENTS.

C. G. H.—The official Army Register is issued only to officers, though some of the booksellers in Washington usually contrive to get hold of a few copies, from whom you may be able to obtain one. Hudson Taylor, Washington, D.C., Washington, can probably supply you if any are to be had. Bourne, on the Steam Engine, is the best work, though, perhaps, too expensive, costing $12.00. It is a London book, as the Steam Engine, as an excellent work at two dollars. It is written especially for the navy, by an engineer in the navy.

TRY P. R. V. C.—Par. 826, Army Regulations, requires sentinels to present arms to the general officer, all colonels, lieutenant-colonels, and majors, whether of the staff corps or in the line, are field officers, and sentinels have by law the right to present arms to any and all of them. The only exception to this rule is on reaching a marital, taking precedence over officers of the same grade in the line, or sitting below them, according to date of commission. Par. 829 of the Regulations are entitled to the same respect from a sentinel on post as any other field officer.

ENSIGN.—An adjutant's uniform is the same as that of a line officer of the same arm of service, i. e., cavalry, artillery, or infantry. "Unless he has marched for detachments of more than twenty-four hours," as used in paragraph 1, Par. 1177, means, unless he has performed a detail of guard or other detachment duty of a longer duration than twenty-four hours.

CO. K, 4TH REGT. PEACE VOL.—By a joint resolution of Congress, approved 13th of July, 1861, the Secretary of War was authorized "to furnish extra clothing to all sick, wounded and other soldiers who may lose the same by reason of the casualties of war, under such rules and regulations as the Department may prescribe during the existence of the present rebellion. By General Order No. 55, also of July 25, 1861, the case of wounded soldiers only was considered. "Other soldiers" will probably wait for "such rules and regulations as the Department may prescribe" before their claims, under this resolution, can be paid, or otherwise. The fact is, that the Regulations and file-closers never go through the manual of arms, except to come to an order or attention. Recruits in nothing must face to their proper front from the ranks, as the manual directs, but from the custom of service, because a soldier should never turn his back to the point from which he may be attacked.

ADJUTANT.—"Point chappal," as used in tactics, is a term applied to any given point upon which a line of troops is formed; it is also used in a more extended sense to indicate the point of support or basis from which operations of any kind are conducted.

Several answers are left over for another week.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, DECEMBER 5, 1863.

THE MILITARY OUTLOOK.

THE closing month of the third year of the rebellion has witnessed the termination of two campaigns by the two great Union armies; and if we assume that grand military operations are over for the winter, they leave the situation in the highest degree gratifying, and the prospect as brilliant as the most sanguine lover of his country can well desire. We do not assume that they are necessarily over, for the very desperation that has overcome the fortunes of the rebels may prompt them to unexpected enterprises to retrieve themselves or perish in the attempt. But if they shall not invite the battle, East or West, they have made that intervene before the season of spring campaigning opens can be most profitably spent in preparing our great armies to deal decisive blows when operations come to be renewed. There is no sufficient object to enter upon the toil and trouble, the risks and hardships of a winter campaign, by the contending hosts that attend military operations in Virginia and Georgia; and to we have everything to gain and nothing to lose, while the rebels have everything to lose and nothing to gain by three or four months of "masterly inactivity," we are sure no right-minded man will feel that the grand cause for which our armies are in the field is suffering any needless let or hindrance by a delay which can be and we doubt not will be turned to such account.

General GRANT resumes in front of Chattanooga a position which, though to the superficial eye may be judged identical with that which he held previously to the late operations, is yet under conditions which make it most essentially different from the late situation, and places the whole weight of the difference in the Union scale. His communications are now perfect, and there is no possibility of their being henceforth greatly embarrassed. The late operations were practically for Chattanooga—that is, for safety, security and comfort in that position. These are now secured. General GRANT's care must now be for his army—for such a strengthening, reorganizing, mobilizing and disciplining of his troops, and such a re-creation and rehabilitation of all its material belongings as will enable him in the spring to operate with a maximum of power and effect. The communications are to be seen to—the bridges over the Tennessee and immediate streams are to be rebuilt—the old connection of the Bridgeport line to be re-opened—the transportation is to be renewed —the envalry force, practically destroyed by the half-starvation that for weeks beset the garrison at Chattanooga, is to be created afresh. In this task General GRANT and his able lieutenants have three good months' work.

Nor are our own fortunes all that are affected by the late operations. The effect on the rebels of General GRANT's double victory—first in driving BRAGG's army from his front, and secondly in bringing to naught the attempts against East Tennessee—comes back to us in a will of despair from the whole rebel press, which forms the most significant manifestation yet given of the hopelessness of the rebel cause, manifestly hopeless. "Again," writes the Richmond *Enquirer*, "the tide of battle has turned against us, and at present "writing all looks gloomy." "The Southern people," writes the Richmond *Examiner*, "never had greater "reason to be serious and anxious than at this mo"ment." The reaction from confidence and their truthfulness must carry them like iron into the souls of the most obdurate of those who a few months ago were blating of "last dishes" and never giving up.

The rich region of East Tennessee—the great natural arsenal whence the rebels drew their lead, nitre and cattle, and the magazine from which great supplies of corn and nine-tenths of all their bacon were derived—has been decided by the gage of battle to remain in our hands; it is ours to have and to hold, and General GRANT and his magnificent army can be relied on to do both. The gate into Georgia and the Gulf States, by way of the West, is ours, and the spring-time will see him enter through that gate, and to fresh and final victories.

In Virginia, though the record of military operations does not shine with the lustre that covers the Army of the West, yet the situation leaves nothing to be completed. If the Army of the Potomac shall for the winter mouths limit itself to the rôle of covering Washington, it will still be doing good and worthy work. It is absolutely necessary to keep a powerful force for that purpose, for the rebels will let slip no opportunity we may afford them to retrieve their fortunes by a blow towards the capital. It would no doubt have been most inspiring had that Army been able to close the campaign and crown its valorous toils by the capture of the rebel capital, but that has not been given it and us. Practically, however, this achievement would, in the present aspect of affairs, be no great material gain. With GRANT at Chattanooga, we rule little of Richmond; for his first motion forward in the spring will "turn," and by consequence necessitate the evacuation of all Virginia, Richmond included. Then will come the opportunity of the Potomac Army; and for the present, whether it covers Washington by occupying the line of the Rapidan, the Rappahannock or the Potomac, is a question of very subordinate moment.

If these reflections are just, the season of rest which will fall to our two great armies (should the policy we have indicated be adopted) will be far from a mere period of *hibernation*, during which they will simply draw from their reserved strength and come out in the spring "fat and contented: it will be a period of most fruitful growth, recuperation and renovation. The fresh levy of three hundred thousand men, to be raised at the opening of the coming year, will afford the material for the replenishing of the thinned ranks of both armies and their reinforcement to proportions that will make them invincible hosts. The rebel armies, on the contrary, have reached that perilous point at which they add nothing and lose every day. Their resources, also, are every day being exhausted, and the blockade presses with increasing stringency upon them. The whole gravitation of all the material and moral forces thus bears steadily towards the ruin of the cause for which these misguided States took up arms.

THE CAMPAIGN IN TENNESSEE.

GENERAL GRANT, after three days sharp pursuit of the rebels, whom he drove, routed and demoralized, from their fortified lines, has again gathered up his forces and resumed his position in front of Chattanooga. Yet to say that he has resumed his position is very far from being the true statement of the actual situation, for though he will still be in front of Chattanooga, the conditions that will now surround his army must differ widely from those under which it was held while BRAGG stood on Lookout Mountain and Missionary Ridge. General GRANT will, of course, fortify and occupy these commanding positions and their *debouchés*, and thus keep the rebels at very long arm's length from coming near him, even if they had the disposition to do so after the disastrous blow they have received at his hands. This will, for the first time, give our army at Chattanooga entire control of its communications. It is now admitted that crossing the Tennessee at the river, which was effected by the seizure of Lookout Valley, a month ago, it would have been found impossible, so long as the rebels had the means which the possession of Lookout and Missionary Ridges gave them of embarrassing our transportation, to have supplied the Army of the Cumberland, and forced to the operations by which by reinforcements from Virginia and Mississippi. All trouble on this score is now, however, at an end, and all power to hamper General GRANT is taken out of the hands of the rebels.

But while General GRANT's brilliant success in driving the rebels from his front, and pushing it back broken and demoralized, has had this important bearing on the fortunes of his army at Chattanooga, its result on the fate of the left wing of his command, held by General BURNSIDE at Knoxville, proves to be no less valuable. LONGSTREET, finding himself by General GRANT's movement isolated from the main body of the rebel army in front, has raised the siege, with the alternative, if he obeys the order of BRAGG to come back and form a junction with him, of finding the Union commander planted across his path; or, on the other hand, of attempting a five hundred miles march, dogged by the force of FOSTER and BURNSIDE up the valley of Virginia to the Gap of the Cumberland. A newspaper report, which by its own weight would not claim much credence, were it not supported by intrinsic probability, affirms that he is now attempting the latter move. It will be interesting to watch its upshot, for the retreat will be made under circumstances of very marked difficulty.

Viewed in their *ensemble*, therefore, the late operations in Tennessee may be regarded as effecting the utter and final frustration of the rebel programme for the recovery of that important region. The accomplishment of this object, which, both in a material and a military point of view, forms an absolute necessity for the continued existence of the rebel cause, was hastened by the official head of that cause as a determination which must be accomplished, "even if it took every man in "the Confederacy to do it." In execution of this plan, LONGSTREET, with a column of about thirty thousand men, was detached from BRAGG and sent against BURNSIDE. His preliminary movements were attended with some success, and his advance resulted in driving back the Union force on Knoxville, which the rebels proceeded to invest. It was a critical position for that force, and one that, for many a day, made "the bravest hold their breath." Two methods were open to General GRANT by which to relieve the beleaguered force in East Tennessee: to send him direct aid by detaching a column from his command at Chattanooga and dispatching it to BURNSIDE's assistance, or to make a diversion in his favor by an offensive movement against the main rebel force in his front, which would put LONGSTREET under the necessity of retreating, after by a prompt exercise of little dependence could be placed on the efficacy of the first method for a reinforcing column would have had a long and circuitous march to make, with slender probability of reaching its destination in time. The second method would be thoroughly efficacious if successful; but that was a risk which BRAGG held at position of prodigious strength—a position of such strength, in fact, that the rebel leaders were willing to hazard the detachment of

LONGSTREET, and felt secure in committing the military fault of a division of their forces, that voluntarily placed the Union commander on the interior line as respects the two rebel columns.

It would be absurd to suppose that the rebel leaders were not quite well aware of the fact that this was a violation of a fundamental maxim of war; but their own experience, as well as the history of all grand military operations, shows that the fortune of campaigns depends on a thousand conditions besides the theoretical treatment of strategy, and that these often violated with impunity when other controlling considerations warrant. With any man less wary, less energetic, less audacious than General GRANT the risk might have been ran with perfect safety; but with him as an opponent, it was a fatal act of temerity, which was no sooner committed than it brought destruction on the heads of its authors. BRAGG was swept from his stronghold, and LONGSTREET's triumphal march turned into a hurried retreat for safety. The blunder of the rebel chieftains was not to have known that GRANT could not be thus trifled with. They ought to have known better, for even the journalists of Richmond display a certain appreciation of the qualities of the hero of Vicksburgh. "If we are "to judge the future by the past," says the *Examiner* of the 27th ult., "GRANT will press his success as he "did after Grand Gulf." This illustrates that very subtle yet enormously powerful element in war which we may call the moral influence of a commander. By making it thoroughly understood that he cannot be trifled with—by inspiring the enemy with the conviction that he will always do what *ought* to be done—the enterprising General hampers his opponent, restricts his plan, binds him in the many doubts of fear," and thus exercises an influence which, though purely personal, is yet equal in itself to an army. General GRANT's military conduct throughout his whole career has justly given him the right and title to this kind of moral power, and we are much mistaken if the rebels do not in the future feel it.

THE QUESTION OF EXCHANGE.

WE have further light on the vexed question of an exchange of prisoners in an unofficial statement from Major-General HITCHCOCK, who presents very clearly and forcibly the real cause of difficulty, in the determined purpose of the rebel authorities to consent to no further exchange, except upon terms which will neutralize the great advantage we now have in prisoners, and leave them free to carry out their murderous purpose toward our officers and men of the *Corps d' Afrique*.

General HITCHCOCK shows that the Government of the United States, in authorizing the employment of colored troops, stands engaged before the world to make no compromise whatever which shall jeopardize the claim of this class of troops, when captured, to be treated with that humanity which is due to all other troops in like circumstances, according to the usage of civilized warfare: that the rebel authorities have steadily refused to recognize the officers and men of our negro regiments as soldiers, subject to the laws and usages of war, and that they have either murdered them, cast them into prison, or sold them into slavery. That though they have thus for been very quiet in carrying out this their declared policy, the sole reason why it has not been more openly inaugurated is because of the superior number of prisoners of war held in the North against those held in the South, and if this inequality could now be neutralized, not a moment would be lost by the rebel authorities in putting in force the "Jeff. DAVIS" law. He asserts that no single instance has the smallest evidence come to light tending to show that any officer connected with colored troops has been captured alive and held in the South as a prisoner of war; nor has any colored man, employed as a soldier of the United States, been captured in the South and accounted for as a prisoner of war.

The offer, therefore, of the rebel commissioner, to consent to a parole of all prisoners on both sides, is a mere subterfuge, as it is clearly not intended to apply to the officers and men of colored regiments. Mr. OLDS has, is it true, offered to exchange *all* the the prisoners of war in *his* hands against all that we have in our hands, the surplus to remain on parole, but he omits to add that by the action of the Confederate authorities, not a single man, officer or soldier, belonging to the *Corps d' Afrique* has been or will be permitted to come into his hands. This is the real point of difficulty in the matter of exchange, and the only one, we apprehend, which our Government might not consent to waive, rather than leave our men to freeze and starve any longer in their Southern prisons. They have offered, General HITCHCOCK tells us, to send to Mr. OLDS 12,000 or more Confederate prisoners, as many as they may hold of our men, and receive in return our prisoners held in the South. They have proposed, also, to receive all of the prisoners from Richmond under a solemn pledge that they shall not be allowed to take arms against the Confederacy with the consent of the rebel authorities, without reference to existing difficulties on the subject of exchange; and to both feed and clothe all rebel prisoners in their hands. Both of these propositions have been rejected, and the only terms upon which we can release our suffering soldiers is by consenting to give our surplus of 27,000 prisoners to the hooor of the men who have assumed to liberate from the obligations of their parole the prisoners we took at Vicksburgh and Port Hudson, and suffer them at the same time to retain the officers and men of our *Corps d' Afrique*, to be dealt with as they see fit.

True, there is a specious claim in some of our Northern journals that the rebel authorities have a right to deal with our colored troops when captured as every government, *de facto* as well as *de jure*, deals with those whose service it claims whenever they join the enemy. But how this claim, if it possess anything, proves that our Government should allow the rebel authorities to deal as they please, not only with our negro troops, but with the officers and men in our service who are natives of the States of Missouri, Kentucky, Tennessee, Maryland and Western Virginia, all of which are claimed to be a portion of the Southern Confederacy. And how does it apply to the officers of the *Corps d' Afrique*, upon whose allegiance the South does not assume to assert even a shadow of a claim?

The question of exchange, we thus see, narrows itself to the single point whether or not our Government will consent to have a portion of the troops it has lawfully employed in the service dealt with as outlaws and murderers, subject to none of the laws or usages of civilized war. The question is one of no slight importance, if we are to accept the assurance of General HITCHCOCK "that the *Corps d' Afrique*, in "the service of the Government, already numbers "fifty thousand men of color, who are fighting "in support of this Government, under the guidance "of a body of most earnest and intelligent officers, "who count their lives as subordinate to the cause "they are engaged in."

A PRIVATE note from a veteran officer of the Regular Army has these remarks upon the Gettysburgh battle-field Cemetery:—"At Gettysburgh, on the "three first days of July, the Regulars, out of 2,044 "men, lost 1,000—by far the heaviest loss, proportion- "ately, suffered by any body of men on that field. "And yet, while every State whose volunteers were "engaged is to have a plot for its illustrious dead, "these brave fellows of our old Regular Army, many "of whom had served for twenty years, and who "finally met their death in the van, are to be buried "with the subordinate officers and common dead, "because they fought but voted not—put on a level "with the horses that fell with them, because their "officers were soldiers and not politicians." We hope it is not yet too late to remedy the neglect concerning which our correspondent writes so bitterly. Probably a good, as it certainly would be an honorable, provision for the burial of the soldiers of the Regular Army who fell at Gettysburgh, would be at the base of the proposed monument, on the inside, fronting the tier of State burial plots. If the matter is to be attended to at all, as we earnestly hope it may, it should be done at once.

THE recent death of the French Algerine General BEDEAU, has given occasion for the revival in Europe of a *canard* which we noticed there a few years ago. It is to the effect that, shortly after the war broke out, General BEDEAU was offered by the United States Government the command of our Army; but, we are told, "these overtures were declined by the General, "as he *would not consent to be a Commander-in-Chief* "under the orders of an Attorney War-Secretary." As this alleged episode in the life of General BEDEAU is likely to pass into his biography and into history, we hope that some pains will be taken to furnish us with information as to *who* offered General BEDEAU the position of Commander-in-Chief (we suppose by this term is meant the command of the chief Army, or Army of the Potomac; for we may inform Europeans that the PRESIDENT is the constitutional and titular "Commander-in-Chief" of our troops and armies in actual service), and to give us all the documents and correspondence bearing upon the question. The story was originally set afloat in Europe after the first battle of Manassas Plains, when Lieutenant-General SCOTT was actively directing military operations. It is quite likely that about this time overtures were made to General BEDEAU to accept a Brevet position in the War Office in Washington; and the General's vanity may have led him to magnify this into an offer of the Commandership-in-Chief; but we need no authority to deny what by authority we do deny, that neither he nor any other European General ever had any such offer from our Government or any one acting officially under it.

AN important question under the prize law was decided in the United States Circuit Court, in this city, last week, by Judge NELSON. The case was that of the United States against the bark *Empress* and cargo, and the question presented was whether or not the Court could award damages and costs against the captors on a decree of an illegal seizure of the property, and restoration of it to the claimants. Judge NELSON decided that the seizure of the vessel or cargo, whether as enemy's property, for a breach of blockade, or as contraband, is the act of the Government by her public armed vessels, and for which it, and not the party making the capture, is responsible, if unauthorized, to the party aggrieved.

THE attempt to launch the iron-clad *Dictator* last week, resulted in a failure, owing to the insufficient inclination given to the ways. Only half an inch to a foot was allowed for this vessel, weighing over five and a half million of pounds, when the rule establishes from five-eighths to three-quarters of an inch as the inclination necessary for ordinary vessels; and, we believe, in the case of the original *Monitor* an inch and one-and one-quarter inches were allowed. An entire change will be made in the machinery for launching, and another attempt will be made about the 10th of December.

THE assault of one of the New York daily papers upon General GILLMORE for alleged ill-treatment of his negro troops, is very well answered by an order issued last month by that General, in which he takes occasion to rebuke the conduct of his command "for "employing improper labors upon colored troops," and calls their attention to a previous order, wherein the same treatment is commanded to be bestowed upon black and white soldiers, and the same opportunities for drill and instruction to be afforded to them.

TWO more contractors have been brought to grief—CHARLES W. HALL, of Indianapolis, Ind., and E. A. SMITH. They were proved guilty of fraudulent conduct by a court-martial assembled at Cincinnati, Ohio, and sentenced, the one to be imprisoned for six months, and to pay a fine of ten thousand dollars; the other to be imprisoned for one year, and to pay a fine of twenty thousand dollars, and if this fine is not paid at the expiration of said imprisonment, to be imprisoned until it is paid. HALL's fraud consisted in paying WILLIAM WOON, the Inspector of Horses at Louisville, a dollar a head as a bribe for passing unsound horses which he was supplying to the Government, under contract for good ones; the whole sum so paid reaching $1,445. SMITH was a partner of HALL in the transaction, as he is in his punishment, and also tried a similar game on his own account.

COLONEL Wiswell, Chief of the Invalid Corps; has addressed to the surgeons of the several hospitals, and to the Provost Marshals in whose districts invalid companies are stationed, a circular, requiring them to forward statements concerning the efficiency of the men and the degree to which their wounds may incapacitate them from service, for the purpose of ascertaining how far the organization has proved successful, and to what extent the Government may be justified in increasing the present forces. Instructions that might in any manner prove prejudicial to good order and discipline.

WE have an account of the repulse of General LONGSTREET in an assault on General BURNSIDE's position on the 29th, with a loss of nearly 700, besides 234 prisoners. Our loss was but 25.

FOREIGN MILITARY AND NAVAL MATTERS.

THE French frigate *Eurydice* was launched at Rochefort recently, with complete success.

SWEDEN is making naval preparations of a warlike character.

THE King of Italy lately reviewed twelve legions of the National Guard at Naples, and nine provincial battalions.

A St. Petersburgh letter mentions the launch of the *Sebastopol*, an iron-clad frigate. She is to carry engines of 1000 horse-power, and be armed with thirty-eight rifled guns.

THE Russian papers publish an Imperial ukase, ordering the formation of twelve new regiments of infantry, each containing three battalions. This force is intended to form ten third reserve corps.

THE *Prince Consort*, whose late unfortunate experience we described last week, has returned from Ireland to Plymouth, been put on a dock at Woolwich, England, are to be repaired. The balloonist will reconnoitre the movements of the troops, who will be marched some miles into the country beyond the entrenchments, in the same time as a pleasure party. He has provided a balloon of much larger dimensions than the former one, and will be supplied from the arsenal gasometer with 75,000 cubic feet of gas for its inflation.

ACCORDING to statements published, the artillery belonging to the Italian army comprises 71 batteries; but included of these batteries containing eight guns in each as in the Austrian service they contain only six. It is intended to rifle the whole of these eventually; at present fifty-two only are so. It is said to be well served in every way, and when Italian finances are in a more flourishing condition, CAVOUR's intention is increasing the number of batteries very greatly.

DURING the Crimean war, out of 309,570 men, the French lost, according to official returns, 75,000; and the English, from a total of 70,000, lost 22,000. These losses are attributed to hospital diseases, which the French, during the late Italian war, by following the precepts laid down by Miss NIGHTINGALE entirely avoided. Instead of crowding the patients together in a large hospital, as had hitherto been the fatal habit in the French army, the sick and wounded were dispersed in a large number of small "hospitals. There were as many as thirty-eight in the "town of Brescia."

PERPIGNAN, for building the *Lord Warden*, iron clad wooden screw steam-ship, have been commenced at Chatham dockyard. Her length is to be 280 feet, extreme breadth 58 ft. 9 in., and depth 27 ft. 9 in. She will be provided with the same thickness of armor-plating throughout, and will have a battery at her bow. The stem will project some 8 ft. or 9 ft. below the water. It is probable that the *Lord Warden* will be constructed to carry two independent screw-propellers, both working by means of separate engines. It is intended that she shall be completed and afloat within eighteen months from the present time.

BY order of the War Department a number of floating targets are being constructed on the plans invented by Captain SHUTTLEWORTH, Royal Artillery, are to be forwarded to Shoeburyness, Eastbourne, Dover, and other artillery stations. The targets, which, it is stated, which after repeated experiments in the presence of the Ordnance Select Committee has been finally adopted in the service, consist of a pontoon, which is divided into four compartments, with galvanized wire netting, and filled with twelve bushels of cork shavings. The whole is to be covered with tarred canvas, and surmounted by a 14 feet flag-staff painted white.

THE *Royal Oak*, which had her iron plates so badly damaged by galvanic action induced by the copper sheathing of her bottom, is at present in dock at Chatham. She is to be thoroughly repaired, and every effort will be made to prevent a repetition of the injury. One of the plates which she had been found to be 14 ft. 10 in. long, 2 ft. 10 in. deep, and 4½ in. thick, and weighs four tons. All her outside facing is to be thoroughly cleansed, the red lead is to be removed, and the holes made by the galvanic action are to be filled with composition. "BROWN'S Vitreous Sheathing" is to be used for the purpose of preventing the lower edge of iron plates from the galvanic action of the copper. The Monts' metal is to be removed.

THE Sardinian have floating batteries not unlike those proposed by England and France, which were built by M. VERLAQUE at Sienna. They are about 200 feet in length and 48 in width, and draw very nearly 17 feet of water. They are armed with 24 forty-pounders and 6 eighty-pounders, all of them rifled. The total weight of these guns, including 150 rounds of ammunition to each, is 220 tons. They are fitted with screw propellers worked by engines of 400 horse-power, and have attained a speed of eleven knots an hour. From the description given of them, it is evident they are not to be despised on the score of strength or speed, they are unfit for navigating any sea except the smooth Mediterranean, and even there they roll very much.

FOUR muzzle-loading BLAKELY guns have lately been received at the Royal Arsenal. They are said to weigh about twenty tons, and are apparently made of cast-iron, hooped with wrought-iron over the breech, and completed with a very large trunnion coil. This gives the guns a somewhat unsightly appearance, from their being so many inches larger at the trunnions than at the breech. All four are rifled with thirteen grooves. After thoroughly examining the interior of artillery, they will be submitted to the test of "proof" charges of gunpowder; they will then be further tested on the usual plan, with view to their four guns the "proof stamp," and thus registered as fit for the service of the foreign country for whom they may be made.

IT is evident from articles in the *Invalide*, the organ of the Russian Minister of War, that the government will immediately increase the force of troops. The direction of all the most recent ukases of the EMPEROR to the object of facilitating the promotion of officers, and thus supply the army with its full complement of officers of inferior grades; the refusal of leave of absence and discharges to all officers and private soldiers; the calling out of the separate army of the Caucasus and of the active army, as well as the army in Finland, show clearly enough that the preparations for war are carried on more actively than ever. Extraordinary activity is exhibited in every department of the War Office and Admiralty, and the whole machinery of the government is put in motion to aid the efforts of these two branches of the public service.

THE military schools of Russia, which within the last year have been placed under the direction of the WAR MINISTER, are undergoing a change. The condition of the Russian soldier has been greatly improved of late years. Formerly his term of service was twenty-five years, his allowance of food was scanty and bad, and was always insufficient. The consequence was, which was that deserters were so frequent that the commanding officers were allowed to keep back a third number of desertions in their respective corps within a specified time, did not exceed a certain proportion, they should receive a reward in money and leave and allowances. In spite of this, it was a long time before the claimants of this bonus were at all numerous; but after the term of service had been reduced to 15 years, the allowance of food increased, and sundry other reforms introduced, the number of desertions diminished to such a degree that the payments made to officers on the account above mentioned, amounted to 12,177 roubles; in 1860, to 54,790 roubles; and in 1861, to 74,000 roubles. The most remarkable fact in this absence of desertion has been that in future these payments are to be discontinued. It has also been decreed that the punishment of the stick shall be confined to hardened and altogether incorrigible offenders.

THE EMPEROR NAPOLEON'S LETTER.

THE Paris *Moniteur* of the 11th instant publishes the letter of the EMPEROR of the French to the Sovereigns of Europe proposing a Congress. The *Moniteur* prefaces the document with the remark that the French Government had not been informed, as it had elsewhere in the journal, but on the copy addressed to the German Confederation had appeared in a Frankfort journal, the motive for any further postponement of it no longer existed. The following is the full text of the letter:—

Sire and Right and Dear Brother, Illustrious Princes, Sovereigns, and Free Cities composing the most serene Confederation of Germany:

In presence of the events which arise and press each day, I deem it indispensable to address myself in a frank way to the Sovereigns to whom is confided the destiny of peoples.

Whenever profound shocks have unsettled the bases and disjointed the traditions on which existing institutions have taken place in order to co-ordinate the new elements, and to consecrate, by accepting them, the modifications which time has brought. Such has been the object of the treaty of Westphalia in the seventeenth century, and of the negotiations of Vienna in 1815. It is on this basis that the political system of all Europe now rests; and yet—you are not unaware of it—it is crumbling on all sides.

In the midst of the particularly the situation of different countries, it is impossible not to recognize that on almost all points the treaties of Vienna are destroyed, modified, or have fallen into disuse. Some of them, without regulating, rights without title, and pretensions without restraint; disregard the most legitimate aspirations, and the most imperious produced by civilization, which has united peoples one with another by the reciprocity of material interests, would make war still more destructive.

Here is matter for serious meditation. Let us not wait, in order to come to a resolution, till sudden irresistible events overthrow all that we have in the way of laws themselves, into opposite directions.

I come, therefore, to propose to you to regulate the present, and to secure the future, in a Congress.

Called to the throne by Providence and the will of the French people, but having, as a result of my policy, in a measure, perhaps, less allowable for me than another to ignore the rights of sovereigns and the legitimate aspirations of peoples. Thus I am ready, without a preconceived system, to carry into an International Congress the spirit of moderation and justice ordinarily the portion of those who have ordered so many victories.

If I take the initiative in this overture I do not yield to an impulse of ambition. I am, as the sovereigns to whom the most ambitious projects are attributed, I have it at heart to prove by this frank and loyal step that my sole object is to arrive without a shock, at the pacification of Europe.

In case the princes, allies, and friends of France should deem it suitable to enhance by their authority the authority of the deliberations, I should be proud to offer them a cordial hospitality.

Europe would perhaps see some advantage in the capital whence the signal for subversions has so many times issued becoming the seat of conferences destined to lay the bases of a general pacification.

I take this occasion to renew to you the assurances of the sincere attachment and lively interest which I take in the prosperity of the States of the Confederation. Whenever, most high and very illustrious princes, sovereigns, and free cities composing the union across Confederation of Germany, I pray God to have you in His holy and worthy protection.

Written at Paris, November 4, in the year of grace 1863.

NAPOLEON.

Countersigned, DROUYN DE L'HUYS.

THE RUSSIAN NAVY.

WE continue to receive reports from Russia which show that the CZAR is still vigorously at work strengthening his navy, and putting it upon a footing to resist the power of England and France in case of war. Two iron-clad frigates, the *Sebastopol* and the *Petropaulovsk*, have been recently completed, and the former being now in commission. These two frigates are to have armor of a new description, of which the thickness is to be one hundred and fourteen millimetres on the centre, and to diminish gradually to sixty-three millimetres at the extremities. It is expected by this method to obtain a strength superior to anything yet manufactured. The steamships *Constantine* and *Emperor Nicholas I* are to be converted into iron-clads, and to carry a double tier of guns, on the model of the *Peresviet*, which passed the first iron-clad ship-of-war. One hundred rifled cannon, cast at a private establishment in Prussia, have been delivered to the arm their ships. Manufactory for manning the fleet are also in progress.

Ever since the war with the allied powers revealed the weakness of its navy, Russia has been engaged in reconstructing her marine. In 1854 she could muster only some two or three ocean steamers, and had altogether but 45 steam-navy-ships of the line, eighteen frigates, forty corvettes and smaller vessels, and about twenty steamers at all kinds. Of these, 14 ships of the line and 10 frigates, and 34 steamers in the Black Sea alone, 60 in the Baltic, 20 in the Caspian Sea, 24 in the Amoor, 8 in the White Sea, and 24 in the Sea of Aral, besides a host of yachts and transports. Three of these vessels, as we have before stated, are fast screw-liners, one mounting 111 guns, and the mounting 130 guns each. The remaining seven of 74 and 84 guns, and ten are fine screw frigates.

The Russian navy has ninety admirals and generals of marine. The naval staff, exclusive of the EMPEROR's personal suite (comprising two rear-admirals, two navy adjutants, and three lieutenant-colonels), consists of a chief and a deputy, a master of ordnance of the reserve artillery, an inspector of the naval architects, a chief of the marine chancery, and a procurator general, and a deputy.

The ministry of marine includes a council of ten admirals, a president, and ten clerks. Five departments attached to the vice-admiral and six other inspectors; a lieutenant-general at the head of the hydrographical department, a medical director-general, and an inspector of the clergy. It besides the above, the engineering department, to which the superintendence of naval fortresses is committed; the marine training department, at the head of which is an admiral the marine intendancy, under that of a lieutenant-general; the marine commissariat; the ship-building, timber and marine artillery department.

MILITARY RENOWN GAINED IN YOUTH.

FROM GENERAL HALLECK'S "Military Art and Science," we extract some facts in regard to the history of great generals. As GENERAL HALLECK says, "most military writers, ancient and modern times have gained their laurels while still "young."

ALEXANDER THE GREAT had defeated the celebrated Theban band at the battle of Chæronea, and gained a military reputation at the age of eighteen. He ascended the throne of Macedon at the age of twenty, and at twenty-five had reached the zenith of his military glory, having already conquered the Persian Empire. He died before he was thirty-two. JULIUS CESAR commanded a fleet at twenty-two; was consul before forty; had conquered all Gaul and twice crossed the Rhine and invaded Britain at fifty-two; at fifty-six, the victor of five hundred battles, and the conqueror of a thousand cities. HANNIBAL was commander-in-chief at twenty-six, had conquered all Spain at twenty-seven at sixteen, and at twenty-one closed his military career. GENGHIS KHAN united and conquered the thousand and one warring tribes, at thirty; at forty, he had made himself emperor of Mogul. HENRY THE FOURTH of France commanded the Huguenot army at twenty-one, was proclaimed King of Navarre; at forty he had overthrown all his enemies, placed himself on the throne of France, and become the founder of a new dynasty. DARIUS entered the army at twelve years of age; soon commanded a regiment of horse; at twenty-four he became Marechal de Camp, and at thirty-two King of Persia. PYRRHUS was proclaimed an army at the age of sixteen. PETER THE GREAT was proclaimed Czar at ten years old. GUSTAVUS ADOLPHUS of Sweden ascended the throne at fifteen; completed his first successful campaign against Denmark at eighteen, overthrew eight thousand Russians at Narva before nineteen, and conquered Poland and Saxony at twenty-four. CORTEZ conquered Mexico at thirty-six, and PIZARRO conquered PERU at thirty-five. NAPOLEON was lieutenant at seventeen, captain at twenty, chef de battalion at twenty-four, general of brigade at twenty-five, and commander-in-chief of the army at Italy at twenty-six. DESSAIX entered the army at fifteen, and after rapidly passing through the intermediate grades, was killed as chef de division at 34; he died before the age of thirty-two, with a reputation second only to that of NAPOLEON.

MASSACHUSETTS VOLUNTEERS.

The following Commissions have been issued by direction of His Excellency John A. Andrew, Governor and Commander-in-Chief:

NINTH REGIMENT.—Rev. G. I. Fox, of Washington, D. C., to be Major, September 19, 1863, vice Scully, discharged.

ELEVENTH REGIMENT.—Second Lieutenant David L. Willcutt, of Lowell, to be First Lieutenant, October 29, 1863, vice Farwell, resigned.

TWENTIETH REGIMENT.—First Lieutenant Wm. B. Rimbull, of Westborough, to be Captain, October 4, 1863, vice Pope, discharged.

First Lieutenant Martin F. Tower, of Randolph, to be Captain, October 29, 1863, vice Colburn, promoted Major, (29th Regiment of Infantry.)

Second Lieutenant Michael J. Dogney, of Roxbury, to be First Lieutenant, October 29, 1863, vice Tower, promoted.

Second Lieutenant Samuel E. Cary, of Boston, to be First Lieutenant, October 29, 1863, vice Kelliher, resigned.

TWENTY-FOURTH REGIMENT.—Rev. Edward B. Wilson, of Salem, to be Chaplain, October 21, 1863, vice Hall, resigned.

TWENTY-SIXTH REGIMENT.—Second Lieutenant Archibald Sturtevant, of Boston, to be First Lieutenant, October 30, 1863, vice Whitcomb, accepted.

Second Lieutenant Russell G. Houghton, of Townsend, to be First Lieutenant, August 11, 1863, vice Yarrington, promoted Major in Corps d'Afrique.

Sergeant Samuel D. Hoyt, of Groton, to be Second Lieutenant, August 4, 1863, vice Houghton, promoted First Lieutenant.

Acting Master W. L. Cheeseman, commanding the *Magnolia*, to the grade of Volunteer Lieutenant.

Acting Master Edward Hooper, commanding the *Alabama*, to the grade of Acting Volunteer Lieutenant.

NAVY YARDS.

BROOKLYN NAVY YARD.

In compliance with the order of the Navy Department directing salaried laborers in the navy yards to work eight hours, all the workmen employed, some 300 men have been discharged within the past week. The reason assigned for this order is, that the progress of the hulls of the ships building has been greater than that of the machinery. The workmen discharged were taken from all the departments except the shops. The gunboats *Ionen*, *Fort Jackson*, *Pittsburgh* and *Ashuelot* are expected to sail shortly.

During the past week, three arrivals have been reported—the *Southern*, T. A. Hunt, Commander, from the Gulf of Mexico; Commander Geo. M. Ransom, on Nov. 29; and the *Sachem*, Lieutenant-Commander Vickery, on Dec. 2. There have been no departures.

The *Tuscarora* is receiving her spar and stores. She is expected to leave for the North Atlantic Blockading Squadron the beginning of next week.

The U. S. side-wheel steamer *Tallahoma* was launched on Saturday last. Her dimensions are as follows: Length, 240 feet; width, 35 feet; and depth of hold, 17feet. She is built of the best live oak and two decks, up and main. She is to have two smooth bore 42-pdr. guns will be pivoted, and on the latter the crew will sleep. She will be schooner-rigged. The machinery was hauled out of dry dock on Tuesday. The *Grand Gulf* takes her place.

The steamer *Algonquin* will be ready to launch in six or eight weeks. The machinery is now being put on board and will be finished.

The following twelve vessels are at this port for repairs—The steamers *R. R. Cuyler*, fort of 12th street; *Augusta*, foot of Water street; *Governor*, foot of Roosevelt street; *Thomas Kinsley*, foot of Sydney's Wharf, Williamsburgh; *Hydrogen*, Polley's Wharf, Williamsburgh; *Sam Sloop*, Polley's Wharf, Williamsburgh; *Monmee*, foot of 23d street; *Thomas Jackson*, foot of 10th street; *Seaward*, foot of Delancy street; *Merriance*, foot of 12th street; *Dunville*, foot of 6th street; and ship *Republic*, foot of Jackson street.

The following vessels are at this port taking coal preparing for sea:—*Sachem*, foot of Delancy street; *Chicopee*, foot of 8th street; *Monona*, *Stamm*, Dock, Brooklyn; *Circassian*, foot of 8th street; *Agawam*, foot of Delancy street; *Tuscarora*, foot of Jackson street; *Kansas*, foot of 9th street; *Neosho*, foot of 8th street; *Proteus*, foot of 10th street; *Wyoming*, foot of Hartigon street; *Suwanee*, Atlantic Dock, Brooklyn.

WASHINGTON NAVY YARD.

The experiments with super-heated steam on board the gunboat *Pawnee* have been completed, and she is expected to pass through the tubes which were subjected to an intense heat, thereby reducing the steam to a great extent, and increasing its power nearly thirty-three per cent, burning less fuel. The *Pawnee* will be ready for sea and go a few days on a trial trip to Fortress Monroe. The President and other distinguished personages are expected to accompany her on the trip.

Two prizes, the *Chisholm* and *Arctic*, (schooners), captured while attempting to run the blockade into Charleston, arrived at the yard on Monday last, in charge of Acting Master Arthur Sherburne Hardy, and the latter in charge of Acting Ensign H. G. Kenzee. Both vessels are loaded with cotton, and are very fine boats. The *Arctic* is a new vessel, and in excellent sailing order.

The repairs on the gunboat *Sagamore* have not yet been completed. It is expected she will be ready for sea in the course of eight or ten days. Twenty-seven of her crew have deserted since she arrived here.

The supply steamer *Baltimore*, which has been lying at the wharf for some time past, has been placed on the ways for repairs.

The following is a list of the arrivals at the yard this week: Tuesday—*Uncle Sam*; steam-packet *H. F. Downing*, with ordnance and naval stores; steam-packet *Seymour*, from New York, with shot and bullet tests; *Dragon*, *Eureka*, *Wyandank* and *King Philip*. The steamer *Ella* left on Monday for service on the Lower Potomac.

The repairs on the *Eureka* are being pushed forward, and making a new quarter-deck erected, and is being otherwise greatly improved. The *Princess Royal* has been taken out to be repaired or replaced by a new one.

PHILADELPHIA NAVY YARD.

There is nothing of any great interest to report from this port. Side-wheel steamer *Quaker City*, Lt. Commander J. M. Frailey, left her moorings last Saturday, for the North Atlantic Squadron. She has been at the station for several weeks receiving repairs to her prow, which was injured by a collision in the stream.

BOSTON NAVY YARD.

At the Charlestown Yard, the *Vicksburgh* is in the dock; the *Adirondack* will soon be ready to sail, the *Hartford* is about two weeks, and the *Ohio* about three weeks. The *Queen*, *Sacramento*, and *Hendrik Hudson* will also be ready in a short time.

The British steamer *Nassau* has been chartered by Master King, from Port Royal, South Carolina, arrived on the 28th ult. She was captured October 5, by the gunboat *Pequot*, on the Bahama Banks, while on the passage from Nassau to Wilmington.

Screw steamer *Nyanza*, 7, which was damaged by a collision with a blockade-runner, is now lying in the stream, awaiting an examination by a board of officers.

VARIOUS NAVAL MATTERS.

Store-of-war *St. Mary's*, 16, sailed from Pensacola, New Granada, Nov. 16, on a cruise.

Four vessels of the Russian fleet arrived in the Potomac, of Anne Arundel, on Monday.

Steamship *Saginaw*, 9, was at La Union Nov. 10, where she will remain for about 20 days.

Side-wheel steamer *Vanderbilt*, 14, Acting Lieutenant Baldwin, arrived at Port Lavaca, Texas, Oct. 4. All well.

The British brig *Fidani*, with a general cargo, arrived at New Orleans on the 19th ult., from Liverpool. She was captured by the *Kanawha*.

Sloop *Iris*, 9, Acting Master commanding Gardner, from Portland, arrived at Bath, Me., on Sunday. She is on a cruise along the coast to recruit seamen.

Iron-clad steamer *Winnebago*, 2, has joined the Mississippi Squadron, after a term of six months' service with the rebel land and naval forces on Grand Lake.

The steamers *Hermann Aniis* and *Matamoras*, laden with cotton, have arrived at New Orleans. The steamer *Bermuda*, with a cargo of cotton, was captured by the gunboat *Estrella*, from a rebel land force and a naval force was found on the steamer and among the passengers.

The steamer *Ella* left Washington on Monday last, for Memphis, and a Cincinnati paper says: "She has 4,000 sacks of Government grain on board and is in charge of Lieutenant Commander Fitzhugh Green. Two of the crew were scalded. There were no casualties among the passengers.

It is reported that no less than fourteen blockade-runners arrived at Nassau from the 1st to the 20th of October. The steamer *Thistle*, from Mobile—runner from Greenock, the *City of Petersburgh*, had arrived. The *Thistle* was formerly the steamer *Ella* from Nassau, and was fitted with all on board, but the report is not believed.

The steamer *Bermuda*, which was captured during Lieutenant-Commander Smith, of the steamer *Bermuda*, has re-captured the schooner *Mary Campbell*, off the mouth of the Rio Grande, and has arrived with her at the mouth of the Mississippi.

The steamer *James Drake*, two other schooners were in company with the *Mary Campbell* when the *Bermuda* was re-captured by the *Estrella*. Her cargo is not known.

Some months ago the United States steamer *Tuscarora* boarded the British steamer *Peterhoff*, and found on board a mail for the English queen and complained that this was a great outrage. The *Thistle* has one of the same mail bags taken out of the *Chesolee*, and it turns out that at the time she was boarded, she was really on a voyage from the Queen to the Nassau Post Office, and the mail bag was put on board the *Thistle* in all due haste to obtain the steamer, which they searched her.

ARMAMENT OF THE *Ossipee*.—The armament of the *Ossipee* will consist of 8 55,000 men. The vessels of the squadron are classed as follows:—Steamers, 1; ram, 1; monitor, 1; armed steamers, 2; tugs, 4; armed steamers, 4; tugs, 7; auxiliary vessels, 12; of all classes building, 23. Total, 105. A number of the vessels are now in the Gulf of Mexico. Mount City, but it is said that as soon as high water in the river rises so that it will make the passage of the Cairo, Illinois, and the near the Red, White and Arkansas Rivers, where her operations for Water will probably be confined

ASSISTANT GEORGE H. Caldwell, 21st Regiment, West Virginia Infantry, has been appointed Assistant Adjutant General to Major Gen. Kelley.

MAJOR F. A. Roth, 1st Massachusetts Heavy Artillery, has been ordered from Harper's Ferry, Va., to Washington, D. C.

COLONEL Charles Ewing, 30th Regiment Ohio Volunteers, N. Y. Vols., has been ordered to Cincinnati, Ohio, to attend the court-martial which is to be held in that city for the trial of Brig. Gen. Carrington, U. S. Army.

CAPTAINS Nathaniel A. Wright, 147th N. Y. Vols., and Thomas K. Rubie, 13th Connecticut Vols., and Lieutenant George Tapp, 13th Ct. Vols., and Adjutant 147th N. Y. Volunteers Vols., Brad Orders have been dishonorably discharged the service.

MAJOR-General Hartsuff, who is now on court-martial duty at Cincinnati, Ohio, is the officer who was severely wounded while fighting at Antietam. He will return to the field as soon as his wound will allow him to do so, and will be assigned to the command of a department of the Ohio.

THE Provost Marshal General issued a General Order suspending all unnecessary labor in his Department on Thanksgiving Day, and directed the commanding officers of posts to cause divine service to be held at some convenient place within their respective commands.

An honour of Patterson Park Hospital writes us that the letter of Surgeon Wood, published in our issue of Nov. 21st, is incorrect in relation. Our correspondent says:—"We had everything that a person could wish for, and the Surgeon in charge was very kind and attentive to numerous to mention. About five hundred sat down to both dinner and supper."

THE U. S. Revenue cutter *J. R. Black*, stationed at Eastport, Me., boarded during the month of October, 27 ships, 42 barks and 47 brigs, and examined their papers, and found all to be correct and was under weigh at 22 different times. She cruises from Mount Desert Rock to Cape Ann. Lieutenant W. H. Ludlow, Jr., U. S. Navy, Captain; H. S. De Hart, Executive Officer; J. H. Hibbs, Third Assistant Engineer; and Wm. Berry, Gunner.

MAJOR-General Gillmore orders that after November 25th, officers leaving the post at which they are stationed, whether upon duty, leave of absence, must register their names at the office of the Chief Commander, with a memorandum of their orders, and, in case of leave of absence, the length of time for which the leave is granted. Officers arriving at the post will report their arrival in person or by letter at the office of the Post Commander, and report their orders in person to the Commanding General, or Chief Commander, in which case they are to report their arrival by letter at the office of the Post Commander, and report their orders in person or Assistant Adjutant-General.

The following officers have been honorably discharged this week:

Captains W. B. Foster, 2d Pa. Vols., Jessie Cunningham, 86th Pa. Vols., and Joseph Le Boutillier, 40th Pa. Vols.; Lieutenants Charles H. Knox, 16th Pa. Cavalry, William J. Ashe, 145th Pa. Vols., Jerome Hoffman, 143d Pa. Vols., D. F. Weaver, 20th Pa. Vols., A. D. J. McDonald, 108th N. Y. Vols., and Burlington Hutton, 76th N. Y. Vols.

CAPTAIN A. J. Cohen, Asst. Adjutant-General U. S. Vols., Lieutenant Samuel Pettes, 13th U. S. Infantry, Captain John F. Clark, 121st Pa. Vols., Lieutenant George Hewson, 147th N. Y. Vols., and Daniel Smalley, 1st Maryland Cavalry, have been ordered to return to their commands.

The record of a court of inquiry convened to investigate the conduct of Major Patterson, 4th East Tennessee Volunteers, and the circumstances attending the surrender of Cumberland Gap, in October last, of the post and garrison of McMinnville, Tennessee, of which he was commanding officer, having been carefully examined by Major-General Thomas, he is satisfied that Major Patterson acted to the best of his judgment, and is, therefore, exonerated from all charges in connection therewith. Major Patterson has been ordered to rejoin his regiment at once.

A *boy's ration* issued to one of our prisoners at the Libby Prison is exhibited in Washington. It consists of a piece of unsifted cornmeal cake, which is 7 inches in diameter, of being ground, cob and all, in one mass, mixed with a little water and baked. It is 2¼ inches thick, 14 inches long and 7 wide, and weighs 12 ounces. It was issued, with a plentiful supply of river water, to Wm. Norman, an Iowa soldier, a prisoner of war at Libby Prison, on the 18th day of November, 1863, the day he was exchanged, after seven months' confinement.

GENERAL John Morgan and six of his officers, viz: Captains Bennett, Taylor, Sheldon, Haynes, Hockersmith and Magee, escaped from the Columbus Penitentiary last week, Friday night, by digging through the floor of their cell to a sewer leading to the river. One thousand dollars' reward was offered for the arrest of Morgan, but he got safely off. Two of his fellow runaways have been since captured.

A CONSCRIPTMEN writes:—"An intelligent rebel deserter reports that Jeff Davis' last wound having broken out afresh caused his death, a short time ago. General Early is in command of Lee's corps."

By order of the War Department, the members, recorder and witnesses of and before Boards instituted under section 17, act of August 3, 1861, to examine the cases of officers recommended for the retired list, will be allowed the same extra pay and travelling allowances as in the case of officers on detached service,—to take effect from the date mentioned in the above cited act.

MARRIED.

[Announcements of marriages and deaths should be paid for at the rate of *fifty cents* each.]

HARVEY—WILCOX.—In East Medford, Mass., Nov. 16, by the Rev. Mr. Hall, Lieutenant Charles Harvey, 2d U. S. Artillery, to Miss Caroline A. Wilcox.

DIED.

BERGER.—On Friday morning, Nov. 27, Sergeant-Major Jacob Berger, late of Co. C, Harris' Cav., aged 27 years.

SCOTT.—On Wednesday, Nov. 25, Lieut. Col. Robert Scott, 2d Regiment Connecticut Heavy Artillery, in the 39th year of his age.

The friends of the family are invited to attend the funeral from the Connecticut Asylum, 6 P. M. to-day.

WEBB.—At Harewood Hospital, near Washington, on the 24th inst., Lieutenant Edward Burnett Webb, of Company D, 108th Regiment Pennsylvania Volunteers, aged 21 years. Mr. Webb was promoted from the ranks on the 5th instant, on the battle of Rappahannock Station.

LOCKWOOD.—Killed at Rappahannock Station, Nov. 25, Major Gilbert M. Lockwood, son of Jason and Ruth H. Lockwood, aged 23 years.

OBITUARY.

BRIGADIER-GENERAL WILLIAM P. SANDERS

who was wounded in the battle of Campbell's Station, and died on the 18th inst. at Knoxville, was a native of Kentucky. He was pleased at West Point in 1856, and entered the service as a Lieutenant in the dragoons, joined Albert Sidney Johnston's command in Utah, and served in the Peninsular campaign afterwards accepted the office of Colonel of a Volunteer regiment in Kentucky, and performed good service in command of it. He was, in 1862, also appointed Brigadier-General of Volunteers and commanded a brigade of cavalry of the Fifth Corps of Cavalry in East Tennessee. He was a brilliant officer, and his loss is severely felt.

Major-General Burnside has issued a noble eulogy of southern officers of the old Army, who, "unmindful of their honor, have become traitors and patriots." He was a thorough gentleman and thorough soldier.

ADVERTISEMENTS.

Advertisements of a character suited to the columns of the JOURNAL will be inserted, in a limited extent, at every reasonable application. Terms, cash in advance. Copy for new matter should be sent on Monday.

WANTED.—Surgeons and Assistant Surgeons for colored regiments in the Department of the South. Applications to be addressed to Boards of all candidates must be examined before a Board of Medical Officers.

Boards are now in session at Boston, New York, Philadelphia, Cincinnati, Louisville, St. Louis and at Headquarters of the Armies of the Potomac, Cumberland and Tennessee.

Applications for examination should be made to the Surgeon-General, U. S. Army, Washington, D. C., and must be accompanied with one or more testimonials of character from officers of high standing in the service.

The Board will determine whether the candidate is qualified for Surgeon or Assistant Surgeon.

No application for the position of Acting Assistant Regular Medical College—non-graduates will not be examined.

WM. A. HAMMOND,
Acting Surgeon-General.

SURGEON-GENERAL'S OFFICE, NOV. 18, 1863.

UNITED STATES
ARMY AND NAVY JOURNAL;
A WEEKLY NEWSPAPER, DEVOTED TO THE INTERESTS OF THE ARMY AND NAVY, AND TO THE DISSEMINATION OF CORRECT MILITARY INFORMATION.

The ARMY AND NAVY JOURNAL is established in the interests of no party; it will be controlled by no clique. Its independence will be its boast. Avoiding all personal and political bias, its influence will be devoted exclusively to the honor of our noble military laws, and to the elevation of the public service to all its responsibilities. It will be the medium of its immortal military criticism by competent authority. It will be the champion of the rights of officers and soldiers against the wrongs of favoritism, and to a full and reliable record of all subjects that may in any way affect the welfare of the Army and Navy, their officers or interested in the art of war. The Army and Navy of Engineering which now has so large an association with warlike operations, will receive adequate attention. The Militia system of the States and of our Commercial Marine will also have an appropriate place. Whatever other questions may arise, the JOURNAL will contain from week to week:

The Latest News, in short, of whatever occurs in all parts of the world of value to our Army and Navy. No effort will be spared to render the JOURNAL complete in all its parts, and communications on any subject within the province of the JOURNAL, and likely to be those interested in the Art of War. It shall be the aim of the JOURNAL to be the best of the Army and Navy Military and Naval gazette, but at the same time a dispassionate, scholarly, liberal journal, which will be read with interest by the families and friends of those connected with the profession, and by the general body of the intelligent public.

The JOURNAL will publish Military and Naval affairs more thoroughly and promptly than any periodical records them; and it will be the persistent endeavor of the JOURNAL to deserve the confidence of the public by its reliability in the dissemination of subjects coming under its charge. It will publish promptly, and without favor to the National Union, shall commend itself to the public and to the Army and Navy by the accuracy and necessity in every text, formula, hospital and wound-report. It will be the JOURNAL'S object to furnish at such a demand, and it shall be the purpose of the proprietor to make the paper worthy of the confidence which will be spared in procuring at their organ, and which will be devoted to the best interests of the country, the duty of its class in the world. Arrangements for official reports of the Army and Navy are made with the competent writers on Military and Naval affairs in the country, and the JOURNAL will be the medium of issuance as well as news to the Journal early and complete in all its parts, and reliable.

From the numerous expressions of approval the JOURNAL has received from officers of the Army we select the following:

From Major-General GEORGE G. MEADE.

HEADQUARTERS ARMY OF THE POTOMAC, }
NOV. 7, 1863. }

W. C. CHURCH, Esq., 192 Broadway—

SIR: I am in receipt of a number of members of the ARMY AND NAVY JOURNAL, and take pleasure in expressing my opinion that they are the promise of an issuance of the journal which will be of great value to the officers of the army, and to its commissioners, and I therefore herewith enclose the necessary subscription.

Very respectfully, your obedient servant,

GEO. G. MEADE, Major-General Commanding.

From Major-General GEO. H. THOMAS, Commanding—

"I should think that the country supplies much paper to the Army and Navy, and that it will be well received every week. Military and naval, in the English. A paper of this character is much needed. My best wishes are all connected with the JOURNAL."

From Major-General W. B. FRENCH, *Commanding 3d Army Corps*—

"I fancy that the ARMY AND NAVY JOURNAL is commencing a career of usefulness, and I wish it success."

From Major-General JOSEPH HOOKER—

"I am pleased with the JOURNAL, and like its plan, and I take this opportunity to express my gratification that such a paper is published."

From Major-General JAMES S. NEGLEY, *Second Division* 14th *Army Corps*—

"You possess my personal and official interest in your enterprise. I observe with pleasure the favorable notice of the Army has my friendly consideration."

From Captain CHARLES CRAWFORD, *Pennsylvania*.

"A good paper of this kind has long been needed. Every officer and soldier should have a paper which will give him correct information, and the JOURNAL seems to be the paper promises to be a brilliant success. Its very varied and able corps of contributors, and the high character of the publishers, guarantee that promises will be fulfilled, and that a paper worthy of the cause will be issued. The form, paper, and typographical appearance of the JOURNAL are excellent, and just such a journal is sympathy with both officers and soldiers in the service."

Of the numerous notices of the newspaper press, we publish the following from the *Tribune*:

The ARMY AND NAVY JOURNAL is an honor to itself and to the country. It is a publication which will be found to subserve the spiritual of most of our distinguished navy officers during the war. It is devoted to the interests of the character and standing of those who lead the armies in the field, and the navies on the sea. It is edited by men and by every officer in the Army, as well as by our Militia officers, and by every officer in the Navy, as well as by our Militia officers, and by every officer in the Navy, as well as by our Militia officers, and by every officer in the Navy

ARMOR PLATES.

NAVY DEPARTMENT,
WASHINGTON, November 21, 1863.

THE DEPARTMENT will, until the 21st day of December next, receive proposals for the delivery at each of the Navy Yards at Portsmouth, N. H., Charlestown, Mass., Brooklyn, New York, and Philadelphia, of the armor plates described in the annexed specification, of the pattern for each vessel at each yard. The proposals may be separately for the side armor, stringers, and bulkheads, and may be for one or more vessels; but it must embrace the whole of each description of armor for a vessel, that is, the side armor, the stringers, or the side armor may be bid for separately.

DECK ARMOR.

Eleven hundred (1100) wrought-iron plates, more or less, ten (10) feet long, thirty-two (32) inches wide, and one and one-half (1½) inches thick.

A portion of these plates will be sheared to suit the curvature of the line of the vessels where the sides round the turrets and hatches, for which plates will be furnished to be delivered in eight (8) days from date of notice, and edges square, straight, and planed true to the said curve. The whole to be delivered within ten (10) months from the date of contract.

SIDE ARMOR.

Three Hundred and Forty (340) plates of wrought-iron, three (3) inches in thickness, of the following lengths and widths, viz:

1 plate	10 feet long	by	30	inches wide
	10	"	32	"
1	10 feet 6 inches long	"	30	"
24	10 "	"	32	"
1	10 " 2 "	"	30	"
1	10 " 2 "	"	32	"
14	9 " 6 "	"	30	"
14	9 " 6 "	"	32	"
1	9 " 7 "	"	30	"
1	9 " 7 "	"	32	"
1	9 " 8 "	"	30	"
1	9 " 8 "	"	32	"

1	9 " 9 "	"	32	"
1	9 " 10 "	"	30	"
1	9 " 10 "	"	32	"
1	9 " 11 "	"	30	"
1	9 " 11 "	"	32	"
1	10 "	"	30	"
1	10 "	"	32	"
1	10 " 2 "	"	30	"
1	10 " 2 "	"	32	"
1	10 " 3 "	"	30	"
1	10 " 3 "	"	32	"
1	10 " 4 "	"	30	"
1	10 " 4 "	"	32	"
1	10 " 5 "	"	30	"
1	10 " 5 "	"	32	"
1	10 " 6 "	"	30	"
1	10 " 6 "	"	32	"
1	10 " 7 "	"	30	"
1	10 " 7 "	"	32	"
1	10 " 8 "	"	30	"
1	10 " 8 "	"	32	"
1	10 " 9 "	"	30	"
1	10 " 9 "	"	32	"
1	10 " 10 "	"	30	"
1	10 " 10 "	"	32	"
1	10 " 11 "	"	30	"
1	10 " 11 "	"	32	"
1	10 " 12 "	"	30	"
1	10 " 12 "	"	32	"

The whole of the side armor to be made from the best iron, and will have to be wrought under steam-hammers and planed true to the sizes given. To be delivered in nine (9) months from the date of contract.

The whole of the iron to be of a quality that will bear a tensile strain of twenty-two (22) United States tons to the square inch.

No bids will be received except from parties who have established reputations for doing this work, and their establishments will be examined before a contract will be awarded.

Particulars will be given on application to the commandant of the Brooklyn, New York, Navy Yard.

The commandants will embrace the specifications, and the Department reserves the right to reject any or all the proposals that may be made in response to advertisement if, in its opinion, the public interests require.

The commandants must refer the plates proposed for which each class of the iron will be delivered in the respective Navy Yards, and shall require guarantees for a guarantee that the parties will execute a contract if awarded to them.

Note.—The side armor for each vessel will be double the quantity of the deck armor above mentioned, in two hundred and ninety-two (292) plates in number.

PROPOSALS FOR TIMBER FOR THE NAVY.

BUREAU OF ORDNANCE,
NAVY DEPARTMENT,
NOVEMBER 16, 1863.

Sealed proposals, indorsed "Proposals for Timber," will be received at this Bureau until three o'clock p. m. of the twentieth day of December next, for delivering and delivering under contract, at the several Navy Yards of WASHINGTON, N. H., BOSTON, N. Y., and Philadelphia, the following described timber and plank, for Ordnance purposes:

Class I. White Oak for Gun Carriages.
Class II. Live Oak and White Oak Wood.
Class III. White Ash and Hickory.
Class IV. Gun Stocks.

Separate offers must be made for the supply at each of the Navy Yards named, of each class of White Oak and the Hickory, White Wood, White Ash, and Plank; but the offer may be made for each class of timber for each Navy Yard.

Bidders are referred to the Ordnance Officers at the several Navy Yards and stations, and to the Chief of the Bureau of Ordnance, Navy Department, for such information as may be required relative to the form of proposals, giving description of the "Timber," time of delivering, and other particulars.

SALE OF REAL ESTATE IN THE STATE OF SOUTH CAROLINA.

Under the direction and instructions of the President of the United States, issued at the date of September 11th, 1863, in pursuance of the 11th section of an act entitled "An act for the Collection of Direct Taxes in Insurrectionary Districts within the United States, and for other purposes," approved June 7, 1862, and on act amendatory of the said act, approved February 6, 1863, I, EDWARD A. WILLCOX, Deputy for E. W. Gilbert, William Henry Brisbane, United States Direct Tax Commissioner for the State of South Carolina, do hereby proclaim and make known that a public sale will be held at the office of the commissioner aforesaid, in the town of Beaufort, in South Carolina, on Monday, the 18th day of January, 1864, at 10 o'clock A. M., and by adjournment from day to day, of the several lots, parts of lots, and blocks of land comprising the town of Beaufort aforesaid, together with the buildings thereon, to wit: Block One (1) to Block Four (4), inclusive, and parts of Blocks (27) Twenty-seven, according to a plat or map made of said town, February, 1863, duly established and authenticated by said Commissioners, and recorded in Valuation Book "A" of said Commissioners.

The following blocks, lots, and parts of lots are excepted and reserved from said sale, to wit: Lot B in Block 8; Blocks 16 and 18; Lot A in Block 21; Blocks 22, 23, 24, 25, and 26; Lots A and B in Block 27; Lot A in Block 28; Lots D and F in Block 36; Lot A in Block 37; Lots A, B, C, and D in Block 38; Lots E, F, G, H, and I in Block 39; Lots A, B, C, and D in Block 40; Lots A and F in Block 41; Lot B in Block 42; Lots A and C in Block 49; Lot A in Block 50; Lot D in Block 51; Lots A and C in Block 52; Lots A and F in Block 69; Lots A, B, C, and D in Block 70; Lots A, B, C, and D in Block 78, and Lot A in Block 90 and Blocks 124, 125, 126 and 132 of said plat; and said lots, parts of lots, and blocks, with buildings now occupied, and continuing to be occupied to the close of said sale, as military and hospitals, and as offices and storehouses of the Quartermaster's Department, Commissary Department, and Revenue and Public purposes.

The terms of said sale will be kept open longer than thirty days from the commencement of the same.

The terms of said sale will be cash, laid on each of said lots and blocks, to be publicly made by them, or by their authority, of such a part as they may deem eligible, not less than one third of the appraised value of said lots and blocks, and the residue in three equal payments, which shall not be laid to one-third of their appraised value, or more than that amount.

Given under my hand at Beaufort, South Carolina, this second day of December, 1863.

E. W. GILBERT,
WM. HENRY BRISBANE,
U. S. Direct Tax Commissioners for the District of South Carolina.

$2,000,000 LOAN OF THE COUNTY OF NEW YORK.

Subscriptions are hereby invited to a loan of Two Million Dollars, authorized by the unanimous vote of the Board of Supervisors, approved by the Mayor, October 30th, 1863, "An Ordinance for the payment of the interest of substitutes for drafted soldiers for the term of the County, and for the relief of such persons as are allowed on the quota of the city and county of New York under the act of Congress."

The proper books for such subscriptions will be opened at the Chamberlain's office, in the City Hall, on the 27th day of November instant, and remain open until the whole sum shall be taken.

Subscribers will be required to deposit with the Chamberlain, or with the Broadway Bank, within five days after receiving their subscriptions, the amounts subscribed for by them, respectively, and to receive therefor receipts for the money to the Comptroller, by their order, to be exchanged for certificates of stock, to be issued by the Comptroller on or before June 1, 1864, with interest from the date of deposit, at the rate of seven per centum per annum.

MATTHEW T. BRENNAN, Comptroller.

COMMONWEALTH OF MASSACHUSETTS.

A PROCLAMATION

TO THE PEOPLE OF MASSACHUSETTS.

EXECUTIVE DEPARTMENT,
BOSTON, NOVEMBER 18, 1863.

FELLOW CITIZENS:—

Under the Act of the General Court, passed this day, the Commonwealth of Massachusetts offers a bounty of three hundred dollars to every-able bodied man who shall enlist and be mustered into the military service of the United States, to serve for three years, or during the war, and to credit three years, as a part of the contingent of Massachusetts, under the last call of the President. This bounty, however, will be paid to no man who shall obtain the consent of his parents or guardians, if he be too young in the State.

Any volunteer who wishes, can deposit his bounty or any part of it, with the Treasurer of the Commonwealth, subject to his order, and receive interest upon it at the per cent. a year. Thus, for such part of his money as he does not wish to use immediately or can make the treasury of the State his banker, and it will be coming him interest as a safe investment. Or, if he wishes to use it from time to time, it can be sent to the treasurer of his own town or city, and there paid out to the volunteer's own order. Or he can leave it with us as a part of it, and have the remainder to accumulate on interest, and be drawn for when wanted.

Persons entitled to State aid, under the laws of the Commonwealth, may receive it, notwithstanding the payment of this bounty.

This bounty is payable equally to veteran soldiers, who have served nine months or more, and to new recruits; and to all it will be duly paid by the United States.

Those volunteers who prefer, may, instead of the money bounty in hand, receive fifty dollars upon enlisting, in addition to the seventy-five dollars paid in advance by the United States, and receive in addition a monthly additional pay of twenty dollars per month, making, with the regular monthly pay from the United States, thirty-three dollars per month. This plan is in addition to the instalments of bounties offered by the United States. The soldier will receive the twenty dollars per month, will be payable at the office of the Treasurer of the Commonwealth, upon the soldier's order, and a separate roll will be kept for the purpose, bearing such orders, for the purpose of guarding both the soldier and the treasury against fraud.

If the month pay, if the twenty dollars, or any part of it, may be deposited in the treasury, as a savings bank, drawing five per cent. interest, or may be drawn over the soldier's order, as he may desire.

In case of the volunteer's choosing to receive the increased monthly pay instead of the larger bounty in hand, he will receive from the State of Massachusetts per month for six months after his honorable discharge for disability after six months' service; and if he does a service, he will receive the same monthly and additional six months' pay after his death; with the limitation, that it will not continue more than three years in the rebels.

If residents of one town, or one ward of a city, enlist in numbers, the Commonwealth will pay interest on the quota of the town or ward where they reside, up to the time quota is filled.

Wherever enlists, knowing he is physically disqualified for military duty, with the fraudulent intent of obtaining the bounty and then getting discharged for such disability, is liable to imprisonment in the State prison not exceeding ten years, or fine not exceeding five hundred dollars, or imprisonment in the jail not more than two years.

Massachusetts soldiers now in service, and having not exceeding one year more of their present enlistment to serve, may re-enlist, and receive the same bounties with the same privileges as new recruits, except the privilege of choosing to receive the $225 down, or $75 down and $20 additional monthly pay instead, and with the same privilege of making half the bounty their wives took, and receiving interest. A set of blanks will be sent to every regiment, before its discharge, or in the event of death, to their widow or heirs, on the terms above mentioned.

Soldiers re-enlisting will be mustered in their own regiments; and veterans, (that is, returned soldiers who have served at least nine months,) may enlist in either of the following regiments now organizing, viz: 1st Regiment of Heavy Artillery, commanded by Colonel Tremlett; the 59th Regiment of Infantry, commanded by Colonel Lakeman; the 60th, commanded by Colonel Bartlett; the 58th, commanded by Colonel Chapin; the 54th, commanded by Colonel Gould; (the latter four being the old regiments 1st, 2d, 3d, and 4th Veteran Regiments respectively of the late Brigade of Veterans Volunteers, now stationed at Readville, or they may join any existing regiment in the service.

In addition to the above bounties, offered by the Commonwealth, bounties will also be paid by the United States, as follows:

To every recruit who is a veteran volunteer, that is, every able-bodied man, between the ages of eighteen and forty-five, who has heretofore been enlisted and has served for not less than nine months, and produces the original examination required by the mustering regulations of the United States, one month's pay in advance, and a bounty and premium amounting to $402, as follows:

1. At the general rendezvous, and before leaving the sense to join his regiment or company, the recruit's pay in advance.....$13 00
First instalment of bounty.....2 00
Premium.....2 00

Total pay before leaving general rendezvous $17 00

(To be paid in cash, or checks for transmittal, in which case the bounty and premium may deduct.)

2. At the first regular pay-day, or two months after muster in, an additional instalment of bounty.....$50 00
3. At the first regular pay-day after six months' service, an additional instalment of bounty.....50 00
4. At the first regular pay-day after the end of the first year's service, an additional instalment of bounty.....50 00
5. At the first regular pay-day after eighteen months' service, an additional instalment of bounty.....50 00
6. At the first regular pay-day after two years' service, an additional instalment of bounty.....50 00
7. At the first regular pay-day after the end of the last years' service, an additional instalment of bounty.....50 00
8. At expiration of three years' service, or to any soldier who may be honorably discharged after three years' service, the remainder of the bounty will be paid.....40 00

All of the above payments of bounty will be in addition to the regular monthly pay of thirteen dollars per month.

To all veterans, not veterans, and re-enlisted as aforesaid, one month's pay in advance, and in addition, a bounty and premium amounting to $202, will be paid, as follows:

1. At the general rendezvous and before leaving the sense to join his regiment or company, the receipt will be paid one month's pay in advance.....$13 00
First instalment of bounty.....100 00
Premium.....2 00

Total pay before leaving general rendezvous $17 00

(To be paid in cash, or checks for transmittal, in which case the bounty and premium may deduct.)

2. At the first regular pay-day, or two months after muster in, an additional instalment of bounty.....$50 00
3. At the first regular pay-day after six months' service, an additional instalment of bounty.....50 00
4. At the first regular pay-day after the end of the first year's service, an additional instalment of bounty.....50 00
5. At the first regular pay-day after eighteen months' service, an additional instalment of bounty.....50 00
6. At the first regular pay-day after two years' service, an additional instalment of bounty.....50 00
7. At the first regular pay-day after the end of the last years' service, an additional instalment of bounty.....50 00
8. At expiration of three years' service, or to any soldier who may be honorably discharged after three years' service, the remainder of the bounty will be paid.....40 00

All of the above payments of bounty will be in addition to the regular monthly pay of thirteen dollars per month.

To all old recruits, not veterans, and re-enlisted as aforesaid, one month's pay to advance, and in addition, a bounty and premium amounting to $202, will be paid, as follows:

1. At the general rendezvous and before leaving the sense to join his regiment or company, the receipt will be paid one month's pay in advance.....$13 00
A like first instalment of bounty.....100 00
Premium.....2 00

Total pay before leaving general rendezvous $17 00

(To be paid in cash, or checks for transmittal, in which case the bounty and premium may deduct.)

2. At the first regular pay-day, or two months after muster in, an additional instalment of bounty.....$50 00
3. At the first regular pay-day after six months' service, an additional instalment of bounty.....50 00
4. At the first regular pay-day after the end of the first year's service, an additional instalment of bounty.....50 00
5. At the first regular pay-day after eighteen months' service, an additional instalment of bounty.....50 00
6. At the first regular pay-day after two years' service, an additional instalment of bounty.....50 00
7. At the first regular pay-day after the end of the last years' service, an additional instalment of bounty.....50 00
8. At expiration of three years' service, or to any soldier who may be honorably discharged after three years' service, the remainder of the bounty will be paid.....40 00

All of the above payments of bounty will be in addition to the regular monthly pay of thirteen dollars per month.

To all veterans, not veterans, and re-enlisted as aforesaid, one month's pay to advance, and in addition, a bounty and premium amounting to $202, will be paid, as follows:

1. At the general rendezvous and before leaving the sense to join his regiment or company, the receipt will be paid one month's pay in advance.....$13 00
First instalment of bounty.....100 00
Premium.....2 00

Total pay before leaving general rendezvous $17 00

(To be paid in cash, or checks for transmittal, in which case the bounty and premium may deduct.)

2. At the first regular pay-day, or two months after muster in, an additional instalment of bounty.....$50 00
3. At the first regular pay-day after six months' service, an additional instalment of bounty.....50 00
4. At the first regular pay-day after the end of the first year's service, an additional instalment of bounty.....50 00
5. At the first regular pay-day after eighteen months' service, an additional instalment of bounty.....50 00
6. At the first regular pay-day after two years' service, an additional instalment of bounty.....50 00
7. At the first regular pay-day after the end of the last years' service, an additional instalment of bounty.....50 00
8. At expiration of three years' service, or to any soldier who may be honorably discharged after three years' service, the remainder of the bounty will be paid.....40 00

All of the above payments of bounty will be in addition to the regular monthly pay of thirteen dollars per month.

The office of the Commonwealth come alike to the poor recruit, the returned veteran, and to the old soldier in the field.

The officers of the United States are alike to all these classes, and every just recruit, and every fairly discharged soldiers of nine months's experience, will receive from the United States $100 instead of $50, (in addition to the bounties and pay to be paid by us.)

A General Order will soon issue from the Office of the Adjutant-General, containing any details needed in addition to those of Order No. 59.

FELLOW CITIZENS:—I have endeavored with clearness and brevity to present the whole matter to your governments, State and National, to render convenient the military service.

Let the duty of this occasion be performed in the spirit of mere worthy of the name and the blood of Massachusetts, worthy to bear in their charge the Fathers of the Revolution, worthy to be called Sons of '61. Your country proposes the opportunity of duty crowned with honor. Posterity waits to render you its undying gratitude. Beneath either you the blessings of those who are ready to perish!

JOHN A. ANDREW, Governor.

COMMONWEALTH OF MASSACHUSETTS.

HEAD-QUARTERS, BOSTON, NOVEMBER 27, 1863.

FURLOUGHS TO VETERANS RE-ENLISTING IN THE FIELD.

General Order No. 61.

By General Order No. 191, of the War Department of the United States, current series, dated 22d day of July, 1863, as amended by General Order No. 358, of the same series, dated September 18, 1863, Volunteers serving in three years' organizations, who may, after the expiration of their terms of service, re-enlist in the War, in the companies or regiments to which they belong, (provided the same may be filled up to the full enlistment, less than one year to serve, will be designated veteran volunteers, and will be entitled to receive the bounty and premium of $402, mentioned in the 4th section of General Order No. 191, in addition to the bounties provided for other troops re-entering the service, by the 3d section of the same General Order, for re-enlistment. The manner of payment has been fully stated in the Commission of the Governor of the people of Massachusetts, dated November 18, 1863; and General Orders, current series, No. 59, dated Nov. 19.

Veterans re-enlisting in the field, and who have served nine months or more, and who have not received the bounty provided by the 4th section of General Order No. 191, as amended by General Order No. 358, shall have furnished to them, by the Quartermaster's Department, transportation to their homes.

Veterans re-enlisting in the field, and who have not received the bounty provided by the 4th section of General Order No. 191, as amended by General Order No. 358, shall have furnished to them, by the Quartermaster's Department, transportation to their homes.

Veterans re-enlisting in the field, and who have not received the bounty provided by the 4th section of General Order No. 191, as amended by General Order No. 358, shall have furnished to them, by the Quartermaster's Department, transportation to their homes.

When the three-fourths of a regiment or company of veterans shall have re-enlisted, and been mustered in a body, for at least thirty days as aforesaid, to go to their homes, they will be furloughed by the War Department to rendezvous companies and regiments until the time of their re-enlistment expires.

The above-mentioned provisions of the said General Order of the War Department are hereby promulgated, and, for the information of Massachusetts soldiers in the service, the same are hereby published in General Orders at these Head-quarters.

By the command of Governor JOHN A. ANDREW, Governor and Commander-in-Chief.

WILLIAM SCHOULER, Adjutant-General.

PENNSYLVANIA MILITARY ACADEMY, AT WEST CHESTER, PENNSYLVANIA.

This Academy is chartered by the Legislature of Pennsylvania, and is under the direction of

HON. JAMES POLLOCK, President; CAPT. JOHN C. CRAWFORD, U. S. A., Retired, Vice-President; JAMES B. OWNES, Esq., Treasurer; HON. JAMES THOMPSON, Secretary; CHARLES J. HOUSE, Esq., Solicitor; Hon. Thomas Cooper, Gen. Wm. H. Keim, Col. Thomas Chapman, Charles O'Neil, Col. D. B. Sutherland, Hon. Thomas Cooper, Gen. P. Russell, Jos. R. Townsend, Charles B. Dungan, Wm. L. Springs, Gen. L. Parnell, Theodore Ryan, Esqrs.

It provides Primary, Scientific, Collegiate and Military Departments of Study, all of which are now in operation, under thoroughly competent Professors. The accommodations for Cadets are of the most approved kind. The discipline is strictly military, and the Cadets are required to pass through a regular Infantry Drill and Course of Instruction. The Academy is furnished with a full Battery of Artillery, and a Troop for the Artillery and Cavalry Drill, by the REPUBLICAN GUARDS, A.T.T., President Pennsylvania Military Academy, West Chester, Pa.

COMMONWEALTH OF MASSACHUSETTS.

HEADQUARTERS, BOSTON, NOVEMBER 21, 1863.

BOUNTIES TO MASSACHUSETTS SOLDIERS IN THE FIELD.

General Order No. 53.

I. The Act of the Legislature of Massachusetts, "To provide for the payment of Bounties to Volunteers, and for other purposes," approved November 18, 1863, is hereby promulgated to all the Massachusetts soldiers in the service of the United States.

II. Officers commanding officers thereof are requested to publish the same, and cause it to be circulated among their commands.

III. Every citizen of Massachusetts serving in the military service of the United States, who has not been being a member of any regiment, company or battery of the Commonwealth's Volunteers, who, since the 15th day of the President of the United States, re-enlisted and is duly mustered into the military service of the United States for three years, or during the war, as a part of the contingent of Massachusetts, under the proclamation of the President, dated October seventeenth, 1863, and who has been credited to the State on or before (Oct. 31, 1863), will be entitled to all the benefits of the Act of the State. And any such soldier hereafter entitled to state aid under the laws of the Commonwealth, may receive the same, notwithstanding the bounty or increased monthly pay provided in this Act.

IV. All soldiers who have been enlisted in the military service of the United States subsequent to October 15, 1863, copies of which will be transmitted to the Commanders of regiments and batteries in the field.

V. All such soldiers, thus re-enlisting, will receive the bounty provided by the Act of the Massachusetts, in addition to those offered by the United States; but no soldier who has been heretofore enlisted has the privilege of choosing to receive the $25 down, or $50 down and $20 additional monthly pay instead, and with the same privilege of making the State treasury his banker, and of having interest upon his money, and of having their six months' pay continued after discharge, as in the event of death, as is provided for in here—which is set forth more in detail in the General Order of the Adjutant-General's Office.

VI. The Colonels and Commanders respectively of Massachusetts regiments in the field, will be furnished by the office of the Adjutant-General of Massachusetts with blanks for the rolls, and with the necessary instructions for the same, and the same will be carefully filling out the same in every particular, as to the soldier's name, residence, age, description, time of last, without abbreviation. The name of each soldier who forwarded must be signed by the Commanding Officer of the regiment or detachment.

VII. Both the bounties for re-enlistment, and the additional monthly pay of $20 per month, will be given the smaller by bounty to advance and additional monthly pay, to the soldier who re-enlists in the Commonwealth of Massachusetts. The soldiers pay will be made by the United States, and the bounties and furnished by the Adjutant-General of Massachusetts, and the soldier's receipt, or order, for the same, quotable or found, either against the State or the soldier, as circumstances may require, and the signature to be witnessed by the Colonel or commanding officer of the regiment, or the Captain or commanding officer of the battery, or detached battalion or company in which he may be.

VIII. The soldier will receive the increased pay of the soldier, at the time of his re-enlistment, to draw the bounty, and the soldier to whom the whole is entitled to it. It is also to be used whenever the soldier wishes to draw any part of it, and to have the remainder paid to, or to draw for his monthly State pay, so long as he remains in the service, and to accumulate at interest.

IX. The soldier is susceptible of being amended hereafter, in order to meet any unforeseen cases, or more convenient the payment of bounties or additional monthly pay. It is hoped by soldiers will bear in mind the object of the Governor to assist and encourage soldiers to re-enlist, by the most convenient and immediate certainty and expedition in carrying out the wishes of the Legislature in relation to the bounties and pay, and for the same not be done the soldiers will be subjected to delay, or to the trouble of correspondence.

By order of His Excellency JOHN A. ANDREW, Governor and Commander-in-Chief.

WILLIAM SCHOULER, Adjutant-General.

UNITED STATES INTERNAL REVENUE.

Fifth Collection District State of New York,
No. 160, Nassau Street, in the City of New York,
November 30, 1863.

THE MILITARY SITUATION.

NOTHING has occurred since the date of our last review of the military situation to indicate any likelihood that our anticipation of a season of military inactivity on the great theatres of war will be disappointed. Both our grand armies, in the East and the West, are confining their efforts to making themselves comfortable in winter quarters; and only in the outlying dominions of the war do we see the signs of military activity.

All fears as to General BURNSIDE'S position at Knoxville are now at an end. Since our last issue we have the positive intelligence that the siege is raised, and that LONGSTREET is in full retreat towards Virginia. The siege virtually terminated on the 4th inst., when, at an early hour, the advance guard of the reinforcing column under General SHERMAN reached Knoxville. The rebels moved off after dark, leaving the rear guard and pickets in their rifle pits to fall back at 2 A. M.; and a reconnoissance by General PERRINO on the ensuing day found their works empty. LONGSTREET retired by both banks of the Holston with a start of thirty-six hours. On becoming aware of the withdrawal of the rebels, pursuit was promptly undertaken, and still continues to be followed up with vigor. General FOSTER, with his cavalry division, moves by the south bank of the river; SHERMAN moves by the north bank. A dispatch from General FOSTER, dated at Tazewell on the 7th inst., announces that his cavalry division attacked the enemy's cavalry in one of the passes of the Clinch Mountains on the 6th inst., and was pushing them vigorously. There seems to be every prospect that the rebels will not escape without the most decided damage.

The PRESIDENT, on the receipt of the intelligence of the retreat of LONGSTREET, on the 7th inst., put forth an executive recommendation, urging all loyal people, in view of the withdrawal of the insurgent force from East Tennessee "under circumstances rendering it probable that the Union forces cannot hereafter be dislodged from that important position," to render thanksgiving for "this great advancement of the National cause." As this is, we believe, the first occasion on which such a recommendation has been put forth with reference to any individual military event, it marks in a very emphatic manner the supreme importance which the Government attaches to the possession of this region. The rebel presses also mark *their* appreciation of its value by the most dolorous wails over LONGSTREET'S failure.

At Chattanooga the situation remains unchanged. General GRANT is consolidating his victory and preparing for new work. The clamors of the Southern journals have had their effect. BRAGG has been removed from command of the army of the Southwest, and Lieutenant-General HARDEE, formerly commanding one of BRAGG'S corps, has been placed at its head. It is rumored, however, that this appointment will be but temporary, as the South is calling for some "abler" man. At latest advices HARDEE was slowly falling back from Dalton, with the fragments of the rebel army in an extremely demoralized and disorganized condition. BRAGG'S losses in prisoners, killed, wounded and stragglers will reach at least *sixteen thousand*, which can hardly be less than half his entire force.

The position of the opposing armies in Virginia remains unchanged. No demonstrations have been made since the 6th inst., when a reconnoissance was made to Madison Court House, which resulted in establishing the fact that no rebel force existed in that quarter. General MEADE'S army is quietly encamped on the south bank of the Rappahannock. LEE occupies his old position at Orange Court House—his advance line guarding the Rapidan fords. Deserters say his force does not exceed thirty-five thousand.

For several days past rumors have been rife of a contemplated change of commanders in the Army of the Potomac. It was said the command was to be given to General PLEASANTON, Chief of Cavalry, after having been proffered to Generals SEDGWICK and WARREN, and refused by them. Other and later reports mention the names of Generals HOOKER and THOMAS as on the slate for the succession. In addition to the rumors of a change of commanders, it is also hinted that the Army of the Potomac is to be broken up and a portion sent to Rosecrans, some other part of the country for a winter campaign.

Slow firing is still kept up by General GILLMORE on the rebel works in Charleston Harbor and occasionally on the city: but it has ceased to greatly disturb the Charlestonians. Meanwhile, we have the one great substantial benefit of completely closing the harbor; and the Secretary of the Navy in his report states that not a single blockade-runner has for months been able to make its way into Charleston.

The rebels continue to carry on a bold and extensive guerrilla warfare on the Mississippi, with the view of obstructing the navigation of the river. A numerous fleet of gunboats is doing patrol duty; but this does not seem to be a sufficient protection, for the rebel movable column passes from point to point, attacking unarmed river craft, but never staying long enough at any one place to hazard an encounter with the Union force.

An act of piracy of extraordinary daring was performed on Sunday last by a party of released rebel blockade-runners, who had taken passage on the steamer *Chesapeake* from New York to Portland. The steamer sailed from New York on Saturday last, and was one of the regular line plying between this city and Portland. On Sunday night, at a point about twenty miles east of Cape Cod, the rascals, sixteen in number, rose on the officers and crew, overpowered them and took possession of the vessel. The second engineer was shot dead and his body thrown overboard, and the first mate badly wounded. The captain and crew were then overpowered, put in irons, and notified that they were prisoners of war to the Confederate States of America. Subsequently, the crew and passengers were put into a boat and landed at St. John's, N. B., when the steamer put out in an easterly direction. Promptly, on the receipt of the news, Admiral PAULDING fitted out a pursuing fleet, and on Thursday morning the *Sebago*, *Grand Gulf* and *Vicksburgh* were dispatched after the pirates. If caught, they will doubtless have a short shrift and a tall swing at the yard-arm.

The Report of the Chief of the Bureau of Ordnance of the Navy Department is a document of great interest, but we are compelled to defer its publication. The naval ordnance which at the beginning of 1861 consisted of 1,872 thirty-twos, 575 eight-inch, 305 nine-inch Dahlgrens, 45 ten-inch, old and new, 32 eleven-inch Dahlgrens; making 2,830 heavy guns; with 29 twenty-fours, 107 twelves, making 136 boat howitzers; has increased to 1,293 howitzers of all kinds, 1,872 thirty-twos, 575 eight-inch, 808 nine-inch Dahlgrens, 56 ten-inch, old and new, 323 eleven-inch Dahlgrens, 209 thirteen-inch mortars, 214 twenty-pound Parrotts, 237 thirty-pound Parrotts, 180 one-hundred-pound Parrotts, 60 one-hundred-and-fifty-pound Parrotts, 13 twenty-pound rifled Parrotts, and 36 fifteen-inch smooth bores; in all, 5,777 pieces, against 2,950 in 1861. Over 700 more guns of the new sort will be completed before the year closes. Several new foundries have been started, and the means are now equal to the demand. The enormous amount of projectiles used may be seen in the following figures:—Shells, made and bought, 678,617: shot, 89,392; shrapnell, grape, and canister, 9,443,948 pounds. Of gunpowder, 2,980 tons have been ordered since March 1, 1861—of which 2,675 tons were from foreign ports. The report says: "The general efficiency of the ordnance of our Navy far excels that of any other, its vessels mostly being due mainly, or wholly, to the improvements of the last two years. Further extensive improvements are in contemplation, and estimates in accordance are presented to Congress."

The Report of the Pension Bureau shows that only 18 Revolutionary pensioners remain on the official rolls, drawing the small sum of $1,044 82 last year; 1,573 widows of Revolutionary soldiers are still pensioned, and took $132,226 74. Up to June 30 last there were 7,348 Army invalid pensioners, drawing $385,670 67; widows, orphans, and dependent mothers, 3,820; admitted during last year, 3,630; amount paid, $342,731 37. Army pensioners added during the year, 7,532. Navy pensions granted for the year ending June 30, 183; whole number, 544; amount paid, $23,622 24. Widows, orphans, and dependent mothers on Navy list, 577; amount paid, $116,449; number added during the year, 316. Whole number of Army pensioners on the list June 30, 13,659; pensions due them, $1,227,641 88. Whole number of Navy pensioners, 1,132; due, $144, 074 61. During the year there has been a decrease of 12 Revolutionary pensioners, and 277 widows of such; an increase of 3,370 Army invalid pensioners, 3,335 widows and orphans of such; 123 Navy invalids, 94 widows of such; and 1 increase on privateer pensions—net increase, 6,632. Since the Government was organized, 65,596,142 acres have gone for military and naval services; value, $32,370,175 50. The Invalid Corps has now 18,000 men, and is of advantage both to the soldier and the Government, relieving the pension list of a heavy burden, and securing to the soldier adequate pay, and to the country efficient defenders.

CAPTAIN George T. Emmons has been relieved from duty as Fleet Captain of the South Atlantic Squadron. Admiral Dahlgren's Staff now consists of the following officers:—Captain J. M. Bradford, Fleet Captain and Chief of Staff; Captain Ammen, Chief of Hydrography; Lieutenant Moreau Forrest, Chief of Ordnance: Paymaster Bradford, Fleet Paymaster; Surgeon Johnson, Fleet Surgeon; Chief Engineer Dunlap, Fleet Engineer; Lieutenant Commander Flythian, Assistant to Chief of Staff; Ensigne Johnson and Bartlett, Flag Ensignes; Acting Assistant Master Dahlgren, Aide to Admiral; Ensign Poor, Naval Signal Officer; Lieutenant Sumner, Army Signal Officer.

GENERAL Robert C. Schenck has relinquished the command of the Middle Department to Brigadier-General H. H. Lockwood.

REPORT
OF THE
SECRETARY OF THE NAVY.

NAVY DEPARTMENT, December 9, 1863.

SIR:—The naval operations of the year have been varied and more arduous as well as far more extensive than ever before under the Government. A blockade commenced at Alexandria, in Virginia, and terminating at the Rio Grande, has been effectively maintained. The extent of this blockade, according to an accurate table of measurement carefully prepared at the Coast Survey office, covers a distance of three thousand five hundred and forty-nine statute miles, one hundred and eighty-nine harbor or river openings or indentations, and many of the most prominent a double degree by longitude. In addition to the coast blockade, a naval force of more than one hundred vessels has been employed in patrolling the rivers, ranging in their operations and co-operating with the army in the suppression of the rebellion. The distance thus traversed and patrolled by the gunboats on the Mississippi and its tributaries, and the Sounds, bays, rivers, and inlets of the States upon the Atlantic and the Gulf, covering an extent of about 2,000 miles, have also been penetrated and watched with unremitting vigilance.

The blockade is becoming more effective and complete. Progress has been made in repelling the rebels from the coast and streams, scribing their limits. The Mississippi and its tributaries have been a protected, persistent, and severe struggle, in which the whole energies and efforts of the insurgents were engaged to obstruct and prevent our progress, have been respected by no principle and regarded. As the rebels have never possessed an open port for the development operations or commercial purposes, nor a naval or commercial marine, their warfare upon the blockade and against it has wholly derived from lawless adventurers and foreign capital. If, in the early period of the war, the unscrupulous were not employed in violating the blockade of ports and public necessity, embarked in illicit schemes to violate the blockade, and furnish the rebels with supplies, were unwearied, the greater results of the past year have been due to them to them most distasteful. The vigilance of our naval fleets and the stringency of the blockade have operated with great severity on those who have taken an active part in the rebellion, or have rendered heavy losses to those who have abetted, or have been in sympathy with the rebellion. I do not propose in this report to enter upon the details of our naval operations since my last annual communication, but shall append the official reports of the officers themselves which best narrate their respective labors and achievements. A general exhibition will be revealed from them of the settlement of their deeds, and no summary can injustice to their unassuming commendations. The exploits generally of the several blockading squadrons remain rendered since my last report.

NORTH ATLANTIC SQUADRON.

Acting Rear-Admiral Lee continues in command of the North Atlantic squadron, faithfully and ably performing the duties in a position of great responsibility, and, in some respects, of great embarrassment. Called and sustained as he has been by the energy, efficiency, the rivers of Virginia and the sounds of North Carolina have been penetrated, watched and guarded, as well as the entire coast, so that the movements of the rebel rams could be known at any single exception of the port of Wilmington, to close which has been difficult from its two inlets, thirty miles apart, flanked by extensive batteries. At time of the fastest steamers, from the first moment of quantum, of light draught, have, under cover of darkness, succeeded in eluding capture, but most driven that description of vessels have fallen into the hands of the blockaders or been driven on the coast, and foreign and constructive consumers with the rebels has ceased in that quarter. At Washington, Newbern, and Beaufort, on the inner waters of North Carolina, and also on the Nansemond, York, and other rivers of Virginia, our naval officers have been always on hand, and have rendered important services to the army, and during is repelling the rebels and protecting and succoring the army when in difficulty, which reflect honor on themselves and the service.

SOUTH ATLANTIC SQUADRON.

The South Atlantic Squadron has continued to enforce the blockade with vigilance and effect. It is with pain we have seen with shade the vigilance of the fleet or effect communication with the rebels on that coast. So long as the blockading force remained off Charleston, instead of getting within the harbor, the little trade at that point was prosecuted with some success, and no vigilance or activity could wholly prevent it. With a view of interdicting, as completely as if possible, of supplies Charleston itself, the original seat of insurrection and of disunion, preparations were made by this department, commencing more than a year ago, for the obstruction of the harbor and the reduction of the defenses. The completion of the iron-clad vessels was urged forward with all the energy the department could bring to bear on contractors, and such aid and co-operation as could be made available were ordered to the squadron to add to its power and efficiency. Delays and difficulties intervened, and it was not until the 7th of April that a demonstration was made. In the accompanion of that day Rear-Admiral Dupont, in the *New Ironsides*, accompanied by seven armored vessels, entered the main ship channel and passed Sumter, proceeded up the harbor and made a vigorous assault upon Fort Sumter. Even some difficulty or defect, the Admiral's ship was unable to take active, but was engaged in the most severe of the attack and sustained a terrific concentrated fire from numerous batteries. 6

Owing to the submerged obstructions, the character of which was not understood, it was not deemed advisé to attempt a passage up to the city, and after a contest of less than two hours, the signal was given to retire the fleet. No ships were destroyed, and the injury sustained by the turreted vessels, and only one life was lost in this remarkable contest. No ships were ever more severely and accurately tested fire, and the gunboat engineering qualities of this class of vessels fully proved. It was intended to have renewed the attack on the following day, but this intention was abandoned when examination of the vessels were withdrawn from the harbor, under an apprehension that they could not withstand the storms of the season and the fire of the rebel batteries. But important considerations rendered it proper that the force should remain inside the bar, and orders were sent to Rear-Admiral Dupont to that effect.

The report of the superintending engineer as to the injuries which the turreted vessels had sustained was satisfactory, and contained the Government to be re-determination to close effectually and completely the port, so as to prevent the ingress or egress of a single vessel, and also to promote operations against the defenses in the harbor.

Rear-Admiral Dupont having accomplished the object contemplated, the position which he had occupied for eighteen months, Rear-Admiral Andrew H. Foote was detailed to relieve him. That brave and distinguished officer entered upon the command which he continues to hold to the present time, with the same energy and efficiency which have characterized his whole career. Under his command, Rear-Admiral John A. Dahlgren, promoted immediately to Port Royal, and, on the 6th day of July, assumed command of the squadron. A combined operation of land and naval forces, the latter under Commodore Stevens, was undertaken for the occupation and possession of Morris Island, on the south side of the entrance to Charleston harbor. After a severe and severe struggle, the army operating upon land with the efficient co-operation of the navy, on the 6th of September, Morris Island was all its batteries was captured, thereby securing the possession of the harbor and entirely of our forces, although the rebels continue to continue a small and powerless fire from Sumter and Wagner, and the remaining batteries. In the slow operations of the protracted siege of over five months, as well as in the bombardment of Fort Wagner, the most exciting and attacking power of the Monitors has been illustrated in person.

Since the fleet under Admiral Dahlgren has remained inside the bar, and we have had the co-operation of the army, the blockade of Charleston has ceased. Not a single blockade-runner has succeeded in passing the fleet, and but few have attempted to do so. Those few, to a certain extent, and with huge profits, previously carried on considerable. As a consequence of the complete blockade of the port, the trade of the last few months has departed. In a military or strategic view the capture of Battle Island, and the possession of Fort Wagner, are of great importance and exhaustion to hold out a few weeks more in the hope of relief.

The most important operation of the year within the limits of this squadron, or indeed in the service during the year, and in some respects one of the most important and brilliant of the whole war, took place on the 15th of June, in Warsaw Sound, between Fort Pulaski, on the Savannah River, and Tybee Island, upon the armored steamer *Atlanta*. Like the contest in Hampton Roads, in March, 1862, between the *Monitor* and *Merrimac*, between the *Atlanta* and the rebel armored vessels and of great disparity in size, but the result was similarly glorious to the flag. The *Atlanta*, a new and powerful steamer, had been completed by the rebels, and prepared for war and prepared to meet the *Monitors*. She was, however, unfortunate in her over her comparatively diminutive antagonists, the *Weehawken* and *Nahant*, she fought gallantly, and her officers and crew, to the witness her triumph; but the brave officers and men of our turreted vessels were the victors, and the rebel ship was theirs. The victory is to be not only the result but the new fifteen-inch guns which for the first time were used in battle, and which proved to be effective. Had there had been no guns of this description in the squadron, the *Atlanta* would have been impregnable, and decisive that only several of the Monitors could have been separated and brought to engage for the fight, was able to participate in the engagement. The *Nahant*, however, was under the fire of the rebel ship for but a few minutes before she could get into action the contest was over. Such was the severity of the fire of the *Weehawken* and *Nahant* that the rebels, with only five shots from her heavy guns, surrendered and captured the formidable vessel. Her officers and crew, to the number of 130, had to the work, could discharge a single shot at the *Atlanta*. This remarkable result is to be attributed to the power of the guns, the precision of vessels for harbor defense and turreted against any naval vessels that have been built, and the skill and gallantry of their officers. It appears also to have extinguished whatever lingering hopes the rebels may have had of being able to contend successfully against naval means.

EASTERN GULF SQUADRON.

Acting Rear-Admiral Bailey has continued in command of the Eastern Gulf squadron. His flag-ship has been the *Hartford*, ranging from Cape Canaveral, on the east, to Pensacola, on the west. There having been no material change in the character of the service since his last report, it is unnecessary to refer to the details of the operations of the squadron. Its vessels have been actively employed in the blockade of the coast and of the adjacent waters has been maintained by the vessels of the squadron. The rebels have been unable to obtain entire annihilation of all illicit traffic. Some important boat expeditions have been undertaken and successfully executed. Prizes have been projected and executed with success. Lying adjacent to many points of the coast, the vessels of the squadron have been enabled to render important co-operation with the army, and to afford protection to many loyal citizens. It was impossible for penetrating the shallow harbors and inlets which abound on the coast. Many of the boat expeditions were attended with impunity—more than one hundred craft of various descriptions have been captured or destroyed by the squadron during the current year.

WESTERN GULF SQUADRON.

The duties of the Western Gulf Squadron have been diversified and exacting. Rear-Admiral David G. Farragut, the gallant Admiral Farragut felt himself compelled to employ many of his most efficient vessels in active operations in the Mississippi River, and, with a view to re-opening the navigation of the Mississippi, and expelling the rebels from Louisiana. The Admiral entered with great enthusiasm of this work, and aware of the determination of the Government to promptly and effectually open the Mississippi throughout its first course, at the ocean outlet of the great central valley of the Union demand to prosecute the work with all the energy and determination the subject of the coast blockade to others of his command, and devoted his personal attention to the operations for the reduction and the possession of the conquest of the rebels, to overcoming and removing their batteries, and to the passage of his fleet past them, that they sought to oppose the navigation of the river, or to resist the authorities of the United States in the control of New Orleans. In the spring of 1862, and as the natural result of that event, the naval force formed a junction with the army under General Butler at Baton Rouge and subsequently co-operating with him, the reduction of Vicksburg, and the possession of the Mississippi River, were determined upon by the Government. The gallant Admiral Farragut being called to the command of the Western Gulf Squadron, and Admiral Porter, who had been accomplished with comparatively little effort in the capture of New Orleans, was detailed for the Mississippi expedition, and difficulty in 1863. It was indispensable that communication should be opened with Red River, and that the rebels in Louisiana, Texas, and General Grant, both of whom were operating against Vicksburg. Admiral Porter, with a fleet of vessels, set out in strong force from Baton Rouge in March, intending to pass the batteries at Port Hudson, but the river was found to be so low that the fleet could not there succeeded. With those he succeeded in approaching Vicksburg, and, in connection with General Grant, in the reduction of the peninsula. The gallant set of Rear-Admiral Farragut being confined, in the Mississippi River, to the vicinity of Port Hudson and Port Hudson, and was enabled to establish a blockade of Red River, and thus to cut off the communication of the rebels with the rebel cavalry. The insurgents find this to be one of the most serious of the many blows struck at the rebellion. The Admiral, with the fleet of Port Hudson, has also been engaged in the reduction of that position, but with doubtful success. The *Hartford*, returning before by way of the Atchafalaya, has been enabled to render important service to the army. To meet the requirements of the occasion a force was kept always ready to co-operate with the army, and the vessels employed on the part of the Navy's continuous shelling of the place from mortar boats, vessels, and the fleet, and the batteries of the enemy were demolished, exceeding the Army. Nearly three thousand 13-inch shells were thrown into the city and its defenses during the 48 days' actual battery of four 8-inch guns, used on a breaching battery, performed great execution. The bombardment of Port Hudson, including on the 6th of July, the reduction of Fort Hudson became inevitable, and the position was abandoned by the rebels. The *Mississippi*, Commodore Smith, was, for some weeks, hotly engaged the place.

The war in the Mississippi has been of the most radical authority on the banks of the Mississippi.

The river being restored to peaceful commercial pursuits, Rear-Admiral Farragut turned over to Rear-Admiral Porter the entire control of the vessels employed in the river, and has returned to his command for that city. Deeming that the long service and arduous labors of Admiral Porter entitled him to a respite from the responsibilities and labors of his command, he has been relieved by Rear-Admiral and Commodore H. H. Bell, the next officer in rank, who appointed to command the squadron in the Mississippi.

The blockade of the Gulf has been in the main, efficient and successful, although numerous attempts have been made to run the blockade, and, for a time, reckless adventurers and foreign capitalists to some extent succeeded, by parrotting neutral privileges and fraudulently assuming neutral rights on the Rio Grande, in carrying on illicit trade with the rebels through Matamoras. The Rio Grande being the boundary between the United States and Mexico, is open to the navigation of both countries, and could not therefore be blockaded. With a knowledge of this fact a multitude of schemes were projected and under the pretense of trading with Mexico, contraband was carried a great commercial mart for the rebels and their friends. But the following order of the President of the United States put a final stop to consequence to most of those who participated in them, and the occupation of the Rio Grande and Brownsville has put a final termination to the lately extensive commerce of Matamoras, which was carried on so lucratively during the first two years of the war.

MISSISSIPPI SQUADRON.

The Mississippi squadron has been constantly engaged in arduous efforts to overcome the rebels and restore the national authority to the great western valley of the Union.

Rear-Admiral Porter, whose activity, energy, and zealousness of services, eminently fitted him for the most commanding duties in the ordinary vigor in various naval expeditions on the Mississippi and its tributaries, and in the unique co-operation with the Army in the most important operations.

Admiral Porter's Arkansas Post, on the White River, in January, the destruction of the batteries at Grand Gulf, on the Mississippi, the passage of the fleet past the fortified city of Vicksburg, and the surrendered on the 4th of July, with the entire garrison of the city, and the capture of the entire position, some of which are of the most formidable character, and the whole of which, as described in this report will be found correct records of the extraordinary operations which have resulted in the capture of the city, and in the restoration to the channel of the Mississippi, from its source to the Gulf, of the great artery of the Union, the Mississippi. These efforts were followed by the naval and military expedition to Red River, under General Banks and Admiral Porter, which, on the right bank of the Mississippi across the State of Arkansas and northern Louisiana. The Confederate and the Red River country, and the capture of Alexandria, the head of navigation of this river, and the entire chase of Morgan by our steamers on the Cumberland River, and the capture of the rebel steamer *Alice Dean* by which were attempting to escape, naturally attracted the attention of the country. The rebel ram *Arkansas*, which had been for months were in the vicinity of Vicksburg, where the main struggle of the war in the West was being made, was destroyed by the officers of the Navy, and the rebel ram *Queen of the West*, which had been in the service, naval or military, or both combined, which could have been destroyed by the Navy, was captured, and rendered useful in the siege of Vicksburg, and subsequently. In overcoming them, the Navy was fully informed at the time, and need not be repeated. For two days, without intermission, the narrow boats were thrown into the river, and the fleet of the Navy, and the fleet of the Army. Heavy guns, mounted on scows, commanded the important navigation of the river, and the fleet of the Navy, and the fleet of the Army. Thirteen heavy guns were landed from the vessels, and the guns of the fleet of the Navy, and the fleet of the Army. The gunboats below the city, in co-operation with the Army, were thrown across the river, and the fleet of the Navy, and the fleet of the Army. Thousand shells were thrown into the mortars, gunboats, and guns of the fleet of the Navy, and the fleet of the Army. 7

The creation and organization of the iron squadron, which has been so successful in the capture of Fort Henry, and the fleet of the Navy, and the fleet of the Army, and the fleet of the Navy, and the fleet of the Army. In creating and organizing this squadron, the Navy, and the fleet of the Navy, and the fleet of the Army, and the fleet of the Navy, and the fleet of the Army. It is to be regretted that the service has not many more and more efficient officers to command them. The Navy, and the fleet of the Navy, and the fleet of the Army, and the fleet of the Navy, and the fleet of the Army. In the absence of no one on which the department could depend. In the absence of no one on which the department could depend. In the absence of no one on which the department could depend

Comparative Establish of the Navy, December, 1862 and 1863.

In what manner lost.	No. of Vessels.	No. of guns.	Tonnage.
Captured	18	178	9,061
Destroyed to prevent falling into hands of the enemy	7	43	1,400
Sold at navy yards	1	2	155
Lost in battle or by tempests, fire, explosion, snagging, &c., and collision	15	61	4,804
Total	32	106	14,985

Vessels placed under construction since December, 1862.

Description.	No. of Vessels.	No. of guns.	Tonnage.
Double-end iron steamers	1,650 tons each	44	7,726
Single screw iron steamers	614 tons each	20	12,280
Double turret iron-clads	2,200 tons each	4	8,800
Upper river iron-clad steamers	1,200 tons each	12	10,800
Screw sloops, 1st class	3,000 tons each	20	60,000
Screw sloops of great speed	3,300 tons each	20	66,000
Total	58	452	90,806

Vessels finished of the Navy when the vessels under construction are completed.

Description.	No. of Vessels.	No. of guns.	Tonnage.
Iron-clad steamers, coast service	40	160	65,440
Iron-clad steamers, river service	30	120	36,000
Screw steamers	116	1,256	125,811

Sailing vessels	112	1,328	79,250
Total	588	4,448	467,697

	No. of Vessels.	No. of guns.	Tonnage.
Navy of the date of present report	588	4,448	467,697
Navy as of the date of last report	427	288	209,053
Increase, exclusive of those lost	161	1,175	125,103

There have been added to the Navy during the past year, by purchase, since thirty days, seventy steamers for blockading and special purposes, and over twenty other vessels for tenders and storeships. A list of many of the steamers purchased and now endeavoring to run the blockade.

IRON IMPROVEMENTS IN NAVAL VESSELS.

Upon the assumption that the United States are to occupy a leading position among maritime nations, a primary object of the Government must be the maintenance of a naval force adequate for defence against all hostile aggressions. The recent demonstrations which this nation places in the character of naval warfare, is the result of a change not less complete in the character of the armament of ves sels. The rolling ships-of-war, wisest construction had been brought almost to perfection, and were capable of carrying heavy armaments, and they to turn have given place to vessels propelled by submerged screws, and the whole character of the armament of the vessels which sailing vessels are exempt. A single chance shot may hastily disable the propelling power of a vessel, and a few shots penetrating vessels of the class unsafe and dangerous, has led to precaution and solicitude for the safety of the crew. The use of iron armor, by which a first-class man-of-war is made invulnerable to the ordinary forces of attack in naval battle, is the result of which science has developed with a corresponding improvement in the means and ends of attack. The Navy of the United States, at the present day, consisting of ordnance of a calibre, reach and power heretofore regarded as impracticable, is the most powerful naval vessels as the new naval structures and defences which it is intended to build. The vessels of the Navy which are now under repair are not to be converted into iron-clads, but are to be made secure for its protection, and heavy ordnance for assault, and to be made capable of carrying the ocean in the event of a foreign war. The vessels of the Navy which are not to be converted into iron-clads are to be made secure for the

Bathville means should be taken to receive, prepare, and train boys for the naval service. For this purpose one of the old ships of the line at anchor in the harbor, or in some convenient and safe and healthy place—perhaps at Newport, or the Naval Academy—should be kept between the ages of twelve and the Naval Academy—where boys could be educated as seamen. The sons of sailors and others might be collected and military service could be enlisted to and others in the public schools and colleges, and it would be well to consideration for their proficiency, at least free to be transferred to the service as midshipmen. The same ship might, if judged expedient, also accommodate for such a primary practice vessel as has been recently recommended by the Bureau of Ordnance.

PIRATICAL ROVERS

The recognition of the rebellion as belligerent by the principal maritime powers at the commencement of hostilities, gave strength and character to the insurrection at once. It could assert itself as a power in the eyes of mankind. A declaration of neutrality between the belligerents went always from governments which by such a recognition declared that they had the confidence of fairness, but which in its operations is most unjust towards the government attacked. Thus, by the British Foreign Office, the rebel commerce, which penetrated every sea, while the rebel ports were closed to commerce or ships, found a refuge in the ports of Great Britain, almost every crisis the rebels had not a single effectual maritime power, thereby had been in the habit of receiving the aid or hospitality of the powers of Europe instituted to recognize the rebels as treated alike in their to declare that they had been treated alike by the belligerent powers. Now, that the public sense towards such a course is aroused, the British Government has given orders that no more warlike supplies or armaments, except such as might be absolutely necessary for the defence of the ports for three months from the proclamation, should not again receive supplies in any of the ports of the United Kingdom. This is a step in the right direction, but it is not the whole scope of the rebels—for they had soon to be effected by the withdrawal of the local vessels of the British ports, and the rebels will be left to the private maritime powers throughout the world, except under the interdictions enumerated.

When the *Sumter*—vessel stolen from our merchants—made her escapes and was allowed armed, was armed, recognized, and allowed to seize and destroy our merchantmen upon the high seas, she found, while the *Alabama* was refused, and was driven to sea, that she could, in addition of the great European powers with whom the United states were in friendship, and after being fitted out in the ports of one power in the harbor of Gibraltar, she was permitted by the authorities to remain not only nearly four months in the port, but to receive supplies of coal, and was duly transferred to an English purchaser, sent to an English port, was refitted, and with the English crown which she had received as a ship of war, she ran the blockade, carrying supplies to the rebels.

The *Alabama*, with her English crew, English officers, built in England, have an English armament on board, and are manned by English officers, and sailing under English colors, and commissioned under the English and sometimes under the rebel flag, and destroying our commerce, and yet she has not been driven to or by, but they can send a depot for supplies, and a port of refuge, and a port of repair, and a port of refitment. The English ships of a nation at peace with Great Britain and the United States, have expressed no difficulty in procuring them, because it has never expressed no difficulty in procuring them, because it has been denied to our vessels of war to acquire the same facilities. Such is one of the many vexatious questions by these recent has ever been jealously complained of in the United States. Whether the object be the policy and purpose of the captors, who have learnt and overstayed the property of their peaceful neighbors.

The theory of recognition rebels as belligerents as soon as they lift their standard against their government, and the practice of granting to the national privileges on the high seas and in the harbors of the world, although without a single port in their hands, has been established as a new policy in the history of nations. For a long succession of years it has been the practice of the great maritime powers to recognize, in the insolency among the maritime powers, that the police of the seas should be regarded and acted upon as the common duty of all nations. The abolition of piratical authorities and the consequent suppression of the power of the rebellious commanders, has influenced by the professed neutrality which elevated insurgents, and sought to organize the piratical authority of the rebels, has been in sympathy with the predatory powers, and while leaving them aid and often furnishing them with information, has refused to recognize the interest unfriendly feelings to the lawful operations of the naval forces of the Union.

Compelled, as we have been, to withdraw in a great extent our foreign squadrons, to the Gulf, Charleston and other ports, and the Mediterranean, as the United States, spread almost upon every sea, but been assigned, and often threatened with capture, by the rebel cruisers, and even by the cause of the rebels' attempts or pulsed and daring qualities which characterized the rebel cruisers, and the rebel cruisers, and the rebel cruisers, and

port, of the enemy's vessel was of inferior force; and of two hundred and fifty-one vessels captured, only one was retaken by the enemy, and that in the same manner as before mentioned.

Some of the claims arising from this service have been repeated cases in which the Navy, particularly on the Western waters; but there be regrets of the Navy, particularly on the Western waters; but there be regrets of the Navy, particularly on the Western waters; but there be regrets of

of Exchanges. As the matter now stands, we have over 40,000 prisoners of war ready at any moment to be exchanged, man for man, and officer for officer, by the number of the rank. Each of these men is about 15,000, and they are now supplied with food and raiment by the Government, and by our benevolent and charitable associations and individuals. Two prisoners, Captains Sawyer and Ryan, held by the rebels, are sentenced to death by way of a pretended retaliation for two prisoners, tried and shot as spies by command of Major-General Sheridan. Two rebel officers have been dismissed, and are held as hostages for them. The rebel prisoners of war in our possession have been treated with the utmost kindness, humanity and tenderness consistent with security. They have had good quarters, full rations, and medicine when sick. Their own surgeons have been employed by our own authorities. Intelligence of their condition has been received by our own surgeons, who have been sent to them for the purpose, and who have reported that they have been well cared for by the Government. If it should become necessary for the protection of our men, rebel retaliation will be resorted to, I trust that the authorities suffer this Government to feed and clothe our rebel prisoners, and to enable our surgeons to attend them. I respectfully handle the humane treatment they have uniformly enjoyed.

The operations of the draft and the calling out and calling out the National forces is exhibited in the accompanying report of the Provost-Marshal-General. As this duty was at first supposed to be known to be very imperfect, many intelligent persons considering its operations impracticable, while others, from the start, favored the partial breath. The law has been enforced in twelve States. It has brought from them, into the military service, since the draft, over 250,000 for more substitutes. With all its imperfections and defects, it is a measure of justice. It has demonstrated the fact, that, in the numbers required, the call for volunteers and the draft for recruiting the armies and calling out the National forces, the latter is the more economical system. The respondents will be submitted to by those who do not wish to volunteer. The draft has been resisted by the lawless and violent, and in the two hundred dollar commutation

ARMY GAZETTE.

EXAMINING BOARD OF ORDNANCE OFFICERS.

ORDNANCE OFFICE, WAR DEPARTMENT,
WASHINGTON, DECEMBER 4, 1863.

Notice is hereby given that the Board of Ordnance Officers appointed for the purpose of examining officers applying to be commissioned as Ordnance Officers, at a rank not higher than Captain, will assemble at this office on the 4th of January next.

All officers desirous of appearing before the Board, must first make application to the Chief of Ordnance, who will furnish, under their seal, present state of knowledge, where and how educated, and what additional information they may desire. Such officers will be heard at its next meeting, should the duty dispositions as hereinafter specified, by or before the 30th of June, 1864.

By order of
Brig.-Gen. Chief of Ordnance.

DISMISSALS.

During the week ending Saturday, December 5, 1863.

WILLIAM W. WILSON, Private Company A, 1st Delaware Volunteers, Nov. 7, 1863, with loss of all pay and allowances, for presenting and endeavoring to take a false muster-roll against the United States Government.

Captain E. Dudley, 62d Indiana Volunteers, to date November 16, for absence without leave.

Captain R. W. Wright, 23d New York Cavalry, to date November 19, 1863, with loss of all pay and allowances, for misconduct and unofficer-like conduct in discharging a detailed mess without authority, and entering money therefor, under false pretenses, from the Sutler of his battalion.

Captain H. Chenney, 126th New York Volunteers, to date November 26, 1863, for absence without proper authority.

Captain John McGahren, 17th Connecticut Volunteers, to date December 2, 1863, for absence without leave. Charges were ordered, but the city of Washington in citizen's clothes, without a satisfactory explanation, therefor.

Captain James L. Townsend, 14th Connecticut Volunteers, to date December 2, 1863, for absence without leave. He was found in a Washington hospital, and attempting to leave the city of Washington in citizen's clothes, he being then sick in bed.

Captain R. L. Thompson, 113th Pennsylvania Volunteers, to date December 2, 1863, for absence without leave. Charges were ordered, but pay delayed before a Military Commission.

Captain William H. Worrey, 7th Pennsylvania Reserves, to date December 2, 1863, with loss of all pay and allowances, for absence without authority.

Captain John W. Todd, Ordnance Department, United States Army, for drunkenness while on duty, at Nashville.

Captain George W. Hill, 19th United States Infantry, to date December 4, 1863, for absence without leave. Charges were ordered.

Surgeon J. S. Spiker, United States Volunteers, to date November 30, 1863, for absence without leave, in order to offer and to sustain an Assistant Surgeon's commission, in the 107th Illinois Volunteers, contrary to General Order No. 252, of 1862, for being in the city of Washington without proper authority, and for absence without leave.

Assistant Surgeon Robert Parker, 4th California Volunteers, to date December 2, 1863, for violation of the 9th, 45th and 83d Articles of War, and conduct unbecoming an officer and a gentleman, by his own confession.

First Lieutenant John Brooks, 1st Virginia Battery, to date December 2, 1863, for absence without proper authority, and failing to report at Headquarters Military District of Washington, as ordered.

First Lieutenant Samuel G. Simon, 2d Missouri Volunteers, to date December 4, 1863, with loss of all pay and allowances, for absence without proper authority.

Lieutenant Hiram B. Manning, 2d Wisconsin Volunteers, to date December 5, 1863, with loss of all pay and allowances, for remaining a false muster-roll against the United States Government.

Lieutenant Thomas O. Pratt, 46th Ohio Volunteers, to date December 5, 1863, with loss of all pay and allowances, for absence without leave.

Second Lieutenant G. H. Brown, 149th Pennsylvania Volunteers, to date November 30, 1863, with loss of all pay and allowances, for swearing away the life of a private soldier, by false testimony given in the same, and for physical disability resulting from an immoral habit.

Second Lieutenant Jacob Hoffman, 1st Delaware Volunteers, to date December 1, 1863, with loss of all pay and allowances, for absence without proper authority.

Second Lieutenant George W. Hilbey, 20th Pennsylvania Volunteers, to date December 2, 1863, for absence without proper authority.

Lieutenant N. Murphy, 58th Illinois Volunteers, to date November 23, 1863, for desertion.

RESIGNED TO COMMISSION.

Lieutenant A. C. Brown, 16th Wisconsin Volunteers, heretofore resigned, is recommended to be commissioned as Captain, and filled by the Governor of his State, with pay from the date at which he resigned the aforesaid position.

NOTICE TO DELINQUENTS.

The following officers, having been reported at the headquarters of the Army for the offences hereunder specified, are hereby notified that they will report in person to the Provost Marshal General's Bureau within fifteen (15) days from December 1, 1863, they appear before the Military Commission, in session in Washington, D. C., in Brigadier-General Holabird, United States Volunteers, as president, and make satisfactory answer to the charges preferred against them:

Absence without proper Authority.

Captain Alfred D. Hall, 1st Delaware Volunteers, Infantry.
Lieutenant-Colonel Wells De Bass, 7th Ohio Volunteers.
Captain Augustus F. Herman, 16th Pennsylvania Cavalry.

Captain Timothy Gifford, 16th Pennsylvania Cavalry.

Desertion.

First Lieutenant James Casey, 6th Pennsylvania Cavalry.

Re-altering his name and re-entering the service entirely entitled men of money extracted and lost by them to him.

TO BE DISMISSED THE SERVICE.

The following officer having been reported at the headquarters of the army for the offences hereunder specified, he is hereby notified that he will be recommended for dismissal from the service of the United States unless within fifteen (15) days from December 1, 1863, he shall appear before the Military Commission, in session in Washington, D. C., with Brigadier-General Holabird, United States Volunteers, as president, and make satisfactory answer to the charges against him:

Absence without proper Authority.

Captain Alfred D. Hall, 1st Delaware Volunteers, Infantry.

PROMOTED.

Private Henry Andreas, alias Harvey Anderson, to be shot for desertion. Sentence confirmed by Major-General Hurlbut, who has ordered that it be carried into execution on Friday, January 8, 1864, at Covington, Ky.

First Lieutenant John L. Neese, 12th New York Volunteers, to be dismissed the service, for conduct prejudicial to good order and military discipline, and neglect of duty. Sentence confirmed by Major-General Meade.

Captains C. L. Livermore, and Second Lieutenants C. T. Parker, 1st Battalion Massachusetts Heavy Artillery, tried by court-martial on the charge of neglect of duty, have been honorably acquitted.

Second Lieutenant George H. Wheelan, 103d New York Volunteers, for using a public document, to wit: the Declaration of Independence, for a use of the Gold, and ordered to Ship Island for two years, upon such duty as the Commanding General of the Department may direct, for using contemptuous and disrespectful language against the President of the United States. The findings of Major-General Banks, the President directs that he be dismissed the service.

NAVY GAZETTE.

REGULAR NAVAL SERVICE.

ORDERED.

Lieutenant R. S. McComb, to the Canonicus.
Acting Assistant Surgeon Wm. H. Dougherty, duty at New York.
Assistant Paymaster Edmund Bellows, to the Oneida.
Assistant Surgeon C. H. Hazelton, from the Boston Navy Yard, and ordered to the Pacific Squadron.
Acting Volunteer Lieutenant, on the South Atlantic Blockading Squadron, and ordered to final examination.
Acting Assistant Surgeon Wm. Lee, resident of the Naval Retiring Board at Brooklyn, N. Y.
Acting Assistant Surgeon Wm. Kellogg, as member of the Board of Examination at Brooklyn, vice Surgeon Lee.
Third Assistant Engineer C. A. Ilher, from special duty at the Washington Navy Yard, and ordered to the Pacific Squadron.
Third Assistant Engineer H. J. Ross, from special duty at the New York Navy Yard, and ordered to the Monadnock.

VOLUNTEER NAVAL SERVICE.

APPOINTED.

The appointments of the following officers have been confirmed:—
Acting Ensigns Alex. Hall and Henry C. Keasse, of the New York Navy Yard.
Acting Masters Horra A. Tinkham and Joseph D. Pike, of the Kanawha.
Acting Ensigns Robert A. Cary and Albert P. Sampson, of the *W. G. Anderson*.
Acting Masters Charles A. Pfeil, of the *Portsmouth*.
Acting Ensign Joseph E. Morrison, of the *Tuscarora*.
Acting Ensign Wm. Gardiner, of the *Governor*.
Acting Ensign Charles V. Hunnewell, of the *Penetet*.
Acting Ensign Wm. H. Wilson, of the *Ottawa*.
Acting Ensigns A. C. Southworth, Edward K. Smith, Lyons H. Parrott and John L. Sherman, of the *George W. Elliott*.
Acting Ensign William Seary, of the *Bibb*.
Acting Masters Thomas Hogan and Wm. Hughes, of the *Oda*.
Acting Ensigns George C. Thomas, of the *Vandalia*; J. Warren Tyson, of the *Kansas*; Wm. Hamilton, of the *Bibb*; Thos. William Pollard, A. G. Kraig, Richard Hudgson, William F. Dudley, John Hamilton, Jr., Edward Hall, Jr., and Wm. Henry Neal; Acting Ensign Kelpiel, of the *Octorara*; Charles Wolf, of the *Prisoner*; James S. Campbell, of the *Rhode Island*; Wm. Hanley, of the *Bibb*; Thos. M. Campbell, of the *Hollyhock*; William Brennan, of the *Arendell*; Acting Ensigns Wm. Hamilton, of the *Bibb*; Wm. Hanley, of the *Arendell*; Acting Ensigns Wm. Hamilton, of the *Bibb*; Wm. Hanley, of the *Octorara*; Francis R. Hunnel, of the *Penetet*; Henry Hope, of the *Commodore*; and William Metcalf, of the *Arendell*.
Acting Master's Mate Christopher Brennan, of the Boston Navy Yard.
Acting Master's Mates William N. Gardner, George D. Bakeman, Albert A. Du Will and Wm. Hamilton, of the New York Navy Yard.
Acting Master's Mate Adelbert Truesdale, of the *Philadelphia*.
Acting Master's Mate Thomas Irving, of the *Arctic*.
Acting Master's Mate Edward W. Lehnd, of the *George W. Elliott*.
Acting Second Assistant Engineer Philip Allmer; Acting Third Assistant Engineers Wm. Hamilton and Wm. Hanley, Brigadier.
Acting Assistant Surgeon J. B. Porter, of the Naval Hospital at Memphis, Tennessee.
Acting Master Thomas Gibson.
Acting Ensign Wm. Hamilton, of the Sagamore.
Acting Master's Mate W. H. Knowles, of the New York Navy Yard.

LEAVE OF ABSENCE.

has been granted to the following officers:—
Acting Second Assistant Engineer T. A. Galloway, of the *Ella*, fifteen days.
Acting Third Assistant Engineer James L. Smith, of the *Brooklyn*, one week.
Acting Ensign Ernest M. Cooke, of the *Tuscarora*, thirty days.
Acting Ensign Edward Hall, Jr., of the *Kansas*, ten days.
Acting Ensign C. Adams, of the *Ivy*, thirty days.
Acting Ensign Wm. Hanley, of the *Bibb*, fifteen days.
Acting Carpenter Noah Dean, of the *Black Hawk*, one week.
Acting Carpenter John Baker, of the *Tuscarora*, thirty days.
Acting First Assistant Engineer William E. Sanford, of the Mississippi Squadron, ten days.
Acting First Assistant Engineer Benjamin Cutler, of the *W. H. Brown*, sixty days.

DISMISSED.

Acting Master's Mate Samuel McLaughlin of the South Atlantic Blockading Squadron.
Acting Assistant Paymaster William B. Greenway, Acting Ensign Daniels. Gross, Acting Second Assistant Engineer John Hassel, of the Second Class.

DETACHED.

Acting Assistant Paymaster H. H. Roberts, from the *Grassful*, and ordered to return to the United States.
Acting Second Assistant Engineer Charles Sinclair, from the Concurrence, and awaiting orders.
Acting Ensign Wm. H. Murphy, from the command of the Fearnot, and awaiting orders.
Acting Assistant Surgeon Lester B. Kendall, from the *New Ironsides*, and awaiting orders.
Acting Third Assistant Engineer E. S. Edwards, from the *Niagara*, and awaiting orders.
Acting Volunteer Lieutenant W. W. Kennison, from the command of the Second Class Boat *Howquah*, and awaiting orders.
Acting Ensign Charles Moore, from the *James Adger*, and granted leave of absence for ten days.
Acting Master S. F. Cook from the *Newbern*, and ordered to the *Sassacus*.
Acting Assistant Surgeon Henry H. Smith, from the *North Carolina*, and ordered to the *Vanderbilt*.
Acting Second Assistant Engineer Hugh Rafferty, from the *Crusader*, and ordered to the *Newbern*.
Acting Second Assistant Engineer John O. Fulhorn, from the *Crusader*, and ordered to the *Newbern*.
Acting Third Assistant Engineer David Furr, from the *Atlanta*, and ordered to the *Ivy*.
Acting Third Assistant Engineer Thomas A. Bryant, from the Boston Navy Yard, and ordered to the *Wyalusing*.
Acting Volunteer Lieutenant Commander Wm. Rowan, from the Potomac Flotilla, and ordered to report for duty to the Chief of the Bureau of Ordnance.
Acting Third Assistant Engineer Thomas M. Jenks, from the *Primrose*, and ordered to the *Sumac*.
Acting Third Assistant Engineer Robert T. Ewing, from the *Queen*, and granted three weeks' leave of absence.
Acting Ensign C. E. Davidson, from the *Pequot*, and ordered to the *Queen*.
Acting Master's Mate Edward N. E. Place, from the *Niagara*, and ordered to the *Sacondaga*.
Acting Master W. G. W. Lane, from the *Ella*, and ordered to the *Sassacus*.
Acting Master H. G. Patterson, from the *James Adger*, and ordered to command the *Wyalusing*.

REVOKED.

The appointments of the following officers have been revoked:
Acting Second Assistant Engineer John Phelps, of the *Georgia*.
Acting Volunteer Lieutenant Wm. Rowan, of the Mississippi Squadron.
Acting Third Assistant Engineer William H. Brown, Acting Master Sidney B. Jay, Acting Second Assistant Engineer Columbus McCoy, of the *Baldwin*.
Acting Third Assistant Engineer John Lloyd, of the *Keystone State*.

PROMOTED.

Acting Ensign Richard Parker, of the *Iroquois*, to the grade of Acting Master, for gallantry while under a severe fire of the enemy from Fort Sumter.
Acting Master R. B. Smith, of the *Nita*, to the grade of Acting Volunteer Lieutenant.
Acting Master's Mates Thomas Irving and George W. Leland, of the *Arctic*, to the grade of Acting Masters, for gallantry while under a severe fire from Fort Moultrie and the surrounding batteries.
Acting Ensign William H. Wilson, of the Mississippi Squadron, to the grade of Acting Volunteer Lieutenant, upon the recommendation of Commodore Wm. D. Porter.
Acting Ensign William Knapp, of the *Commodore McDonough*, to the grade of Acting Master, for good service in piloting the squadron at the assault and capture of the south side of Morris Island, S. C.

ORDERED.

Acting Ensign H. G. M. Reeves, to the *Indiana*.
Acting Assistant Surgeon Thomas S. Carpenter, to the *Pittsburgh*.
Acting Assistant Surgeon Wm. Lee, to the remainder of the Armed Guard.
Acting Master E. B. Bussey, to the *Oneida*.
Acting Assistant Paymasters H. S. Gregory and George T. Rose, to the *Ethan Allen*, when relieved by Mr. Bellows.
Acting Assistant Surgeon Charles H. Hyde, to the *Gerdard*.
Acting Assistant Surgeon Thomas W. Newton, to the *Commodore McDonough*, when relieved by Surgeon Lee.
Acting Master William H. Pollen, to the Receiving Ship for duty to Captain Gansevoort, Navy Yard Office, Washington, D. C.
Acting Assistant Paymaster David S. Beaseley, to the *Atlanta*.
Acting Assistant Paymaster A. M. Mitchell, to the Mississippi Squadron.
Acting Assistant Paymaster B. F. Power, to the *Augusta Dinsmore*.
Acting Master's Mates Thomas Rogers and David H. Daniel, to the *Oneida*.
Acting Assistant Surgeon John T. Coates, to the *Atlanta*.
Acting Master Francis G. Prior, to the *Hartford*.

CHANGED.

John H. Aldrige, Acting Assistant Surgeon, and ordered to report to Surgeon Lee, for duty on board the *Ohio*, at the Washington Navy Yard.
Thomas Gaughhart, Acting Third Assistant Engineer, and ordered to the *Atlantic*.
Thomas Speakman, Acting Third Assistant Engineer, and ordered to the *Atlantic*.
Henry D. Barrow, Acting Third Assistant Engineer, and ordered to the *Primrose*.
William McKean, Acting Ensign, and ordered to the Canonicus *Perry*.
Wm. Cooper, Acting Third Assistant Engineer, and ordered to the *Quaker City*.
Fayette C. Lurvey, Acting Second Assistant Engineer, and ordered to report for duty to Lieutenant-Colonel H. D. Porter.
Robert A. Kyle, Acting Third Assistant Engineer, and ordered to the *Quaker City*, vice Lurvey, ordered to the *Ivy*.
John W. Anderson, Acting Second Assistant Engineer, and ordered to the *Pequot*.
Anthony Sandry, Acting Ensign.
Thomas Hogan, Acting Assistant Surgeon, and ordered to the Commodore.
Edward B. Yeoe, Acting Assistant Surgeon, and ordered to the *Ohio*.
Thomas Heath, Acting Gunner, and ordered to the Sassacus.
Henry M. Teat, Acting Third Assistant Engineer, and ordered to the *Pontoon*.

RESIGNED.

Acting Master's Mate Frederick S. Turner, of the *Black Hawk*.
Acting Assistant Paymaster Bowes S. Bedford.
Acting Assistant Surgeon Charles H. Hyde, of the Mosa.
Acting Master C. A. Curtis.

Acting Master C. F. Langley's orders to the South Atlantic Blockading Squadron, and ordered to the *E. A. Gregory*.

MEDICAL DEPARTMENT.

ORDERED.

Assistant Surgeon Richard Cowles, U. S. A., has been relieved from duty at Hilton Head, and ordered to report to the Commanding General of the Army of the Potomac, to relieve Assistant Surgeon H. S. Hewit.
Assistant Surgeon Wagner, when relieved, to report for duty to Surgeon John Ridgely, U. S. Medical Inspector, Philadelphia, Pa.

APPOINTED.

Robert Fletcher, Lincoln B. Adams, A. C. Van Dusg, William C. Bennet, E. P. Morong, Ida M. Humphrey, and James H. Thompson, Surgeons of U. S. Volunteers.
Thomas Canning, of New York, Surgeon of the 20th U. S. Colored Troops.
Thomas Rogers, Chaplain at Cumberland Hospital, Nashville, Tennessee.
M. C. Carr, Chaplain at Jackson Hospital, Memphis, Tennessee.

PROMOTED.

Assistant Surgeon Lewis Taylor, to Surgeon U. S. A.

CHANGED.

Captain C. M. Smith, 11th N. Y. Volunteers, has been honorably discharged the service.
Assistant Surgeon Donaghue is announced as Volunteer Aide-de-Camp upon the Staff of Major-General Gillmore.
Lieut.-Col. H. Binmore, A. A. G., 16th Army Corps, has been discharged the service.
Captain W. H. Russell, 10th Infantry, and Charles Hoppin, 17th Infantry, Aides-de-Camp, have been relieved from duty on New York, 30th, 1863.
Lieut.-Col. Gury has recommended for promotion Captains Elliott, Wilbur and Forbes, of his staff, who distinguished themselves in the assault upon Fort Wagner, July 18.
By special order of the War Department, the following named officers of the Quartermaster's Department are announced to Major-General Sherman, 13th U. S. Infantry, Michael Beahan, 8th New Jersey Volunteers, and Lieut. Wm. Hoffman, 1st Cavalry.
Surgeons of thirty-three guns were dead on Monday, November 30, from all the batteries on Morris and Folly Islands, S. C., and in Charleston harbor, in honor of General Gillmore's victory.
Captain D. B. Bell and First Lieutenant G. W. McKee, U. S. Ordnance Department, are assigned as Assistants to the Chief of Ordnance of the Department of the South.
Major-General Peck directs that the new work on the left bank of the Neuse River, opposite the city of Newbern, be designated as Fort Rhett, after Colonel Rhett, Secretary of the Treasury.
Major-General Butler has ordered that hereafter all officers coming to Fortress Monroe, Va., for the purpose of obtaining furlough or leave of absence, shall register their names at his headquarters.
Brigadier-General Hamilton, U. S. A., and Mrs. Hamilton, Va., have been arrested and placed in the Old Capitol Prison, for alleged malfeasance in their respective offices.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers of the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all occurrences of general interest; of the movements of vessels; of casualties among officers; and military and naval events.

The Editor will, at all times, be glad to be favored, in these columns, with enquiries in regard to tactical and other matters.

From gentlemen in the medical service we shall be glad to receive communications on military hygiene, practical surgery, and reports of notable operations and novel forms of treatment.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made by United States funds, or Quartermaster's, Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the Journal.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, DECEMBER 12, 1863.

THE LATE CAMPAIGN IN VIRGINIA.

WE have thus far abstained from passing any opinion on the late campaign of the army of the Potomac, for the very good reason that we had no sufficient basis of facts on which to found a judgment. Some experience of the practical conduct of war has taught us that the just criticism of military operations demands a minute knowledge of the vast complex of facts, conditions and circumstances, that enter into all military operations; and it is a disadvantage under which we labor, as compared with our contemporary critics of the daily press, who are able to pass easy, off-hand judgments on the conduct of campaigns, that we feel ourselves absolutely incapable of even forming any opinion until we have all the facts before us. We do not feel that we are able to say this of the late movements of the Army of the Potomac; but we have some hitherto unpublished facts, and we shall endeavor not to push our criticism beyond the warranty of well-assured authority, leaving what still remains obscure to be cleared up as our information grows more complete.

The purpose with which General MEADE started out on his late campaign differed essentially from any military operation hitherto attempted in Virginia. It was not, primarily, with a view to an advance on Richmond, which had hitherto been the animating motive of every previous advance. He designed a bold, *coup de main*; which, if successful, would enable him to sever the forces of the enemy and beat them in detail. All his preparations were made with this view and no criticism which omits to take this fact into account can possess the smallest value.

At the time General MEADE ordered an advance of his army, the position of the two corps which now compose the rebel army of Northern Virginia, was as follows: The corps of EWELL held a line running nearly north and south, and extending from a point on the Rapidan toward Orange Court House. The corps of HILL was in the vicinity of and west of Orange Court House—*separated from* EWELL'S *by several miles*. The direction of EWELL'S line left the lower fords uncovered. General MEADE'S plan, accordingly, was to cross at the lower fords and push his columns rapidly in the direction of Orange Court House, thus *gaining the interval between* EWELL *and* HILL, and enabling him to beat them in detail.

The execution of this plan was, as already intimated, essentially of the nature of a *coup de main*, based on a precise mathematical calculation of the elements of time and space, of the kind for which NAPOLEON was so famous, and dependent absolutely for its success on a rigorous execution of all the foreordained movements in the foreordained time and way. All General MEADE'S combinations were modeled in accordance with this plan. He cut himself entirely loose from his base of supplies, providing ten days rations, and relying on his meditated success to open up new lines of communication for a further advance.

In the position occupied by the army at the moment the advance was inaugurated, the distance to Old Verdiersville—the objective to be reached in order to effect the separation and division of the rebel army—was from twenty to twenty-five miles. General MEADE reasonably calculated that each of the corps commanders would be able to march this distance in thirty hours. The advance was begun on the morning of the 26th. He calculated his army would reach the designated point by the evening of the 27th.

Without designating the several lines of march of the various corps, it is enough to say that the morning of the 27th found the army only across the Rapidan. Twenty-four hours had passed, and only half the distance had been accomplished. The army was now pushed forward with greater rapidity. Early in the afternoon General WARREN came up with the enemy, and began developing his strength by a brisk skirmish, but was ordered not to make a serious attack until FRENCH'S corps (the 3d) should come up.

But FRENCH'S corps did not come up. Various difficulties delayed it, and it had misfortune to take the wrong road, which brought it face to face with JOHNSON'S division of EWELL'S corps, and this held it in check, again delaying its progress. But this mishap did more. It disclosed the plan of General MEADE and caused EWELL to phat his force across the turnpike, thus preventing WARREN'S advance.

To repair, if possible, the delay, General MEADE sent an order to NEWTON'S corps (the 1st) to come up and support WARREN. This was promptly obeyed, but it was dark before he reached the point. In the meantime SEDGWICK'S corps arrived and was posted to the right of WARREN. Such was the best General MEADE could do, but it was unavailing. His plan was completely unmasked to the enemy, and in that very fact was frustrated. Had General FRENCH been able to get up to the support of WARREN he would have been able to advance and seize the impregnable position beyond Mine Run, and would not get up. WARREN was held in check by EWELL; HILL was able to come up and form a junction with EWELL, and the consolidated rebel army formed its line of battle in the unassailable position which we should have had.

The position was one of rare strength, even among the splendid defensive positions of Virginia. The rebel line was formed on a series of ridges, with enfilading positions for batteries, while in front stretched the marsh of Mine Run, and the enemy had further strengthened the position artificially. In every respect is seems to have been a perfect parallel to the Austrian position at Lowositz.

Saturday was given to careful reconnoissance of the enemy's position. Sunday was an interval of silence. General WARREN had carefully reconnoitred the enemy's right, and reported confidently of his ability to carry it. It was determined to make the assault on Monday morning. To ensure the success of WARREN'S attack on the enemy's right, that General had been furnished with two divisions of the Third and one division of the Sixth corps. On examining the enemy's position more carefully, however, General WARREN came to the conclusion that he could not carry it without an immense sacrifice of life. This unexpected intelligence being communicated to General MEADE, he resolved to postpone the attack.

But to postpone was to abandon it. All the plans and preparations had been conditioned on a rapid, vigorous offensive, and on *success*. The supplies were nearly exhausted, and a single day's rain would have plunged the army in a helpless position. The army was accordingly drawn back in safety across the Rapidan.

We have no intention to enter into any detailed criticism of the events here recorded, nor to discriminate what was fault and what misfortune. The delays of FRENCH were an immense misfortune, and General WARREN was very unhappy in having formed a premature judgment. General MEADE'S plan was superb. It was defeated by untoward fortune—a mishap that has repeatedly befallen the greatest commanders in the world.

REPORT OF THE SECRETARY OF WAR.

WITHOUT in the least overshooting the mark we think we can say that a budget of more vast, extended and successful military operations was never crowded into so narrow a compass as that in which Secretary STANTON has succeeded in condensing his Report of the conduct of the war for the past year. If, however, the Secretary's review of the year's work is brief and concise, it is not for want of material, but on account of the very *embarras des richesses*. Volumes will be required by the future historian to fitly chronicle the year's military history, whose contents are rapidly indicated in this official document. We print Mr. STANTON'S report entire in another part of this journal.

The Secretary of War gives us no *interior* views of the military events of the past year. Those who pursue it to discover the explanation of much that remains obscure in the conduct of the war will look in vain. His report is a simple *resumé* of facts which are quite on the surface, and which, with a rare exception only, have been already quite familiar to the general public. He opens with a brief glance at the field operations of the year, and congratulates the country upon our military achievements, the brilliancy of which, he says, has not been surpassed in any age.

The Western successes are referred to in terms of high praise, but the operations of the opposing armies in Virginia are said to leave them without material advantage to either side, and the forces under MEADE and LEE occupy now the same relative positions as at the date of his last report. Nevertheless, in a survey of the whole field it is found that the forces of the National Government are now firmly planted on the soil of every insurgent State. And as a practical proof of the progress already made, Mr. STANTON is able to announce a reduction of over two hundred millions of dollars in the war estimates for the ensuing fiscal year.

The question of the exchange of prisoners is reviewed with much candor, but the Secretary's presentation adds no new facts to the statement put forth by General HITCHCOCK. The evidence regarding the bad faith and violation of the cartel on the part of the Confederate authorities is very plainly put, and will secure popular sympathy with the firm stand our Government has determined to take.

Notwithstanding the known imperfections of the conscription act, Secretary STANTON thinks the practical test has demonstrated it to be "an efficient means "for recruiting the armies." It gave us fifty thousand soldiers. The most important defect of the enactment as it stands is the three hundred dollars commutation clause. While recognizing to how great an extent this provision is a practical nullification of the system, Mr. STANTON does not pronounce any opinion as to the desirability of repealing it; but states that the matter will be submitted to Congress.

The formerly much-debated question as to the suitableness of many of the labors regarded by the Secretary as having been definitively settled in their favor. "The slave has proved his manhood and his capacity "as an infantry soldier at Milliken's Bend, at the as"sault on Port Hudson, and the storming of Fort "Wagner. In the cavalry and artillery arms he thinks them equally apt and available. He recommends that, as pay and bounty, they be put upon the same footing as white troops.

Of the numerous minor topics included in this Report, it is unnecessary here to speak. All loyal men will unite in the aspiration of Mr. STANTON that the next Annual Report of the War Department may be able to announce the "complete overthrow of the re"bellion, and the establishment of the Union on a sure "foundation in all the bounds of the United States.

REPORT OF THE SECRETARY OF THE NAVY.

WE print in another part of this journal the entire report of the Secretary of the Navy, and we need scarcely do more than direct the attention of our readers to a document of so much interest and importance. We hope it will prove to be able to take up in detail the numerous questions presented by the report, and for the present can do no more than glance at its more salient points.

The Secretary begins by remarking that the naval operations of the past year have been more varied, arduous and extensive than any ever before under the Government. First, we have the work of the blockade—a blockade covering a stretch of 3549 miles, and extending from Alexandria to the Rio Grande. We need not remark that this is the most colossal work of the kind ever attempted. It will be remembered that, when at the commencement of hostilities it was proposed to seal up this vast extent of coast, the idea was scouted by the European press as preposterous. But not only has a blockade of this extended seaboard, acknowledged "effective" within the technical definition of the term, been sustained during the whole course of the war, but its stringency has been latterly so increased as to render it now all but complete. For

these results, which forms so important an element in the means employed for the extinction of the material power of the rebellion, the country is indebted to the vigilance, vigor and daring of the officers of our several blockading squadrons, to whom the Secretary pays a high and deserved tribute.

In connection with the operations of the South Atlantic Squadron, Secretary WELLES enters into some important statements respecting the attack on the forts of Charleston harbor, by Admiral DUPONT. Among these is the new and interesting fact that the relieving of that officer, after the failure of the attack of the 7th of April, was at his own request. "Rear-Admiral DUPONT," says the Secretary, "*having expressed it as a willingness to relinquish the position which he "had occupied for eighteen months,* Rear-Admiral ANDREW H. FOOTE was detached to relieve him." This will be most gratifying intelligence to thousands who were disposed to indulge in bitter comments on the removal of an officer whose services to the country are justly regarded as second to those of no other man in the service, and whose assault of Sumter with the iron fleet, though unsuccessful, is looked upon as one of the most daring and brilliant feats in naval annals. The failure to renew the attack is attributed to the apprehension that the ability of the iron-clads to "withstand the storms of the season and the fire of "the rebel batteries;" but the Secretary expresses the opinion that the attack in April, and the slow operations of the protracted siege of over five months, have illustrated and proved "both the resisting and attacking power of the monitors." Particularly are the fleet has remained inside the bar not a single blockade-runner has succeeded in reaching the city, and in achieving this result, Secretary WELLES seems to think the chief point has been gained, as "in a military or strategic "view Charleston is of small importance."

We next come to the exhibit of the actual naval force, and the facts presented are certainly very striking. At the commencement of this administration it consisted of 76 vessels, and of these only 42 were in Commission. We now have 588 vessels carrying 4,443 guns, and representing a tonnage of 467,987 tons! The increase since last year is 164 vessels and 1175 guns. It is certainly not too much to say that this sudden creation of so vast a naval force is unparalleled in history. The Secretary justly remarks that it has elevated the nation to the position of a first-class naval power.

The all-important and yet difficult and delicate question of improvements in naval vessels is next discussed in a very fair, judicious manner. While recognizing the thorough revolution which has taken place in the character of naval warfare since the introduction of armored ships of heavy armament, the Secretary justly states that the problem is yet in an "experimental" stage. The Monitor class of armored ships, which is the type we have most thoroughly tested, is severally mentioned with much approval. "They have," says Secretary WELLES, "proved "themselves to be well adapted for harbor defence and "coast service, and in some emergencies these vessels, "from their great powers of endurance, have shown "themselves to be efficient and serviceable in offensive "operations." Elsewhere he remarks that they "will "perform not only what should be expected of them "to make our harbors secure, *but, when of enlarged "capacity, may supersede ships of higher pretensions,*" though we confess we are ignorant what class of ships the Secretary here alludes to. A similar ambiguity also attaches to the seemingly-important statement which follows: "To maintain our rightful maritime "position, and for predominance upon the ocean, ves"sels *of greater size than any turreted vessel yet com"pleted may be essential.*" The dubiety here rests on the point whether these "vessels of greater size than "any turreted vessel yet completed" are to be themselves turreted or of another mode. The only mode the contemplated vessels are designed to attain, however—namely, "predominance upon the ocean"—would imply that a different class of vessels from the Monitors is designed; as, with all the valuable qualities for harbor defence conceded to these ships, no one claims that they have either sea-going or sea-fighting capacity. And yet we cannot help expressing a certain regret that, in face of the Secretary's theoretical recognition of the fact that the problem of iron naval architecture is yet in its "experimental" stage, his practical action should limit the construction of iron-clads to the Monitor model alone. The report mentions twenty single-turret iron-clads and two double-turret iron-clads as having been placed under construction during the past year, nothing is said of the building of more broadside iron-clads, notwithstanding the strikingly satisfactory results given by the *New Ironsides.*

As subsidiary and yet very important subjects, the Secretary touches on the necessity of a new Navy Yard and additional facilities for the construction of iron vessels and machinery; the expediency of establishing a Naval Depôt; Yard and Foundry at some accessible and suitable point on one of the rivers in the valley of the Mississippi; the education of engineers; the promotion of volunteer officers; the necessity of encouraging the supply of seamen; the defects of our present laws in relation to prizes; the marine corps, and the importance of legislative action on the subject of lights and signals at sea. We shall return to the discussion of these various topics at future occasions.

TWICE-FOUGHT FIELDS.

The student of history is continually struck with the manner in which war, largely endowed with "the "organ of locality," returns again and again to the fields of his former glory, to renew his youth on the very spots where he has already had the sweet savor of holocausts, which

"Shed before his shrine the blood he deems most sweet."

Not to invade the domains of ancient history, what stories do the valleys of the Danube and of the Po tell of twice and even thrice-fought fields among their numerous tributaries! Flanders is red with the lifestreams, and mossy with the legends, of great kings, gallant knights and splendid armies which have battled generation after generation upon her plains.

Poictiers witnessed the quick, powerful blows of KARL MARTEL, as with his iron hammers he smote the turbaned Saracen, and drove Islam "howling to "his gods;" and again it saw the glorious deeds which have made the name of the BLACK PRINCE, albeit never a king, greater than that of his father, EDWARD THE THIRD. Antwerp, resisting and finally surrendering to the splendid war-making of ALEXANDER FARNESE, Prince of Parma, again in our time suffered siege at the hands of the French, in 1832, and was taken by Marshal GERARD. Castanaza-la-Real is a notable instance of recent war. Besieged twenty-four times, it was taken by six conquerors.—ALCIBIADES, SEVERUS, CONSTANTINE, DANDOLO, MICHAEL PALEOLOGUS and MOHAMMED II.

Leipsic beheld the energetic valor, and Lutzen heard the dying groan of the great GUSTAVUS, before they witnessed the defeat of NAPOLEON'S destiny.

Vienna looks out upon the Marchfeld as the scene of battle carnage in the days of barbarous Germans, of cruel emperors of the houses of Saxony, Francenia and Hohenstaufen, and when NAPOLEON THE GREAT conquered victory at Essling, Aspern and Wagram.

Paris, besieged often in earlier days, in the "War "of the Public Weal," of which Mr. KIRKE is now writing so brilliantly in his "History of Charles the "Bold," was twice occupied by the allies—in 1814 and 1815; and it may be that when the present EMPEROR invites the European Congress to meet there it is that he thinks the allied sovereigns know the way so well.

The route of General SCOTT to the conquest of the city of Mexico was essentially the same as that of CORTEZ; our soldiers passed over some of the same causeways, and took the same capital, and the coincidences of the two campaigns, in detail, are remarkable.

But this kind of history is repeating itself in our own war. Look at the valley of the Shenandoah, Harper's Ferry, Winchester, the double invasion of Pennsylvania, the occupation of Chambersburgh. See how geography compels the subsidiary action of mere military strategy, on the Rappahannock and Rapidan.

The field of Corinth was twice fought. Fredericksburgh was not less the aim of attack in the battle of Chancellorsville, than when BURNSIDE made his devoted corps battering rams, and proved, what many knew before, that iron and stone were harder than human heads, and the initial velocity of projectiles swifter than the double-quick of the lightest infantry.

Bull Run numbers its two disastrous battles, and it is due to the forecast, cool caution and common sense of General MEADE that, instead of a third defeat on that field, commemorative of the fate of POPE, he outgeneralled LEE, and won the battle of Bristoe Station.

And so it must be. Strategy and tactics both depend for practical success upon a subordination to geographic and topographic laws, and great battlefields in the world's history are often consecrated by this recurrence of strife at distant intervals, because both armies tacitly agree that just there their grievances are to be settled, and their quarrel fought out.

There is one battle that we want to see twice fought; one field that we wish much to place in the same historic category. We mean Richmond. Once our armies encircled it, and the day of final attack was even announced. We may now feel sure that the end of the Rebellion will be fairly reached, when victory again rests upon our banners on the twice-fought field of Richmond.

Upon the maintenance of that city the rebels have staked every thing; they have announced it to the world as their capital; in it are their archives, insignia, regalia. It is almost as though they had said to us, "When you succeed in taking this, we must succumb, "when once more a well-appointed army is within "sight of our spires, flushed with success and determined to conquer, we abandon our arms, and when "they are abandoned, the rebellion is at an end." And then, God grant that a lasting peace, on the strong foundations of a National Constitution, is more to be attacked by false applications of State Rights, render it unnecessary and unpatriotic for us to number among our historic curiosities any more "twice-fought "fields."

A CORRESPONDENT asks: 1. What is the difference, in the United States service, between *cashiering* and *dismissing?* 2. Should the votes of the members of a court-martial on the *finding* be preserved, and if preserved, what should be done with them?

There is a vagueness in the terms used to denote the dishonorable separation of an officer from the Army, such as *cashiered, dismissed, dropped, struck from the rolls, &c.* But the usage in the British service makes a real distinction, which, without decided confirmation, we have adopted. *Cashiering*, from the French *casser*, to break,—and having original reference to the breaking of an officer's sword as a disgrace—implies in itself dishonor, and it is always so considered. The case mentioned by BENET (p. 44) of a British officer whose punishment was mitigated by being examined from *cashiering* to *dismissal*, will illustrate this. *Dismissal* does not in itself imply dishonor; since we constantly read of officers being *honorably dismissed*—corresponding to the honorable discharge of soldiers. The term *dropped* is applied to cases where officers have been guilty of such conduct as does not even seem to need trial by a court; where a disbursing officer refuses to hand in and settle his accounts; or where he absconds and cannot be got at. It is believed that no clearer distinction can be made, as the articles of war are loose on this point.

With regard to the individual votes of members of courts-martial on the *finding*, the *practice* is universal of destroying them, and leaving to the memory of members and judge-advocate alike what those votes were. This we believe to be entirely just; and if any one concerned is afterwards called up "to give evidence "thereof by a court of justice in due course of law," —which is very improbable in the case—we do not see why his memory should not be considered the proper authority as in other cases of evidence. One great charm of military justice is its abstract impersonality, and usage has sanctioned the destruction of the individual votes, as adding to this.

WE are compelled this week to sacrifice our usual variety of contents, to make place for the long reports of the Secretaries of War and of the Navy. We have on hand other important official documents, which we are obliged to leave over for another week.

SINCE General MEIGS has been at the West, the officers of the Government have had an especial eye to the management of the Quartermaster's Department, and frauds are reported to have been discovered. Some arrests have already been made.

MAJOR-General Garfield, late chief of staff to Major-General Rosecrans, but now Representative to Congress from Ohio, drew the first choice of seats at the opening of Congress.

GOVERNOR Seymour and Secretary Stanton have agreed upon a commission to ascertain the just quota of New York and to inquire into the disproportionate enrolment in the several Congressional districts.

TRAINING SHIPS.

EDUCATED SEAMEN AND WARRANT OFFICERS.

In a former number we essayed to give a few rough ideas in regard to the improvement of the *personnel* of the Navy. We then considered those men alone who already serve in our little improvised squadrons; but to effect any real and permanent good we must begin at the beginning and educate boys for the lower grades just as we do for the higher. The Naval School for officers of the line is admirable and how a great amount of good we see now in the matter and have a school for the seamen and subordinate officers.

About thirty-five years ago, the French Government undertook, partly as a matter of charity, the education of the sons of deceased seamen and of pauper boys. Such youths at a certain age were received on board of old men-of-war converted into school ships, and there carefully instructed in the rudiments of a common education, in seamanship and in gunnery. This system, founded on sound principles, and governed by wise regulations, soon germinated and grew apace, till now it forms one of the most important features of that navy. As one means of *manning* the Navy it forms part of the most perfect system that has yet been devised; one strong proof of which is that England, wonderful man how ever anxious on the subject of naval improvement, hastened to adopt it from her neighbor and rival.

It may be briefly stated in explanation of the French system, that boys are taken on board the training ships and thoroughly educated as men-of-war's men. At the expiration of their term they go to sea, where twice a year they are obliged by law to be examined as to their proficiency and improvement, and those deemed worthy are promoted. Then they go step by step to fill the highest grade in the line—that of warrant officer; and, indeed, in this position they are eligible to a commission and a place on the quarter-deck.

They have, therefore, in that service at the present time a large corps of fine petty officers, many of whom have been reared in the service, who are perfectly familiar with all their various duties, with the discipline and routine of the service, and with their ships and officers; who are not ignorant of the history of their navy, its songs and traditions, and who belong to the service as much as the commissioned officer does, and with the same proud feeling of attachment. There is also a body of warrant officers who add to all this an intelligent familiarity with the duties of their office, and have devoted much practical study to their profession. The great value to a navy of two such bodies of men, whether in time of war or during peace, can hardly be over-estimated. Taken in an economical point of view, it is entitled to the highest consideration: viewed in connection with the Naval Academy, the advantage of such a system by us would seem to leave but little undone for the placing of our Navy in the best possible condition. French officers speak in the highest terms of the plan of bringing up boys, and declare it to be fully equal to every condition as a means of manning the navy in the best and surest way.

It may not be out of place here to give a glance at those officers whose warrants are within the reach of every body who enters a training ship.

The *Premier Maître* is the highest rank which that class of officers known with us as *warrant* or *forward* officers can ordinarily attain. Of this rank there are four different grades, viz: the *maître de manœuvre*, or boatswain; *maître canonier*, or gunner; the *capitaine d'armes*, and the *maître de timonerie*, all of whom are heard before the *maître maître*, or first masters. The two first officers are in almost all respects similar to ours, so far as their general duties are concerned, but not in respect to education and attainments the French being quite as far ahead as in general. The duties of a *capitaine d'armes* are numerous and important, and not dissimilar in some respects to those of our master-at-arms, though far more comprehensive. He has, for example, the charge of all the small-arms in the ship, and it is his duty to drill the ship's company in the use of a large ship, he is an indispensable functionary, and exercises, as with us, a very decided influence on the discipline It is evident that to fill such an office well requires a man of peculiar character and ability, and one who is thoroughly conversant with the character of seamen. The office is therefore sufficiently elevated to make it an object of ambition to the class of men best qualified to fill it.

Our practice differs from the French in this particular, and the two methods serve as an index to the two services. Their master-at-arms is selected for his place: ours, such as they are, are picked up at random.

Were our signal quarter-masters to receive warrants, and become *forward officers*, they would be equivalent to the *chefs de timonerie* of the French. In their service the department is considered of the highest importance, though it does not comprehend more than with us, viz: The entire charge of everything relating to the steering gear, sounding and signalling. Why this department should be considered so important, and be placed in charge of a warranted officer, we may not readily understand; simply for the reason that we have not been much accustomed to serving in fleets of fifteen or twenty line-of-battle ships. Where they are constantly manœuvring, where hundreds of signals, both day and night, are made during the twenty-four hours, and where everything is done with an alacrity and precision which is one of the most striking features of the French navy of the present day.

The men of the *timonerie* department are more nearly associated with the officers than any others of the ship; are more assimilated to them, and it is generally through this grade that young men pass in becoming officers; for a fat missing the usual standard by over age or other reason, is by no means shut out, as with us, from the hopes of an admiral's flag. Of all the promotions made from warrant officers to lieutenants, the great majority, or in fact all, are from the *timonerie*.

The *maître charpentier* and *maître voilier*, or carpenter and sail-maker, are not warrant officers, and never arrive to be in the line of promotion.

The constant examinations going on in the French service, and the consequent promotions, have the effect of stimulating ambition to the utmost. Twice a year such examinations take place for the promotion of seamen and petty officers. Indeed, throughout their entire system the French seem to recognise and practice the wisdom of the ancient apothegm, that we should reward merit as well as punish vice.

It may be still remembered, by persons conversant with naval affairs, in what an agony of spirit England was plunged because of her inability, in time of need, to man her fine ships. According to the report of the First Lord of the Admiralty, the *Ganges* (84) remained in harbor 110 days before completing her crew. The *Diadem*, screw frigate, commissioned in August, 1857, was detained 135 days. The *Resource*, a 90-gun screw, was detained 172 days, and then sailed 42 men short of her complement, and with many others.

"This is a state of things," remarks an English writer who seems to have given some attention to the subject, "which cannot be allowed to continue." "In 1852, what was then, and has been since, termed the 'continuous service system,' was first introduced. By this scheme were engaged upon certain advantageous stipulations to enter "for a period of ten years. This plan has now been in operation about ten years, but it cannot be said to have worked "satisfactorily, nor to have given the country such a body "of well skilled men as was originally anticipated. It "seems therefore, that even in time of peace some modifica- "tion must be introduced into this system of voluntary re- "cruiting." "With this view," the article goes on to say, "a royal commission was issued, and Lords DARTMOUTH and "CRANBORNE, Mr. W. S. LINDSAY, Captains, Mas- "TIN, ELPHINSTONE, SHEPHERD, and GREEN, were appointed "to examine witnesses and thoroughly investigate the sub- "ject in order to ascertain what remedy could be devised." Accordingly, in February, 1860, their report appeared, bearing evidence of great labor to all concerned in the inquiry. "The commissioners seem to have approved of the 'con- "tinuous service system' as sufficient so long as the country "was not at war: in combination, however, with that sys- "tem, they consider that the following provisions of *personnel must very much principally depend upon a supply of trained boys.* "Now, not above 500 or 600 of those lads who annually "enter the navy pass previously through the training ships; "they therefore recommend that at least five large vessels, "of which we have at present on our books, should be "stationed at the different ports, forming, as it were, so "many marine schools." The report contains other suggestions on the same subject, some of which are of great value, but it is necessary to our present purpose to notice that already quoted alone.

The system recommended by the commissioners in regard to training up boys has been fully carried out. Accordingly, we find the *Baccanes*, an old liner, in Southampton Water; the *Implacable* and *Impregnable* (eighty's) at Devonport; the old 56 *Tweed*, at Plymouth; the *Wellesley* (74) at Chatham, &c., &c., all in full and successful operation as training ships. Indeed, they have carried the plan even further, and are providing for a strong reserve to draw upon in time of sudden emergency; as the *Woodcote* sloop-of-war, for example, stationed at Aberdeen, and used as a drill-ship for the Royal Naval Reserve; the *Brilliant* at Dundee, the *Conte* at North Shields, &c.

Now here is an experiment which has been fully tested by the two great Naval Powers and found to be perfectly successful. We need no better or further proof of its value: let us hasten, then, to import it into our own service. Is our system of manning the Navy so perfect that it cannot be mended? We have, it is true, an admirable plan of reserve in the bounty paid fishermen of the Eastern States; but it has, like the beautifully-contrived Chinese steam engine, but one slight fault—it won't work. Neither the *Sabine* nor the *Ningara* were overrun with fishermen during their Gulfing tour.

The subject is important, and we shall recur to it again next week.

ENGLISH FIELD ARTILLERY.

THE ARMSTRONG SYSTEM.

We gave last week an historical sketch of the Armstrong gun. We will pursue the subject, stating, with more particularity, some of the "facts," in order to comment upon them.

The English government first experimented upon rifled ordnance in 1851, with the ovalo-hexagonal muzzle-loading gun of Mr. LANCASTER. Although this system of rifling has succeeded moderately well in small arms, (the whole of the English Engineer Corps being armed with them), it does not appear to have succeeded for artillery purposes. It was tried chiefly with the 8-inch gun, weighing 10,960 lbs., the smooth-bore 68-pounder, rifled, throwing shell a seventy-five lbs., and was wanting in accuracy and precision, while the gun was unequal to the strain imposed upon it.

In 1854, Sir WILLIAM ARMSTRONG proposed his system of artillery, and in March, 1855, his first gun, a 3-pounder, was ready for experiment. In November, this same gun was bored up to a 5-pounder, (1.75 bore). It contained eight grooves, having a turn of one in twelve feet, and weighed about 450 lbs. The projectile was 9 lbs. long, (nearly 3½ calibres), with a charge of one-eighth the weight of the shell. The following results were obtained, as regards accuracy and penetration: At 1,500 yards, fourteen shots were fired, with an elevation of 4° 26', at a butt five feet wide, seven feet six inches high. The first six were employed to get the range, the remaining eight struck the butt, the mean deflection from the centre line being 11.5 inches. The butt was a block of elm 3 feet thick, in 6 thicknesses of 6 inches each, bolted together. One shot passed through, one lodged in the third and the other three in the 4 inches and 2 feet 6 inches to 2 feet 9 inches. Two targets were placed 30 feet apart, and 22 shells were fired, at 1,500 yards, from the first, and 4 shells and three shot at 2,000 yards, 6° elevation). These were fired from a distance of 164 feet from the targets, and 70 in the ground between.

The 18-pounder, then ordered and constructed, weighed 1,344 lbs, the old cast-iron smooth-bore 18-pounder weighing 4,700 lbs. It was experimented upon in connection with the old English 9-pounder bore gun, weighing 1,484 lbs. In order to obtain a correct measure of their respective values, the following mode was adopted. Forty rounds were fired from each gun, this number being supposed to be sufficiently great to include every form of error in its proper proportion. The range of each shot in yards, and its position in inches, were then measured on a diagram, a mean range and a mean deviation established, and a rectangle calculated such that if any two shots were fired from the gun, the probability would be that one would fall within the rectangle. This was called the probable rectangle. The probable rectangle for the rifled 18-pounder, at a range of 1019 yards, was 23.1 yards long by 30.6 inches broad; and that of the 9-pounder, at a mean range of 983 yards, was 147.2 yards long by 237.6 inches broad, being many times as large as the probable rectangle of the rifled gun.

The result of these experiments was the substitution throughout the English service of the rifled 12-pounder of 950 lbs. for mounted batteries, instead of the 9-pounder smooth-bore of 1,484 lbs., and the 8-pounder howitzer of 1416 lbs., and the rifled 9-pounder of 675 lbs. for other batteries, instead of the 6-pounder smooth-bore of 672 lbs. and the 12-pounder howitzer of 744 lbs. Of the former guns 392 are in the land service and 178 in the navy, and of the latter 66 are in use in 11 batteries of horse artillery.

Sir WILLIAM ARMSTRONG, who naturally desires to give as wide limits as possible to the system of artillery which bears his name, defines his system as consisting in, first, the construction of the gun by means of welded coiled hoops, the axis of each either parallel or inclined to the bore; second, the system of rifling by means of a large number of small wavetooth grooves; and, third, the use of a soft-coated projectile. The field guns are all breech-loading guns, and the Armstrong gun is generally considered to mean a breech-loading gun. The application of the system of construction to muzzle-loading guns having been undertaken only in consequence of the complete failure of his system of breech-loading for all sizes of guns above 110-pounders—and its comparative failure at that.

The advantages claimed for this system of guns are strength, durability, precision, range, uniformity and distinctness of projectile. The disadvantages urged against it by its opponents are those general objections urged against all breech-loading guns—the liability in this special system to a leakage of the vent-piece, the loss of recoil in connection with all rifled guns, its great expense, and that guns, projectiles and fuses require too great a nicety of construction and are too easily put out of order to be serviceable in war. Its strength is said to be proved by the following experiment: "A 12-pounder gun was thus tested. 60 rounds "were fired in quick succession, then 30 rounds with double "charges and cylinders, progressing in weight up to 120 lbs., "and the result of this trial was considered as proving that

"it was practically impossible to burst a gun in ordinary service."

The strength of a gun must be considered in connection with its expense. A muzzle-loading gun constructed by the Armstrong process must necessarily be more expensive than the simply-constructed ordnance gun, and much more so than the Parrott. When the expense of a complicated breech-loading arrangement is added, the balance of economy is evidently very largely in favor of the American guns, and a very extensive practical experience in actual warfare has proved that these guns are fully equal to the requirements of the most difficult service. If, therefore, the Armstrong system produces stronger guns, the additional expense entailed is useless, because no object is gained by having guns stronger than strong enough. Had the Armstrong system succeeded in producing guns stronger than the simpler systems failed, it would to that extent be a great advantage, but the reverse of this is the case. Parrott successfully constructs 300-pounders, while Armstrong is but partially successful with 100-pounders, and fails completely with all larger guns.

In proof of the durability of the Armstrong gun, it is stated that one gun has been fired 3,263 rounds, one 1,953, one 1,515, one 1,911, and one 1,416 rounds, giving an average of 2,010 rounds each without injury. Out of 650 guns issued and in use, and from which an average of 95 rounds per gun had been fired, only 13 had been returned for repairs, 2 of which were very slightly damaged, 11 seriously. The damage to 7 of these 11 arose from defects in entry considerations, since corrected, and the remaining 4 have proved permanently unserviceable. The same argument applies to this point: the Armstrong gun may be durable, but the very much severer tests of actual service have proved our guns to be as too, and they are very much cheaper.

The range and precision are said to be very great. In addition to the facts quoted above, it is said that the 12-pounder and 40-pounder are certain, at an object 15 feet square, at 2,300 yards. The comparative precision of the English and American guns could only be ascertained by a careful series of experiments. A comparison of the results of ranges of the two guns shows an almost identical range up to four degrees of elevation, and a slight advantage in favor of the American guns at five and six degrees. The range of the Armstrong at the latter being 2,100 yards, and of the Parrott 2,200 yards. The Armstrong appears to range beyond this range field guns ever produces an effect commensurate with the expenditure of ammunition.

The Armstrong gun uses but one projectile for all purposes. It is thus described by its inventor: "The projectile consists of a cylindrical body, with a head-piece and tail, which is composed of 42 segment-shaped pieces of cast-iron, built up in layers around a cylindrical cavity in the centre, which contains the bursting charge and the concussion arrangement. The exterior of the shell is thinly coated with lead, which is applied by placing the shell in a mould and pouring melted lead round it. The lead is allowed to percolate among the segments so as to fill up the interstices, the central cavity being kept open by the insertion of a steel cone. In this state the projectile is so compact that it might be shot through the feet of hard timber without injury, while the resistance to a bursting force is so small that less than one ounce of powder is sufficient to break it "in pieces."

It is claimed that this projectile is the most destructive in use. The fuse is very simple, and is not considered liable to unsoundness to mention. They certainly prove a great destructive power, which, taken in connection with the great advantages of using only one projectile instead of four, may perhaps justify the claims of this projectile to be considered the best now in use by service men. The reports in the support of this destructiveness are taken from the experience of the Chinese war, and could only have happened in the rude warfare of those people. Cavalry, when war is conducted on sound principles, do not appear in column at 1,500 yards from rifled cannon, and the attack of a fort by the fire of guns set one gun behind fortifications, both because fortification is better understood by us and by our enemies than by the Chinamen, and our artillery, when served behind works, would have but four or five men to be over partially exposed.

With the exception, perhaps, of the projectiles, it is therefore certain that in no respect is our artillery system inferior to the Armstrong system; while the latter, in addition to its enormous expense, has all the disadvantages necessarily included in any breech-loading system with many points peculiar to itself. The only real advantage whatever is gained by loading at the breech, and such a system has never have been adopted by practical soldiers, had the simple expanding principles of Sherke and Hotchkiss been known. The Armstrong has the special disadvantage that the ventpieces are very liable to spit. This is obviated to some extent by spare vent-pieces being carried. Any practical artillerist who has been through such campaigns as all of our services have made, will readily understand what excessive, almost impossible, care and attention are necessary to keep in working order guns which depend upon the close fitting of highly-polished surfaces and the accurate working of screws.

In returning from Sebastian's raid one of the bases batteries was brought across the Rappahannock when the water was so high that the carriage was entirely immersed, the lead and swing teams were swimming, and nothing but the heads of the wheel horses were visible. Imagine the result upon any breech-loading gun. In all accounts of the Armstrong guns, of the experiments which have been made with them and of the service which they rendered in China, and later in the late naval fight on the Japanese coast, admissions abound that they exhibit defects and liabilities to derangements and accidents. And it is very easy to perceive that in a difficult campaign these defects, derangements, and accidents would render the Armstrong gun, projectile and all, inferior, for all the practical purposes of war, to the simpler and cheaper ordnance now in use. We have proved their efficiency in every battle-field from Bull Run to Gettysburgh and Chattanooga.

CORRESPONDENCE.

THE BATTLE OF CHICKAMAUGA—THE ORDER TO GENERAL WOOD.

To the Editor of the Army and Navy Journal:

Sir—In your issue of the 4th of November there is an editorial headed "The Removal of General Rosecrans." The following extract is taken from that editorial:

> "When the rebels pierced the right wing (a fatal step, which was occasioned by an unfortunate order from General Rosecrans), that occasioned the retirement of General Wood's division from its position in the line of battle. General Wood came on and fell over them back in the rear, and separated by the rebels from the right and centre of the army."

It is believed that you had not seen a copy of the order in question when you wrote the editorial, or you would never have called it "an unfortunate order," and you could have no greater mistake. No order could be more plainly and clearly worded. All the movements and dispositions made in strict conformity to it have been very considerably discussed, and what is more, very much misrepresented, since the battle of the Chickamauga. The order is plain, and intelligible, and especially your military readers, feel sufficient interest in knowing the truth to desire a full explanation to be published. It is a conclusive fact that the following facts statement involves the truth.

In the night of Saturday, the 19th September, General Wood had but two brigades under his command, one of his brigades having been left in Chattanooga when the division moved out in pursuit of Bragg's army on the 18th of September. Early in the morning of the 20th, a brigade of General Van Cleve's division was placed under General Wood's command, and General Wood was ordered to take position in the line on the right of General Brannan's division, and to keep his left closed well against Brannan's right. The further instruction was that General Wood was to be prepared to resist an attack, but not to invite one. The position was taken by General Wood's command but just been vacated by Negley's division, which had been ordered toward the left. These changes were made in conformity with the orders of the commanding general. To the right of the position in line occupied by General Wood's division came Davis' and Sheridan's divisions, raised, for the purpose of covering the right flank, by Palmer's and Hazen's brigade. General Brannan's division, in full line, was next to General Wood's division, and next to General Brannan's division came General Reynolds' division.

The skirmishes thrown out to cover the front of General Wood's division, on taking the position, encountered the skirmishers of the enemy, when quite a sharp but brief musketry encounter occurred. It lasted, however, but a little while, soon subsiding entirely. Complete and perfect quiet prevailed, not only along General Wood's front, but to the extreme right of his line. Nor was the right half of General Brannan's front disturbed. The fact of the absence of all fire on the right half of Brannan's front, on General Wood's left, was one of the extreme right, is necessary to a just appreciation of General Wood's situation and subsequent movements. But the rattle of musketry was heard on the extreme right, and from the centre and left, told in unmistakeable language that a fierce contest was going on there. Commencing with the left half of General Brannan's division, and extending to the extreme left of the line, a bloody battle was being fought. Such had been the status of the contest for half or three-fourths of an hour, when General Wood received the following order:

> HEADQUARTERS, D. C., Sept. 20, 10.45.
> Brigadier-General Wood, Commanding Division:
> The General Commanding directs that you close up on Reynolds as fast as possible and support him. Respectfully, yours,
> FRANK S. BOND,
> Major and A. D. C.

The order was addressed as follows:

> "10.45, A. M. Gallop.
> Brigadier-General Wood,
> Commanding Division."

As sound military principle requires as a rule (of course there may be exceptional cases), the moving of troops from one part of a line to reinforce another part of the same line, and as Brannan was evidently in the centre of a considerable hostile force in his front, General Wood felt some embarrassment in the execution of the order. He could not fail to act, and his first impulse was to refer to the commanding general for further instructions. But a second reading of the order convinced General Wood that the most peremptory and imperative language of the order—an order directing him to make a certain movement for an assigned purpose—required him, as commanding general, though had not designated any position on the field where he or his representative could habitually be found, and that, hence, the reference to him might cause much delay in the movement; considering also that the severe firing toward the centre and left indicated with much certainty that the assistance of General Wood's division was needed; and considering also that a precedent for the movement had been established by the movement of General Brannan's division from the very same position and moving it towards the left, all doubt as to what his duty was vanished from General Wood's mind. These reflections were the work of an instant, but they were promptly acted upon by General Wood, the course he should pursue. It was that of instant, prompt obedience.

General Wood had received on the field of battle a most important order, couched in the most peremptory and imperative language, and his duty as a soldier required him to give to it a thorough obedience.

There was neither physical nor moral obstacle in the way of carrying the order into immediate execution. That order had come to General Wood from the very highest authority on the field—that of the commanding general himself. For General Wood, under such circumstances, to have delayed obedience, would have been an act of insubordination. To have delayed obedience on the hypothesis that the place then occupied in line by General Wood's division would not be filled up by other troops would have been most disrespectful to the commanding general, as indicating a want of confidence in his wise foresight to meet every emergency. Hence, it may be repeated with great truth and force, that General Wood had but one line of action—obedience.

Let it be supposed that General Reynolds had needed support as much as the peremptory and imperative language of the order General Wood had received indicated he did (and that he did so need support General Wood had the very highest assurance General Rosecrans had, that of the commanding general's order); let it be further supposed that General Wood had delayed to obey the order, and that in consequence of the delay General Reynolds's division had been thrown back and routed, with the loss, as would inevitably have occurred, of General Reynolds himself, what excuse or justification could General Wood have offered his commanding general, to the officers and soldiers of this army, whose confidence he must retain in order to be true to the Government and country, whose servant he is, for his unpardonable, guilty delay? None, absolutely none! As already remarked, at the time the order was received, another General Wood's division, the troops on the right of it, nor the first brigade of the third division was engaged. At such a time, and under such circumstances, could General Wood, would General Wood, have been pardoned for failing with an order directing him to close up as fast as possible and support it, when, judging from the peremptory language of the order, that division surely needed that support? It is unnecessary to this question.

As there was a division between General Wood's division and General Reynolds's, when the order was received, it was absolutely physically impossible for the former to obey the order by any other movement than the one he actually made. Had General Wood's force been on the left of General Reynolds and support him (as the two divisions were then situated with reference to each other), but by withdrawing a portion of his force from the line, which is what was done, and passing in rear of General Brannan's division, to the rear of General Reynolds' position (General Wood had to pass by or close up on General Reynolds and support him. It was certain General Wood could not reconcile that with the requirements of the order. To obey the order it was independently necessary he should move his division to the left. At the time General Brannan's division was in the line of battle (as has been assured the reader), with his left closed against and resting firmly on General Reynolds' right, General Brannan's division *was not on the extreme right of the line*. Between his division in front of General Brannan's division, because to do so would obstruct the line of fire and destroy it was during the movement. Besides, to pass in front of General Brannan's division would expose General Wood's division to a fire from the enemy in front, and to a fire from friends in the power of reply. Such a movement would not only have been absurd, but criminal and murderous. Moreover, General Wood was ordered to close up on General Reynolds. He could not do this by moving in front of General Brannan's line, for moving in the way would also have thrown his division in front of General Reynolds's position. General Wood could not run his division over General Brannan's men to reach General Reynolds's position. He could only have thrown both divisions into confusion. Hence, the only way left for General Wood to obey the imperative and peremptory order to close up and support, the only way to close up on General Reynolds and support him, was by the movement he executed; namely, by passing in rear of General Brannan's division to the rear of General Reynolds's position. But it may be remarked, that had General Wood attempted the original and necessary movement of passing his division in front of General Brannan's division, or had he attempted the absurd movement of running his division over General Brannan's division, the moment his division was in line between General Reynolds' position and General Wood—would equally have been made, as by the movement he executed. But let it be again inserted for a moment that General Brannan's division was out of the line of battle at the time General Wood received the order, and that he could have reached the right of General Reynolds' position by passing over the ground supposed to have been occupied by General Brannan's division, it is not still plain, since General Wood would have been compelled to move a division front to the left, that a gap would equally have been created in the line of movement which was created? Hence, it may be truthfully asserted that there was no possible way in which General Wood could have obeyed the order, but by the movement of moving his division from the ground it occupied, which necessarily would have made a gap in the line.

It must be patent from the preceding remarks that it was not the manner in which General Wood's division moved, but the fact that it moved, that caused the gap in the line of battle; yet no one would dare say that General Wood would have been justified in remaining where he was after receiving so imperative and positive an order—an order which left him not the slightest latitude or discretion.

In reply to the assertion that the order is loosely worded, it may be remarked that the order itself does not sustain the assertion. The order is curt, precise, pointed, peremptory. It is possible it may have failed to communicate to General Wood the real wishes of the commanding general; but surely from the circumstantial evidence, it must be inferred that such was the case. At the time the order was received it was the only guide General Wood had for the regulation of his movements.
